PHOTO PHOENIX INTERNATIONAL

We are an international New York based agency representing amateur and professional photographers in the following areas: Galleries, Business and Organizations, Book Publishers, Paper Products, Consumer Publication, Newspapers & Newsletters Publication, Special Interest Publication, and Trade Publication.
We are seeking photographers who strive for excellence in the aesthetic/ creative and technological world of images, who have the talent to capture the setting and to convey the mood. Your work should reflect a genuine, pervasive interest in photography as a fine art.
Whether your work portrays conservative, experimental, stylish, or innovative themes, your project proposal should be well thought out before submitting to us.
For first contact, please submit a query letter, direct mail flier/brochure, tearsheets, slides, photographs & SASE.
For amateur photographers, send sample photos and/or slides.
TO ALL: Do not send entire portfolio unless we ask for it. If we are not interested, you might not hear from us, so please submit material that does not need to be returned.

Send to:
Photo Phoenix International

SB DX @ WW $OPDX.308
Ohio/Penn DX Bulletin No. 308

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 308
BID: $OPDX.308
June 9, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & 59(9) DXReport, W3UR & The Daily DX, K4RO, WT4K, W5IJU & Island/DX News, K8SM, NW8F, G3NOM/9M2OM, DJ5AV & DX News Letter, ER1DA, G4BUE & DX News Sheet, GB2ATG & BARTG, F5ATD, PS7AB, RA1QHJ and VE1CBK for the following DX information.

A6, UNITED ARAB EMIRATES. The "DX News Sheet" reports Jamal Al Maktoum, A61OU, is a newly licensed operator and will be active sometime this week. He is the cousin of A61AD. QSL via N1DG.

CORRECTIONS.....
Patrice, F5ATD, informed OPDX that the correct address for TM0RSE is: P.O. Box 20, F-14480 Creully, FRANCE (not P.O. Box 22 as reported in last week's bulletin).

Last week we reported under "BV, TAIWAN" that SM3EVR would be active from here, this is wrong (there was a mix up in the callsign) the correct operator is SM3SGP, and he will be active until October as SM3SGP/BV2. QSL via SM3EVR.

CY0, SABLE ISLAND. Wayne, VE1CBK, will be travelling to Sable Island for work reasons on June 7 and will be there until around June 23rd. He expects to get on the air about June 12 or 13th and will be operating during his off hours. He will be on all bands HF (except 160m). He will also be active on 2 and 6 meters (50.132 and 144.200 MHz). The callsign will be CY0SAB. QSL to VE1CBK.

FK, NEW CALEDONIA. Didier, F5PXQ, is active as FK/F5PXQ. He will be here for the next three to four years. His activity will include RTTY. He has been heard on 20 meters SSB (above 14250 kHz) between 0330 and 0545z. QSL to his CBA.

FR/E, EUROPA. FR5KH, who was recently active from Juan de Nova with FR5FT, states he will be active as FR5KH/E from Europa Island the next

time he visits the islands.

GU, GUERNSEY. A group of BARTG (British Amateur Radio Teledata Group) members will take part in the CQWW RTTY Contest, September 27-28th, as a Multi/Op team on all bands from the club radio station using the club call GU3HFN.

HP, PANAMA (HR, HONDURAS, possible). Bill, WT4K, will be active as HP3/WT4K, June 23-27th. He will be active on SSB and RTTY. QSL to home call with SASE. If travel arrangements can be made, he will also go to Honduras as HR6/WT4K June 30th through July 4th.

HS, THAILAND. Chai, HS1NGR, was active for a couple of days on 14195 or 14180 kHz between 1300 and 1600z.

HZ, SAUDIA ARABIA. Sam, HZ1CCA, in Riyadh, has been quite active on 40, 18 and 15 meters SSB. Activity times vary throughout the day, but watch around 7060, 21235 and 18135 kHz. Meanwhile, HZ1AB was very active this past weekend on 18160 kHz between 1300 and 1500z. QSL via K8PYD.

KP2, U.S. VIRGIN ISLANDS. "The 59(9) DXReport" states N2OO, KF2BQ and N2LD will sign homecall/KP2 July 24-31st. Their stay here will include the IOTA Contest and activity on 160-10 meters CW and SSB. QSL via their respective homecall.

NEW SIX METERS BEACON. A new beacon is now active on 50.080 MHz sending the following message every 3 seconds: VVV BEACON DE PP1CZ PP1CZ GG99UQ GG99UQ 3 WATTS 5 ELEM YAGI VVV. The current antenna is a 5 elements Yagi (for a short time until a vertical can be fixed by July). Send reports to: PP1CZ, P.O.Box 010.629 - Vitoria - E.S. Brazil (or Internet e-mail: pp1cz@br.homeshopping.com.br).

"POLAR-97" DXPEDITION! Nick/RA1QQ, RW1ZZ and RA1ZZ reported that they are planning a major DXpedition during the second part of June to the islands of Barentsevo Sea. After the 15th of June, they want to visit the following islands: Kildin Island (EU-82), Bolshoi Olenij Island (EU-61), Harlov Island (EU-161), Novaya Zemlya Island (EU-35) and possibly Bolshoi Ainov Island (a new one for IOTA, EU-???). The team will be using special callsigns as homecall/1 (ex. RA1QQ/1, RW1ZZ/1, RA1ZZ/1). Also, they will be using the team callsigns: UE1QQQ/1 and UE1ZNF. Additional information about this DXpedition can be obtained from RA1QQ or RW1ZZ on the air or via E-mail at: Albert_Marcovchuk@p18.f350.n50.z2.fidonet.org

QSL INFO AND NEWS.....
Kirk, K4RO, reports he has been receiving cards for contacts made with UA8TAA in June, 1992 (mainly from JA). He states that he is not the QSL manager for UA8TAA or anyone else for that matter. Once again, K4RO is *NOT* the QSL manager for UA8TAA.

Den, A35DB, was heard on the air saying to QSL to W7TSQ. Not W7SNH as reported in last week's bulletin.

HS50A QSLS. For the IOTA DXpedition to Koh Chang which took place in 1996, Ray, G3NOM/9M2OM, reports QSL cards have been printed and distributed to all stations who sent direct to I1JQJ and JA9IFF, as of 3rd June, 1997. Bureau cards are still being dealt with. Requests for verification received via E-mail will be accepted, and if verified will be confirmed by a QSL card returned via the Bureau. The operation which took place May 8-11th made 2488 QSOs (CW 1427 and SSB 1061). Due to the season and poor propagation, only 29 North American stations were worked. The logs and QSL cards (which have been printed) are now with the QSL Managers, therefore, QSLs should be sent out soon.
QSL info for both DXpeditions go to:
I1JQJ - Email - <i1jqj@amsat.org>
JA9IFF (For Japan only) Email - <jim@ba2.so-net.or.jp>

The address of the Moldovian National QSL-buro has been changed since April 15, 1997, to: National QSL-buro of MOLDOVA (ARM), P.O. Box 9537, Kishinev, MD-2071, MOLDOVA.

R, FRANZ JOSEF LAND. Nick, R1FJV, continues to be active, mostly on CW. He will be here until the end of the year. QSL via UA3AGS.

SV, CRETE. The "Island/DX News" reports that Manfred, DL8SET, will be active signing /SV9 from now until June 20th. No QSNs reported yet. QSL via home call. Also, look for SV9DJV and SV9DRO to be active on SSTV. This is believed to be the first SSTV operation from Crete. Meanwhile, SV9/OM7RU has also been active, mainly on CW. He was heard on 20 and 18 meters between 1130 and 1600z. Length of activity is unknown at this time.

SV5, DODECANESE. Another report of an operator that will be active from here is Vito, I3BQC. He will be active from June 16th to the early part of July from Karpath-os Island. QSL via bureau to his home call.

TJ, CAMEROON. Mark (ex-J5UAI) is now active from Yaounde as TJ1US. Mark is running an ICOM 735, and we are not sure if he has his amplifier operating yet. His antennas are a Mosley tri-bander, dioples for 40/80 and a Butternut vertical. We are not sure what he will use for 160 meters. He plans to be active on all bands CW/SSB/RTTY. His tour of duty at the U.S. Emabassy in Cameroon will be 2 years. All QSL cards go to NW8F.

YN, NICARAGUA. Hiro, JA6WFM, will be active until the end of December as YN6WFM. He can sometimes be found on 20 meters operating RTTY on 14085 kHz between 1130 and 1230z or SSB on 14190 kHz around 2315z. QSL to JA6VU.

While it is admirable that you are providing a web page with ham radio information, it is also worth mentioning that nobody has bothered to verify any of the information in your database. For example, your data base contains the following information:

KH2D K8NA 1996
KH2D K8NM 1996
KH2D KA3T 1980
KH2D KA3T 1995
KH2D KH2D 1989
KH2D/KH0 JA1SGU 1980

K8NA is my QSL manager, and has logs for any/all operations from Guam. I have no idea who K8NM is. KA3T has no logs for any of my operations. KA3T couldn't have been my QSL manager in 1980. In 1980, I was WB3IXC, and had never been to Guam. Listing KH2D for the manager of KH2D is a bit redundant. I have never operated from Saipan (/KH0) and I didn't loan my callsign to JA1SGU, so whatever call he used from /KH0 is apparantly incorrectly listed as my call. I noticed a bunch of other incorrect entries for

Guam calls, but don't have the time right now to correct the entire list for you.

Your data base is not the first one I have seen that is off by about 80%. If 80% of the Guam calls you list have incorrect information for QSL managers, can I be assured that the rest is 80% incorrect also ?

I realize that it would be a major project to verify 121,000 QSL managers. People looking for QSL information are going to use it to mail things, so if you haven't verified any of the data you are giving out, you should at least tell that it is not verified.

That way we don't have to look forward to seeing packet bulletins saying "K8MN, who is KH2D's QSL manager is a jerk. He took my dollar and didn't send me a card." Since K8MN doesn't know me, I doubt he'll send anybody one of my cards.

My advice to anyone who wants to know how to get a QSL card from a DX station is to ASK the DX station how to QSL when they work him.......

Hello to all,

Has anyone in the U.S. had much luck working the Malyj Vysotskij Island DXpedition? My antenna is just an R-7 and I have heard them on 20 and 30 meters, both signals very weak. I made what I hope is a contact on 30 meters, heavy QRM, better try again.

Rolling On The Floor Laughing ROFL

but crying at the same time!

At least YOU have a chance with an R7 on 20 and 30 meters!

Consider what it feels like to be a guy who works only 40 and 80
CW.. Look at the spot play on the OH2BU cluster..

ROFL... :)

They work 7001 for maybe two minutes a day and the signal is so
weak from them even on your end, just what do you think it's like
down on 40 after it almost gets to Texas?????

I'd really like to know what the propagation springboard is like
there! Is there this some kind of mountain that is in the way
of low band stuff to us? All the previous attempts at MVI
have had the same characteritics of virtuallly nothing to show
for low band between MVI and this end of the USA...

Are they using a dipole 20 feet up for 40 and 80 and 160?

From: kh2d@kuentos.guam.net
Message-ID: <5nhegj$7pc@lehi.kuentos.guam.net>
Source record: 32513

A few more corrections for your database:

Of the 121,017 entries in your database, 42,131 (approximatly one third) are duplicates of the same call sign, for example:

3A0HJ WB8PTF 1980
3A0HJ WB8PTP 1977
3A0HJ WB8PTP 1992

It is very unlikely that 3A0HJ had WB8PTF for a manager then switched to WB8PTP. My guess is one call is wrong. Which one, I have no idea. It looks as if somewhere along the line, someone merged two databases, one with '1980' as a default date, as you can see in the the following lists, as I have not removed the 'dupes'.

KG6ARL KH2D 1980
KG6ARL KH2D 1995

KG6DX KH2D 1980

KG6II KH2D 1995

KG6RE KH2D 1980

KG6RI KH2D 1980

KG6RN KH2D 1995
KG6RN KH2D 1980

KH2D is not the QSL manager for anyone, I am slow enuff answering my own cards, that's why I have a manager. KG6RE is a VHF repeater. It doesn't QSL at all.....

KH2AD KA3T 1987

KA3T is not, nor has he ever been, the manager for KH2AD.

KH2AM JE1CKA 1980
KH2AM JE1CKA 1991

The call KH2AM should be KH0AM.

KH2S/KH0 JH4RNF 1980

KH2S is JH4RHF, not JA4RNF.

More 'dupes':

KH2S JH4RHF 1980
KH2S JH4RHF 1991

KH2S/6Y5 JH4RHF 1980
KH2S/6Y5 JH4RHF 1993

In this series of calls, someone has listed the individual calls of all the Japanese hams who operated from KH2S during the CQWW contests a few years ago. The only call used was KH2S. Nobody, for example, made any contacts using the call KH2S/JA8RUZ, or any of the other KH2S/ calls listed. Again, please note the 'dupes', the only diffence being the supposed date of operation. KH2S was not issued yet in 1980. This string of calls seems to verify the theory that two databases were, at some point, merged. None of these are worth listing - they don't exist. If you feel they are, please add KH2S/KH2D via JH4RHF.....

KH2S/JA8RUZ JH4RHF 1980
KH2S/JA8RUZ JH4RHF 1995
KH2S/JF3EIG JH4RHF 1980
KH2S/JF3EIG JH4RHF 1995
KH2S/JH0USD JH4RHF 1980
KH2S/JH0USD JH4RHF 1995
KH2S/JH4RHF JH4RHF 1980
KH2S/JH4RHF JH4RHF 1995
KH2S/JI3ERV JH4RHF 1980
KH2S/JI3ERV JH4RHF 1995
KH2S/JQ3OZY JH4RHF 1980
KH2S/JQ3OZY JH4RHF 1995
KH2S/JR0BQD JH4RHF 1980
KH2S/JR0BQD JH4RHF 1995
KH2S/JR4PMX JH4RHF 1980
KH2S/JR4PMX JH4RHF 1995
KH2S/JR7MZC JH4RHF 1980
KH2S/JR7MZC JH4RHF 1995

Again, thanks for providing the disk space, the time, and the effort required to

maintain a ham radio related website. But at this point, I would suggest that you remove the QSLMGR.DBF file from your website, as it appears to contain a very large amount of incorrect data. In the years that I have managed the Guam QSL bureau, I have seen thousands of cards (with lots of postage) sent to the wrong place and never be delivered or answered. Ham radio could feed a starving country with all the stamps, IRC's, and QSL cards we send to the wrong place that wind up in the dump, and this list is only adding to that problem.

73, Jim KH2D

This is also true on our side of the pond - for the last few weeks there
has been significant activity on 17m, 15m, 12m, 10m and 2m (I don't have 6m
here). I dont (admit to) any listening to CB but that was open too...

Could this be the beginning of the end of the bottom of the cycle ?

1576. 10 KW Collins Shortwave Broadcast Transmitters For Sale

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-10 00:00:00 UTC
From: superclan@usa.net
Message-ID: <339cf2cf.5314857@news.euro.net>
Source record: 32518

There are 3 Collins10 KW shortwave broadcast transmitters
immediately available. They are currently in western Europe. They
were manufactured in 1982 and very well maintained. The modell is
208 U 10, and can broadcast in AM,CW and SSB. The main valve
is the 4CX10.000 . Frequency range is 2-30 Mhz.
Price for each transmitter (with inbuilt power supply and an
electricity regulator) is 17.000 German Marks (roughly 9,000 US
dollars)

In addition to this, there are 3 SIEMENS 10 Kilowatt transmitters
available. They were used for ship to shore communications. The
Siemens have Telefunken exciters with digital frequency readout.
These transmitters can also broadcast in AM,CW and in SSB.
The Telefunken exciters were manufactured in 1985, and the
Siemens 10 KW boosters were built in 1980, but only in 1989
they came in use, and therefore have only been used in the last 8
years. Included in the price of this Siemens/Telefunken transmitter
is a 3 phase power supply, a double external ventilator and an
airfiltering system. The main valve for the Siemens is the RS 2012.
Frequency reach is 1.5 to 30 Mhz. Price is 10.000 German Marks.

All transmitters come with all the books.
For more information: send an email to superclan@usa.net

1577. Correction: Need two 6JS6C sweep tubes

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-10 00:00:00 UTC
From: Joe <joentam@transend.com.tw>
Message-ID: <339DD677.2C5A@transend.com.tw>
Source record: 32519

Correction -- The Yaesu output tubes needed are 6JS6C, not
6JE6C as previously stated. Swan uses 6JE6, Yaesu uses 6JS6C.
Low price still paramount.

>
```

This is probably EH3CUU/B which has been reported to me by G4UPS &#65533;
in his May monthly report.

The "where" can, of course, also be determined from the grid &#65533;
square JN12FE.

```
EH is the Spanish prefix for 50 MHz permits.

> John Charles

Good Morning John from San Diego.

There is a 50MHz Beacon List on one of my pages at URL:
http://pw2.netcom.com/~ac6v/pages.html
Searching for JN12FE (I guessed it was the grid square) reveals you are
probably receiving:
50055.5 EH3CUU JN12FE

ITU Prefix blocks EAA-EHZ are allotted to Spain, so I'll guess the call
you copied (BES3CUU/B) sign is indeed EH3CUU/B -- the /B is for Beacon.
I'll further guess that the first part BE is DE which is Morse lingo
for "this is station". So the message is probably:

V V V DE EH3CUU/B JN12FE K K K

The V's are the start of the transmission followed by the DE (this is
station) the call sign (EH3CUU/B) then the grid square (JN12FE).

If you go to URL:
http://www.amsat.org/cgi-bin/gridconv
You can convert the Maidenhead grid square to long/lat and it gives:
jn12fe
42 degrees 11 minutes 15 seconds North
2 degrees 27 minutes 30 seconds East

Which on my map is on the east coast of Spain -- perhaps Benicario or Tortosa, Spain. Need a better map to pin it down.

Any way Sherlock here rests his case. Let me know if my educated guesses are correct.

Very Best regards (I love a puzzle)

To all radio amateurs

SB DX ARL ARLD026
ARLD026 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, the Daily DX, The 599Rpt, 425DXnews and Contest Corral from QST. Thanks to all.

MONACO, 3A. I1YRL and IK1OWC will be QRV as homecalls/3A using only CW on June 14 and 15. QSL to home calls.

NEPAL, 9N. Rich, 9N1RHM, has been QRV on 20 meters. QSL via KV5V.

UNITED ARAB EMIRATES, A6. Jamal Al Maktoum, A61AO, is a newly licensed operator. QSL via N1DG.

SABLE ISLAND, CY0. Wayne, VE1CBK, is here until June 23 for work reasons. He expects to operate during his off hours. He will be QRV on 80 to 10 meters, and may also be found on 50.132 and 144.200 MHz. The callsign is CY0SAB. QSL to VE1CBK.

IRAN, EP. Ali, EP2MKP, is QRV using CW, and can be found on 40 meters from 2000 to 2100z. QSL 40 meter QSOs via UV6HPV, and any 20 meters QSOs via UA6HCW.

NEW CALEDONIA, FK. Didier, F5PXQ, is QRV as FK/F5PXQ. He will be here for the next three to four years. Activity will include RTTY. QSL to home call.

SWITZERLAND, HB. HB9FG will use the call HB6FG during contests for the rest of 1997 in celebration of 60 years of the Fribourg section of the Switzerland Radio Association, USKA. Special QSL via the bureau.

FRANZ JOSEF LAND, R1FJ. Nick, R1FJV, is QRV from here until the end of 1997. QSL via UA3AGS.

EGYPT, SU. Abdul, 9K2DZ, is QRV from Cairo as SU1DZ. He has been operating on 6 meters. QSL to home call.

DODECANESE, SV5. Vito, I3BQC, will be QRV possibly as SV5/I3BQC/P from Karpath-os Island until June 16. QSL to home call.

MACQUARIE ISLAND, VK0. Tom, VK0TS, plans to be active every Tuesday and Wednesday at 0345z on 14222 Khz. QSL via VK1AUS.

ANTARCTICA. Roman, VP8CTR, has been QRV on 18072 Khz around 1520z. QSL via DL5EBE.

GIBRALTAR, ZB. Jorma, OH2KI, is QRV as ZB2X. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL June VHF QSO Party, Asia Pacific Sprint, West Virginia QSO Party, Portugal Day, WW South America CW Contest and the TOEC WW Grid Contest are all on tap for this weekend. Please see June QST, page 103 for details.

Ready for field day?

1605. X5... callsigns

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-13 00:00:00 UTC
From: Bob MacLeod <bob@rmacleod.demon.co.uk>
Message-ID: <Gb5sbEAs6TozEwEb@rmacleod.demon.co.uk>
Source record: 32547

Never give up do they?

Let's say it again: X5 prefix has never been issued and all stations using it are **pirates**. The country usually given as 'the republic of Sushka' or suchlike (it varies slightly) does **not** exist! There is a district of Bosnia-Hercegovina called something similar, but it is not and never has been a country in any shape or form.

And no, it does **not** count for your DXCC. . . !

If you doubt any of this get in touch with your national radio society and ask them.

Perhaps someone would like to send this info out via packet radio - my local route operators (HIPAK) do not distribute outgoing bulletins into the network.

73, let's all work some **real** DX.

Hello !

The X5 prefix is used from some hams in Bosnia Herzegovina.
They say Republika Srbska - a part of Bosnia Herzegovina where live
mostly serbs. They declared independence, but...well...politics.

Have a nice day and GD DX !!!

1615. June Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-14 00:00:00 UTC
From: ids@nol.net
Message-ID: <33a2b10c.3736774@news.nol.net>
Source record: 32556

PROPAGATION - by AD5Q HOUSTON, TEXAS -- JUNE 1997

The HF bands have completed their transition to summertime conditions. 20 Meters is the band of choice for worldwide propagation, providing easy access to parts of the world that are difficult to reach in the winter. We can enjoy these conditions for the next 2 or 3 months.

There is also a surge in activity on 10 Meters at this time of year. It's not DX, but it's fun. The bottom of the sunspot cycle seems to bring out the best in Sporadic E propagation on this band. Openings occur through the daytime and into the night. This is an important source of SSB contacts during the ARRL Field Day. On normal days, most activity is in one of the two Novice bands on 10 Meters (the other one is deserted for some reason). 6 Meter propagation is also in season.

DX can be found primarily on 20, 30 & 40 Meters. 17 is OK, but the propagation is mostly north / south (as it is on 15 and 10). East / west propagation can also occur on 17 to, for example, Africa and the Pacific.

20 Meters is in excellent shape for much of the morning and most of the evening. There are several paths to watch. Long path isn't very reliable at current levels of solar activity, but the morning path to Africa is workable. This path peaks in the summertime even at sunspot peaks, while the Antarctic paths are best from the fall through the winter and spring. DX activity on these paths is currently low, since they are not watched very closely anymore. With higher solar numbers these long haul paths are really awesome from W5.

The morning also brings a 20 Meter opening to the Pacific and an excellent northerly opening to most of Asia. There usually aren't many JA's on the band, so we tune for the more exotic stuff. There is some upcoming activity from Nepal to watch for on SSB. On CW, contacts with BV, 9V, 9M, V8, BY, JT, HS & VS6 are a common occurrence. Our evening openings can also include Asia if the band stays open late enough. This would be a good source of JA contacts in the upcoming IARU contest. Europe is best in late afternoon, traversing a night (evening) path to a part of the world where the band is quiet and about to close. We all know that prime time evening DX consists of a nightly opening to Siberia and Russia, but also watch this opening for activity from the Middle East. The westerly path across the Pacific is also good in the evening. Enjoy!

1616. Distributors Wanted NOW!!

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-14 00:00:00 UTC
From: Tony Scott <summer@laoffices.com>
Message-ID: <5nue5t$84p$9402@cadmium.aware.nl>
Source record: 32557

Hi,

This is a Solicitation Email, we are looking for new TUFF'97 DISTRIBUTORS.
TUFF'97 is a promotional concept for a prospect follow-up system called
"Simple Track". Software designed for Windows 95, 3.11 and NT
machines. (Macintosh users read the NOTE below(*))

Concept:

The TUFF'97 software includes a copy of Simple Track, so you can use this
for your own personal administration (free). However, the TUFF'97 software
is designed to give you BIG TIME credits for just taking the efforts to
PROMOTE it.

How do I get those credits?. Easy, just distribute/promote it. How?
(Give away the software for free, put it on your website/homepage
and let everyone download it. Give it to your friends, attach it by
email etc). With a one time $40.00 (USD) validation code purchase,
YOUR name becomes part of all sofware you sent out to your customers.
When your TUFF'97 software gets validated, all your personal information is
automatically integrated in the software, so everyone knows how to reach
you by phone/fax or email and where to sent the check/money or cash orders.

Basically this is the concept. Offcourse you need the software to grasp
the whole thing. Believe it, there is absolutely no marketing knowledge
required, just ask for the software package, join and start promoting your
own TUFF'97 line. The only thing you DO need is a PC or Mac(*) and Internet.

(*) TUFF'97 is only available for MacOS users running Connectix VirtualPC
or Insignia's Sofwindows 95/3.11. A true MacOS version is not available.

When you're interested in becoming a TUFF'97 distributor and create your own
distribution line, sent a mailto:FiReStArTeR@frodo.com and ask for your
copy of the TUFF software (We'll sent you a download location and install
instructions). This is a serious opportunity, so only serious responses
are processed. If you're not interested, have a nice day.
Best Regards,
Tony Scott

The web page is wrong!

Rockall hasn't been given an official IOTA reference (or at least it
hadn't when the 1997 directory came out).

The 1997 IOTA directory gives EU-164 as Corsica's Coastal Islands - TK
prefix.

>PS Listen out for me (GM/ON4BAM) from 31/7/97 to 4/8/97 whem I'm on EU-010
>and EU-008.

Hmm - that British call sounds a bit 'interesting'. If it's a reciprocal
licence, then obviously use what you've been issued with. However, if
you're operating under CEPT rules, I believe you should now be signing
MM0/ON4BAM/P (or /M).

[This is all IIRC, and there is still a lot of confusion]
CEPT operations were meant to change to the M (instead of G) prefix on
1st April 1996, when the UK stopped issuing new G calls.

The second letter should be the 'secondary regional identifier' - M for
Scotland, absent for England and so on. Both island groups you mention
are Scottish, so M is the correct letter.

In addition, you should then use the digit 0 for a UK Class A equivalent
(HF allowed - CEPT Class 1) or 1 for a UK Class B equivalent (6m and up
- CEPT Class 2).

If I've got this wrong, I expect to be corrected shortly.

73,

David

1618. Re: Help DIP Swx old terminal

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-14 00:00:00 UTC
From: w4bxi@vulcan.com
Message-ID: <8D9C48C.002600079A.uuout@vulcan.com>
Source record: 32559

I need help with the DIP Switch settings for an (old)
Fortune Terminal, "Series 32:16", probably 25 years old,
made by Fortune Systems in San Carlos, CA (no telephone listing there
now).

The following are the labels for the eight switches on the rear panel:

50/60 Parity Stop Baud Sel
hz sel Bits

ON . .. .
OFF . .. .

Swx
Nr. 1 23 4 5678

I would appreciate any help you can give me as to what OFF or ON
positions are likely to provide. I have spent HOURS trying every pos
ible combination of these switches but no luck. I'm trying to use this
with the SE DX Packet; it once worked, but now does not.

My thanks to you in advance for reading this.
John Drum
(Please respond to direct email address below. Thanks)

>not and never has been a country in any shape or form.

According to the ITU the only official call sign for Bosnia is Z3. X5
and 4N4 are not legal and do not count for anything much less DXCC
or WAE.

The ARRL looks closely at all spots and all operations. If you cannot
produce evidence that you are licensed then you don't count no matter
if the operation is from KP4 or Bosnia.

I agree that in the past credit was given ..but for several spots like
Abu A'il, Spratley, San Marino, and the Knights of malta all at one
time had no assigned call sign block..of this group only San Marino
has a properly assigned call. Bosnia has an assigned call block so
anything else is "no good."

The recent problem with the Scarbrough Reef operation show that we
still accept DXCC counters that are questionable. And we count XZ1N
licensed by a Government that controls only part of XZ and is disfavor
with the world. Why then did not the 1Z9/XZ9 stations of 10 years ago
count? No one questioned their location.

Romeo, Romeo where art thou?????? I would add Martti to that list on
BS7!

Yes, but I understand you must put the CD back in the
drive every third time you start the program!? Most of us
wish to leave one of the call sign data base CDs in the
drive just about all the time. According to the author,
that is just the way it is, copyright protection, I guess.

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 309
BID: $OPDX.309
June 16, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1SP, N2XL, W3UR & Daily DX, WB3LHD, WA4JQS, W5IJU & Island/DX News, DJ5AV & DX News Letter, F6AJA, G3SWH, G4BUE & DX News Sheet, HB9HFN, I1JQJ, LA4BN, LY2BVQ, PA0JR, VE7SZ, VE9AA and VK4AAR for the following DX information.

1997 PACIFIC NORTHWEST DX CONVENTION. The PNW DX Convention moves yearly between, Washington, Oregon & British Columbia. This year it will be held at Richmond, B.C. on July 25, 26 and 27th. If you are considering attending and wish additional information, please contact Ken Thompson, VE7BXG, P.O. Box 3048, Blaine, Washington 98231 or Allan Buckshon, VE7SZ, via E-mail at: abucksho@direct.ca. Also checkout their Web site at: www.davetek.com/pnwdxconvention/dxcon.htm

5Z, KENYA. The "DX News Sheet" reports Christine, a YL operator, is curently active from Kiambu as 5Z4LL and is often found around 1500z on 18145 kHz. QSL to Box 14425, Nairobi, Kenya.

9H, MALTA. The 10th DXpedition to Malta organized by the V.R.Z.A. (Dutch Society of AmateurRadio) will take place from Saturday, 21st June up to Saturday, 5th July. There will be fourteen hams in Sliema, QTH-locator JM75FV, using their own 9H3-callsign. They will activate IOTA EU-023 on the HF-bands, 80-10 meters as well as 6 meters, CW and SSB. There will be four complete stations available. (Last minute update received before going to print: "To commemorate this 10th VRZA DXpedtion to Malta a special clubstation callsign is been issued: 9H0VRZ.") Operators are: 9H3IE/PA0BEA, Frits; 9H3KE/PA0PAN, Nick; 9H3ON/PA3BIZ, Bill; 9H3QD/PA0JWK, John; 9H3QG/PE1JFR, Francois; 9H3TD/Teun, PA0TPM; 9H3WA/PA3EPV, Phillip; 9H3WH/PA0JR, Andre; 9H3XQ/PA0CKV, Kees; 9H3YM/PE1OFJ, Sjirk; 9H3YN/PA3CUZ, Madeleine; 9H3YO/PA3AGZ, Wim; and 9H3YP/PD1ABY, Dick. More info and QSL direct addresses can be found on on their WEB site: http://www.pi.net/~vrza/malta.htm

9M8, EAST MALAYSIA. Arie, PA3FWG, will be active during the month of July for about a month as 9M8ZZ. His activity will include RTTY. No other details were given.

CY9, ST. PAUL ISLAND (Just an early reminder!). Mike, VE9AA, wants OPDX to remind its readers that CY9AA will be active June 26-July 3rd. Operations will be on 160-2 meters with one station on 6 meters FULL TIME on 50.101MHz. CY9AA operators will be: VE1PZ/Doug, K7BV/Dennis and VE9AA/Mike. Also, check out the Web site "http://www.uksmg.org/cy9.htm" to read all about their upcoming trip to St. Paul Island. The LATEST UPDATE, dated June 10th, will be sent to all OPDX InterNet Subscribers as an additional bulletin.

FK, NEW CALEDONIA. FK8HC, although weak, has been heard during East Coast mornings (around 1000z) on 3799 kHz. Also, VKs and Zls stations were on awaiting the VK0 group in Maquirie Island to come on the air at about 1200z.

IOTA NEWS......
Mauro, I1JQJ, states YB5NOF/8 told him that Bynny, YC8YZ, will be portable from Obi Island (OC-???) until June 19th. Operations are expcted to be on either 7090 or 21260 kHz (he has no other band available). QSL via YC8YZ: P.O. Box 67, Ternate, Halmahera Island 97716, Indonesia.

Joel, F5IPW, will be active from Oleron Island (EU-032) from June 28th to August 31st and will be especially active for the IOTA contest.

Alaina, F6BFH, will probably be active as G/F6BFH in July from Isles of Scilly (EU-011).

Albert, FO5JR, will take his Christmas holidays in French Polynesia and plans to activate Rimatara Island (OC-050). He will take his TS-440 and dipoles with him and will operate CW only on 7010, 10110, 14010, 18110, 21010, 24910 and 28010. More details will be reported later.

Phil, G3SWH, will be active on CW only as SV8/G3SWH from the Island of Mykonos (EU-067) until June 20th. This will be a holiday operation and activity will be on all bands from 80-10 meters but limited to an hour or so in the mornings, usually between 0600 and 0800z and in the afternoons, usually between 1500 and 1800z. The QSL route is via G3SWH, either direct or via the RSGB Bureau.

George, SV1QN, will once again be active from Myconos Island (EU-067) as SV1QN/8 during August. Activity will be SSB and CW, but this time he will also work RTTY and SSTV with pictures from the island. His operations will mostly be on 20 meters with some activity on 80, 40, 15, and 10 meters (depending on the propagation). QSL via his CBA or via the SV-bureau.

JW, SVALBARD. Leif, JW2PA, will be active from July 18-26th on all bands from 10 to 80 meters. Activity will be on CW and SSB. QSL to home call LA2PA direct via callbook address or via bureau.

MIDDLE EAST GROUP ACTIVE. Naser/A61AN, and Murtada/9K2MU, are on almost daily on 14240 kHz. Both have S9+ signals into the East Coast. They have been assisting other Middle East/Arabic stations (TA, SU, 7X, A7.... all heard) in working DX. They come on about 2200z until the band dies or they get too sleepy.

QSL NEWS AND INFO......
Jean, F6AJA, reports he has received the HP1XBI/1 QSLs from the printer. Gerard, HP1XBI, was active from Contadora Island (NA-072) at the end of March. All direct cards will be answered by mail as soon as possible.

Scott, N1SP, reports the W1 QSL Bureau has been receiving cards for JY6ZZ. This is not correct. Please QSL JY6ZZ direct only!!

The QSL route for the following stations is via KP4AM (1997 Callbook or earlier): KP4AM/D (Desecheo Is. 1979), KV4IM, VP2VDK, VP2V/KP4AM, NP4P and ZF2DN.

Tony, WA4JQS/VP8BZL, Director of Operations - South Sandwich Island Antarctic DXpediton Group (SSIDXG), has advised OPDX that the he has (in hand) the landing permission from the Fish and Wildlife Dept. for Chuck Brady's, N4BQW, Midway and Kure Atoll operations which took place in May of 1997. Tony has faxed the document to the DXCC Desk and also other interested parties. Chuck is a member of the SSIDXG, and his operations are SSIDXG supported. Chuck did not request funding for this operation because he did not know if the WX would allow him to land at the time. His out of pocket expense are $6000 (USD), and any help that you can include with your QSL cards to offset this cost would be greatly appreciated. Chuck is also currently active with other SSIDXG operations in the works..

Lee, KH6BZF, advises OPDX that he is the QSL Manager for Dave, T9/WA5IKQ, and would like to clean up any and all requests for BOSNIA QSLs that might be wandering around. QSL T9/WA5IKQ via KH6BZF (+IRCs, SAE or SASE + Amount in US AIRMAIL POSTAGE): Lee R. Wical, KH6BZF, 45-601 Luluku Road, Kane'Ohe, HI 96744-1854-25

SPECIAL EVENTS.....
The Rochester, New York DX Association (RDXA) will be celebrating its 50th anniversary this month. The club will operate with its club callsign with the addition of a /50 for the event; W2RDX/50. Look for them to be on the air operating CW, SSB and RTTY. Operations will be in various parts of the band (Time will be spent in the DX, General and Novice portions of the bands). Look for them to be on the air from June 21st at 0000z until July 6th at 2359z. A special QSL card will be available. Stateside and Canada QSL to: AF2K, Irv Goodman, 515 Drumm Rd., Webster, NY 14580. A regular size envelope will do. DX stations may QSL via the bureau. Look for W2RDX during Field Day too!

Cedric, HB9HFN, reports the section of Fribourg of the Swiss Ham-Radio Association (USKA) is celebrating its 60th anniversary and will use the callsign HB6FG until the end of 1997. QSL via bureau or direct via

HB9FG.

Lithuanian station LY97XA will be active from July 10-20th, to help celebrate the 300th anniversary of Vilkaviskis town. There will be an award (Vilkaviskis-300) available after gathering 5 points for contacts on all shortwave bands with the members of the radio club " Varpas". A plaque "Vilkaviskis-300" is given to a radio amateur after gathering the most points. 2 points are given for contacts with LY97XZ, while 1 point is given with contacts for Varpas members. You can repeat the contacts in different bands. All contacts are counted from July 1, 1997, until December 31, 1997. Conditions for SWL are the same. Applications and the payment of 5 USD for the award can be sent until July 31, 1998, to the following address: P.O.Box 7, Vilkaviskis 4270, Lithuania.
The station of the Radio Club "Varpas": CT1DW, DK1XT, DL1GBP, DL6GN, LX2DW, LY1DM, LY1DW, LY1DY, LY1EM, LY1FAE, LY1FAG, LY1FAK, LY1FAT, LY1FAU, LY1FAV, LY1FBG, LY1FCA, LY1XA, LY2BDT, LY2BEE, LY2BEO, LY2BGP, LY2BGW, LY2BOK, LY2BVD, LY2BVQ, LY2CQ, LY2HT, LY2KA, LY2LI, LY2NLK, LY2PAQ, LY2PU, LY2RB, LY2RF, LY3BLI, LY3ET, LY3GF, LY3GM, LY3NGZ, LY3NHD, LY3NHK, LY3NJD, LY3NMJ, LY3NNK, LY3NOY, LY3PDS, LY4AB.

VK0, MACQUARIE ISLAND. "The DX News Letter" reports Tom, VK0TS, has a sked with Jim, VK9NS, on 14222 kHz each Saturday and Sunday at 0345z.

WEBSITE. Ron, WB3LHD, says to check out the WESTERN PA DX ASSOCIATION (WPADXA) website at: http://home.att.net/~rcberry/wpadxa/

ZK2, NIUE. Alan, VK4AAR, reports to OPDX that he is the QSL Manager for Paul/ZK2PJ and Janice/ZK2JJ who will be on Niue Island for the next 2 years. Paul is currently preparing his antenna system and will have a Quad antenna up soon. ADDED NOTE: Alan mentions he is also the QSL Manager for YJ8AA and VK8MI (March 1996 operation on Melville Is), but PLEASE NOTE that Paul is good direct ONLY via the 1995, 1996 and 1997 CBA (callbook address) ***ONLY*** Here's the address for those without the right call book: VK4AAR, Alan Roocroft, Post Office, Dalveen QLD 4374, Australia.

Just for curiousity.. What's a 4N1? I've worked a few over the last
few months, but the QTHs they give don't appear on my (rather poor)
maps.

NEW Kenwood Reflector!!!

Kenwood is a mailing list (reflector) devoted entirely
to equipment manufactured by the Kenwood Communications
Corporation (Amateur Radio Products Group).

* equipment, accessories
* repairs, modifications, enhancements
* questions, discussions, etc
* buy, sell, trade, swap

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe kenwood

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe kenwood

To post items to the reflector, send email as follows:
TO: kenwood@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

-----

HomeBrew is a mailing list (reflector) devoted to amateur radio
and electronics experimentation and construction:

* building kits
* scratch construction
* radios, antennas, widgets
* design
* accessories
* station construction
* digital, analog, uP
* repair, modification, surplus

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe homebrew

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:

BODY: unsubscribe homebrew

To post items to the reflector, send email as follows:
TO: homebrew@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Ham-Books is a mailing list (reflector) devoted to the literature
and periodicals of amateur radio:

* publishers
* magazines
* newsletters
* books
* old and "collector" books
* new book announcements

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe ham-books

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe ham-books

To post items to the reflector, send email as follows:
TO: ham-books@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Ham-Software is a mailing list (reflector) devoted to software
of all types used for amateur radio:

* logging
* propagation prediction
* digital modes
* award tracking
* commercial, shareware, freeware
* electronic design and simulation
* amateur software development

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe ham-software

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:

BODY: unsubscribe ham-software

To post items to the reflector, send email as follows:
TO: ham-software@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Fox_Tango is a mailing list (reflector) devoted entirely
to "vintage" and "classic" equipment manufactured by the
Yaesu Musen Co., Ltd. of Tokyo Japan.

* equipment, accessories
* collecting, restoring, refurbishing
* buy, sell, trade, swap
* repairs, modifications, enhancements
* questions, discussions, etc
* just plain operating old Yaesu stuff

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe fox_tango

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe fox_tango

To post items to the reflector, send email as follows:
TO: fox_tango@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Mobile-Portable is a mailing list (reflector) devoted to mobile
and portable operation of amateur radio (QRP and QRO, HF and VHF+):

* rigs, antennas, tuners
* installation
* batteries
* generators
* solar and alternative energy
* camping/RVs/backpacking
* laptop/palmtop computers
* portable packet
* roving and mountain-topping
* GPS, APRS

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:

BODY: subscribe mobile-portable

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe mobile-portable

To post items to the reflector, send email as follows:
TO: mobile-portable@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

BitBucket is a mailing list (reflector) devoted to
specialized amateur radio communication techniques.

-SSTV, ATV, FAX, APT, DSP, QRP, APRS
-Packet, Pactor, GTOR, Clover, AMTOR, RTTY
-R/C, Telemetry, Balloons, Rockets, Robotics
-homebrew, modifications, interfacing, widgets, etc

To subscribe:
TO: majordomo@qsl.net
SUBJECT:
BODY: SUBSCRIBE bitbucket

To unsubscribe:
TO: majordomo@qsl.net
SUBJECT:
BODY: UNSUBSCRIBE bitbucket

As we encourage the free exchange of ideas, if you pay for
email service by the byte you may want to consider carefully
before subscribing.

To submit materials:
TO: bitbucket@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

bit bucket /n./

1. The universal data sink (originally, the mythical receptacle
used to catch bits when they fall off the end of a register
during a shift instruction). Discarded, lost, or destroyed data
is said to have `gone to the bit bucket'. On Unix, often used
for /dev/null. Sometimes amplified as `the Great Bit Bucket in
the Sky'.

2. The place where all lost mail and news messages eventually go.
The selection is performed according to Finagle's Law;
important mail is much more likely to end up in the bit bucket

than junk mail, which has an almost 100% probability of getting delivered. Routing to the bit bucket is automatically performed by mail-transfer agents, news systems, and the lower layers of the network.

3. The ideal location for all unwanted mail responses: "Flames about this article to the bit bucket." Such a request is guaranteed to overflow one's mailbox with flames.

4. Excuse for all mail that has not been sent. "I mailed you those figures last week; they must have landed in the bitbucket." Compare black hole.

This term is used purely in jest. It is based on the fanciful notion that bits are objects that are not destroyed but only misplaced. This appears to have been a mutation of an earlier term `bit box', about which the same legend was current; old-time hackers also report that trainees used to be told that when the CPU stored bits into memory it was actually pulling them `out of the bit box'. See also chad box.

Another variant of this legend has it that, as a consequence of the `parity preservation law', the number of 1 bits that go to the bit bucket must equal the number of 0 bits. Any imbalance results in bits filling up the bit bucket. A qualified computer technician can empty a full bit bucket as part of scheduled maintenance.

4N1 = Yugoslovia.
Incidentally, Z3 is NOT the prefix for Bosnia. Z3 is the prefix for
Macedonia. The official prefix for Bosnia is T9.

"Wings Over Long Island" A group from Islip ARES, GSBARC and LIDXA will be signing AC2P/p from the air show in Westhampton June 21-22. A QSL Certificate will be issued. Send 9 x 10 SASE to: AC2P cba.

Look for this group on Aug 2-3 from Montauk Lighthouse to celebrate the 200th year of the lighting of Montauk. Aug 16-17 from the first amateur operation from Fire Island Lighthouse.

"Wings over LI" and Montauk Lighthouse is good for IOTA NA-026 and USIA NY-03S. Fire Island Lighthouse is good for IOTA NA-026 and USIA NY-013S.

1643. My QSLs OK for DXCC?

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-18 00:00:00 UTC
From: martin@mjrigby.demon.co.uk
Message-ID: <33a82bfc.5123591@news.demon.co.uk>
Source record: 32485

Hi All,

Last year I was active (legitimately) from Lesotho in Africa with a "guest" licence. I operated as 7P8/G4FUI from July to December 96.

In many instances the operators I worked stated that I was a "new" country for them, as they required 7P8 for DXCC.

I have been responding to many QSLs stating the same.

Are my cards automatically valid for DXCC, or do they require some sort of official authorisation from the ARRL?

I will be happy to do this if required.

Any advice or comments welcome.

*** The Daily DX ***
====================
Volume 1 Number 66
June 18, 1997
Edited by Bernie McClenny, W3UR

Headlines

Tim Totten, N4GN, has informed The Daily DX that he will join up with Martti, OH2BH, and Timo, OH1NX, on Monday, July 7th on the Aland Islands. They will be operating from the famous OH0W contest site using the call OH0/N4GN. Plans include the use of two complete stations which include Yeasu FT1000MP's and Alpha 91B's. Those deserving should check the following frequencies:

Band SSB CW
80 3795 3502
40 7045 7002
30 10101
20 14195 14024
17 18115 18074
15 21295 21024
12 24935 24894
10 28495 28024
6 50110 50104

QSL via Tim Totten, N4GN (ex-KJ4VH), 8309 Dawson Hill Road, Louisville KY 40299-5317, U.S.A.

Immediately following the Aland Island operation Tim, Martti and Timo will be joined by Seppo, OH1VR, Lars, OH0RJ, OH1RX (ex OH1NYP) and OH3FT on July 10th. The group will then be transported by the Finnish Coast Guard to the barren rock of Market Reef. The Rock is located about 2-1/2 hours west of Alands by small boat. Market Reef is a tiny dot of rock at 60° 18' 10" North and 19° 8' 3" east on most

maps and charts and is nonexistent on others. Look for operations to start sometime late on Thursday evening, July 10th. OJ0/OH1VR will be operating in the IARU Radiosport Championship contest. OJ0/N4GN will be active before and after the contest and on the WARC bands during the weekend. Martti, Seppo and Lars are no strangers to the reef in fact Martti's initiative in late 1969 along with support by Armas Valste, OH2NB, then President of the Finnish Amateur Radio League (SRAL) was the driving force that put Market Reef on the DXCC list. Market Reef is one of the smallest DXCC countries measuring less than one square mile. RTTY and 6 Meter operations are planned from Market Reef. Operations will come to a halt on Monday, July 14th. QSL OJ0/OH1VR via Seppo Sisatto, OH1VR, Lansirinteenkatu 23, 33400 Tampere, Finland. QSL OJ0/N4GN via Tim Totten, N4GN (ex-KJ4VH), 8309 Dawson Hill Road, Louisville KY 40299-5317, U.S.A.

Rick, VK4LW, from the ODXG reports another change to the upcoming VK9 Willis Island list of operators. Harry, VK4DHM, has just finished a 16 day stay in the hospital and he has been grounded by his doctor. 7K3EOP and VK2AEA/OM3CUU have just joined the list of operators going.

Toshi, JA1ELY, reports that the JARL Kyoto Club will be operating from the Marshall Island from August 6th to August 14th. The operators include: JA3ART/V73AR, JA3MM/V73MM, JH3QNH/V73NH, JA3YAQ/V73YAQ. They will be active from Majuro Island (IOTA OC-029). Activity will be on 10 through 160 meters, including WARC bands, SSB, CW, RTTY and 29 MHZ FM. They will be using an FT-900, TS-440 FL-7000, a 3 element beam for 10, 15 and 20 meters, 2 element HB9CV for 17 and 12 meters and dipoles for 160, 80, 40 and 30 meters. QSL via JA3OIN.

QSN

4X/4Z - ISRAEL - There are usually two or three stations from Israel on 20 meters SSB between 02:00 and 03:00Z.

8R1Z - GUYANA - Len can be found often between 23:00 and 01:00Z around 14200.

FH5CB - MAYOTTE - Elio usually can be found near 21295 between 11:00 and 15:00Z. Tuesday he was on 14242 just before 15:00Z.

VK6HD - AUSTRALIA - Mike showed up from zone 29 on 3505 at 22:50Z working Europe.

VU2WAP - INDIA - Maku was working North America on 14195 around 01:00 to 01:40Z on Tuesday.

YI1RS - IRAQ - Can be found most days around 07:00 to 10:00Z near 14248.

YI9VK - IRAQ - Sanyi, HA7VK (ex XU7VK) was on 14247 at 05:40Z.
QSL via HA0HW.

ZA1MH - ALBANIA - Mike was on RTTY on 14087 around 20:45Z
QSL via Vladimir Kovaceski, Z32KV, Box 10, 96330
Struga, MACEDONIA

While sorting cards for the W2 buro, found this letter.

The PZK Headquarters kindly informs that the Central QSL Bureau of PZK
acting in Warsaw under the address

PO Box 320
00-950
Warszawa
Poland

will accept QSL cards which arrive in Warsaw before December 10, 1996

For economical reasons, the Polish QSL bureau will be moved from Warsaw
to Leszno, to the seat of the Society PZK.

Effective Jan 1, 1997, the Polish QSL bureau acting under the new address

PO Box 42
64-100
Leszno 7
Poland

Send, please, QSl cards to Polish amateur stations to the above
mwentioned address

Signed

Marek Kulinski SP3AMO
President of PZK

1647. EARN MONEY EASILY !!! (For Smart Guy/Gal)

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-19 00:00:00 UTC
From: james@nowhere.com
Message-ID: <james-1906971701470001@ip-52-41.dialup.hkstar.com>
Source record: 32489
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment

Please spend a minute to read this, you may get a few thousands US dollars at least. It really works to anyone who follow those simple instructions. The guy who set up this is a smart guy, but who believe this and follow all is the smartest.

If you are a very smart guy or gal, please spend 5 more minutes to read the rest. Think very carefully and excute. My friend, a lot of money will flow into your pocket very soon.

- James

The original news I have received :

This is the fairest, most honest way I have seen to share in the wealth of the world!

Take five minutes to read this and it WILL change your life. If you want to know how to make thousands of dollars quickly, legally and with NO CATCH, then keep reading.

The Internet has grown tremendously. It doubles in size every 4 months. Think about it. You see those 'Make Money Fast' post more and more. That's ... because it WORKS! So I thought, all those users might make it work. And I decided to try it out a few months ago. Besides, what's $5.00, I spend more than that in the morning on my way to work on coffee and cigarettes for the day. So I sent in my money and posted.

A lot of users will join in and make it work for you.

Well, two weeks later, I began receiving money in the mail! I couldn't believe it! At first only a few hundred dollars, then a week later, a couple of thousand, then BOOM! By the end of the fourth week, I had received nearly $47,000.00. It came from all over the world. Every bit of it perfectly legal and on the up and up. I've been able to pay off all my bills and still have enough left over for a nice vacation for me and my family.

Not only does it work for me, it works for other folks as well. Markus Valppu says he made $57,883 in four weeks. Dave Manning claims he made $53,664 in the same amount of time. Dan Shepstone says it was only $17,000 for him. Do I know these folks? No, but when I read how they say they did it, it made sense to me. Enough sense that I'm taking a similar chance with $5 of my own. Not a big chance, I admit--but one with incredible potential, because $5

is all anyone ever invests in this system. Period. That's all Markus, Dave, or Dan invested, yet their $5 netted them tens of thousands of dollars each, in a safe, legal, completely legitimate way. Here's how it works in 3 easy steps:

STEP (1)
Invest your $5 by writing your name and address on five separate pieces of paper along with the words: "Please add me to your mailing list." (In this way, you're not just sending a dollar to someone; you're paying for a legitimate service.) Fold a $1 bill inside each paper, and mail them to the following five addresses:

1) S. Hogan
36 Prenton Lane
Prenton, Wirral
Merseyside, L42 8LB
England, Europe

2) J. Larsen
Grinnekaerrsvaegen 50
436 56 Hovas
Sweden, Europe

3) C. Mason
473 44th Ct. NW
Rochester
MN 55901-6666

4) H. Reichel
Hahnenstrasse 8
30167 Hannover
Germany, Europe

5) J. Yung
Flat C, 6/F., Tower 2,
Kornville, 38 Yau Man St.,
Quarry Bay,
Hong Kong.

STEP (2)
Now remove the #1 name from the list, and move the other names up. This way, #5 becomes #4 and so on. Put your name in as the fifth one on the list.

STEP (3)
Post the article to at least 200 news groups. There are at least 20000 news groups at any give moment in time. The more groups you post to, the more people will see your article and send you cash! It's recommended that you do AT LEAST 200 news groups for a lot of people to read it!

STEP (4)
You are now in business for yourself, and should start seeing

returns within 7 to 14 days. Remember, the Internet is new and
huge. There's no way you can lose.

****

Now here is how and why this system works:

Out of every block of 250 posts I made, I got back 5 responses.
Yes, that's right, only 5. You make $5.00 in cash, not checks or
money orders, but real cash with your name at #5.

Each additional person who sent you $1.00 now also makes 250
additional postings with your name at #4, 1000 postings.
On average then, 50 people will send you $1.00 with your name
at #4 ... $50.00 in your pocket!

Now these 50 new people will make 250 postings each with your
name at #3 or 10,000 postings. Average return, 500 people =$500.

They make 250 postings each with your name at #2 =100,000
postings =5000 returns at $1 each =$5000.00 in cash!

Finally, 5,000 people make 250 postings each with your name at
#1 and you get a return of $50,000 before your name drops off
the list. And that's only if everyone down the line makes only
250 postings each! Your total income for this one cycle is
about $55,000.

From time to time when you see your name is no longer on the list,
you take the latest posting you can find and start all over again.

The end result depends on YOU. You must follow through and re-post
this article everywhere you can think of. The more postings you
make, the more cash ends up in your mailbox. It's too easy and too
cheap to pass up!!!

If you're really not sure or still think this can't be for real,
then don't do it. But please print this article and pass it along
to someone you know who needs the money and see what happens.

GENERAL STEPS ON AUTOMATING THE PROCESS:

Make any necessary changes to this article as explained in step
(2) and when you're satisfied, save it as a .txt file and import
it into the body of your email or news reader program. This way
you only have to change the name of the news group or email address
for each redistribution.

Valuable tip: And very important for those not too familiar with
email: By all means use a word processor to ensure the article is
composed well, but to ensure people that first read it via their
news reader program see it clearly laid out. Re-format it with a
simple text editor such as "notepad," or "WordPad" if you're using
"Windows 95." Providing the text is clearly visible and does not

scroll into the right margin, it should be okay! Using this procedure essentially means the article will be correctly displayed when viewed through other people's news reader. You can of course check this out for yourself before going on line, by viewing it in your own news reader program.

Next, begin by locating the news groups you intend posting to, Netscape 3.0 or a similar news reader is terrific for this, because you can highlight dozens of news groups all at once, enabling you to distribute your article to 1000's of locations in less than an hour or two. Highlight all news groups you want to mail your letter to (which as you know is done by holding down CTRL while left clicking.) This way you can select multiple news groups in one go, choose perhaps a dozen each time. You will then see all news groups you highlighted displayed in the News groups Field.

Next: select/highlight your news groups, then click "To News" place a sensible title in the "Subject" location, click on "Attachments" where upon another box appears. Locate the file you are going to distribute, click on the file and then click "Open" again click OK; provided you followed these instructions, you should see your file greyed out in the "Attachments" box.
Hit send . . . and that's it.

Repeat the process over and over again by selecting further news groups in multiples of 10's but try to be selective with the groups by posting to high volume locations, and don't choose a subject that appears too flashy, this will only put people off. This is an honest and legitimate way of making a reasonable amount of money, and making it on a regular basis. But only if your message is sincere and clearly understood by others will you succeed.

PLEASE NOTE: This system is based on everyone being honest, but it's all too tempting not to bother mailing out envelopes with dollar bills inside. The success for all participating is dependent upon this taking place and if carried out will mean a 500% increase on your article being redistributed! The system won't work to yours or indeed other people's advantage if you don't follow the procedure. You can however, if you wish to remain anonymous use a pseudonym - but please ensure that your address is correct.

AS A FINAL NOTE: Many business ideas for making money, no matter how well thought out and implemented, simply don't get off the ground. And in most cases is due to advertising costs, but the exposure obtained through the Internet is quite honestly -- pretty awesome, so please study this article carefully taking all the time you want, because the moment you begin participating you will be on track for some serious financial rewards.

By the very nature of the way the system works you may not see the benefits the first week. BUT COMMENCING THE SECOND WEEK, YOUR INTAKE OF MAIL FROM AROUND THE WORLD WILL TRULY ASTONISH YOU!
Please give this some serious thought, because this is one of the few money making ideas that really does work.
The one that sends this file take no responsebility of the contents or substance of this text. The mailer of this text-file are not the author.

1648. All NEW Service for your "PAGER"...

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-19 00:00:00 UTC

ONLY AVAILABLE IN THE:
U.S.A, CANADA VIRGIN ISLANDS, AND PUERTO RICO

BE SURE TO GO TO OUR SITE AND CHECK OUT OUR FREE TRIAL.

Call everyone and tell them to throw away all of your old home, office, fax, pager, voice-mail, and cellular numbers and give them your New "Virtual Office" 800/888 number! The only number any one will ever need.

Are you tired of giving out all of your different phone numbers to everyone? Wouldn't it be nice to be able to give everyone just ONE phone number that will find you anywhere you are? Even out of town, or in a restaurant, or even on the golf course.

Now you can.

We have the answer to all your communication needs. It's called the "Virtual Office".

And this new service is loaded. It comes with features like:

An automated Call Attendant, Live Call Connect (in real time), Fax Sending, Fax Receiving, Even without a fax machine! E-Mail Notification and Delivery, Without a PC!, Outbound calling, Low Cost Long Distance Service, Inbound/Outbound 800/888 Number, Worldwide Call Transfer, Call Forwarding, Call Screening, Full Service Voice Mail, Nation Wide Pager Notification, Conference Calling, Speed Dialing, Auto Dial, Auto Messaging, Temporary Greeting, Unavailable Greeting, Password Protection, Pager Notification, and No Equipment or Software to buy, "Ever".

Priced from $9.95* per month, Plus 10.9 cents per minute per event.

That's less than one phone line would cost per month.

For more information please visit our web sight:
http://www.mynumber.com

* Based on our best priced plan.

SB DX ARL ARLD027
ARLD027 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, The Daily DX, 425DXnews and Contest Corral from QST. Thanks to all.

KENYA, 5Z. Christine, a YL operator, is active from Kiambu as 5Z4LL and is often found on 18145 Khz around 1500z. QSL to Box 14425, Nairobi, Kenya.

MALTA, 9H. 9H0VRZ will be operated by 14 Dutch amateurs from June 21 to July 5. Activity is expected on 80 to 6 meters, using CW and SSB. Operators may also use their own 9H3 calls during this DXpedition.

HUNGARY, HA. Special Event Station HG5UFO will be active on 80 to 10 meters using all modes from June 20 to 29 for the International Exhibition of Space in Budapest. QSL to PO Box 17, Budapest 1456, Hungary.

PANAMA, HP. Bill, WT4K will be QRV as HP3/WT4K using SSB and RTTY from June 23 to 27. QSL to home call.

HONDURAS, HR. After his Panama operation, Bill, WT4K, may be QRV as HR6/WT4K from June 30 to July 4. QSL to home call.

NORTHERN MARIANAS, KH0. Tony, JA6CNL, and Sumy, JA6HBS, will be active as KH0N and KH0/JA6HBS, respectively, from Saipan Island, IOTA OC 086, from June 20 to 23. Operations will be on 160 to 6 meters, including the newer bands, using CW. SSB operation may be found on 80 to 6 meters. QSL both calls to JA6CNL.

US VIRGIN ISLANDS, KP2. Jim, W5ODD, will be QRV as W5ODD/KP2 from June 19 to 25. He plans to be active on CW only and mostly on the low and newer bands. QSL to home call.

SUDAN, ST. Lou, G4OJW, is active from Khartoum as ST2AA. QSL via WB2RAJ.

CANADA, VE. Bruce, N6NT, will be QRV on 160 to 10 meters from the QTH of VY1JA during the Canada Day Contest on July 1.

SOUTH AFRICA, ZS. The Special Event callsign ZS50WRC will be on the air until the end of this year to celebrate the 50th Anniversary of the City of Welkom. QSL to ZS50WRC, Welkom Radio Club, PO Box 30594, Moreskof 9426, Republic of South Africa.

THIS WEEKEND ON THE RADIO. The Kid's Day Operating Event, All Asian DX Contest, CW, and SMIRK QSO Party are scheduled for this weekend. Please see June QST, page 103 for details.

I worked UX0ZZ on 20 meters this evening. His signal was pretty strong 559 or so and very fluttery. I also detected a bit of an echo. I am assuming somewhere in the former USSR. I was hearing eastern Europe at about the same time but none of my maps have UX0 anywhere on them. For anyone else who worked him QSL via N3IRZ.

Subject: *ALINCO* Mailing List (and others)...

Alinco is a mailing list (reflector) devoted entirely
to equipment manufactured and distributed by Alinco, Inc.
of Torrance, Ca 90501.

* equipment, accessories
* repairs, modifications, enhancements
* questions, discussions, etc
* buy, sell, trade, swap

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe alinco

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe alinco

To post items to the reflector, send email as follows:
TO: alinco@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Icom is a mailing list (reflector) devoted entirely
to equipment manufactured and distributed by Icom
America, Inc. of Bellevue, WA.

* equipment, accessories
* repairs, modifications, enhancements
* questions, discussions, etc
* buy, sell, trade, swap

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe icom

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe icom

To post items to the reflector, send email as follows:
TO: icom@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Kenwood is a mailing list (reflector) devoted entirely
to equipment manufactured by the Kenwood Communications
Corporation (Amateur Radio Products Group).

* equipment, accessories
* repairs, modifications, enhancements
* questions, discussions, etc
* buy, sell, trade, swap

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe kenwood

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:

Ham-Books is a mailing list (reflector) devoted to the literature
and periodicals of amateur radio:

* publishers
* magazines
* newsletters
* books
* old and "collector" books
* new book announcements

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe ham-books

To be deleted from the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: unsubscribe ham-books

To post items to the reflector, send email as follows:
TO: ham-books@qsl.net

If you have questions or need assistance contact: k7on@qsl.net

---

Ham-Software is a mailing list (reflector) devoted to software
of all types used for amateur radio:

* logging
* propagation prediction
* digital modes
* award tracking
* commercial, shareware, freeware
* electronic design and simulation
* amateur software development

To be added to the mailing list, send email as follows:
TO: majordomo@qsl.net
SUBJECT:
BODY: subscribe ham-software

To be deleted from the mailing list, send email as follows:

1667. ## ET3YU - LOOKING 4 QSL MNGR

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-21 00:00:00 UTC
From: dragans@eunet.yu
Message-ID: <5ogi0k$fq3$1@SOLAIR2.EUnet.yu>
Source record: 32508

Hello and TNX for reading this.

I'm looking for the QSL manager who will handle the QSL cards for my ET3YU operation.

I was trying to manage QSL-ing but unfortunately I can't manage it any more. It takes time which I don't have.

The person has to have experience as QSL MNGR and he/she must have a valid QSL card exchanged with me. Must have an Internet access.

I'll supply the LOG with all necessary information including the current QSL status. As ET3YU I had more then 14.000 QSO's and have exchanged about 3.000 QSL's.

I'm planing the trip to ET again, that will last about 2-3 weeks, sometimes in October/November. In that matter I'll be glad if the MNGR could manage support. Everything is still sketchy.

Looking forward to hear from you.

Regards,

Dragan Stojanovic <> dragans@eunet.yu

Has anyone sent a qsl card to the Germany qsl bureau?
I need recommendations for sending and receiving qsl card through bureau.
How many IRC"s should I send them to insure return of a qsl card. I
understand Germany return postage is expensive. I made my first Germany
radio contact and station requested to qsl via bureau, so I'm looking for
info. to improve chances I receive card.
Thank you, Kevin KC5MXH

In article <01bc7f07.d9f768e0$234189d0@mypc.tdsnet.com>,
kwoods@sstelco.com says...
> Has anyone sent a qsl card to the Germany qsl bureau?

MANY many TIMES

> I need recommendations for sending and receiving qsl card through bureau.

To send, you can (1) send thru the ARRL outgoing buro. You need to be a
member and the cost is $4 for the 1st 100-150 cards. Or you can send
directly to the German QSL buro.

To get back, you need to be a member of your incoiming buro. In your
case the W5 buro. Contact someone local to you for exact details.

> How many IRC"s should I send them to insure return of a qsl card. I
> understand Germany return postage is expensive. I made my first Germany
> radio contact and station requested to qsl via bureau, so I'm looking for
> info. to improve chances I receive card.

I think you confusing sending direct as oppsoed to the buro. To send
direct, I usually put $2 to cover postage, along with a self addressed
return envelope. BTW, I find $2 bills work very well.

However, since the station requested via the buro, just work it that way.
I have found the the Germans in particular are EXCELLENT QSL'ers. Figure
you'll have one in about 6 months.

The buro works like a giant clearing house. You cards are sent over with
the cards from 100's of other amateurs. They're sorted and distributed
to the various members of the German buro. In return, his card is sent
to the various incoming buros, sorted and distributed. In other words,
it takes alot of time, so be patient.

If you want to see how an incoming buro works, vist

http://www.njdxa.org.

It's the home page for the North Jersey DX Association, who is the W2
incoming buro facility.

Good luck. If you have any questions, feel free to e-mail me. If I
don't have an answer, I'll direct you to someone who does.

SB DX @ WW $OPDX.310
Ohio/Penn DX Bulletin No. 310

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 310
BID: $OPDX.310
June 23, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N2OO, WB2YQH & The 59(9) DXReport, W3UR & Daily DX, AA4US, KP4AM, N4GN, WD4JNS, KH6BZF, AA7VL, K7JJ, NL7TB, DJ5AV & DX News Letter, F5ATD, G3SWH, G4BUE & DX News Sheet, JA1ELY, JA4DND, IK0AZG, SP2FOV, VE9AA, VK9LW and VS6XMT for the following DX information.

3W, VIETNAM. Toshi, JA1ELY, reports the following: After Hiroo's, JA2EZD, XU2A operation, Hiroo went to Vietnam to help setup a new club station, 3W6LI. Hiroo has been showing up on 15m SSB. He will be active on all band either SSB and CW. Meanwhile, Hiroo has a plan to operate from Quan Phu Quoc Island the first IOTA from 3W-land. He may use his own callsign, 3W6ZD or 3W6PQ (applied). Quan Phu Quoc Island is in the Mekong Delta West Group located on the border of Cambodia. No IOTA number is issued. Check your 1997 IOTA Directory, page 63, there are seven Vietnamese groups, all with no IOTA number.
Meanwhile, the "Daily DX" reports 3W5RS has recently been showing up again at the bottom of 20 meters on CW around 1400-1500z.

3Z, POLAND. Special event station 3Z2GD will be active once again to celebrate 1000 years of Gdansk City during the month of July. QSL via SP2FOV.

5X, UGANDA. Mats, SM7PPK, reports that he has received the Ugandian license of 5X1Z. He currently working on his antennas and has something up on 40 meters, so he will be there on CW as much as he can. Other antennas will be up soon. Mats states that there are others active on SSB, so he will mainly be on CW for the time being. QSL via SM7PKK: Mats Persson, Zenithgatan 24 #5, SE-212 14 Malmoe, Sweden (de Mats.. Please try to forget my old address this time around or your QSL will be delayed at least 3-4 months extra!!!)

8P, BARBADOS. The "DX News Sheet" reports Enno, PA0ERA, will be active from July 3-16th, during a holiday from Holetown on the West Coast. This

will be a CW only operation mainly on the WARC bands (wire antennas). Enno will be on 6 meters (IC-706 and 4 el yagi), possibly with a 6m beacon.

9G, GHANA. PA3AWW will be active now until the end of 1997 as 9G1AA. He is currently working at the Dormaa Hospital. Activity will be mostly CW. The callbook address of PA3AWW is wrong, so QSL to: H v Dousterhout, Bosbesplein 15, NL-3355 SG Papendrecht.

9M6, EAST MALAYSIA (SPECIAL EVENT DXPEDITION). A special event station will be active in Sabah to celebrate the Grand Opening of "Hillview Gardens", a resort with a Ham Radio theme. Bob, N2OO, reports this is a life-long dream of Alfons, 9M6MU, and Doris, 9M6DU. That becomes a reality this August. The special event DXpedition will be operational from Hillview Gardens August 4-23rd, signing with a special callsign (to be announced at later date). Operations will be on 40-10 SSB/CW including WARC bands for this initial operation. Operators as of this time are: Bob, N2OO/9M6OO; Alan, VS6KY/ZL1TX (ex-VS5TX) and several local 9M6 operators. All QSLs will go via N2OO. Hillview Gardens used to be Alfons and Doris' home. Last year, Alfons and Doris began a project to convert the home and surrounding property into a resort. It includes a 50 ft. swimming pool, food, beverage and entertainment areas; 20 chalets (rooms), a new 85 ft. tower and hamshack. Please send any inquiries directly to Bob's, N2OO, E-mail address at: CQPINEY@worldnet.att.net

BY, CHINA. "The 59(9) DXReport" states Simonetta, IV3FSG, will be in Beijing July 9-28th, and hopes to be active from a club station, possibly on RTTY.

CY9AA, ST. PAUL ISLAND (UPDATE AND REMINDER!). This DXpedition starts Thursday, June 26th (complete details can be found in OPDX.303). The CY9AA gang is very pleased to announce the addition of Tom Taormina, K5RC, as their "North American HF Pilot Station". Tom brings with him many years of HF DXing and will most certainly prove to be a great asset to the CY9AA gang. Please send pertinant comments to Tom (which will be relayed to the DXpedition team through various means) via E-mail: TOMK5RC@aol.com

HG, HUNGARY. Be looking for special event station HG5UFO to be active on 80-10 meters on all modes now until June 29th. Activity is in celebration of the International Exhibition of Space in Budapest. QSL via P.O. Box 17, Budapest 1456, Hungary.

HZ1AB WEB HAS MOVED. HZ1AB has moved to a new provider. There is lots of good news regarding the station's continuing operation. Also, photos and QSLs have been added. Check out at: http://www.garlic.com/~k7jj/hz1ab.html

IOTA NEWS.....
Be looking for JA4DND/4, JI4POR/4, JM4BPV/4 and JM4MAQ/4 from Oki-Archipelago (AS-041), starting June 28th (at 0700z) throughout June 30th (0100z). Activity will be on 160-6 meters SSB/CW. Operations

will be mainly on the IOTA frequencies plus 7006.7045, 10112, 14026, 14160 and 21016 kHz. QSL via homecalls.

Jim, G3RTE, and Phil, G3SWH, will be activating St. Nicolas Island in the Glenans group, IOTA EU-094 (DIFM AT-010), between Saturday 28th and Monday 30th June 1997. They plan to run two stations simultaneously with F/G3RTE/P on SSB on the usual IOTA frequencies and F/G3SWH/P on CW on all bands 80 to 10 meters. QSLs for both stations will be handled by G3SWH: 21 Dickensons Grove, Congresbury, Bristol, BS19 5HQ, UK. or via the RSGB bureau.

OH0, ALAND ISLANDS. Tim, N4GN, says he will be active as OH0/N4GN along with OH1NX and OH2BH and will arrive on the Aland Islands on Monday, July 7th. The group will put two stations on the air for the deserving. The operation will be carried out from the famous OH0W site with stacked beam antennas and a clear horizon over the open sea in all directions. There will be two FT-1000MP stations with Alpha 91B amplifiers on the air using the following suggested frequencies:
CW: 3502, 7002, 10101, 14024, 18074, 21024, 24894, 28024 and 50104 kHz
SSB: 3795, 7045, 14195, 18115, 21295, 24935, 28495 and 50110 kHz
QSL via Tim Totten, N4GN (ex-KJ4VH), 8309 Dawson Hill Road, Louisville, KY 40299-5317, U.S.A.

OJ0, MARKET REEF. The OH0 group (mentioned above) will be joined by OH1VR, OH1RX (ex-OH1NYP), OH3FT and OH0RJ on July 10th, when the Finnish Coast Guard will transport the entire group to this barren rock between Finland and Sweden. The stations will hit the airwaves late on Thursday evening, July 10th. OJ0/OH1VR will be active in the IARU Radiosport Championship and the OJ0/N4GN call sign will be used to hand out elusive OJ0 QSOs before and after the contest and also on the WARC bands during the entire weekend. A special effort will be made to activate 6 meters during the season of sporadic-E. The team will also be active on RTTY. The operation is limited to 6 kW of generator power. The same frequencies as OH0/N4GN will be used. The operation will close down on Monday, July 14th. QSL to OJ0/OH1VR via OH1VR Seppo Sisatto, Lansirinteenkatu 23, 33400 Tampere, Finland. QSL to OJ0/N4GN via Tim Totten N4GN (ex-KJ4VH), 8309 Dawson Hill Road, Louisville KY 40299-5317, U.S.A.

QSL INFO AND NEWS......
GianFederico, IK0AZG, QSL Manager of special event station IR0MFP (Millennium For Peace) states he is still waiting for QSLs to be printed. IR0MFP and several stations qualified for the new certificate "2000: Millennium for Peace" (details can be found on the 425DX Awards page at http://www-dx.deis.unibo.it/htdx.

Gene, AA4US, informs OPDX that he is now the QSL manager for Atson, V63BR.

John, AA7VL, provided OPDX with the following update to QSL Didier, FK/F5PXQ. Didier is now giving out a local address to QSL to: Didier Lavisse, Caserne Normandie, B.P. 12, 98842 Noumea Cedex, NEW CALEDONIA. However, Didier wants people to know that $1.00 is equivalent to 100

XPF, and that stamps for North America cost 130 XPF. One green stamp is not enough!

TM0, FRANCE. Special event station TM0VER will be active on all HF bands plus 144 MHz from June 28th to July 7th, CW and SSB. The station will operate from the "America-Gold Beach" Museum in Ver sur Mer (Calvados), on the channel coast of Normandy, FRANCE. The station commemorates the historical flight of R. E. Byrd, of polar fame, between USA and France in 1927, which ended in this village after a forced landing on the sea. A handsome QSL card will be printed to confirm the QSOs made with this station. Please send your card with details of the QSO either via Bureau (QSL Manager F5UOW) or direct to: A.R.S TM0VER, The AMERICA - GOLD BEACH MUSEUM, 2 Place Amiral Byrd, F-14114 VER SUR MER, FRANCE (Please for direct QSLs send a self-addressed envelope plus two International Reply Coupons "IRCs".)

USI NEWS. The United States Islands Awards Program (USI) is celebrating its 3rd anniversary, and over 1000 state islands have been activated. The special event station VY1USI will be used before and during Canada Day Contest from Yukon River Islands starting 1700Z June 30th. On July 2nd, VE7USI will be on from several islands in Atlin Lake. QSL to: John Reisenauer, NL7TB, USI Contest Mgr./Spec. Events Coordinator, 23406 East Kennedy Rd., Benton City, WA 99320 USA

UTC CORRECTION AND LEAP SECOND ADJUSTMENT. Well known propagation guru Lee, KH6BZF, would like to remind\inform all amateurs of the follwing: "Master clock pulses used by WWV, WWVH, WWVB and the GOES satellite time code transmissions are referenced to the UTC time scale. Occasionally, one second is added to the UTC time scale due to the slowing of the revolutions of the Earth. A positive leap second will be added beginning at 23-hr 59-mins 60-secs UTC on June 30th and ending at 0-hr, 0-min, 00-secs UTC on July 1st." (This is something your watch watches for...please pass it the word!..... ALOHA & Mahalo, Lee "KH6BZF REPORTS")

V73, MARSHALL ISLANDS. The JARL Kyoto Club celebrated the 50th anniversary of its foundation recently, and in celebration, they have decided to go on a DXpedition/vacation to V7 in August. Look for them to be active from August 6-14th, from Majuro Island (OC-029). Look for the following operators with callsigns to be active: JA3ART/V73AR, JA3MM/V73MM, JH3QNH/V73NH and JA3YAQ/V73YAQ. Activity will be on 160-10 meters (including the WARC bands) with operations on CW, SSB, RTTY, and 29 MHz FM. QSL via JA3OIN (CBA).

VK9W, WILLIS ISLAND. Rick, VK4LW, reports the ODXG will be operating a mailing list for their up and coming Willis Island VK9W(?) Dxpedition. Information on how to subscribe to the mail list can be found on their WEB page at: http://www.keylink.com.au/odxg. The ODXG pages have been updated with lots on new stuff.

VR97 & VS97, HONG KONG. Most DXers (if not all) know by now that Hong Kong will become a Special Administrative Region of the People's Republic of China after the transfer of sovereignty from UK to PRC on July 1, 1997.

Charlie, VS6XMT, states, "To commemorate the change over, special event stations VS97SAR (June 28-30th) and VR97SAR (July 1-2nd) will be active on the bands. Rumors say that Hong Kong DXCC status will change to a delete country!?? Perhaps this will be the last chance!?? QSL to VR2XRW: Mr. Logan Chan, PO Box 80312, Cheung Sha Wan Post Office, Kowloon, Hong Kong".

VY, CANADA. Be looking for Bruce, N6NT, to be active from the Yukon and signing VY1RAC for the Canada Day Contest July 1st. Operations will be on 160-10 meters from VY1JA's QTH.

ZF, CAYMAN ISLAND. A group of South Florida DXers will operate from Little Cayman Island (NA-016, CQ-08, ITU-11, Grid-EK99), July 10-15th. The four Southfloridians will operate during the IARU HF Championship signing ZF2DN/ZF8, and the CQ VHF contest signing ZF2PU/ZF8. Before and after the contests, they will sign indivudual calls as listed below. The operators are: David - ZF2DN/ZF8 (QSL via KP4AM); Bob - ZF2DE/ZF8 (QSL via N4BP); Bruce - ZF2PU/ZF8 (QSL via W4OVU); and Julio - ZF2JS/ZF8 (QSL via WD4JNS). The group plans to operate all bands and modes, 160-6 meters, CW, Phone, RTTY and QRP.

1679. DX Packet Cluster Question

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-23 00:00:00 UTC
From: Herb Rosenberg <rosenbeh@netsoft.com>
Message-ID: <01bc7ff4$8248fb20$0eae7ecc@rosenbeh.netsoft.com>
Source record: 32272

I am logging into a 2 meter DX Packet Cluster in Southern California. (N6HVZ 145.605).

I have noticed that in the evenings I seem to only get DX alerts from other W6 callsign stations, but during the day, I receive DX alerts from other stations all over the world.

In others words, at 10:00pm local time, I will receive an alert from N6ABC regarding hearing VK0ZZ.

But in the morning and daytime I get an alert from I1XXXX regarding hearing ZS6ZZ, etc.

Why is that? Is there anything I have configured wrong? Any advise or further explanation of how this works would be appreciated.

Thanks and vy 73's.

Herb - KG6OK

1680. FT5ZG LOGS ANYONE?

1681. VS6DR - Phil Wight - a DX Legend

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-23 00:00:00 UTC

The following was prepared by Fred Laun/K3ZO. For those newer DXers who may have never known Phil Wight VS6DR/W5UHK, I think you'll enjoy reading the story. The world is now a little bit worse off that Phil has gone silent key.

73, Sandy W7BX

==========

PHIL WIGHT, VS6DR -- A DX ORIGINAL
by Fred Laun, K3ZO

It was with great sadness that I put down the telephone on Saturday morning June 7 after having just been informed by Chester Lunsford, XV5AC/W4EVG, that Phil Wight, W5UHK/VS6DR, had died that morning at the age of 57.

I hasten to add that there is a lot about Phil that I don't know and probably a lot that I have forgotten too, and there are probably others around who could fill in many other details, but here goes:

I first got to know Phil in 1968 when I was assigned by the U. S. Information Agency to the U. S. Information Service office in the city of Chiang Mai in Northern Thailand's Golden Triangle area. Though amateur radio was nominally illegal in Thailand in those days, thanks to the research carried out by another DX'er who I have really been missing for the past 10 years, Don Riebhoff, K7ZZ/HS3DR/HS4ABM, who was assigned to Thailand several months before I was, I knew by the time I was ready to ship my stuff to Thailand that in fact it was possible to get on the air there, and so I put a Drake line and NCL-2000 amplifier in my household effects shipment to Chiang Mai, along with a 14AVQ vertical and odds and ends of coax and wire.

Sure enough, through the good offices of the late Thai Police Lieutenant Chankij Boonyaratvej, HS1CB, I was issued the call sign HS3AL by the Society of Thai Amateur Radio (STAR) of which he was President, and once my gear arrived I put the vertical up on my house in Chiang Mai and I was on the air. I noticed at once that one of the more active stations in the area was one VS6DR out of Hong Kong. Since HS1CB had asked those of us operating from Thailand to stay on SSB, since he was not about to try to tune through the CW band to try to find an HS station that might be operating there when on SSB a voice provided instant ID of the 15 or so of us that were privileged to be operating from Thailand at

the time, an awful lot of evening on-the-air time was spent just rag chewing in round tables on 20 meter SSB with other stations in the area, most prominently VS6DR, who styled himself as the "biggest DX'er in the Orient" not because his country total was the highest -- though he wasn't far behind the leaders -- but because his approximately 500 pound bulk cut an imposing figure at radio club meetings in the area. He even topped the famous "Big John" Van Lear, VE7IR/YB0AAA -- another good friend who, sadly, has passed on since -- who only ran to about 330 pounds or so.

Phil was an excellent operator and at that time was one of the high scorers in the area in many of the major contests. Don Riebhoff had already visited Phil in Hong Kong so it was only natural that the first vacation I took after arriving in Thailand was a trip to Hong Kong, where Phil met me at the airport in his chauffeur-driven Rolls Royce with the specially-outfitted back seat to allow Phil's bulk to be transported around town in regal comfort. I sat up front with the chauffeur, and we headed for Phil's town house apartment on Victoria Peak. Phil leased the whole top floor of about a four-story building at the very top of Victoria Peak. One of the first things we did on arriving at Phil's place was to go to the roof where I was given a guided tour of the VS6DR rooftop antenna farm -- a tribander and wires at the very top of the local topography, with an unobstructed 360 degree view of the horizon. I watched in amazement as aircraft lining up to approach Hong Kong's Kai Tak Airport circled the colony at altitudes well BELOW the altitude we were standing at.

The Victoria Peak residence came with its own Phil Wight story. Hong Kong was under rent control at the time, and so Phil's Chinese landlord was forbidden to raise his rent unilaterally. When Phil initially moved there the rent was fairly expensive as Hong Kong rents went, but once the real estate market took off -- too much money chasing too few available apartments -- Phil ended up with a real bargain, and refused to accept a significant rent increase. Thus the landlord took the only legal step available to him -- he tore the building down and built a new one. Phil eventually had to move downtown to a much less desirable DX QTH.

Phil was an excellent cook and as I recall he whipped up a first-class Mexican dinner for the two of us, and in a conversation that went well on into the night I began to learn a little about my fascinating host.

My first surprise was that Phil was actually a couple of years younger than I was -- I was only 31 at the time -- and yet he was already an experienced hand in the Oriental colony's business circles. He was the Chairman and CEO of Pacifica Products, Ltd., and, despite the fact that it was still about three years before the USA recognized the Peoples' Republic of China, Phil was already doing big business with the "mainland".

Phil was one of those people you meet in your lifetime who had absolutely no fear of failure. He was willing to try anything that seemed promising, and his business sense proved to be right on the money most of the time. Though a congenial and gracious host, he evidently could throw his considerable bulk around in the business world when he had to. He had begun his working life as a bass player with a band in a Las Vegas casino, and somehow found his way to Hong Kong while still a very young man -- I never heard exactly how.

He was a specialist in finding a business "niche" where there was a demand and no one was fulfilling it. I am sure I don't know the half of what his dealings with the PRC amounted to, but one big profit center was his purchase of human hair from PRC traders which eventually found its way to hairbrush manufacturers in the States. (ed: and for human hair wigs to Europe).

In succeeding years Phil even utilized his knowledge of Las Vegas to charter aircraft so that high rollers from Hong Kong's business elite could travel non-stop to Las Vegas in style and gamble to their hearts' content. However that business generated so much loose cash that some of Phil's employees were tempted to get light-fingered, and he eventually dropped that line of endeavor.

Of more interest to me was the fact that Phil was astute enough to obtain for Pacifica Products the exclusive franchise for all of China from several Japanese radio manufacturers, who had no objection to granting such a franchise since everyone knew that the Chinese Government couldn't afford to buy modern radios anyway. A few years later when the Peoples' Liberation Army modernized its communications systems, Phil literally "cleaned up" with the commissions he received.

My days during my stay in Hong Kong were spent using Phil's downtown office as headquarters for my foray into Hong Kong's commercial districts where I had several suits made to order for a pittance of what they cost in the states, and otherwise watched in fascination as Phil spent his days signing contracts and business letters put in front of him in myriad folders by his faithful secretary Ceci, whom he later married.

On one of the evenings I was there he took me over to the China Fleet Club where the Hong Kong Amateur Radio Transmitting Society was having its weekly session of the DXers' Liars and Barfly Society -- not a real club meeting but sort of a "can you top this one?" bull session complete with plenty of Gilbey's Gin and Schweppes Quinine Water flowing as the tropical night went on.

Also by this time Phil had begun a ham radio magazine in Hong Kong called OHM (for Oriental Ham Magazine), which gave a number of us expat hams in the Orient a chance to become authors for the first time in our lives. There was no pay involved, but it was still nice to see one's name on the byline of an article which was

circulated all over the world. Imagine my satisfaction when an article I wrote about the ITU banned country list actually drew a response from Dick Baldwin, W1RU, then the ARRL's Assistant General Manager (and now, of course, the President of IARU).

It was not long after my return to Thailand that Phil began making ever-more-frequent visits to Thailand, and if Don and I could get to Bangkok on such occasions we would. Most of our time there was spent on guided tours of Bangkok night life provided by the radio club President Lt. Chankij, who of course as a police detective knew where the action was. This being a family list, I will go into no graphic descriptions of what happened, except to say that Phil was an enthusiastic participant in whatever it was that we did on such occasions, despite the skepticism of some business owners as to whether his size would allow him to fully participate in all of the evening's activities.

Following our diplomatic assignments in Thailand, both Don Riebhoff and I were transferred to Viet Nam, where there was a war going on at the time and the U.S. Government made it rather clear that if you wanted to continue to have a career in the U. S. Diplomatic Service, a tour as a civilian advisor in Viet Nam would have to be served eventually -- why not now?

Naturally Don and I started working on getting ham radio legalized in Viet Nam and OHM Magazine was a big ally in our efforts, lending its pages to whatever we wanted to write about what we were doing. Don and I met Chester, W4EVG, who was already in Viet Nam when we arrived, literally by following the coax lead-in from a monstrous 4-el quad on top of an American Government apartment building to the apartment where it entered the building. Chester, who was to have the major role in establishing the first legal ham station in Viet Nam in many years, was a new enlistee in the "Phil Wight Fan Club" and in Phil's final years he had no more loyal friend than Chester, who held Phil's hand by e-mail more than the rest of us in order to try to keep Phil's mind off his health problems.

It was not long after our arrival in Viet Nam that Phil began making Saigon a regular stop on his business travels throughout the area. I'll never forget the time that Phil came down to Saigon on his way to the very first Southeast Asia Net Convention in Penang, Malaysia, so that we could all fly over to the Convention together. We were scheduled to fly Air Viet Nam to Bangkok, with a stop in Phnom Penh, and, after overnighting in Bangkok, to take a Malaysia-Singapore Airlines flight to Penang. We got to the Air Viet Nam check-in counter at Saigon's airport only to find that Phil was carrying no health card showing that he had been vaccinated against yellow fever. Thailand was rather strict at the time about not allowing people to enter its territory from war-torn places like Viet Nam without health certification, and Air Viet Nam was not willing to let Phil board the flight without one, since they might

be forced by Thai authorities to return him to Saigon from Bangkok free-of-charge. Never in my life have I argued so tenaciously with airline officials as on that occasion; we couldn't conceive of being at the SEANET Convention without our big friend. Finally I got the airline to produce a release-from-liability form -- which it turned out they had all along -- and once Phil signed it we were on our way. Oh, yes -- the Thais never asked him about his health!

On our stop at Phnom Penh airport we stood under the wing of the 727 on the tarmac waiting until the local passengers were ready to board -- since there was no power truck keeping the plane cool while it was on the ground -- fantasizing about one day getting Cambodia on the air as well. Not long thereafter, "Big John" Van Lear -- who was the one who organized this first SEANET Convention -- managed to accomplish that feat.

We stayed that night in the Monthien Hotel in Bangkok. My memories of what happened that night are fuzzy, but the next morning I joined Phil in his suite for breakfast, which he ordered delivered to his room, and I remember that for the first time in my life I saw one of those extra-long shoe horns which was how Phil got his shoes on in the morning. Having expanded my girth considerably in recent years, I now utilize such an apparatus myself.

Off we went to Penang and the convention, and we had a great time -- all 17 of us. Ed, W2MIG, who was 9V1QD at the time, was another one of the participants.

I left Viet Nam just after Chester had managed to get the first legal ham station going there, but Don and Chester stayed on, and Phil Wight got very interested in getting the Spratly Islands on the air. He devoted several issues of OHM Magazine almost single-mindedly to the effort, and even went along on the first, abortive DX-pedition, though he had to stay on the mother ship because if he had tried to get off on the dinghy it probably would have tipped over. On succeeding efforts, including the successful one, Phil was satisifed to cheerlead on 20 meters from his shack in Hong Kong, but there is no doubt that his enthusiasm helped drive the effort to its eventual success when Chester and Don along with WB4UZP, N5TP and "Scotty" -- WA4??? -- made several thousand QSO's from one of the Spratlys.

I had only had sporadic contact with Phil after that until last summer, though mutual friends had told me about encountering Phil in his electric vehicle prowling the exhibit floor at electronics conventions. Among those keeping me informed of Phil's activities was Phil's long-time accountant, Vince Chinn, K6KQN. Then last summer, inasmuch as I was going to be in the San Francisco area for the World Radiosport Team Championships anyway, my XYL Somporn and I accepted a long-standing invitation to be house guests of Phil's. By this time Phil had been having serious health problems for years, and though Pacifica Products was still going great guns in

Hong Kong, Phil was a virtual shut-in at his house in Mountain View. Immobile as he was, his old brain was still racing ahead as always, and it wasn't long before I had forgotten his infirmities as we got caught up in a passionate review of what had happened since we had last seen each other in Bangkok in 1979, during my second tour of duty in Thailand. I am really pleased that my XYL Somporn got to meet him and see what a great guy he was.

One final anectode illustrates the way Phil went about doing things in his own original way. I happened to remark that his home telephone and fax numbers both seemed like the kind of numbers that would be assigned to the switchboard of a major business or government establishment -- numbers like 568-9600 and 568-9400. He answered that when he had moved into the house he had programmed an automatic dialler to dial every number ending in "double-zero" in the area, and finally he found two such numbers where an automatic recording informed him that "the number you have dialled is no longer in service." He then asked the phone company for those numbers and got them.

Unfortunately our stay as Phil's house guest was all too brief, as the very next day Phil was ordered by his doctor to go back into the hospital. After I left for the WRTC festivities that day, I never saw my friend in person again, though Somporn stayed at the house that day and accompanied him to the hospital. I now regret not having made a final effort to get by the hospital to see the old boy.

A real original has passed from among us, someone who vastly enriched the lives of every one he touched. RIP, Phil Wight!

Very simple Herb. Somewhere in one of the interconnected nodes, someone
is feeding in dx spots from the Internet DXcluster, hence the foreign
station DX spots. At other times, that feed is either blocked or not
operational. The ability to do this is configured at the sysop level
(for the most part) and affects all connected nodes. You are doing
nothing wrong.

Quite frankly, I think the foreign spots are a pain in the buns. Chances
are what they hear, you can't anyway. Same for getting W6 spots here on
the NE Dxcluster.

Anyway, that's the story, as they say. There is an internet address for
the dxcluster, but I am afraid I don;t know it

Boy do I agree with the above... I wish whoever was putting those reports of G stations being heard by DL stations would stop... It is the biggest waste of bandwidth I've ever seen... And on an already slow network...

I also agree with the W6 spots for the east coast and visa versa but I I've heard people say " it allows you to watch the band change as it moves across the U.S." I personally would like to see nothing being reported east of the Rockies but then who am I... Just another 30 db down dx'er...

One contributor must be the fact that 10 pm in W6 is early
morning in Italy and there are fewer people likely to be
logged in then - not to mention the fact that there might
not be suitable propagation to ZS at that time.

Try logging in at 4 a.m. CA time and see how many US spots
you see vs the number from European, where it is mid-day.

DX Bulletin 28 ARLD028
From ARRL Headquarters
Newington CT June 26, 1997
To all radio amateurs

SB DX ARL ARLD028
ARLD028 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, the Daily DX, QRZ DX, the DXNS and Contest Corral from QST. Thanks to all.

BARBADOS, 8P. Enno, PA0ERA, will be active from July 3 to 16 from Holetown on the west coast of Barbados. This will be a CW only operation, mainly on the newer bands. He will be on 6 meters, possibly with a 6 meter beacon as well.

FRANCE, F. Special Event Station TM0VER will be QRV on all HF bands and 2 meters from the American-Gold Beach Museum on the channel cost of Normandy from June 28 to July 7 using CW and SSB. This operation is to commemorate the historic flight of Admiral R.E. Byrd between the US and France. QSL via F5UOW.

ENGLAND, G. Special Event Station GB2CFG will be QRV on all bands using CW and SSB on June 28 and 29 to commemorate the 25th Anniversary of Guiding in Chandler's Ford. QSL via bureau.

SVALBARD, JW. Leif, LA2PA, will be operating JW2PA on CW and SSB on 80 to 10 meters. QSL to homecall.

PUERTO RICO, KP4. Terry, W5XJ, will be QRV from June 25 to July 16 as NP3G, using CW mainly on 40 meters. Karen, N4YGP, will be there as NP3F. QSL to their home calls.

NORWAY, LA. Unni, LA6RHA, will be QRV as LG5LG on June 27 to 29 from the joint station owned by Norway and Sweden at Morokulien. She may also use the callsign SJ9WL. QSL to homecall.

POLAND, SP. Special Event Station 3Z2GD will be active to celebrate 1000 years of Gdansk City during the month of July. QSL via SP2FOV.

CANADA, VE. The World Police and Fire Games will be held this year in Calgary, Alberta. Amateur Radio operators in Calgary may use the special prefix CG6 from June 27 to July 4 to commemorate this event.

HONG KONG, VR2. Special Event Stations VS97SAR and VR97SAR will be active until July 2 on all bands to commemorate the return of Hong Kong to China. QSL to Logan Chan, PO Box 80312, Cheung Sha Wan Post Office, Kowloon, Hong Kong.

NAMIBIA, V5. Charlie, W0YG, plans to be active as V5/ZS6YG on 160 and 80 meters in July and August. QSL to homecall.

NIUE, ZK2. Paul, ZK2PJ, and Janice, ZK2JJ, will be QRV for the next two years. QSL both calls via VK4AAR.

THIS WEEKEND ON THE RADIO. It's that time of the year again! Field Day operations should keep you busy this weekend. Please see May QST, page 109 for details.

Hello all,

I'll be calling CQ on 50.400 AM all this weekend.

Was a bummer I missed out on lastnight's good opening.
Need to check the radio before I go to bed.

Sat I'll be on from 10:00 pdt - 22:00 pdt
Sun from 10:00 pdt - 18:00 pdt (later if there's openings)

Hope to hear from you...

P.S. If you have not checked out my 50AM web page, please do so......

1706. DX Cluster and EGOspots vs. DXspots

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-27 00:00:00 UTC
From: la8ak@online.no
Message-ID: <33b422f8.4488251@news.online.no>
Source record: 32299

Hi
we have a problem that several OZ-stns send
"ego" announcements instead of DXspots:
ex.:
DX 144300 LA8AK JO38xc QRV for contest
during VHF/UHF contests we have many of these ego-spots,
but few dx spots on the screen
a much better idea is to send a regular DX spot
for a station you work

To prevent this OZ-rubbish from spreading through the
network sysops set the command (max hop ?) to 3-4
DXclusters, and we receive minimum amount of
DXspots from Europe continent, which in my case would have
been desirable to see.

Jan-Martin N&#65533;ding, ** My email address: la8ak@online.no **

Not entirely a "rec.radio.amateur.dx" topic, but old time DXers may want
to peruse the old time rigs for nostalgia's sake while the sunspots
revive.

Included are: Heathkit, Military Radios, National, Collins, Swan,
Vibroplex and others at URL:
http://pw2.netcom.com/~ac6v/pagex.html

Other goodies include:
Antique Radio Dealers & Repair Via PC Dealer Online
Ham AM Radio Page -- With Bulletin Board
Marconi Centennial Celebration
100 Years of Radio
Radio History Society
History of AM/FM/TV Old Time Stations
United States Early Radio History -- Origin of US callsigns
History of Radio Transmission -- From Spark To Spread Spectrum!!
History Of Teletype Development -- Via K7ON
Nikola Tesla Page -- Zap Zap
History of Defence Electronics
BoatAnchors -- From The Days Of Yester Yore-- Old Time Ham Radios!
BoatAnchors FAQ -- Don't Miss This One.
Heathkit Virtual Museum
Heath Kit Mail List Reflector
Antique Wireless Association, Inc. -- Electronic Communication Museum
Antique Radio Page -- By Don Adamson - Over 170 Exhibits!
200 links To Antique Radios -- From Antique Radios Classified
NJ Antique Radio Club Home Page -- Excellent History Pages
Phil's Old Radios, -- Very sophisticated and graphically beautiful site.
The Antique Radio Collector -- Web Site Directory

1708. Crozet Island

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-29 00:00:00 UTC
From: jeff@jehosophat.com
Message-ID: <slrn5rd680.2v3.jeff@photuris.jehosophat.com>
Source record: 32301

Has anyone found a Web site for the FT5WE operation on Crozet Island?

Thanks.

We see spots here from Europe on VHF, UHF, and up. One guy's
rubbish may be another guy's gold. Instead of limiting hops, let the users use
the SET/FILTER command to filter what they don't want to see.
Sounds like your sysops need to read the manual. Nobody wants
to see EVERYTHING on a cluster.

Herbs problem is probably nodes going up and down, and nodes that are on
the cluster only at certain times. As Steve says, Herb, you aren't doing
anything wrong.

Dennis, did you ever talk to the guy who runs your node about filtering spots ?
If you have and he wants to see everything, you can use the SET/FILTER command
to filter out a lot of the stuff you don't want to see.

tell the German/Dutch/French sysops! Problem is that many dxspots sent
from south stops before they reach Scandinavia. Some German Friends
told me that it was difficult to spread announce (A/F) over wide
area, because of this limitation, dxspots sometimes goes farther, so
they send "xmas and new year greetings" as ego spots

I am not sure exactly what can be filtered, but I wish to have all dx
spots from 1800-24192000kHz (1.8MHz-24GHz), because I mainly operate
CW/SSB on VHF/UHF/SHF and when condx are bad I work lower frequencies
I use DXcluster as a warning for possible VHF/UHF condx

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 311
BID: $OPDX.311
June 30, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & The 59(9) DXReport, W3UR & Daily DX, N4ZY, W4NS, WA6YOO, K7DBV, NL7TB, KD8JN, DJ5AV & DX News Letter, DL2HEB, DL8OBC, F6AJA, G4BUE & DX News Sheet, JA1ELY, JA4DND, JH4RHF, LU6BEG, OH1NOA/OH0NOA, RA1QHJ, RA3AUU, VE6JO, VK4AAR and ZL3RG for the following DX information.

3RD ANNUAL RUSSIAN IOTA/DX CONVENTION will be hosted by the Russian Robinson Club in association with Russian Contest Club and Soyuz Radiolyubitelej Rossii (the Union of Radioamateurs of Russia) on August 29 to 31st, 1997, in Voronezh City, just 300 km south-east of Moscow. The announcement of details will be sent to all OPDX InterNet Subscribers as an additional bulletin.

3W, QUAN PHU QUOC ISLAND, (New IOTA - VIETNAM). By the time you read this, Hiroo, JA2EZD, should be active as 3W6ZD or 3W6PQ. Hiroo was to fly to Phu Quoc Island on the afternoon of June 29th with his TS-850S and tri-band yagi. He will operate all bands including the WARC bands. There is only one flight in a week, so Hiroo will stay and operate until 6 July.

5A, LIBYA. The "DX News Sheet" reports Charly, OE3KLU, and others from Icom-Austria Radio Club will be active from August 28th to September 7th, as 5A28. The group has applied for activity on 160-10 meters and also 6 and 2 meters.

FG, GUADELOUPE. Alain, F2HE, will be active as FG/F2HE now until September 25th. He activity will be mostly on CW. He has plans to try to activate some of the neighboring islands.

HF PROPAGATION QUESTIONS. Lee, KH6BZF, propagation guru who writes articles for several DX publications and magazines, informs OPDX that he is willing to receive questions from readers who send their questions to Lee's E-Mail address. He is willing to answer those questions direct

or through his publications to inform all readers. Lee states, "If I don't know the answer(s) I will do my best to find out and respond. Fair enough?"..... 73, Lee "KH6BZF REPORTS" at E-mail: leewical@aol.com

HL, ANMYU-DO ISLAND (South Korea). Operators HL1TUE, HL1TMU, HL1MKT and one other will activate this Korean Island (IOTA AS-080) as HL0N/3, from July 4-7th. Activity will be on CW/SSB on 40, 20 and 15 meters. QSL via HL1TUE. Via the bureau at: CPO BOX 162, SEOUL KOREA. Or direct to:
120-110
Eom,Sin-Jo (HL1TUE)
21st. Century Const. Research Lab.
Dept. of Architectural Eng.
YONSEI UNIVERSITY, 134 SHINCHON-DONG,
SEODAEMUN, SEOUL, KOREA

IOTA HUNTER'S NEWS.....
Matthias, DL4OCL, will travel to Poel Island (IOTA EU-098, DID O-002) and join the RSGB IOTA Contest fun (July 26 to 27) as DL4OCL/p on CW and SSB. QSL to DL4OCL via bureau or direct to: Matthias Deutscher, P.O. Box 100412, D-30942 Ronnenberg, Germany.

Felix, DL8OBC, will again sign DL8OBC/p from Helgoland Island (IOTA EU-127, DID N-014). Activity can be expected beginning during the IOTA Contest weekend and will last approx. one week. QSL to DL8OBC via bureau or direct to: Felix J. Riess, P.O. Box 1253, D-30984 Gehrden, Germany.

1996 IOTA Contest winners OH1MDR, OH1NOA and OH1MM will once again activate Sandstrom Reef (EU-96) for the IOTA Contest. The group will probably use the call sign OH0MDR/1. Special attention will be given to the IOTA hunters in NA and JA. Their one target is to make even more than last year's 2700+ QSOs. QSL via OH1MDR.

Frank, YJ8AA, has had delays getting the boat overhauled, but should have it ready by the end of June for his departure soon for "The Shepherds Islands" (OC-111). QSL via VK4AAR direct only.

Alex, VE2AFC, will be active as VE2AFC/VE2 from Coudres Island (NA-128) sometime between July 15th and August 15th.

ES1RA/1, ES1QD/1 and ES1OX/1 will be active from Aegna Island (EU-149) July 16-23rd. The group will then be active during the IOTA Contest as ES1QD/0 from Muhu Island (EU-034).

Ulli, DL2HEB, will use the OZ/DL2HEB/p callsign from Laes Island (EU-088). He will be active from July 14th to August 3rd. Operations will be on 80-10 meters CW, but check the IOTA and QRP frequencies, especially 14.040 and 14.060. He does plan to take part in the IOTA Contest. QSL to DL2HEB via the bureau.

Hiromi, JA4DND, reports his plans to Oki Archipelago (AS041) were cancelled because of a big typhoon which hit this area. They will go to Oki the next chance they can in the next few months.

Evangelos G Papapanagiotu, reports that during the IOTA Contest the special callsign J48LSV will be active from Lesvos Island - Greece (EU-049). The operators (members of the Amateur Association of North Aegean) are expected to be SV8CRI, SV8DCY, SV8DTL, SV8DTD (maybe more). They will be active on all bands (80-10 meters) on SSB. QSL via Bureau or Direct (PO Box 46, Mytilene, GR-81100, Greece).
JX, JAN MAYEN. Begin looking for YL operator Unnui, LA6RHA, to be active from July 25th through August 1st as JX6RHA. She will be using the military amateur radio station. Operations are planned for SSB but with some CW on demand. Keep a close look on 14248 kHz. QSL to her home call.

NEWLY ELECTED OFFICERS. At the San Diego DX Club's June meeting, the membership elected the following slate of officers to serve for the 1997-1998 term: President- Bruce Clark, K6JYO; Vice President - Jim McCook, W6YA; Secretary/Treasurer - Harry A. Hodges, WA6YOO; Directors - Bill Denton, NG6Z, Larry Serra, N6NC, Bob Pace, WB6NBU and Harvey Hiller, KD6QK. The membership also nominated Dick Shanks, W6BZE, founding President of the San Diego DX Club in 1946, to the position of President Emeritus. His election to this position was unanimous.

NP3, PUERTO RICO. Terry, W5XJ, will be active now until July 16 as NP3G. Activity will be mainly on 40 meters CW. Terry has plans to permanently move here by the end of summer. Also, look for Karen, N4YGP, to be active there as NP3F.

OA175, PERU (Special Prefix). Cesar, OA4QV, states he will be signing with the special prefix OA176 in commemoration of 176 years of Peru's independence. Activity will be from July 1-31st, with their Independence day taking place on July 28th. Operations will be on SSB on 40, 20, 15 and 10 meters. QSL direct with a SAE plus two International Replay Coupons (IRCs) to: Cesar Aguirre, P.O.Box 957, Lima 18 PERU.

QSL INFO AND NEWS.....
Jean, F6AJA, has received the HP1XBI logs up to May 13. All direct request are on the way. It's the same for all direct requests for HP1XBI/1 from Contadora Island from the end of March.

QSLs for UA3AP are now via his U.S. stateside callsign of K3AO either via the bureau or direct: Sergei Kulyov, P.O. Box 3497, Columbus, OH 43210, USA

Last week we mentioned N4BP would be active as ZF2DE/ZF8 and to QSL via N4BP (refer to OPDX.310). Since then, Jim, N4ZY, 4th Area QSL Manager Bureau for W/K/N (suffix B) states/advises OPDX readers that N4BP does not keep envelopes at the bureau and suggests not to send cards to the bureau (only direct). All the unclaimed cards over the past several years that have been addressed to N4BP had to be destroyed. Jim reports this to save a lot of cards from going into the round file.

RUSSIAN ACTIVITY. The "Polar-97" DXpedition has began. RA1QQ, RW1ZZ, UA1ZIC, UA1ZJW and UA1ZKW have reported that they started their DXpeditions to the islands of Barentsevo Sea. Look for them to be active from the

following islands: Kildin Island (EU-82), Bolshoi Olenij Island (EU-61), Lumbovskyi Island (EU-161) and Novaya Zemlya Island (EU-35). They were hoping to receive a special callsign (which did not happen) when they activate Bolshoi Ainov Island (a new IOTA, EU-???). Instead the team will be signing homecall/1 and the team callsigns of UE1QQQ/1 and UE1ZNF/A. This DXpedition is dedicated to the 60th anniversary of renaming North Russian flotilla to Northern Navy (Severnyi Flot). QSL via UA1ZJW, P.O.Box 72, Severomorsk-1, 184600, Russia /or via RA1QQ, P.O.Box 24, Cherepovets, 162627, Russia.

SPECIAL EVENT. Look for VI0ANARE to be active from July 1st to October 31st to celebrate the 50th anniversary of the Australian National Antarctic Research Expedition (A.N.A.R.E.). The suggested frequencies are:
SSB - 3620, 7075, 14175 and 21175 kHz
CW - 3532, 7020, 14052 and 21052 kHz
WARC bands by request and all frequencies are "+/-" QRM. QSL direct only to VK4AAR (Alan guarantees a fast reply, but no bureau facilities are available for him). Bureau cards go to VK4ARB.

SPECIAL PREFIXES.....
The city of Calgary (AB, Canada) will host the World Police/Fire Games. Industry Canada assigned a special callsign prefix "CG6" for use by amateurs in Calgary area. This special prefix is valid now through July 4th.

Watch for amateurs in Thunder Bay, Ontario, using the CJ3 prefix instead of their VE3 prefix, and also the CK3 prefix instead of the VA3 prefix, during July 12-31st, in celebration of the Scouts Canada Jamboree.

USI ALERT. Randall, KD8JN, will activate Hatteras Island July 5-12th, as KD8JN/4 for the "United States Island Award" program. Hatteras Island as an USI number of NC-005S (also an IOTA of NA-067, Grid Square FM-25 and is located in Dare County). Activity will be on all bands. Suggested frequencies are: 3785, 7260, 14260, 18128, 21260, 24950 and 28460 kHz. QSL via the bureau or direct with a SASE to: Randall Phelps, 1226 Delverne Ave SW, Canton, Ohio 44710-1306 USA

USI ANNOUNCEMENT. The United States Islands Awards program (USI) will kick-off the summer with an operations from Northern Canada (Ops: KC7FVA, KC7KHU, and NL7TB). VY1USI will be active before and during the Canada Day Contest from YT-002, 03, 04, and 05 and from a couple of "new ones" starting around 1700z on June 30th. The team will focus on the emerald green Yukon River in Whitehorse. VE7USI operation will commence from Atlin Lake (Northern BC) on July 2nd around 1700z from several "new ones" through July 4th. For a feeling of being there, try:
http://users.yknet.yk.ca/bbdo/cascade/about.htm
Photo QSLs will be available from NL7TB (SASE to: J Reisenauer, 23406 East Kennedy Rd., Benton City, WA 99320).

VK9L, LORD HOWE ISLAND. Jun/JH4RHF, Kumiko/JR4DUW (YL) and Hiro/JR4PMX are planning a trip to Lord Howe for their summer vacation during the

IOTA Contest weekend. The operation itself will be from July 24-29th or so. The callsigns they hope to be assigned are; VK9RH, VK9YL and VK9MX, respectively (not licensed yet). Please note these callsigns are for VK9L-land. Activity will be 80-10 meters, SSB/CW. There will be some 160m and RTTY activity, if there are many requests. QSL via JH4RHF, for VK9RH and YL (or operation by these two). QSL via JR4PMX for VK9MX (or op by JR4PMX).

XW, LAOS. It has been reported that Zorro, JH1AJT, is in Laos with a group that will be active now until July 2nd. This is not Zorro's first time to Laos as he was there in December, 1989, as XW8KPV. Reports indicate they will operate on as XW1A and on SSB as XW1 (YEP! That is the callsign). The group will be operating on 6 through 160 meters. QSL via JH1AJT.

YJ, VANUATU (Activity on 6 meters!). Stuart, YJ8UU, will be active from Vila over the next 3 years. Look for him to begin activity around July 19th. Operations will be on all bands including 6 meters. His station consists of an Icom 706; antennas are a Gap R5 vertical and a 3 element Delta loop for 6 meters with 2 elements for 20 meters. He will be active daily at 0630z on 50.110 MHz. QSL via ZL2HE.

Z2, ZIMBABWE. "THE 59(9) DX REPORT" states Cedric, N9YXA, will be active on 160-10 meters, mainly SSB, from August 3-21st while providing communications for a church convoy. Callsign is yet to be announced.

ZF, CAYMAN ISLANDS. The Cinco Nueve Contest Group has announced early that they will operate as a Multi/Single from Little Cayman Island as ZF2RV during the CQWW CW Contest, November, 1997. Operators will be:
Al, K7AR (ex-WB2TMP, op at YK0A); Lee, N7NU (ex-WB7SND, op at XR0Z);
Mark, N7MQ (ZF2MC, and ex-N7MCA); Ron, WJ7R/ZF2RV; and Gene, K7DBV (ZF2BV).
ZF2RV contest QSLs are via AA6BB/7; cards for all other QSOs between November 24th and December 3th (including ZF2RV) go to each operator's home call, CBA or via W7 Bureau.

ZP, PARAGUAY. Ernesto (GADX Bulletin Editor), LU6BEG, will be operating from Asuncion as ZP5/LU6BEG from July 9-13th. Operations will be on 80-10 meters CW/RTTY/BLU. During the IARU Contest, he will team-up with Renato as a Multi-Op station using the callsign ZP5XF or ZP0M (to be confirmed). QSL ZP5/LU6BEG to Box 1589 - 1000 CF - Argentina and ZP5XF/ZP0M to Box 1937, Asuncion, Paraguay.

Mailloop is an Industrial Bulk Email and Newsgroup Broadcasting Program.

Visit http://205.199.4.219 for More info.

Here is just some of the many hunreds of Mailloops Features:

Send Bulk Email to Thousands of People an hour-

Send Bulk Broadcasts to the Newsgroups with an Anti-Cancel Bot Feature-

Send Binaries to the Newsgroups in Bulk-

Process your incoming Mailbox -

Build E-Mail and Newsgroup Lists From:

Extracting from the Newsgroups-

Extracting from a Whois-

By processing your incoming Mailbox-

By using the finger Client (You can finger a domain and extract all of the email addresses)-

Extracting From a Import File-

Extract from a Web Page-

Extract from an FTP Site-

And Many Many More.

If you interested in these and many other features that Mailloop has to offer, or to obtain a copy,

Visit Our Web Site:

1718. Lowest INTERNATIONAL Calling RATES Available !!

Newsgroup: rec.radio.amateur.dx
Date: 1997-06-30 00:00:00 UTC
From: remove@freemail.nll
Message-ID: <5p7i6j$945$4618@cadmium.aware.nl>
Source record: 32360

We offer very competitive low international calling rates worldwide, with saving up to 85% !!!

Some examples:

Australia - USA = 0.29 US$/minute
Hong Kong - UK = 0.61 US$/minute
New Zealand - Netherlands = 0.66 US$/minute
Japan - Germany = 0.61 US$/minute
Singapore - USA = 0.35 US$/minute
Sweden- Canada = 0.36 US$/minute
Germany- Dom Rep =0.71 US$/minute
France - Bahamas = 0.60 US$/minute

There are no fees, other than usage !!

If you might be interested in more information on our services and rates to other countries, please visit our website at http://www.angelfire.com/biz/GTconsult or send us a message to GTconsult@freemail.nl and tell us the countries you call now, what you are paying now and which service you use at the moment !!

If you think this is not the appropriate newsgroup to place this advert, please let us know by sending an e-mail to remove@freemail.nl and mention the newsgroup in the subject heading, so that in future we will not advertise in this newsgroup again !!

Regards
Robert

Welcome,

Chair-Pak is a great idea!!!

It's a Backpack AND a built-in Chair!!!

See it at http://www.chairpak.com

3 Sizes Full Pak, Day Pak, and a Child Pak!

How many times have you gone somewhere and needed a chair ?
beach waiting in line with friends
hiking around the campfire conventions
air shows at the park in line at the DMV
outdoor concerts hiking trails car shows
camping on campus reading at the poo l /beach
fishing trekking rest areas
poetry readings jams outdoor games
outdoor sport events story telling to children picnics
theme parks national parks hunting
backyard outdoor weddings and anywhere you want to SIT!!!

Carry your stuff and your chair where ever you go!!!

Where do you want to sit today?

Chair-Pak is made of the strong durable Dupont Cordura and the frame is of strong and light T6 aluminum.

If you would like to order, or get more information about Chair-Pak, please visit our web site

1724. Looking for Yaesu Owners

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-02 00:00:00 UTC
From: dthimm@newnorth.net
Message-ID: <33b9cc69.19245476@news.newnorth.net>
Source record: 32366

Greetings,

I have recently made available the N9IPV Spectrum Analyzer for the
Yaesu FT757 style rigs.
I would like to extend the same software for owners of the following
rigs...
Yaesu FT 747 style
Yaesu FT 767 style
Yaesu 980 style

Since I do not own any of the above rigs, I cannot do this unless an
owner of each of the following rigs will come forward and send me a
copy of the page(s) in your manual that describe the communication
protocol and a diagram of the front panel.

In return, I will give you a copy of the completed software.

E-Mail me for my address please. dthimm@newnorth.net

If you would like to see the features included in the FT757 version,
please visit my website and download a copy of the software at:

http://www.newnorth.net/~dthimm

Thank You and 73
Dan T.

Dear Internet user,

If you are paying for your Internet services then
you have not heard about 1stFamily. We have
a marketing method that guarantees you will not
have to pay one dollar to access the Internet.

* You will never again have a busy signal !

* You will always have the fastest access you have ever seen !

* Residual income for the rest of your life !

* and much much more.

This opportunity is for YOU to take advantage of !

Do you wish to continue the rest of your life paying
$19.95/month to access the Internet when you can
access it for free with speed and reliability that exceeds
the other competitors ??? We did not think so. That
is why our company is the best and fastest growing
of it's kind and will soon compete with AT&T and MCI
and all the big companies in providing Internet Service.

For complete information please mailto:sameer@1stfamily.com
and type "More Info" in the subject box.

You will receive our webpage address where you can get enrolled in
seconds !!

DIPLOMA VASCO DA GAMA

REP - Rede dos Emissores Portugueses (CT1REP), with the support of the Comiss&#65533;o Nacional para as Comemora&#65533;&#65533;es dos Descobrimentos, sponsors this Diploma which is to celebrate the Portuguese Discoveries during the XV century and specially the Discovery of the sea route to India by the Portuguese navigator Vasco da Gama.
This will be a permanent Diploma and all SSB and CW HF contacts (on the authorised amateur bands) on the different amateur regions will count, starting on 15th Novembre 1945.
Licensed Radio Amateurs and SWLs world wide are invited to participate.
To qualify for the Diploma participants must have at least 25 points but with contacts with one sation in Portugal Continental"CT" and another in India "VU".
Diplomas can be requested on one of the three different modes - SSB, CW or MIXED, and there will be 5 different classes and 5 different stamps as follows:
Class I 75 points Golden Lantern
Class II 100 points Golden Compass
Class III 125 points Golden Anchor
Class IV 150 points Golden Astrolabe
Class V 200 points Golden Helm Wheel
There is also a "Honour Roll" for those with 250 points or more.The participants of this Honour Roll can request the correspondent Trophy which is a nice filigree miniature of XVI Century Portuguese "Caravela".
Lists of stations awarded with the different classes of the Diploma will be published in Portuguese Ham magazines and bulletins as well as any foreign magazines who wish to publish them.
Logs can be certified either by photostat of QSLs or by a GCR list (General Certification Rule), certified by two different Amateurs or by a certified amateur radio Association. Should any doubt arise QSLs can be requested.
The Diploma will be awarded free of charge to members of REP (Rede dos Emissores Portugueses), and will cost 1000 portuguese escudos for non members residing in Portugal. For Europe the cost will be US$ 8.00 or 12 IRCs and US$ 10.00 or 15 IRCs for the rest of the World.
Certification stamps for each class are sent free of charge, providing a list of the contacts, certified in the same way as the original log is sent together with self addressed stamped envelope (SASE) or a self addressed envelope (SAE) and 2 IRCs.
For the "Honour Roll" trophy the cost will be US$ 30.00 or equivalent for Portugal or Europe and US$ 40.00 for the rest of the World.

ARLD029 DX news

ZCZC AE29
QST de W1AW
DX Bulletin 29 ARLD029
From ARRL Headquarters
Newington CT July 3, 1997
To all radio amateurs

SB DX ARL ARLD029
ARLD029 DX news

This week's bulletin was made possible with info provided by Tim, N4GN, Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, The Daily DX, QRZ DX, DXNS and Contest Corral from QST. Thanks to all.

CYPRUS, 5B. Aris, 5B4JE, is QRV on SSTV. QSL via bureau. Look for Rich, 9N1RHM, who will be QRV sometime during July as 5B4/G4RHM.

GHANA, 9G. PA3AWW will operate 9G1AA until the end of 1997. He is working at the Dormaa Hospital. QSL to H.v Oosterhout, Bosbesplein 15, 3355 SG Papendrecht, The Netherlands.

UNITED ARAB EMIRATES, A6. Abdullah, A61AQ, has a daily schedule from 0000 to 0100z on 14240 kHz with his QSL manager N1DG. Abdullah is also QRV around 0800z on 15 meters, looking for JA and VK stations.

IRELAND, EI. Leo, K8PYD, will be QRV as EI4VUJ, on all bands, from July 7 to 19. He will be located in Leitrim County, one of the rarest of the Irish counties. QSL to K8PYD

GUADELOUPE, FG. Alain, F2HE, will be active as FG/F2HE until September 25. His activity will be mostly CW. QSL to home call.

SOUTH KOREA, HL. HL1TUE, HL1TMU, HL1MKT and one other will activate Anmyu-Do Island, IOTA AS-080, as HL0N/3, until July 7. Look for CW and SSB activity on 40, 20 and 15 meters. QSL via HL1TUE.

PERU, OA. Cesar, OA4QV, will be active using the special prefix OA176 in commemoration of 176 years of Peru's Independence. He will be active until July 31, with Peru's Independence Day taking place on July 28. SSB operations will be on 40, 20, 15 and 10 meters. QSL to home call.

ALAND ISLANDS, OH0. N4GN, OH1NX and OH2BH will be active as OH0/N4GN and OH0W until July 10. QSL to N4GN.

MARKET REEF, OJ0. After their stint from Aland Islands, this group will be joined by three other OH-stations and travel to Market Reef. The group is expected to arrive here late July 10. Look for activity from OJ0/OH1VR, and OJ0/N4GN. OJ0/OH1VE will be used during the IARU HF Championship contest. Besides activity on the HF and newer bands, there may be some 6 meter action as well. QSL via home calls.

AUSTRALIA, VK. Special Event Station VI0ANARE will be active from July 1 through October 31 to mark the 50th Anniversary of ANARE, the Australian National Antarctic Research Expedition. Activity will be on 80 to 15 meters, using CW and SSB. QSL via VK4AAR.

THIS WEEKEND ON THE RADIO. The Venezuelan Independence Day Contest, Phone, is scheduled for this weekend. Please see July QST, page 97 for details.

If you have downloaded a copy of the N9IPV Spectrum Analyzer
prior to July 5, 1997. You may download a 110kb corrective patch
that will eliminate the "Error 360 Invalid Property" when changing
starting and stopping frequencies.

The download is available at the following URL:

http://www.newnorth.net/~dthimm

Thank You

Dan

OK, I'm hearing LOTS of DX on 20, and even some on 15. And,
as usual, I'm not working ANY of it. :-(

Now, I've got this puny old Griefkit that breaks all the time,
and a lousy wire dipole up 50', so I'm a bit limited there.
It struck me the other night listening to all the folks work
an A6, that one thing I obviously need is ... a good-luck charm.

I've tried using several different logging pens I thought would
be lucky, tried keeping a toy animal by my rig, tried wearing
my favorite old shoes, but so far I have NOT been able to find
the lucky charm I obviously need.

Any real DXers care to tell me what I'm missing here? What
good-luck totem works for you? IARU HF 'test is next weekend
and I need something to help me work 'em, fast!
;-) --Ken (only partly joking)

Hi Ken,

Yes, DX can be both fun anc frustrating.

> Any real DXers care to tell me what I'm missing here? What
> good-luck totem works for you? IARU HF 'test is next weekend
> and I need something to help me work 'em, fast!

Have you considered the advantages a good propagation
prediction and system analysis app might offer?

Good luck in the contest.

73,
Jim

1744. VK0IR Log Search Software Released

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-05 00:00:00 UTC
From: lyndon@ve7tcp.ampr.org
Message-ID: <5pn92j$luu@ve7tcp.ampr.org>
Source record: 32386

During and after the VK0IR expedition I received numerous
requests for the software I used to implement the e-mail
and WWW log search interfaces on ve7tcp.ampr.org. I held off
releasing it because there were a couple of small bug fixes
required. After six months of procrastinating I finally got around
to cleaning the code up, and I've put it up in the anonymous
FTP archives at:

ftp://ve7tcp.ampr.org/software/vk0ir/

1746. /Sell/Your/Photos$$$$

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-06 00:00:00 UTC
From: ret643@aol.com
Message-ID: <5pnrvihcs7080@roadrunner.miracle.net>
Source record: 32388

We are a New York based international photo agency representing professional and amateur photographers in search of having their work promoted in order to conduct their profession or hobby minus the time consuming inconvenience of presenting and selling their own work.
You do not have to be a professional photographer to sell your photographic work successfully, and as any pro will tell you, quite often throughout history an amateur stumbles on a scene that he or she photographs and ends up with a photo that becomes a classic. Those who publish magazines, books, newspapers, greeting cards, record albums, or just about anyone who works with images in their profession, are in desperate need of fresh material, and are more than willing to review photos submitted by professional photo representatives. Sometimes the photos of amateurs are sought after more so than professionals because of accidental originality and innovative themes.
At Photo Phoenix International, we delight in and value the work of people who view photography as a fine art and understand a photo representative's significance in terms of a photographer's career, reputation, and monetary gain.
The photos we are seeking are some of the following: ANIMALS, ARCHITECTURE, ART, AUTOMOBILES, BUSINESS, CELEBRITIES, DOCUMENTARY, ENTERTAINMENT, EROTICA/NUDITY, FASHION, FOOD, HEALTH, HISTORY, HOBBIES, OUTDOORS, PEOPLE, POLITICAL, PORTRAITS, STILL LIFES, RELIGIOUS, SCIENCE, SPORTS, TRAVEL . . .
Whether your work portrays conservative, experimental, stylish, or innovative themes, your project proposal should be well thought out before submitting to us.
For first contact, submit a query letter and "SAMPLES ONLY" of your photos.
You must include "2" self addressed, stamped envelopes--one for correspondence, the other for the return of your material should we not be interested.
If we think your work is sellable, we will respond as soon as possible. Do not send entire portfolio unless we ask for it.
SEND TO: Photo Phoenix International

SB DX @ WW $OPDX.312
Ohio/Penn DX Bulletin No. 312

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 312
BID: $OPDX.312
July 7, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1DG, W1HIJ, N2OO, W2GD, WB2YQH and WB2RAJ from The 59(9) DXReport, NH6YK, K8PYD, K8XP, W0YG, DL8OBC, EA3CB, F6AJA, G4BUE & DX News Sheet, GM4SUC, HL1CG, HL1SSG, IK0AZG, IV3HYD, LA2IJ, RA3SL, SM3CVM, VE9AA and VK3EW for the following DX information.

3D2, FIJI. Ron, ZL1AMO, may be active once again July 6-8th as 3D2RW while on his way to Tarawa (T30) and possibly Banaba (T33). QSL via CBA.

4J, AZERBAIJAN (Attention YL Hunters!). The "DX News Sheet" reports that Oksana, 4J8YL, a YL operator, is active most days at 1400z on 20m (often 14198kHz) SSB.

5A, LIBYA. A group of four German operators will be on the air from the club station 5A1A in Tripolis, Libya. This operation will begin on approx. November 24, 1997, and last until December 4, 1997. During their stay, they plan to be a serious entry in the CQWW DX Contest as M/S category. Activity will be on all HF bands, including 160m and WARC bands (propagation permitting), with operations on CW, SSB, and, for the first time from Libya for many years, RTTY. The Germans will have two stations with amplifiers on the air simultaneously as often as possible. The operators will be: Andy/DJ7IK, Dieter/DL3KDV, Felix/DL8OBC and Thomas/DL1GGT. There will be a special WEB site set up for more details on this DXpedition (plus logs will be updated daily when operation is active). The WEB site is: http://www.afthd.th-darmstadt.de/5a1a/
The QSL manager (for this operation only!) will be DL3KDV. Please send your QSLs via the bureau to DL3KDV or directly to: Dieter Voss, DL3KDV, Friedrichsthal 21, D-51688 Wipperfuerth, Germany.

9M0, LAYANG-LAYANG ISLAND (Spratly Islands). Bob, N2OO, reports that he and Bob, N0RN, will take a side trip and break from their special event station activity (read down below) to be active from here August 14-18th. Operation is expected to be on 30, 20, 17 and 15 meters CW/SSB. There will

be two stations operational using beam antennas provided by Cushcraft. The license is confirmed, but the callsign is still being negotiated. The callsign will be announced at a later date. Upon completion of this operation, they will return to resume activity of their special event station 9M6HIL in East Malaysia.

A6, U.A.E. Don, N1DG, reports another new ham is on the bands from, this time, the Emirate of Sharjah. Abdullah, A61AQ, has some temporary equipment up and Don will be shipping him a monobander for 20 meters along with a linear amp. Abdullah already has antennas up for 15 and 10 meters. Don also states he will be Abullah's QSL Manager. Don can also provide cards for A61AD, A61AO and A61AQ, while his son handles cards for A61AF. Since July of last year, Don's address is: Don Greenbaum, 27 Pill Hill Lane, Duxbury, MA 02332 (Note: Next month Don's mail stops getting forwarded from his old address.) For those still needing A6, Don has as a daily schedule on 14240 kHz (+/- QRM) at 0000-0100z.

CY9AA ON QRT FROM ST. PAUL ISLAND. VE1PZ, K7BV and VE9AA arrived back in Pictou, NS, around 3:09 A.M. local time Friday. They started tearing down the stations at 6 A.M. Thursday, and the final thing to be dismantled was the 6 meters station. They made approx. 12,000 QSOs on 6m-160m, with around 275 on 6 meters (Best DX was CT3FT, W7RV and N5JHV). Remember, the callbook address for QSLs is not correct for VE9AA. The correct address is: Michael Smith, 271 Smith Rd, Waterville, Sunbury Co, NB, E2V 3V6, Canada

CY0, SABLE ISLAND. Jarek, VA3NCD (also SP8NCD), informs OPDX that he has just received authorization to land on Sable Island and was given a special callsign to use. He can use the callsign CY0NCD, during the period of August 9-22th. Jarek will be visiting the island between August 15 and August 17th. He will be equipped with an ICOM 751a and some simple antennas. The primary purpose for his visit is not radio, but just to explore the place (he has been thinking of doing this for a long time). He is actually taking more cameras and film with him than radio related things. Operations will be on 80/40/20/15 meters bands, mostly CW, at the bottom of the bands (7 kHz +/- QRM). He will take a microphone with him but doesn't plan to use it too much.

EI4, IRELAND (Rare county to be activated!). Leo, K8PYD, will arrive in Ireland on July 7 and will leave on the 20th. During that time, he will operate as EI4VUJ. Most of his operations will take place during the weekend of the 12th and 13th from the County of Leitrim, one of the rarest counties in Ireland. He will operate SSB, RTTY, and mostly CW. Check 14030 kHz. All QSLs go to K8PYD direct or bureau.

EU930, BELARUS. Igor, EU1EU, will be active until July 30th as EU930EU from Minsk. Activity will be on 160-2 meters with operations on CW, SSB, FM and RTTY. QSL via LY1BA (Box 67, Vilnius 2000, Lithuania) or QSL via EU1EU (ex USSR-HAM's).

FG, GUADALUPE. Juanjo, EA3CB, will be active as FG/EA3CB August 8-14th, from Guadalupe (NA-102) and August 15-17th, from Les Saintes (NA-114). Activity will be on 40-10 meters (including the WARC bands) with operations on CW and SSB (posible RTTY). QSL via the BUREAU.

HP, PANAMA (6 meters!). Gerard, F2JD/HP1XBI, is now active on 6 meters, and he will stay in Panama until October.

JU, MONGOLIA. Hyungsuk Song, HL1CG, has announced the following in a press release: "A group of Korean, Mongolian, and U.S. amateurs will be on the air at Danlanzadgad (Gobi Desert) in Mongolia from July 10-13th (Naadan Holidays in Mogolia). The DXpedition to Gobi Desert, Mongolia will be conducted by Korean DX Club (KDXC) and sponsored by The Korean Amateur Radio League (KARL), which is the IARU affiliated National League of Korea. Members of this joint DXpedition to Gobi Desert are Korean radio amateurs (HL1CG, HL1DK, HL1FB, HL1IE, HL1IFM, etc), Mongolian hams (JT1CD, JT1FBB, etc), and W6EE. The callsign JU4HL was issued for this operation, and CW & SSB will be operated on all HF bands including WARC bands. JU4HL plans to participate in IARU HF World Championship though it is not the purpose of this DXpedition. QSL cards must be sent direct or via bureau to 'Mr. Hyungsuk Song, HL1CG, Kaehwa APT #107-305, Banghwa-3-dong, Kangso-ku, Seoul 157-223, Korea'. Special photo QSL cards will be sent to all the stations who request their QSL cards. If it is okay to receive QSL card via bureau, you can send QSL card request via InterNet E-mail to 'hl1cg@stella.skku.ac.kr', in the body of which you must include your callsign and QSO data (Date and Time in UTC, Band, Mode, Report), 1 QSO a line."

KH4, MIDWAY ISLAND. Ted, NH6YK, reports there is now a 99.9% chance he will be on Midway from July 6 to August 20th or so. He will be working, but in between work and other fun things (like watching birds, snorkelling, star watching), he will be on the radio as NH4/NH6YK. His current plans for operatrions are: 28480 kHz (or so on 10M), 50.110 MHz slow CW for 6 meters, occasional 28.105 packet and possible U.S. novice band CW. There exists a slight chance of other bands (because he needs a few European contacts to finish his WAC from KH4). QSL via home call or bureau.

NORTHERN LIGHTHOUSE WEEKEND AND LIGHTHOUSE/LIGHTSHIP ACTIVITY WEEKEND. Over the past years, there seems to be growing interest by DXers to work lighthouses all over the world. Well, here is your chance to work a bunch of them. During the weekend August 23 and 24th, there will be two events taking place associated with lighthouses and lightships. The first event is The Northern Lighthouse Weekend when ten Scottish amateur radio stations will be established at lighthouses around Scotland. Running concurrent with The Northern Lighthouse Weekend is the Lighthouse/ Lightship Activity Weekend when amateur radio stations will be established at lighthouses/lightships around the world. ADDED NOTE: Complete details of these events and information on the lighthouses/lightships will be provided to all OPDX InterNet Subscribers as an additional bulletin.

QSL INFO AND NEWS.....
Hamad, 9K2HN, states that all 9K out going bureau cards have been sent out recently. Those who have been waiting for bureau cards from

Kuwait should have their cards in hand soon. This includes more than 1000 QSL cards from Hamad to DL's hams for the years 94,95 and 96.

QSLs for HS0/SM3DYU is via SM3CVM, bureau or CBA. QSL cards are printed, and some have already been distributed. QSL for HS0/SM3CVM (operation Nov 25-26 1995) is via SM3CVM bureau or CBA.

Nicola, IV3HYD, reports he is the QSL Manger for the special callsign of IR3A. QSL via bureau or via direct to: Nicola Corvino, P.O.Box 12, 33034 Fagagna, Udine, Italy.

Deal, BA4TB, reports the following addresse can be used for BG4TBD, BD4TB and BA4TB: 9A2AJ, P.P., 34551 LIPIK, CROATIA. Also for BA4TB the following address can be used: F/HH2HM, P.O. Box 104, 22650 PLOUBALAY, FRANCE

Jack, F6BUM, states he has answered all direct QSLs for the 6W2/F6BUM activity from Karabane Island.

OX, GREENLAND. Jorgen, OZ8AE, will be active from here July 11-23rd. He plans to sign OX/OZ8AE from Groennedal. Operations will be QRP on CW. Suggested frequencies are: 7019, 10115, 14041, 18086 and 21041 kHz. QSL to CBA.

P40, ARUBA. John, W2GD, will operate P40W during the IARU Radiosport, CW ONLY, Single/Op, all band and high power entry. Activity will be July 9 through July 13, 1997. QSL only via N2MM.

SPECIAL EVENTS...
Special event station IR0MFP and several other stations qualified for the "Diploma of Millennium" will be active July 14-15th.

Bob, N2OO, the Special Event callsign 9M6HIL will be used from August 5-24th from the Hillview Gardens Resort in Keningau, Sabah, East Malaysia, to celebrate the resort's opening (Refer to OPDX.310). Operators will be Bob/N2OO/9M6OO, Bob/N0RN, Alan/VS6KY/ZL1TX, and a number of local 9M6's. Although it is getting late, anyone interested in joining them for this Special DXpedition can E-mail Bob for further information at: CQPINEY@worldnet.att.net.
Also, please note that the permanent callsign for the resort will be 9M6A for all subsequent operations. All QSLs for both 9M6HIL and 9M6A will go via N2OO. Updates are in progress on the Hillview Gardens web page and can be found at: http://www.idis.com/alfons/hill.html

TF, ICELAND. Ove, LA2IJ, states he will be active on RTTY as TF/LA2IJ from July 21-27th. His main operating frequency will be 14083 kHz. Also, he will possibly be on 21083 and 7037. There will be some SSB operations on 14177 (and maybe 21277 and 7077). QSL via LA2IJ direct to CBA or via the bureau.

THE DELTA DX ASSOCIATION in New Orleans voted in June the following new officers: President - Don Boudreau, W5FKX; Vice President - Bruce Stevenson, K5HAA; Secretary - Shelby Smith, W5SNU; and Treasurer -

Stan Pulitzer, W5JYK.

TK, CORSICA. "The 59(9) DXReport" states that IK0XBX will be active from here as TK/IK0XBX/P from July 12 to July 26 or 28. QSL via homecall.

V5, NAMIBIA. Charlie, W0YG (ex-KY0A) reports to OPDX that he plans to be active from V5 again in a month as ZS6TG. However, there is so much confusion over bureau cards from his last operation (in receiving cards from the ZS and W0 bureaus), that Charlie states he does not want any bureau cards from this operation. He now only wants cards sent direct to W0YG at: 6746 North Yucca Trail, Parker, CO 80138. Charlie will be mobile with 500 watts and plans to be active again on 160/80 meters. He may also be active from A2, Z2 and other places.

VK3 AUSTRALIAN QSL BUREAU HAS A CHANGE OF ADDRESS. Barry, VK3XV, Chief Executive Officer of WIA Victorian Division, reports the mailing address for all cards for VK3 WIA members and others has changed. All cards from overseas countries should be addressed as follows: WIA VICTORIA, INWARDS QSL BUREAU, 40G VICTORY BOULEVARD, ASHBURTON. VIC. 3147. Cards addressed to the current address of "BOX 757G GPO MELBOURNE" will continue to be collected and distributed until December 31, 1997, to enable the changeover. QSL Managers should note that this is the IARU endorsed bureau for all VK3 cards. Bureaus in all overseas countries will be notified of the change by direct mail.

VP5, TURKS & CAICOS ISLANDS. Look for Carlo, I4ALU, to be active from here August 12-24th, as VP5/I4ALU. Operations will be on all bands, but CW only. QSL via homecall.

VR6, PITCAIRN ISLAND. "The 59(9) DXReport" states that Betty, VR6YL, is active on 14176 kHz at 0300z.

ZK1, NORTH COOK ISLANDS (DXpedition Update. Tom, K8XP, provided the following update: "Several members of the Dateline DX Association met in Charlotte, NC, to assemble and test equipment in mid June. All eqiupment was packed and shipped to Oakland, CA, where it was to be loaded on a vessel departing June 30th bound for Rarotonga, South Cook. Licensing and other arrangements are completed and N1DG is finalizing the Web site. On-line log checking will be tested in the near future for implementation during the operation. N4RF, N7RO, WA4YBV, N6MZ, ZS8IR, KI6AN and K8XP will meet at LAX on September 17th for departure to Rarotonga with arrival on the Island of Penrhyn in the North Cook Group on the morning of September 20th. Operation with the call ZK1XXP will last 7 days with 3 or more stations on 3 modes. Primary goals are low bands, Europe and East Coast North America. QSL information to be announced. Any questions or information can be forwarded to K8XP at "K4TSJ@juno.com"."

We are a New York based international photo agency representing professional and amateur photographers in search of having their work promoted in order to conduct their profession or hobby minus the time consuming inconvenience of presenting and selling their own work.
You do not have to be a professional photographer to sell your photographic work successfully, and as any pro will tell you, quite often throughout history an amateur stumbles on a scene that he or she photographs and ends up with a photo that becomes a classic. Those who publish magazines, books, newspapers, greeting cards, record albums, or just about anyone who works with images in their profession, are in desperate need of fresh material, and are more than willing to review photos submitted by professional photo representatives. Sometimes the photos of amateurs are sought after more so than professionals because of accidental originality and innovative >themes.
At Photo Phoenix International, we delight in and value the work of people who view photography as a fine art and understand a photo representative's significance in terms of a photographer's career, reputation, and monetary gain.
The photos we are seeking are some of the following: ANIMALS, ARCHITECTURE, ART, AUTOMOBILES, BUSINESS, CELEBRITIES, DOCUMENTARY, ENTERTAINMENT, EROTICA/NUDITY, FASHION, FOOD, HEALTH, HISTORY, HOBBIES, OUTDOORS, PEOPLE, POLITICAL, PORTRAITS, STILL LIFES, RELIGIOUS, SCIENCE, SPORTS, TRAVEL . . .
Whether your work portrays conservative, experimental, stylish, or innovative themes, your project proposal should be well thought out before submitting to us.
For first contact, submit a query letter and "SAMPLES ONLY" of your photos.
You must include "2" self addressed, stamped envelopes--one for correspondence, the other for the return of your material should we not be interested.
If we think your work is sellable, we will respond as soon as possible. Do not send entire portfolio unless we ask for it.
SEND TO: Photo Phoenix International

I am looking for some logging/contest software that runs on a
Macintosh computer. I need something that would allow me to
participate in the upcoming IOTA contest and indicate dupes.
Scoring facility is not important.

Any recommendations?

Please respond by email to morawski@mitre.org

TIA,

Paul Morawski, AA3DD

The Macintosh contest logging software that I like and have
used with excellent success is: MARATHON for Macintosh
by Kevin Krueger/N0IOS. He is also the fellow who wrote
the most recent version of MacRatt III for AEA TNCs as well
as for HostMaster for Macintosh for the Kantronics TNCs.

You can contact Kevin/N0IOS at:

krueg010@maroon.tc.umn.edu

Ain't nothing like a big antenna<g>.

Seriously, K0EJ brewed up a couple of wire quads for 20 and 15 for our Field Day effort at K4CPO. Cheap to make, fit in a lot of places even if you can't have a tower or mast, and we seemed to be loud on those bands. Same dimensions as in the handbooks, use small-diameter PVC electrical conduit to separate the driven element and reflector. You don't actually need spreaders -- just tie ropes to the conduit & tie them off to stakes on the ground.

Hello All,

Your help is heavily requested!!!

Our company named "Multi-Communication". We were established at January 1994. Our business - trade. We have a number of branches in different countries. We employ Russian-speaking staff there. We use office alpha-numeric paging system to organise its work. We would like to buy NEC paging receivers (pagers) from you.
We would like to receive the price on NEC-21A, NEC-26B, NEC-20B and, possibly, other 2-language Cyrillic-Latin alpha-numeric pagers. Please, send us by fax delivery terms and conditions on them, too.
We consider to place an order on
1000 NEC-21A (100-200 monthly - depending on prices),
1000 NEC-20B (100-200 monthly - depending on prices),
1000 NEC-26B (100-200 monthly - depending on prices).
System:
Frequencies: 159,825+MHz and 161,950+MHz,
Rate: 1200 baud,
Format: POCSAG.
Please, call us:
007 095 921-4709,
007 095 971-5514,
007 095 971-5328.
Our fax:
007 095 921-7780.

Our email:
m-comm@dol.ru

If you have no possibility to deliver such volumes directly, please give us the list of distributors with contact numbers.

Best regards,

Dmitri Ivanov
Multi-Communication

Actually, that's not entirely correct. The present-day Yugoslavia
is comprised of Serbia, mostly-autonomous Montenegro, and the
serb-dominated regions of Kosovo and Vojvodina. (Yugoslavia is the DXCC
designation for all of these regions, as well.) Slovenia, Croatia,
Bosnia-Herzegovina, and Macedonia, all former Yugoslav Republics, are
now entirely independent
(and separate DXCC countries, too.) A nice map of the region is
available online at
(http://www.lib.utexas.edu/Libs/PCL/Map_collection/europe/Fm_Yugoslavia_pol96.jpg).

I suspect mail addressed to either Yugoslavia or Serbia will
probably reach the place it's
supposed to, though. At least I'm hoping. I sent my 3V8BB cards off to
the Yugoslavia address.

Well Ken, if you really want to reach the luxury,
what about getting the DX spots directly from the Internet
(From US, EU, and Asia simultaneosly)
and get them into your loved contest logging program (such as CT or TR)?
Check this out:
http://home.sprynet.com/sprynet/wd4ngb
The program is named DXTelnet.
Enjoy!

Hi folks,

I intend to spend my summer holiday somewhere in the Carribbean sun sometime between the end of July/beginning of August for two weeks.

Who could help me to find an affordable home for this time, preferrably close to a nice beach resort and hopefully with a well equipped shack and good antennas.

Since I don't subscribe to any American ham magazine, it is difficult to find any information from Germany. Can anyone comment on the ads in QST? Which ones should I steer clear of, which ones would you recommend?

Thanks for replying.

: Well Ken, if you really want to reach the luxury,
: what about getting the DX spots directly from the Internet

Thanks to everybody who responded. "Better antennas" was the consensus vote, and that's what I need to work on, though my lot makes it very tough. I was really hoping to find some simple good-luck charm that would make the ZLs and 9Xs jump back to my call with a "59+, Ken!" and offers to go to other bands and work me there, too. ;-) The telnet cluster spots won't do me any good--I can tell when a DX station hits the cluster, because I hear tuning up all around, and then suddenly there are a dozen or so "big guns" working him. Once the boys with the amps and monobanders get on the case, I'm out of luck.

Thanks again for all the suggestions. 73!

The Radio Amateur's Callbook was in print at that time. Many larger
libraries have hard copies of those editions that go back that far and earlier.
If you are in or near a major city, a call to the reference librarian and
a kind word or two MIGHT get you those calls looked up on the spot.

At the least, they should be able to tell you from the card catalogue if
the editions are on-shelf.

An alternative way to try this is to sniff out a larger library's email
address for a reference clerk. You could ask for help by email.... from
most anywhere in the world...

Yeah, if you don't have a Yagi of some kind, the Cluster is best for
just knowing whether the band is open to a particular target area..
Now that I do have a big antenna & amplifier, I still find it most
handy for knowing whether things are open or not..

Thank you Lyndon! I used the CGI script and was interested in how it was implemented - now I know.

I am unable to use the script to search my M6A/M7A contest logs as my ISP does not allow me to use CGI scripts on my home page :-(To get around the problem I have a written a Java applet which implements the same search functionality. A demonstration is at URL "http://www.babbage.demon.co.uk/searchm7a.html"

A description of the how to use the applet and source code is also available from "http://www.babbage.demon.co.uk/logsearch.html"

SB DX ARL ARLD030
ARLD030 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX Bulletin, Eduardo, YV5MHX, Julio, WD4JNS, The 599Rpt, The Daily DX, QRZ DX and Contest Corral from QST. Thanks to all.

TUNISIA, 3V. Hrane, YT1AD, will sign 3V8BB during the IARU HF World Championship. QSL via YT1AD.

NEPAL, 9N. Charlie, K4VUD, is active as 9N1UD from Kathmandu. QSL to homecall.

BELARUS, EU. Igor, EU1EU, is active until July 30 as EU930EU from Minsk. Look for CW, SSB, FM and RTTY activity on 160 to 2 meters. QSL via LY1BA.

MONGOLIA, JT. Amateurs from the Korean DX Club and the Korean Amateur Radio League will be active as JU4HL from Danlanzadgad until July 13. Activity is expected using CW and SSB on all HF bands, including the newer bands. They will also participate in the IARU HF World Championship. QSL via HL1CG.

MIDWAY ISLAND, KH4. Ted, NH6YK, will be QRV until August 20 as NH4/NH6YK. Activity will depend on his work and recreation schedule. Look for some 10 meter activity, including 28105 khz Packet, and 50.110 Mhz CW. QSL to homecall.

FAROE ISLANDS, OY. DL1MBG plans to be active as OY/DL1MBG until July 29. He may be active in the IARU HF World Championship as OY6A. QSL both calls to homecall.

TURKEY, TA. YM7PA is QRV from Trabzon until July 21. QSL via PA0TLX.

ANTARCTICA. Pavel, UX2HO, is active as EM1HO from the Ukrainian Vernadsky Base until February 1998. QSL via I2PJA.

VANUATU, YJ. Stuart, YJ8UU, will be QRV on 6 meters after July 19 on 50.110 MHz. 6 meter activity is scheduled for 0630z. He will be here for three years. QSL via ZL2HE.

VENEZUELA, YV. YV3OT will be activated by a group of Venezuelan amateurs and the Venezuela Navy in celebration of the Navy's 30th anniversary. CW, SSB, FM, RTTY and Packet activity on 160 to 2 meters is expected. They will be QRV until July 13. QSL via W4SO.

CAYMAN ISLANDS, ZF. A group of South Florida DXers will be QRV from Little Cayman Island, IOTA NA-016, until July 15. Activity in the IARU World HF Championship is the primary reason for this DXpedition. Look for ZF2DN, ZF2DE, ZF2PU and ZF2JS to be active with /ZF8 callsigns. QSL via operator's home call.

THIS WEEKEND ON THE RADIO. The IARU HF World Championship, CQ WW VHF Contest and QRP ARCI Summer Homebrew Sprint are on tap for this weekend. Please see July QST, page 97 for details.

Do you need HAM Radio clips for QSL cards, HAM newsletters, or your HAM web pages?

N7LN HAMWARE is introducing a new HAM Radio clipart CD to satisfy all of these needs.

But since the clipart only fills up half of a 650 Meg CD, the rest of the CD has been crammed with useful HAM files, like the following:

o Complete US callbook, hard disk installable (60 Meg)
o HAM Radio programs: packet, antenna, morse code, etc. TONS!
o HAM Radio information files: freqs, RACES, SWL, ARRL, etc.
o Morse code practice on CD audio tracks -- 20 mins to listen to on any standard audio CD player!
o Around 500 or so images directly related to HAM Radio, including state maps, flags, HAM logos, antennas, radios, etc.
o 1500+ total images, including many topics not directly related to HAM Radio that HAMs may wish to put on their QSL cards
o MORE

This HAM Radio Clipart CD, with all of the above included bonuses, is only $19.95 with free shipping in the US!

Does this sound like something you need? If so, you can check out my web page at http://www.qsl.net/n7ln or contact me via email for more information (n7ln@qsl.net).

Thanks,
Darvell (N7LN)

From: w1_k_sorter@qsl.net
Message-ID: <5q5c9d$ean@news2.tds.net>
Source record: 32344

Hey,

I've recently become convinced that the ARRL has got to go. IMHO, the loss of 2 metrs and 432 would be a small price to pay for ridding us of their crap. It's a long story hi hi.

Basically, I DO NOT wish to stand and be counted with the Glen's and the Burt's-at this time, I'm not sure that they are any better than the common enemy....

I fully realize that $$ runs the ARRL and that $$ will bring them down.

Towards that end, I'm wondering what the most effective tactics are regarding covert passive resistance? What can I do that will cost them $$ (without spending any $$ out of my own pocket)?

Is there an anti-ARRL underground?

Any replies would be very much appreciated-for me, the war is just starting (after being a life member for 20 years).

Thanks de K.

Source record: 32346

Well, for starters -- request services that the League provides
for free but that consume administrative time. Make these
requests at all League levels. Some examples -- query for
reciprocal licensing information for out-of-the-way countries
such as Bhutan or the Malagasy Republic. Write letters to your
Section Director asking for assistance with an antenna beef,
or requesting details on obscure matters before the League.
Get copies of the latest Archie radio comic book, send it to
a local elementary school, and provide the League as a point
of contact for more Amateur radio info.

IN OTHER WORDS, your best covert subversive tactic against the
League is TO FORCE IT TO FULFILL ITS CHARTER!

I won't affix a smiley emoticon here. I'll let the individual
reader figure out whether I am serious or kidding. I will caution
the unwise that the tactic described is a time-tested subversive
ploy used throughout modern history in many countries. Last week
we commemorated a famous instance of the application of this tactic.

1804. CABLE TV--FREE DECODER PLANS--

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-11 00:00:00 UTC
From: Edward Witt <superted@worldnet.att.net>
Message-ID: <01bc8e48$5b871460$537074cf@default>
Source record: 32347

Now you can get new plans to build a Cable Descrambler System, US and UK plans.

This is not the origonal Radio Shack plan (now obsolete), but a choice of six new up to date plans designed to work on any cable box in any area. Just send me details of which cable box you have and in what area you reside as the plan needed will vary area to area, and you will be able to view all premium and pay per view channels.

It works on all Cable Tv Systems. The parts to make the box cost appoximately $15 (depending on the plan) and you can find them at any local electronic part supplier(US Residents will be supplied with radio shack part numbers). British Sky Cable descrablers cost approx 20 Pounds. Remember this is for educational purposes only, you still have to pay for the channels you view. I have to say that to protect myself for any liablity.

For the Plans just send $ 2 or 2 Pounds to:

Ed Hacker
409 Adams Street # 7
Hoboken, NJ 07030
USA

The reason I charge two dollars is for the stamp, envelop, and paper your plans are on. I am doing this for you not for me to make money. Lets get real you cant buy much for two bucks. I am not in this for the money but to get back at the cable companys that over charge people.

CABLE HANDBOOK (Additional $2)

Everything you ever wanted to know about cable boxes. Includes a cross reference list for upgrading your box using upgrade converts, cubes, plug-in activators and service code-generators. Also explains general cable operation, this handbook is very COMPLETE, a must have!

TURN ME ON!

Turn on all your premium channels with nothing to buy.

The Notch Filter

A notch filter allows you to selectively descramble channels. For instance, if HBO is on channel 7 and Cinemax is on channel 14 or pay-per-view is on 22, you may build a notch filter to descramble each of those channels. This method is fairly simple to build; However, it requires several more parts than the Fifteen Dollar Box. This system will work on your cable system, no matter what frequency your cable system operates on. A cable box is NOT

REQUIRED, and parts cost in the range of $25-30 depending on how many channels pay channels you wish to descramble. NOTE: I used channel 7,14 and 22 as an example. Your premium services may be on other channels and the notch filter can be built for whatever channel your premium services are on. (between the range of 2-22) Parts can be purchased from a electronics wholesaler/retailer in your phone.

The Gated Sync is the Grand Daddy of descramblers (in band and out band). It can be configured to operate on your cable systems frequency. This system is for the serious home electronics buff. It is a bit more complex to build; However, it sells for a lot of money. And, it will descramble EVERY channel.

SSAVI was created by Zenith, and used by many Zenith converters. The system is very difficult to build, but it will descramble EVERY channel, and also sells for a lot of money. Novices should not attempt to build the SSAVI system.

FREQUENTLY ASKED QUESTIONS

What is a Descrambler?

A descrambler is a device that restores the picture and sound of a scrambled channel. In most cases, ALL channels which are scrambled will be restored.

Are Descramblers legal?

YES! It is legal to build, sell, ship, use, and own a descrambler; However, when you use a descrambler, it is your responsibility to notify the cable company that you are accessing their signal.

Do I need a converter from my cable company?

In most cases NO. A cable ready VCR or TV will work.

Is it difficult to build a descrambler?

Turn me on, the Fifteen Dollar Box, the Oak converter and the Foil method are very simple methods! The instructions provide step by step instructions. No special skill or knowledge are needed. The Notch filter is still fairly simple. The Gated Sync is not for the beginner, it requires electronics knowledge.

Can I build more than one?

YES! You may build as many descramblers as you want! They are legal to sell and demand fairly high prices!

Just send me details of which cable box you have and in what area you reside as the plan needed will vary area to area
For the Plans just send $ 2 or 2 Pounds to:

Costs just get passed on to the members, so you're only hurting
your fellow hams.

I suggest you read about the history of amateur radio, and how
the ARRL, time and time again, kept the hobby from being distroyed.
Heck, we never would have been allowed back on the air after WWI
if it wasn't for the ARRL. You are indebted to them whether you
wish to admit it or not.

Bet you've got at least one ARRL pub on you shelf!

Followup directed to .policy,
Jeff KH2PZ / KH7

Hi
As I know, now, the BW be reserved by Taiwan, CTARL.
^^^^^^^^^^^^^^^^
Till now, both Mainland China and Taiwan, we have no
BW station on air.

For your reference.

Let me guess that (a) this was on CW, (b) the signal peaked
to the south. Add a dit to the first character and you have
the call of a station that is quite active, but not from China.

1816. IOTA DXpedition starts tomorrow

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-13 00:00:00 UTC
From: on4bds@NOSPAMmicroware.be
Message-ID: <5qbjij$87l$1@tornix.tornado.be>
Source record: 32359

F/ON4BDS/P, French West-coast IOTA DXpedition.

This DXpedition will take place from 14 till 28 July 1997.

I am planning to be active on the following IOTA's:

EU-157 C�zembre : 15 - 16 July
EU-074 Br�hat : 16 - 19 July
EU-065 Ouessant : 19 - 22 July
EU-094 Glenan : 22 - 25 July
EU-068 Sein : 25 - 28 July

(maybe also EU105-107, 20% chance)

14 July, I will take the high-speed train to St Malo, where I will board a ferry for Cezembre. I hope to be active on Cezembre by noon on the 15th. Activity on Cezembre might be amateuristic, since this I haven't planned much in advance for this island.
The rest of the trip, I will trot around several IOTA's, trying to keep up with the above schedule. What is absolutely certain, is that I will arrive late in the afternoon on the 25th July on Sein, to put up my antennas for the IOTA contest. After I leave Sein, I might also activate EU-105 and EU107, if I feel like it that is.

Transceiver will be a Kenwood TS50, and antennas will be an FD4 and dipoles.
Operation is planned on all HF bands, including WARC.
QSL cards are ok via the 1996 Callbook adress, or via the buro to ON4BDS, my home call.

Hope to give you some new ones!

CONGRATULATIONS!!!!

1818. Canadian Callsign WHOIS Server

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-13 00:00:00 UTC
From: lyndon@ve7tcp.ampr.org
Message-ID: <5qc14i$s7h@ve7tcp.ampr.org>
Source record: 32411
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

This weekend I implemented a WHOIS based callbook server for Canadian
callsigns. This started out as a benchmark for a simple
database engine I needed for a work related project, but then I
discovered the Canadian callsign data on the RAC website and decided
to test the code with some live data :-)

The server contains data from the RAC (Radio Amateurs of Canada)
callsign database as of July 3, 1997. For now you can only
search by callsign:

```
lyndon@ve7tcp:~> whois -h ve7tcp.ampr.org ve6bbm
VE6BBM
NERENBERG, GORDON LYNDON
10967 - 130 STREET
EDMONTON, AB
T5M0Z6
lyndon@ve7tcp:~>
```

Doing a search on HELP will return some very basic instructions.
The query strings are not case sensitive.

Having built this little beast I'm thinking it might actually be a
useful tool. Some things I'm thinking of are:

* implement fuzzy matching on names
* query by city, province, postal code
* add date range support to provide allow for callsign
searches based on date ranges (i.e. who had VE6BBM in 1970)
* an e-mail based interface for people without direct
IP connectivity.

An obvious extension would be to add an auxiliary database that would hold
mappings of callsigns to QSL managers. If you searched on a DX
call it would then return the info for the QSL manager in addition to
the license data associated with the DX call.

Comments? Suggestions? Volunteers to write code?

Anyone out there have any pointers to additional sources of
raw callsign databases? (I'm going to incorporate the FCC
database later this week.)

1821. $$ LOAN BUSINESS, EASY MONTHLY INCOME, NO BRAINER $$$$$

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-14 00:00:00 UTC
From: a7@a.a
Message-ID: <33c97bd3.0@news.unibe.ch>
Source record: 32414

I have participated in the standard "Please put me on your mailing list" letter and found it to be worth
my time (I get 1 or 2 handfulls or letters every day) but I also found that it's results were nowhere
near what I expected due mainly to people not sending in the money but rather spreading the letter
without paying for it. I participated in that mainly as an experiment and found that there are a
tremendous amount of people willing to do it. I thought about how to, first, eliminate the "non-pay"
problem and, second, to create a monthly income. I came upon the solution and decided to start a new
program. I decided that there were 3 things that this new program needed in order to work for everyone
and they were: 1.) It needed to be very simple and easy for anyone to do, and, 2.) It needed to be
inexpensive enough for even the poorest of people, and, 3.) It needs to be DUPLICATABLE. I think you
will find this program to meet those requirements. I have put lots of thought into it and I ask that you
PLEASE do NOT modify it. This WILL WORK if you follow it. This system is based on the unconditional
"loaning" of money to people. Simply say, "I am loaning you this $2 as an act of goodwill to help you in
your financial need, you may pay me back if and when you can." You should find 5 or more people who will
send $2 to the 5 needy people on this list AND MAINTAIN 5 or more people who will do the same. You
should put your name on postition number 5 and move each of the other names up one position. The name
originally on position number 1 gets removed. You should be able to contact each of your 5 or more
people to see if they are going to be active this month. If not then you need to find one or more people
to be active in order to maintain at least 5. I am not speaking about the 5 people on the list but
rather the 5 new people you have found. I would highly suggest having more than 5 in any given month.
Now I know that this would be extremely easy to do since I can think of at least 20 people myself who
will do this consistently. The key is to maintain at LEAST 5 active people. If you don't then you can't
expect for the rest of the people to do it either and you can't expect for this system to work. This

system is a no-brainer, and if someone can't afford the $10 + stamps for this then they truly ARE in
need! It is OK to use the internet to find people but I think it would be easier to find them through
people that you know. This way it will be easier for you to contact them every month to ask about their
being active, unless someone is willing to give you their e-mail address. Here are some numbers:

Monthly income model per level and total for maintaining 4 active members @ $2 each:

Level 1: $2 x 4 people = $8, Total now $8
Level 2: $2 x 16 people = $32, Total now $8 + $32 = $40
Level 3: $2 x 64 people = $128, Total now $8 + $32 + $128 = $168
Level 4: $2 x 256 people = $512, Total now $8 + $32 + $128 + $512 = $680
Level 5: $2 x 1024 people = $2048, Total now $8 + $32 + $128 + $512 + $2048 = *** $2728 ***

Yearly income: $2728 x 12 months = $32,736

Monthly income model per level and total for maintaining 5 active members @ $2 each:

Level 1: $2 x 5 people = $10, Total now $10
Level 2: $2 x 25 people = $50, Total now $10 + $50 = $60
Level 3: $2 x 125 people = $250, Total now $10 + $50 + $250 = $310
Level 4: $2 x 500 people = $1000, Total now $10 + $50 + $250 + $1000 = $1310
Level 5: $2 x 2500 people = $5000, Total now $10 + $50 + $250 + $1000 + $5000 = *** $6310 ***

Yearly income: $6310 x 12 months = $75,720

Monthly income model per level and total for maintaining 6 active members @ $2 each:

Level 1: $2 x 6 people = $12, Total now $12
Level 2: $2 x 36 people = $72, Total now $12 + $72 = $84
Level 3: $2 x 216 people = $432, Total now $12 + $72 + $432 = $516
Level 4: $2 x 1296 people = $2592, Total now $12 + $72 + $432 + $2592 = $3108
Level 5: $2 x 7776 people = $15552, Total now $12 + $72 + $432 + $2592 + $15552 = *** $18660 ***

Yearly income: $18660 x 12 months = $223,920

Monthly income model per level and total for maintaining 7 active members @ $2 each:

Level 1: $2 x 7 people = $14, Total now $14
Level 2: $2 x 49 people = $98, Total now $14 + $98 = $112
Level 3: $2 x 343 people = $686, Total now $14 + $98 + $686 = $798
Level 4: $2 x 2401 people = $4802, Total now $14 + $98 + $686 + $4802 = $5600
Level 5: $2 x 16807 people = $33614, Total now $14 + $98 + $686 + $4802 + $33614 = ***

$39214 ***

Yearly income: $39214 x 12 months = $470,568

Keep in mind that it does not matter what day of the month that someone chooses to be active. It DOES
matter that they are active on that day EVERY month. The key to this is DUPLICATION! You must treat this
as a business. If you treat it like a hobby that is how it will treat you. You could even organize small
meetings with your people and their prospects and work with your leaders.
Think of how easy this would be for you, how reasonable this is, and of how good the chances are of it
working for you. You may need to hire someone to open all the envelopes.

NOTE: I decided on $2 instead of $1 because it is more feasible and it won't matter much for someone to
send $2 as opposed to $1. Also I was against $5 as that becomes too expensive to duplicate.

Mail $2 every month with a piece of paper saying "I am loaning you this $2 as an act of goodwill to help
you in your financial need, you may pay me back if and when you can" to the following needy people:

#1 Robert Jezil

1822. $$$$$ NEW SYSTEM, BETTER THAN "ADD ME TO YOUR MAILING LIST" $$$$$$

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-14 00:00:00 UTC
From: a14@a.a
Message-ID: <33c9aa3e.0@news.unibe.ch>
Source record: 32415

I have participated in the standard "Please put me on your mailing list" letter and found it to be worth
my time (I get 1 or 2 handfulls or letters every day) but I also found that it's results were nowhere
near what I expected due mainly to people not sending in the money but rather spreading the letter
without paying for it. I participated in that mainly as an experiment and found that there are a
tremendous amount of people willing to do it. I thought about how to, first, eliminate the "non-pay"
problem and, second, to create a monthly income. I came upon the solution and decided to start a new
program. I decided that there were 3 things that this new program needed in order to work for everyone
and they were: 1.) It needed to be very simple and easy for anyone to do, and, 2.) It needed to be
inexpensive enough for even the poorest of people, and, 3.) It needs to be DUPLICATABLE. I think you
will find this program to meet those requirements. I have put lots of thought into it and I ask that you
PLEASE do NOT modify it. This WILL WORK if you follow it. This system is based on the unconditional
"loaning" of money to people. Simply say, "I am loaning you this $2 as an act of goodwill to help you in
your financial need, you may pay me back if and when you can." You should find 5 or more people who will
send $2 to the 5 needy people on this list AND MAINTAIN 5 or more people who will do the same. You
should put your name on postition number 5 and move each of the other names up one position. The name
originally on position number 1 gets removed. You should be able to contact each of your 5 or more
people to see if they are going to be active this month. If not then you need to find one or more people
to be active in order to maintain at least 5. I am not speaking about the 5 people on the list but
rather the 5 new people you have found. I would highly suggest having more than 5 in any given month.
Now I know that this would be extremely easy to do since I can think of at least 20 people myself who
will do this consistently. The key is to maintain at LEAST 5 active people. If you don't then you can't
expect for the rest of the people to do it either and you can't expect for this system to

work. This
system is a no-brainer, and if someone can't afford the $10 + stamps for this then they truly ARE in
need! It is OK to use the internet to find people but I think it would be easier to find them through
people that you know. This way it will be easier for you to contact them every month to ask about their
being active, unless someone is willing to give you their e-mail address. Here are some numbers:

Monthly income model per level and total for maintaining 4 active members @ $2 each:

Level 1: $2 x 4 people = $8, Total now $8
Level 2: $2 x 16 people = $32, Total now $8 + $32 = $40
Level 3: $2 x 64 people = $128, Total now $8 + $32 + $128 = $168
Level 4: $2 x 256 people = $512, Total now $8 + $32 + $128 + $512 = $680
Level 5: $2 x 1024 people = $2048, Total now $8 + $32 + $128 + $512 + $2048 = *** $2728 ***

Yearly income: $2728 x 12 months = $32,736

Monthly income model per level and total for maintaining 5 active members @ $2 each:

Level 1: $2 x 5 people = $10, Total now $10
Level 2: $2 x 25 people = $50, Total now $10 + $50 = $60
Level 3: $2 x 125 people = $250, Total now $10 + $50 + $250 = $310
Level 4: $2 x 500 people = $1000, Total now $10 + $50 + $250 + $1000 = $1310
Level 5: $2 x 2500 people = $5000, Total now $10 + $50 + $250 + $1000 + $5000 = *** $6310 ***

Yearly income: $6310 x 12 months = $75,720

Monthly income model per level and total for maintaining 6 active members @ $2 each:

Level 1: $2 x 6 people = $12, Total now $12
Level 2: $2 x 36 people = $72, Total now $12 + $72 = $84
Level 3: $2 x 216 people = $432, Total now $12 + $72 + $432 = $516
Level 4: $2 x 1296 people = $2592, Total now $12 + $72 + $432 + $2592 = $3108
Level 5: $2 x 7776 people = $15552, Total now $12 + $72 + $432 + $2592 + $15552 = *** $18660 ***

Yearly income: $18660 x 12 months = $223,920

Monthly income model per level and total for maintaining 7 active members @ $2 each:

Level 1: $2 x 7 people = $14, Total now $14
Level 2: $2 x 49 people = $98, Total now $14 + $98 = $112
Level 3: $2 x 343 people = $686, Total now $14 + $98 + $686 = $798
Level 4: $2 x 2401 people = $4802, Total now $14 + $98 + $686 + $4802 = $5600
Level 5: $2 x 16807 people = $33614, Total now $14 + $98 + $686 + $4802 + $33614 = ***

$39214 ***

Yearly income: $39214 x 12 months = $470,568

Keep in mind that it does not matter what day of the month that someone chooses to be active. It DOES
matter that they are active on that day EVERY month. The key to this is DUPLICATION! You must treat this
as a business. If you treat it like a hobby that is how it will treat you. You could even organize small

1823. July Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-14 00:00:00 UTC
From: ids@nol.net
Message-ID: <33c9b3b9.44961719@news.nol.net>
Source record: 32416

PROPAGATION - by AD5Q HOUSTON, TEXAS -- JULY 1997

Summer continues to provide us with evening propagation on the high bands following the long lowband season that runs from fall through spring. The outstanding 10 Meter conditions of recent years are a distant memory, and few DX'ers spend much time tuning 15 anymore. At sunspot peaks, 20 Meters is used primarily as a nighttime band year-round. With the cycle dragging bottom, summer provides us with our only remnant of these good times. Things are really dry on the high bands.

We are beginning to hear forecasts of better times ahead from those who watch the solar charts more closely than I. Butterfly charts, which show the pattern of latitudes for sunspot activity, are showing that cycle 22 has completed and 23 has begun. This is good news for the long term, but it will be at least a year before we see substantial improve-ment even on 15 Meters. Brief periods of flux readings into the 80's and above will start to become more frequent but will not do much for us. The sunspot pundits will continue to gaze upward at the barren sun for signs of excitement, and can now surf the web to view sophisti-cated pictures and charts of our predicament. We will continue to report on propagation with a focus on working whatever DX is out there.

Much DX activity has departed 40 Meters for the summer due to the higher noise levels, but the stronger stations are still coming through and are workable. Many of them are regulars, and have already been logged by everyone that's been on much. There is still a nice Asian path in the morning, with Europe through the evening. High latitude paths are difficult on 40 even in winter, and are now out of season.

But it is summer, and high latitude paths are wide open on 20. Every evening we can work over the pole into Siberia and Turkestan, listening to that hollow and mysterious echo we never tire of. We can also hear it for much of the morning, especially for the first couple hours after sunrise. This path is to the Far East, and provides contacts that are especially exotic from a North American perspective. Those in other parts of the northern hemisphere can work these same paths, but they lead to different populations equally far off. Late afternoon opens an evening path to Europe equivalent to the seasonally deteriora-ted path on 40 in the same direction. Africa is open for most of the afternoon via short path, and briefly in the morning for a westerly challenge. The VK's and ZL's will gladly ragchew your ear off in the late evening, and Japan opens up around midnight as the sun

approaches the horizon there. Things ain't so bad unless you are one of those watching the sun and waiting for 10 to open to Zone 22.

im new to hf radio and DXing. can you give me any advise.
here is my hf EQ.
kenwood ts-850s/sm220 monitor/sp-31 speaker/mc-80-mic/
viking nyne phone patch. easyway 55ft tower with hygain explorer
14 and 40 meter add on kit. flexi 4xl cable for everything.
i also have a packet system for the dx cluster. im hearing alot about
all kinds of software to run for logging/dxing/beam headings/etc etc. so
what should i do for software? and how can it help me? in my dxing? is
there awards for working all state/islands/country's/
etc,etc....?? any help fron you real dxer's will really help me...
thanks in advance... 73 and hope to catch you in the pile up's..

>oo7@astro.as.utexas.edu
>

Hey, you must mean 6W1AE ! :-)

I just received a QSL from him via buro. I remember he was QRS when I
worked him on CW.

1832. 4L6HMC

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-14 00:00:00 UTC
From: kuzen001@acpub.duke.edu
Message-ID: <5qe5gl$25p$1@news.duke.edu>
Source record: 32425

A while back I worked 4L6HMC. Didn't find any QSL info
on him for a long time, then saw "via OH7AB" in one of
those databases of managers.

I just heard back from the OH; he sent my card back with a
sticker saying "SRI OM OH7AB is not a manager of any UA station."
(Talk about a good guy--he returned the 'green stamp,' too!)

Anybody work this station? Have a route/manager/whatever?
BTW, I'm also waiting, like our JA friend who posted earlier,
to hear about CU2X. Many thanks.

1834. "Bird song" QRM

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-15 00:00:00 UTC
From: bb099@cleveland.Freenet.Edu
Message-ID: <5qf1o2$p5p@alexander.INS.CWRU.Edu>
Source record: 32427
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.dx

Debate on CW aside, I was wondering if some OM or YL out there happens to be familar with a certain type of QRM I heave heard recently on BBC. It's only on their 49 metre band signal at 5.975 MHz signal, usually around 04:00 to 05:30 Zulu.

The QRM sounds like a "Morning Glory" or similar bird that is common to the midwest US (people near my Ohio QTH should hear it around sunrise every spring through summer). I know the sound is electronic for three reasons

(1) I hear it only from an indoor music source (like a press confrence or from the studio)

(2) It is WAY too regular and consistent to be from a real bird.

(3) I remember reading many years ago about a form of QRM that sounded like a bird. I think people where using them on CB's in the 80's a lot.

If anyone knows, or can jog my memory, I would be thankful.

73's

Hi Thanks for reading,
I am looking for mods for my kenwood/trio TR751e,
what i would like to do is to get it to rx below 144.00
i have got the display to read 140 to 150 but it only rx,s from 144 to 150
dont know why?? the display shows a small minus sign when trying
to tune below 144 mhz !!
any help would be of great use ....73s DE dave Gw7pny

Of course it is. However, cranking up a web browser to search and retrieve strictly textual information incurs a lot of system overhead. WHOIS is designed specifically for this type of application -- it's lightweight, fast, and doesn't require a GUI.

I am looking for help selecting a new rig, I am just starting out in this hobby and am looking for a transeiver with 6M and 2M (any additional wouldn't hurt) or an HF w/ 6M and 2M. I am looking to spend about $1,000 for my entire setup, at the moment I am looking at the Icom IC-706MKII, it is a HF+6M+2M, a little more than I wanted to spend but will if it is all I can find.

If you can help me or give me some info (antenna info as well) please send me e-mail at: Matth@netacc.net, or at lease forward a copy to my e-mail, thanks in advance!!!

Matt

1841. RSGB HF & IOTA Convention

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-15 00:00:00 UTC
From: John W Gould <g3wkl@pagnell.demon.co.uk>
Message-ID: <i4A4+BAln+yzEwjI@pagnell.demon.co.uk>
Source record: 32434

RSGB HF and IOTA Convention

26, 27 and 28 September 1997

This years Convention will again be sited at the Beaumont Conference Centre, Old Windsor, Berkshire, UK.

The Convention is being organised by the RSGB HF Committee in conjunction with the RSGB IOTA Committee, the RSGB HF Contests Committee and the Chiltern DX Club (The UK DX Foundation).

This Convention is a real MUST for active 30MHz to 73kHz enthusiasts and IOTA participants, and is the ONLY opportunity to discuss equipment and operating techniques with like-minded radio amateurs from all over the world. The weekend offers a full three-stream lecture programme on both Saturday 27 and Sunday 28 September, with the IOTA Buffet taking place on Friday 26 September and the ever popular DX Dinner on the evening of Saturday 27 September.

Entrance to the Convention will be FREE for all Under 21s. For others, the Day Visitor's fee will be payable on arrival at £6 per day or £10 for both days. The fee includes free parking and free hot beverages plus all talks and facilities at the Convention. See the booking form for day visitors if you wish to attend the Friday IOTA Buffet, the Saturday evening DX Dinner or wish to take part in the Partner's Programme

The sponsors of this event are Yaesu (UK) Ltd and Martin Lynch and Son.

Outline of programme:

VK0IR Dxpedition - Ghis Penny ON5NT (Saturday: 35 mm slides & Sunday: Video)

Ghis will present a detailed account of the recent record breaking DXpedition to Heard Island. His talk will be in two parts - over an hour of slides on the Saturday, and a 55 minute video on the Sunday. This is your opportunity to relive the excitement of the expedition, but this time see the DXpedition as it was to those amateurs who braved the elements, far south, in the Southern Ocean.

Supporting Polar Expeditions - Laurence Howell GM4DMA (Saturday & Sunday)

Laurence and Morag have shared the opposite ends of the important radio life-line on a number of polar expeditions. He will describe the technical and physical problems, preparation and excitement of this unique brand of radio operating.

IOTA (Saturday & Sunday)

The RSGB Islands of the Air (IOTA) Programme will have a high profile at this year's convention. Apart from the IOTA reception and sit-down buffet on the Friday evening there will be three lecture slots. The IOTA Committee will be well represented and will be organising a number of activities. There will be something for everyone from the newcomer to the honour roll member.

The activities include:

DXpeditioning including guidelines, environmental impact and finances ;
Reports of the past years activities including feedback from the Fresno, Dayton, Friedrichshafen and Tokyo conventions;
Demonstrations of our new software and the members system IOTAMEM;
Slide and video presentations of recent IOTA DXpeditions;
Our new presentation - "This is IOTA";
Our Millennium activities;
The new IOTA certificates;
IOTA on the Internet;
IOTA quiz and game;
Question and answer session.

DXCC Award Programme - Bill Kennamar, K5FUV (Saturday)

Following the successful lectures on this subject during the last two years, we are delighted to welcome Bill once again to explain the logistics of the ARRL DXCC Programme and to provide us with an insight into the workings of ARRL Headquarters.

IARU Ron Glasier, G6LX (Saturday)

Ron will will put some of the current IARU issues in perspective by talking about the history of IARU and the role of the RSGB as a founder member. He will illustrate his presentation by showing a video of last year's Region 1 Conference in Tel Aviv. This is your chance to find out more about IARU, to learn how it can shape our hobby for the future, and to appreciate how the RSGB represents us internationally.

DX Operating Techniques: beginner to expert - Don Field, G3XTT (Sunday)

Don, a well known DX enthusiast, will give a short talk and answer questions on how to get the most out of your rig and aerial system, whether it is a modest set-up or the latest black-box and tower arrangement. He will also give some insight as to how you can improve your operating technique to beat the pile-up, and importantly for some, get that elusive QSL card?

The History of BERU Bob Whelan, G3PJT (Sunday)

Another chance to hear Bob's facinating history, and latest updates, of this unique contest - The Commonwealth Contest or BERU. It is one of the longest running DX Contests in the World. Started in 1931 to promote contacts between stations in the Empire, it has become an annual event and a firm favourite of stations all over the Commonwealth. In the 193Os it was a major factor in the development of new antennas and receivers. 1997 is the UK Year of the Commonwealth and the Diamond Jubilee of the BERU Contest, it is therefore appropriate that we should review the contribution that this contest has made

to the development of amateur radio. Many individuals have entered this contest every year for 50 or more years. Through their eyes a unique insight can be gained into amateur life over the past 70 years.

Aerials - from HF to toroidal aerials for 73kHz - Prof. Roger Jennison, G2AJV (Saturday)

Roger, well known for his unique contribution to aerial design, will explain the basics of how aerials operate. He will then show how the elementary theory can be applied to derive his unique toroidal design for general HF operation, and how recently that has been scaled for 73kHz operation. An exciting lecture, with a bit about the possibility of radio frequency photons ending up somewhere in the universe as electrons and positrons, making tangible matter as a finale!

Exploring the world of the Digital Modes - Chris Lorek, G4HCL and Phil Bridges, G6DLJ (Sunday)

The use of data modes is growing almost exponentially on HF. We're seeing greater use of digital signal processing techniques, and this audio-visual talk will detail some of the data modes eminently suitable for HF together with their use, and provide a glimpse of what the exciting future of HF data could have to offer.

Chris Lorek G4HCL has reviewed a wide range of multimode TNCs over the past ten years, and is currently the RSGB's technical reviewer for data units in RadCom. In his professional capacity, Chris is also the Chief Engineer of an international radio communications company providing systems to government, commercial, and aid organizations throughout the world. He shares the results of his vast experience in this talk.

Technical advances on 73kHz - Andy Talbot, G4JNT (Saturday)

Andy, well known for his microwave interests has already shown his lead on this new LF band. He is one who is setting the pace for both design and operation achievements. He will take stock of the current "state of the art" and perhaps suggest where we all might aim out efforts in future.

PacketCluster technology and practice - John Dundas, GM0OPS (Sunday)

PacketCluster technology has been with us now for a number of years, so what is new? Why do the DX spots take time to propagate across the network? What comprises the backbone, or network, and how is it developing? How will the new bandplan for 2 metres affect the access to the Cluster? These and other questions will be answered along with some tips as to how to get the best out of your setup for linking to your local node.

Radio and Radiations from the Sun - About The Next Solar Cycle - Geoff Grayer, G3NAQ, Propagation Studies Committee
(Saturday)

Geoff, a member of the RSGB Propagation Studies committee will explain some of the physics behind the radiations from the sun and how that affects HF radio propagation. He will dispel some of the myths, and help us better appreciate

what we can learn from the propagation indices. We may be able to get him to give his own views on what the next Solar Cycle may bring!

RadioCommunications Agency Open Forum (Sunday)

The RA will lead a question and answer session, along with the Colin Thomas, G3PSM and Chairman of the RSGB HF Committee, covering all aspects of HF and LF amateur operation. This is expected to be an interesting and lively session. The RA is encouraging all radio amateurs to attend - this is your opportunity to put views or questions on policy to our regulatory authority.

Planning & Advisory Committee Forum - Louis Thomas, GW4ZXG, Planning & Advisory Committee (Saturday)

Louis has kindly agreed to repeat the Forum that he ran a few years ago, and give us the benefit of his detailed knowledge of planning matters. He will give a short talk and then take your questions.

73kHz Forum - John Gould, G3WKL (Saturday)

Following the success of last year's event it is planned to hold another open forum for the experimenters involved in this challenging new amateur alocation. Participants will be encouraged to discuss their plans, successes and failures leading it is hope to a successful exploitation of this band.

Novice Forum - Keith Kahn, G3RTU (Sunday)

How can we better integrate the novice into main-stream amateur radio? What is the best up-grade path that he or she should follow? These and similar questions need addressing in order to encourage the newcomer to our hobby to make greater use of the unique operating and experimental privileges that the world-wide authorities allow us. Come and share your views to secure the future of the hobby.

HF Contest Forum - HF Contest Committee (Saturday)

The RSGB HF Contest Committee will be on hand to answer any queries that you may have regarding HF contests.

Trophy Presentation (Saturday)

The award of 1996 - 97 HF and Microwave Trophies

Young Amateur of the Year (Sunday)

The presentation of awards to the 1997 Young Amateur of the Year and the Runner up will take place on Sunday shortly following the RA Forum. representatives from the RSGB, RA and the Commonwealth Office will be present. The presentation is open to all visitors to the Convention.

To obtain further information and your priority booking form please contact Marcia or Fay on +44 (0)1707 659015 (0815 to 1615 UTC) or fax +44 (0)1707 645105 (24 hour).

More information, covering the times of the various events as well as other attractions - the DXCC Card checking and Special Event Station, Trade stands, etc. at http://www.pagnell.demon.co.uk/conv/convention.html

Introducing the Hottest Breakthrough in Network Marketing History!

Bottom line/smallprint: NO minimum purchase required . Zero.
Only an annual fee of $29.95 and your chance to save and earn BIG money.

We are the first company to combine the Hottest Products of the 20th Century, the Hottest Telecommunication Services available, 1000's of Name Brand Products you buy everyday, and the Best Pay-Plan in the Industry!

Products will be presented in 3 formats:

1. In a state-of-the-art Internet Mall
2. In printed catalogs that you can hand out or mail out
3. In a beautiful CD-ROM that you can hand out or mail out

If you want you may go directly to this web page :

http://www.romegeorgia.com/cgi-bin/mfgdir/index.cgi?CH0667

Or,

For all the hottest details on this once in a lifetime opportunity, reply to ICTC@nhi.no with "More Info" in the subject field, and the information will be sent to you ASAP!

Or read on here :

Does this sound too good to be true??? Well, it's true, and here's why:

We are working closely with the following businesses to bring you all the greatest products of the nation through the convenience of Home Shopping!

1. One of the Largest Wholesale Clubs in the Nation, bringing you 1000's of products you are currently buying and using every day!

2. Sysco Foods, the Nation's Largest Food/Household products supplier for Supermarkets, Grocery Stores, Hotels/Motels, and Restaurants!

3. Suppliers of "As Seen On TV" products, 25,000+ Name Brand Foods Items, Nutritionals, Weight Loss products, 175,000 Music CDs, Sharp, Panasonic, Southwestern Bell, Quasar, Timex, Seiko, Black & Decker, KTool, Sunbeam, Mikasa, Corning, Char-Broil, Bush Furniture, Braun, Vidal Sassoon, Gifts, Jewelry, Fragrances, and the list keeps growing!

4. A $100 Million Telecommunications company bringing you the HOTTEST High-Tech products available ANYWHERE! Plus all the services you use everyday at prices that will save you money just by using them!

9.9 cpm Long Distance Service
$9.95 Unlimited Internet Service
Virtual Home/Office System
Free Calling Cards

Combined all this with the Hottest Sponsoring System available online and your success is bound to be unbelievable! FREE Webpages to use when sponsoring others, Weekly Updates to keep you informed, Rep Support Center to have all your questions answered DAILY, and much, much more!

See this webpage for more info :

Source record: 32438

Dear Friend,

Greetings! I am a retired Attorney, and about two years ago a man came to me with a letter. The letter he brought me is basically the letter in your hands. He asked me to verify the fact that this letter was legal. I told him that I would review it and get back to him. When I first read the letter my client brought me I thought it was some off-the-wall idea to make money. However, a week and-a-half later we met in my office to discuss the issue. I told him the letter he originally brouht to me was not 100% legal. I suggested a few changes with which the letter would be 100% legal.

I was curious about this letter, and my client told me how this plan works and suggested that I give it a try. I thought it was a long shot and would be a wast of time, so I decided against participating. However, before my client left, I asked him to keep me updated of his results. About two months later he called me to tell me he had received over $800,000 in cash!! I didn't believe him, so he suggested that I try this idea and find out for myself. I thought about it for a couple of days and decided that I didn't really have anything to lose, so I asked my client for a copy of the letter. I followed the instructions exactly, sent out 200 copies, and sure enough, the money started arriving! It came slowly at first, but after 3 weeks, I was getting more mail than I could open in a day! The money stopped coming after about three months. I kept a precise record of my earnings, and they totaled $968,498.00!!

I was earning a good living as a lawyer, but anyone in the legal profession, or even anyone who owns their own business will tell you, there is a lot of stress that comes with the job. I told myself that if things worked out, I would retire from my job and travel. I decided to try the letter again, but this time I sent out 500 letters. Well , three months later, my earnings totaled $2,344,178.00!!! I just could not believe it. I met with my former client (and now my friend) for lunch to find out how it worked. He told me there are quite a few similar letters going around. What made THIS ONE DIFFERENT WAS THE FACT THAT 6 ADDRESSES APPEAR ON THE LIST, AND NOT 5 LIKE MOST OF THE OTHERS. This fact alone results in your name being on far more returns. Of course I was thankful that he had shown this plan to me, but he was just as thankful that I had suggested the changes to ensure that this plan was legal since most people don't want to risk doing something illegal.

I'll bet that by now you are curious to know the little change I suggested in my friend's original letter. Well, if you send a letter like this out, to be legal you must actually sell a product or service

if you expect to receive a dollar. I told my friend that anyone sending a dollar back to him must receive something in return. You have received this letter due to the participation of each of the 6 persons given below. This letter and the plan given within this letter are a "product" that you have received. Thus, you will be sending $1.00 to each of the 6 persons given below in exchange for receiving this letter and for asking them to provide the "service" of adding you on their mailing list.

THIS IS A SERVICE AND IS 100% LEGAL BUSINESS OPPORTUNITY WHICH IS COVERED IN TITLE 18, SECTION 1302 AND 1342 OF THE POSTAL AND LOTTERY LAWS.

NOW, PLEASE FOLLOW THESE TRIED AND TRUE STEPS TO OBTAIN THE AMOUNT YOU DESIRE:

1) Immediately send a $1 dollar bill to each of the 6 people on the list below. Wrap this dollar in a note with the words: "Please put me on your mailing list." (Remember, in this way, you're not just sending a dollar to someone; you're paying for a legitimate service.) Include your address. You do not need to include your name. This is the key to the program! Also, let each person know what number they are in the letter so he/she knows which cycle he is receiving the $1.00 from. Make sure that you retain EVERY name and or address sent to you, either on computer or hard copy, but do not discard the names and notes that people send to you. This is PROOF that you are truly providing a service, and should the I.R.S. or some other government agency question you, you can provide them with this proof! Therefore you will start a list of all the people who send you a dollar requesting to be added on a mailing list. Actually, you will want to safeguard this list because it can generate even better responses and much more money later! See step #4 below.

2) Remove the name next to the #1 on the list, and move the rest of the names up one position. Then place your name in the #6 spot. Thus, #6 becomes #5, #4 becomes #3, etc., and YOU will be #6 on the list. DO NOT EDIT THIS LETTER ANYMORE BEYOND THIS POINT. When you are mailing this letter, you may edit the references to the internet.

3) Post this letter in at least 250 newsgroups, I do 5 groups per post. You can simply copy the contents of this letter and past it to the newsgroups of your choice.
IMPORTANT NOTE: Please pay attention to the newsgroups in which you post. If there is an abundance of similar letters, you may want to seek another newsgroup. Thus, pat respect to the harmony of the newsgroup and use common sense. There are plenty of newsgroups on the Internet. (I think there are close to 18,000 of them.) ALSO, PLEASE POST IN APPROPRIATE GROUPS AND SPREAD YOUR POSTINGS OVER MANY DIFFERENT LOCAL & INTERNATIONAL AREAS (SPREAD THE WORD)!
For added success, you can also mail this letter as well, in addition to posting in newsgroups. Order 200 (or more) names from a mailing list company. Two that have been most effective for these names are:

S.E. Mailing List Advon Distributors
P.O. Box 15061 P.O. Box B-11
Ft. Lauderdale, FL 33318S Helly, ID 83274
(954) 742-9519 (800) 992-3866

4. Keep a copy of this letter so you can use it a second time. Also keep EACH AND EVERY NAME AND ADDRESS SENT TO YOU as instructed in #1. Then, send out more copies in about 6 months, but mail it to the addresses you receive (your new mailing list) with each dollar! It will work again, only much better!

Here are the addresses that you must send a dollar to with your slip of paper requesting placement on their mailing list, as instructed above:

1. Ron van Hoof
14 Moshier St.
Greenwich, CT 06831
USA

2. Richard Blanchette
Pob 455
Palisade, Colorado
81520
USA

3. Caroline Mowinckel
Molnar Utca 21
2 Em Nr-10
H-1056 Budapest
Hungary

4. Odd Hilsen
Avda Espana 93
Sitio de Calahonda
Mijas Costa - Malaga
Spain

5. Peter Kjoge
Camino de la Condesa 9, 5-A
E-29640 Fuengirola
Spain

***THIS PLAN WILL NOT WORK UNLESS YOU SEND $1.00 TO EACH OF THE ABOVE PERSONS AS DIRECTED.

How do the numbers work for potential income earnings?
Assume for the sake of example that you get a 7.5% return rate. This is a very conservative, my first attempt was about 9.5%, and my second was over 11%.

1. You send out 250 letters, and 18 people (250 x 7.5% = 18) will send $1 each. $18.00

2. Those 18 send out 250 letters each, and 337 people (18 x 250 = 4,500x 7.5% = 337), send you $1 each. $337.00

3. Those 337 send out 250 letters each (337 x 250 = 84,250 x 7.5% = 6,318), and 6,318 people send you $1 each. $6,318

4. Those 6,318 send out 250 letters each (6,318 x 250 = 1,579,500 x 7.5% = 118,462), and 118,462 people send you $1 each. $118,462.00

5. Those 118,462 send out 250 letters each (118,462 x 250 = 29,615,500 x 7.5% = 2,221,162), and 2,221,162 people send you $1 each. $2,221,162.00

ADD 1-5 AND TOTAL AT $2,346,297.50

ALL THIS IS AT A 7.5% RETURN ON YOUR LETTERS. THAT'S 18 REPLIES ON YOUR ORIGINAL 250 POSTINGS.

Some valuable, general suggestions:

1. DO NOT TRY AND CHEAT THIS PROCESS. IF YOU DO, YOU WILL NOT ACHIEVE THE DISIRED RESULTS.

2. The Internet is a very effective medium for exposing this vehicle. However, pay attention to newsgroups, and avoid posting this letter in the newsgroups where there are a lot of upset epeople complaining about "spamming." In other words, we are asking that you use common sense, and have courtesy to others on the Internet. This may be opposite of what many other similar postings may be saying. Keep in mind that there are plenty of people out there who believe and want this as much as you do.

3. Keep a positive frame of mind while engaging in this process, and you will receive the amount of money you desire.

4. In order to achieve maximum results DO NOT CHANGE THE CONTENTS OF THIS LETTER. However, you may edit applicable portions relating to Internet when sending this letter via regular mail.

5. When the money begins to arrive, it is a good gesture to give 10% or more to your church or favorite charity with a joyful spirit.
The Internet has proved to be a very quick and effective means to reach millions of people with your message. This message exemplifies a UNIVERSAL LAW OF ABUNDANCE that there is plenty to go around for everyone. You will not be hurting anyone and will be creating the opportunity for those who read your message to benefit--just as you will--from the abundance that exists in this universe.

I am interested in buying a good general coverage short wave receiver. Is Collins Radio still the best? Are they still in this business? I searched for them on the internet and got rockwell and it looked like they were only int aircraft avionics. Can someone please offer advice on what companies are good in this product area. thanks

You are probably hearing:

RAI - Radiotelevisione Italiana (external service)

0415-0425 smtwtfs ITALIAN EuMEAf..... 7270 5975

0425-0440 smtwtfs ENGLISH EuMEAf..... 7270 5975

The RAI external radio ID is a bird chirping

This is not very clear. Are you saying you believe it's riding on the
BBC's audio, or it's being transmitted from another transmitter on 5975 kc?
If the BBC's carrying it, you can't call it "QRM."

> (2) It is WAY too regular and consistent to be from a real bird.
>
> (3) I remember reading many years ago about a form of QRM that
>sounded like a bird. I think people where using them on CB's in the 80's a

I believe Radio South Africa uses a singing bird as a freq'y marker;
they'll play it for quite awhile prior to the beginning of a scheduled
broadcast.

Best to direct these type of questions to the NG rec.radio.shortwave -
that's where the experts on these sort of things hang out.

Volume 1 Number 87
July 17, 1997
Edited by Bernie McClenny, W3UR

Headlines

Ken, VY2RU, in talking about the upcoming operation to St. Paul Island says "As of today the DXpedition is still a go with 5 ops, VY2SS, VY2RO, VY2LI, VY2KHZ/W3KHZ, VY2CD and hopefully a 6th op being confirmed in the near future." He also said they will not use the CY9SPI callsign, instead they will use CY9SS for this trip. As a reminder they will be active from 23 to 30 July. Ken later said the 6th operator who may or may not go with the group would be only operating on 6 meters. More details to follow in the next few days.

Alex, RA1PC, is currently located on Heyss Island which is located in the Franz Josef Land group of islands. He operates the club station, R1FJL, and also has his own F.J.L. callsign, R1FJR. The club station has the ability to operate on all bands. However, due to the sun never setting on F.J.L. and with rotten conditions he is only active on 20 meters. He will be on F.J.L. until the spring of 1998. QSL for R1FJL is via RK1PWA and for R1FJR via F5PYI.

Martti Lane, OH2BH, reports the weather on Market Reef was not very good and they had to take a helicopter in for the landing. In three days the boys worked over 11,000 QSOs using two stations. A special effort was put forth on RTTY which netted more than 600 QSOs. Martti said "Tim Totten, N4GN, also passed the Finnish license exam while in Finland and he carried back home his newly issued OH4GN callsign." Martti and his wife Leena, OH2BE, will spend the rest of their remaining vacation at their cottage in the Aland Islands resting at OH0BH. They should be active from Friday through Monday, mostly 14195. QSL via OH2BH.

The DX News Sheet reports that EA5FKI will be active from 5A1A in early September on RTTY.

QSN

CE0ZIS - JUAN FERNANDEZ ISLAND - Eliazar showed up on
Wednesday on 21250 working North America and Europe
from about 19:00 to 20:00Z.

PY2BW - BRAZIL - Was working North Americans on 1832 around
01:30Z.

TJ1GI - CAMEROON - This station was found very high in the
band on 14347 working a few Europeans around
20:00Z. QSL via I2EOW.

TJ1US - CAMEROON - Mark was working Europeans on 14260
Wednesday at 18:30Z. QSL via NW8F.

VK0TS - MACQUARIE ISLAND - Tom came up on 14222 around
04:40Z on Wednesday. He was much weaker than the
day before and did not work as many stations. QSL
via VK1AUS.

ZS2LL - SOUTH AFRICA - Was on 1835 and worked a few South
Americans around 00:00Z.

IOTA

The following operations are planned for the 1997 IOTA (Islands on
the Air) Contest for 26 and 27 July. Some of these stations will
be on before and after the contest. This IOTA Contest information
may be used, distributed to any publications, BBS or packet systems
as long as The Daily DX is given as the source.

DX Bulletin 31 ARLD031
From ARRL Headquarters
Newington CT July 17, 1997
To all radio amateurs

SB DX ARL ARLD031
ARLD031 DX news

This week's bulletin was made possible with info provided by The 599Rpt, Tedd, KB8NW, The OPDX Bulletin, Lars, SM3CVM, QRZ DX, the Daily DX, 425DXnews and Contest Corral from QST. Thanks to all.

EASTERN MALAYSIA, 9M6. The Special Event callsign 9M6HIL will be used from the Hillview Gardens Resort in Keningau, Sabah, on August 5 to 24. Operators will include N2OO/9M6OO, N0RN, VS6KY/ZL1TX and a number of local 9M6s. The permanent callsign for the resort will be 9M6A. QSL 9M6HIL and 9M6A via N2OO.

TAIWAN, BV. BV2KI and others will be QRV as B0OM from July 24 to 31. They can be found on 160 to 2 meters, and will be active in the upcoming IOTA Contest. QSL via BV2KI.

SVALBARD, JW. Jurgen, DJ3KR, may be active from here as JW/DJ3KR until 20 July. QSL to home call.

SWEDEN, SM. Special Event callsign 8S3JR will be used to celebrate the memory of King Chulalongkorn from Siam, now known as Thailand. He visited Bispgarden in Jemtland 100 years ago. This operation is in conjunction with the opening of a museum to commemorate the King's visit. QSL via SM3CVM.

CENTRAL AFRICA, TL. Claude, TL8BC, is QRV most days, and can be found between 14118 and 14132 khz around 1600 to 1700z. QSL via F5IPW.

CHAD, TT. Jean Pierre, F5TRP, will be active as TT8LJP. He will be QRV using CW and SSB until October 15, 1997. QSL to home call.

SAINT PAUL ISLAND, CY9. Robbie, VY2SS, Bob, VY2RO, Bill, VY2LI, Art, VY2KHZ/W3KHZ, and Paul, VY2CD, will be QRV from July 23 to 31 as CY9SS. They will operate primarily RTTY and 6 meters. QSL via

VY2SS.

ST. HELENA, ZD7. Gilbert, ZD7BG, is active using CW on 80 to 10 meters. QSL to PO Box 157, Jamestown, St. Helena Island.

PIRATE OPERATION INFORMATION. The operation by 9K2ZZ on July 4 was by a Pirate. Do not send QSLs for this operation to 9K2ZZ's QSL Manager W8CNL.

THIS WEEKEND ON THE RADIO. The Colombian Independence, QRP Summer, SEANET CW and South Pacific 160 Meter Contests, and the North American RTTY QSO Party should keep you busy this weekend. Please see July QST, page 97 for details.

1854. Parabolic Antenna For AMSAT Work

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-18 00:00:00 UTC
From: rutledgec@geocities.com
Message-ID: <5qmt9c$92p$1@excalibur.flash.net>
Source record: 32447
Cross-posted to: alt.ham-radio.vhf-uhf,rec.radio.amateur,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.space

Has anyone ever used or heard of anyone using a parabolic antenna (Satellite Dish Antenna) for working any of the AMSAT birds? Seems like the gain would be nice but are there any problems with polarization and how about the mesh width? - i.e. would a plain old 10' C-Band TVRO dish work for xmit? or would the signals pass right through it?

Thanks In Advance -

Chris Rutledge
KC5FHV

Depending on the frequency, a TVRO dish could work well for you, the mesh is designed to work at frequencies of up to 4 Ghz. As for gain, at 432 mhz, a perfect 12 foot dish has a gain of about 22 dB over an isotropic radiator, according to charts in the ARRL Antenna Book. A 10 foot dish has a potential gain at 432 Mhz of about 20 dB, i figure by interpeting the charts. At higher freqencies, the potential gain is even higher.
At 1296 Mhz, that same 10 foot dish has a potential dBi of about 26 dB, and in fact people have used 10 foot dishes for EME work at these frequencies.
At lower frequencies than 432 Mhz, a dish becomes impractical. A 10 foot dish at 144 Mhz has a dBi of only 8 or 10 dB, a figure I can equal with a homemade 4 element Quad.

The ARRL antenna book also has ideas for building feedhorns for dishes, and other ideas. Good luck and 73
Bruce N3LSY -k-

1856. Re: Parabolic Antenna For AMSAT Work

Hi Chris

Follow some of the links from my web site you will find plenty of info
on parabolics.

The problem with a big dish will be:

1> surface accuracy at required freq. No lumps can be bigger than 1/3
wavelength or you get squints

2> solid or mesh? If mesh the holes cant be bigger than 1/10 wavelength
wide or you get losses

3> pointing accuracy required. A big dish might need a pointing accuracy
of 3 degrees. Pretty hard!

I would go for a smaller dish, say 1M - perfect gain for higher bands,
reasonable pointing accuracy and easy to control.

Polarisation, depends on what satellite, but normally circular - simple
helix feed at the dish focus for 2.3/3.4 and a horn with phasing adapter
for 5.7 and 10 ghz.

I think you must be gearing up for 3D.

Let me know more, I maybe able to help.

73 Simon

Radio South Africa still uses the bokmakierie bird in their interval signal.

I thought the one being referred to was the nightingale used in the
interval signal of either Vatican Radio or RAI (Italy). Whichever it is
(I forget), it is a real recording they have been using for over 25

years. The bird is long gone but its song lives on! :-)

I haven't been able to hear the one mentioned yet here. If it sounds mechanical, it is neither of the ones I mentioned above.

It's the Princiality of Seborga. (Located in Northern Italy).

Although it doesn't count for anything (not even Italy), the cards are usually worth receiving just because it appears to be such a beautiful place. The ops who go there like to put great photos on the cards.

I put them in my file with 1B, 1C, etc. cards.

1860. VE7TCP DX Reflector Funds Drive

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-18 00:00:00 UTC
From: VLBK93A@prodigy.com
Message-ID: <5qoiar$20sc$1@newsxfs02-int.news.prodigy.com>
Source record: 32453

Please direct any questions about the funding drive to:

<funding@ve7tcp.ampr.org>

VE7TCP.AMPR.ORG
1997 Funding Drive

<lyndon@ve7tcp.ampr.org>

Some (Ancient) History

This message is being sent to all subscribers to mail-
ing lists hosted on the ve7tcp.ampr.org server. Copies will be
placed in the root directory of the anonymous FTP area, and on the
web server.

The ve7tcp.ampr.org internet server has been a back room
project of mine (literally) since 1994. It's con-ception can be
traced back to the formation of the Internet DX mailing list
in 1993. The DX list was a spin-off from the very successful CQ-
CONTEST mailing list started by Trey Garlough. The DX list
was ini-tially hosted on a system at the University of Northern
British Columbia, but as time went by the administra-tive load
involved with running the list required it to be moved to a
dedicated server where I had the flexi-bility to install software
necessary to manage the list in a more reasonable (on my time)
manner.

Once the machine was in place, setting up a web site dedicated to
ham radio was a natural extension, and in early 1994
ve7tcp.ampr.org made it's debut as one of the first web/mail
servers on the internet dedicated exclusively to amateur
radio. (As near as I can recall, it was the first, and I
would be interested in corresponding with anyone who can provide
information on other servers that were set up in that
timeframe. There's some history there that should not be lost.)
The initial focus of the server was on contesting and
DX (my two favourite aspects of ham radio, in that
order :-) although it soon grew to encompass other aspects
of the hobby. It was (and has) always been my intention to make
this place a home for useful informa-tion, and not just a site
containing links to other sites ...

From it's birth I have funded the server out-of-pocket. This
worked well until early 1996, by when the load on the server
overwhelmed not only the hardware running it, but also it's
internet connection. That spring I was uncertain what to do about

the situation. I didn't want to turn the operation into a commercial business, but at the same time I didn't want to shut it down. After a bit of soul searching, and a lot of poking from the system users, I decided to undertake a funding drive to get the system upgraded to the point where it could handle the increasing load. The positive response from this was stunning to say the least, and allowed me
to make the upgrades necessary to keep things running smoothly (for the most part) and to expand the service offerings.

Since then, the demand on services has maintained a steady growth, and the hardware has continued to age. We're now at the point where critical components are starting to fail, and doing so with all too much frequency. So once again we are at a point where the sys-tem needs an upgrade if it's to continue doing the job.

What Have You Done For Me Lately?

From it's beginnings as a server for a single mailing list, ve7tcp.ampr.org has grown to offer a wide variety of services to the ham community. Some of these are rather mainstream (the mailing lists, FTP archives, etc) and some are unparalleled anywhere (the Heard Is. log servers). A quick summary of these includes:

Mailing Lists

* The Internet DX Mailing List

* The Heard Is. Expedition Mailing List

* WF1B-RTTY

* CT-USER

* LOGPLUS

* NA-USER

As well it acts as an FTP distribution site for files and software related to CT, DXBASE, Logplus, Logwin-dows, and NA, and mirrors the FTP archives at the ARRL and oak.oakland.edu.

During the Easter Island (XR0Y) DXpedition it provided the first internet-based online search engine allowing hams to query the DXpedition log files to ensure the information about their QSO(s) had been logged cor-rectly. During this years DXpedition to Heard Island (VK0IR) it served up an e-mail log search engine (another first) in addition to providing web-based log search capabilities. And as we've gained experience establishing these services, the software has been made available to the amateur community for use in future expeditions -- a tradition I intend to carry on.

Both the web engine and the FTP archives offer up archives of several DX bulletins (through the efforts of some very dedicated volunteers), and these archives are indexed and available for search via a WAIS server running on the machine. More recently, a WHOIS based Canadian callsign server was added, and I expect to have the US callbook incorporated into that shortly. NNTP feeds of rec.radio.amateur.*, alt.ham-radio.*, and the ampr.* newsgroups are also available.

So What's Next?

Good question. I wish I had a simple answer. There are some immediate goals I would like to achieve:

* Redo all the mailing list archives using Glimpse as the indexing and search engine.

* Provide a single consistent front-end -- both web and email -- for DXpedition log searches, ala what we did for VK0IR.

* Write (yes, write) a replacement for the mailing list server we currently run.

* Replace the existing server hardware with bits that have been manufactured within the last five years, and get some filesystem backups happening.

I also have some longer term goals that involve providing web accessible tools for things like antenna design, propagation analysis, and general electronic design, that are not available to people running low-end computer systems. From an operating standpoint it would be nice to provide an archive for expedition and contest log information in a format suitable for con-ducting propagation analysis, and I would *love* to see a truly interactive QSL database engine that could not only be queried, but *updated* by the users.

What Needs To Be Done?

The most immediate need is to replace/upgrade the existing server hardware. As much as I hate to say it (and believe me, I *hate* asking for money like this), it's going to take $$$ to do this. Details of the his-tory of the server hardware are available on the web page so I won't repeat them here. As it stands right now, the system is running on a 100 MHz Pentium with 128 MB of RAM and roughly 8 GB of disk. A year ago it was an 80486 with 16 MB and about 2GB of disk.

The load imposed by running the mailing lists has always been the limiting factor. Last years upgrades kept the status quo mailing lists quite happy, but the appearance of the Heard Is. list required a RAM upgrade to 32 MB. Since them we've gone to

64, then 128 MB of RAM. Disks have also had to be replaced, mostly due to the old ones failing from old age. A related problem has been heat. The server has enough hardware in it that the fan just can't push the air through it fast enough any more. (I attribute two of the recent disk failures to excess heat.)

As I see it, here's what we need to do to keep the server going:

* Replace the existing cabinet with commercial grade rackmount chassis -- two of them: one for the CPU board and base peripherals, and a second for the SCSI expansion bay.

* Install a tape drive for backups.

* Purchase tapes for the tape drive.

* Replace/upgrade most of the disk farm with current hardware. This includes adding a sec-ond SCSI controller so that I can start interleaving the disk I/O across more than one channel.

* Expand the disk farm to properly accommodate the FTP, mailing list, and expedition log archives.

Beyond this it would be nice to be able to add one or two (or more) SCSI CD-ROM drives in order to be able to offer up some of the public domain amateur radio related CD's via the FTP archives.

How Can I Help?

Over the short term it's quite simple: cash is required to upgrade the hardware. But there is more to it than that. Just having the hardware means nothing unless there are people willing to use it to provide tools and services useful to the amateur community. Running a mailing list is not a simple exercise. The people work-ing behind the scenes put in a lot of hours to see that you get that information in your mailbox. Similarly, maintaining the web site, the FTP archives, the mailing list indices, etc., requires time that we could all be spending on the air. Keeping this going requires a com-munity effort, and it's you the community that must contribute to reducing the information vacuum. First and foremost this site requires VOLUNTEERS to help maintain the services running here. Regardless of your level of computer skills, please consider providing some of your time to help this continue to be a useful site. Just like contesting and DXing, you will learn more by looking over the shoulder of an experienced op than otherwise, and we're more than willing to share our knowledge.

But naturally the other half involves finding the $$$ to fix
the hardware problems we have. I've run up a quick budget showing
where we need to get to:

```
+-----------------------------------------------------+
| Tape drive (DDS-2 Sony DAT 8GB) $1000 |
| DAT tapes for above 110 |
| 4GB SCSI disk 1050 * |
| 4GB SCSI disk 1050 |
| 96 MB RAM 1200 * |
| SCSI Controller 100 |
| SCSI CD-ROM 200 |
| Rackmount Chassis (CPU) 1300 |
| Rackmount Chassis (SCSI) 800 |
+-----------------------------------------------------+
| Sub-total (CDN $) $5810 |
| GST(**) 407 |
+-----------------------------------------------------+
| Total $6217 |
+-----------------------------------------------------+
```

* These represents bits that I have already pur-
chased this year to keep the box running.

** GST is the Canadian "Grab and Steal Tax" -- an
excuse for the government to take an additional 7%
of my livelihood.

The costs I've listed represent my "dealer cost" buying
price. Some of you might be able to get the gear
cheaper, however I insist on purchasing the equipment myself
from vendors I know. It's not worth saving $10
to get something that doesn't work, and UNIX servers are a lot
more picky about what they will or will not work with. (But if
you have pointers to quality hard-ware that I should consider
purchasing, please send the information along.)

How Can I Contribute?

As mentioned above, there are two things required to keep this
service going: volunteers, and money for the hardware.

Anyone wishing to volunteer their time and knowledge, or who has
ideas on how the services here could be expanded to assist the
amateur community should contact me via e-mail at:

<lyndon@ve7tcp.ampr.org>

I discovered last year that collecting donations was almost as
much work as running the server :-(I'm very fortunate this year
in having a volunteer who will be coordinating the collection of
donations on my behalf, freeing up my time to concentrate on
upgrading the server. Those wishing to make cash contributions
to the server upgrade fund can send them to:

Robert Reed (W2CE)
1991 Route 37 West
Lot 109 - Pine Acres Manor II
Toms River, New Jersey
USA 08757

Cheques and money orders are fine -- cash is not.
Please make things out in Robert's name as he will be
depositing the money and forwarding it to me sepa-
rately.

NOTE:

To those of you in Edmonton, I can collect this
money directly. You can reach me via e-mail or at
424-4922 x339 during the day.

Last year I promised to have a web page set up to list those of
you who contributed to keeping the system going. The
workload of keeping up with the donations precluded that, but I'm
hoping that someone with some basic HTML skills will step
forward this year and vol-unteer to maintain that information.

I Would Like To Thank The Academy ...

Jim Reisert (AD1C) deserves a *lot* of thanks for act-ing as the
other system administrator for this system. He spends *way* too
much time watching all the mailing lists, and the machine in
general, in between his duties watching out for contesting.com.
(And we even let him off for a bit to get married :-)

Bob Reed (W2CE) also deserves a large *thank you* for handling
this years fund raising drive. (He doesn't know what he got
himself into :-)

And all the people who keep the bulletin and mailing list
archives up-to-date also deserve your thanks. The system would not
be what it is without them!

From: LittleBILL@webtv.net
Message-ID: <5qpkuu$gg7$1@newsd-104.bryant.webtv.net>
Source record: 32454

I am new to amateur radio and would like some advice from the experienced. I would like to purchase a six meter radio for DX ssb work.

When I check out QST and the radio catologes I dont see much mention of GOOD six meter transcievers. What are the 6 meter radios of choice for DX work? Where can you get them?

Any info would be appreciated. HAVE A GOOD DAY! 73'S KF4SXG

Bill Capps

Hello everybody.
My name is Andre, and my call is CT2GEU. I would like to make an antenna to work the 17 meters band, because my working conditions are only a rusty dipole. I have some material from an old 10m vertical. Please, if you can, send me all the information about sizes, traps, and radials, or even better, a draw of scheme.
Thanks very much, everybody.

SB DX @ WW $OPDX.314
Ohio/Penn DX Bulletin No. 314

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 314
BID: $OPDX.314
July 21, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1BB, KQ2I, WB2YQH and WB2RAJ from The 59(9) DXReport, W4FOA, N5PG, W6KK, W8CNL, F6AJA, G4BUE & DX News Sheet, HA0HW, HL2KAT, JA1ELY, JA1HGY, OH6KXL, PP5LL, SM0AJV, VE2PIJ and VY2SS for the following DX information.

1997 NEW ENGLAND DXCC CONVENTION. The Patriot DX Association will be sponsoring the 1997 New England DXCC Convention to be held Sunday, October 12th. The convention will be held at the Chelmsford Elks Hall, Chelmsford, Mass. (jct I-495/RTE3). An exciting program is shaping up with a pair of new shows from K1XM 1996 CQWW at J3, and the 1997 Spratley trip. N6EK will share his experiences at VK0IR. For more info, contact Bill, N1BB (E-mail address N1BB@JUNO.COM).

5A, LIBYA. The "DX News Sheet" reports that EA5FKI will be active early September from the 5A1A club station. RTTY was mentioned.

CE0, EASTER ISLANDS. Erling/LA6VM and Just/LA9DL have plans after their Peru (see South American Visit) trip to be active from here July 31st to August 4th during their holiday visit. Their callsigns have not been announced as of yet, but using a TS-50 and dipoles antennas, their suggested frequencies were given as:
CW - 7001, 10101, 14001, 18069, 21001 and 28001 kHz
SSB - 7047, 14185, 18120, 21275 and 28475 kHz.
QSL to their home calls via the bureau or direct.

CY9, ST. PAUL ISLAND (ATTENTION RTTY OPs). Robby, VY2SS, reports to OPDX that he and operators VY2LI, VY2CD, VY2RO and VY2KHZ will be active during the last week in July. The team hopes to land on the morning of the 23rd (weather permitting) and leave on the 31st. They report that their activity will be concentrated on RTTY as it has been neglected in many past operations. Their callsign will be CY9SS. QSL via VY2SS. There will also be activity on 6 meters beaming at Europe with a beacon on 50.101 MHz. They will also participate in the IOTA contest from there

as well.

EP, IRAN. Paul, N5PG, has recently called the League to find out the status of EP2MKO. Bill Moore at DXCC advised him that this station is "OK" for DXCC. This station has been heard recently on 20 meters (around 14001 kHz) around 1200z or between 2200 and 2230z. QSL via UA6HCW.

FO, FRENCH POLYNESIA. The following group will operate from Bora Bora as a Multi-Single entry in the CQWW Phone contest in October. The operation will be from the Bora Bora DX Club station and will use the club call FO8DX during the contest. Stan, FO5IW, will be their host for the week. Outside of the contest, the group will operate with individual FO calls, Ron N6VO/FO5VO, Doug N6RT/FO0RT, Mike W6RW/FO0RW, John KA7CQQ/FO0CQ and Charlie W6KK/FO0KK. QSL to CBA's or W6DA.

FR, REUNION. Look for DF2SS to be active sometime between July 28 and August 17th. He will sign as FR/DF2SS/P and will operate mostly SSB on 160-10 meters.

FRENCH WEST COAST IOTA DXPEDITION. Just a reminder that David, ON4BDS, continues to activate islands from here (EU-157 and EU-074 this past week). His next stops are: EU-065 (Ouessant) July now-22; EU-094 (Glenan) July 22-25th and EU-068 (Sein) July 25-28th. After he leaves Sein, he might also activate EU-105 and EU107. Operations are planned for activity on all HF bands, including WARC. QSL cards are "OK" via the 1996 Callbook address, or via the bureau to ON4BDS.

IOTA NEWS.....
Chung, HL2KAT, informs OPDX that there will be some IOTA activity from South Korea. Team leader Lee, DS4CNB, will use the callsign HL0Z/area to activate the following islands: HL0Z/5 Hansan-do Island (AS-080) July 19-20th; HL0Z/4 Huksa-do Island (AS-093) July 26-28th; HL0Z/4 Wan-do Island (AS-060) July 29; and HL0Z/4 Soan-do Island (AS-085) July 30-31st. Suggested frequencies: CW - 7003 or 14020 kHz and SSB - 7084 or 14260 kHz. QSL via bureau or direct to: D.R. Lee, DS4CNB, KwangSan P.O Box 111, KwangJu 506-050, Korea

A Group of Finnish-German hams will activate the Island of Hailuoto (EU-126) from August 15-17th. They will use call OH8TA and will operate mostly on 14260 kHz, but there will be other HF/VHF/UHF bands that will be used as well. Operating modes are SSB and CW. QSL cards will be delivered via bureau.

Jay, PP5LL, will be active from Campeche Island (SA-026) from August 7-11th and San Franciso Island (SA-027) September 1-15th. Callsign to be used on both islands will be PR5L. Activity will be on CW/SSB on the use IOTA frequencies. QSL via PP5LL.

JD1, OGASAWARA ISLAND. Look for members of "Mitubishi Electric Tokyo Ham Club" to be active from here August 14-16th, as JM1YGG/JD1. They will be operational on 40-6 meters CW/SSB. QSL via JM1YGG (JARL) or direct to 7N3GNX: Tatuo Torii, 34-10 Sakuragaoka 3, Tama, 206 JAPAN

KH2, GUAM. JA1HGY and JI1DLZ will be active from here July 25-27th, as KH2/JA1HGY and WH2Q, respectively. Operations will be on 40-6 meters (modes not mentioned). QSL KH2/JA1HGY via JA1HGY: Nao Mashita, 8-2-4 Akasaka, Minato, Tokyo 107, JAPAN. QSL WH2Q via JI1DLZ.

KG2, GUANTANAMO BAY. Larry, WB6VGI, will be returning to GIMTO, Cuba, around the 8th of August for about 30 days. Signing KG4ML (CW and SSB), he will be operating 160-10 meters on the weekends and 80-15 meters on the weekdays. His work schedule will determine the weekday times, but he hopes to be on from 1000-1130 and 2200-0300z. Larry states the weekends will be the big push (but taking time out for a fishing trip or two). This looks like the last trip down to GITMO for Larry, so he is going to try and work as many that need KG4 as possible. WARC bands will have a higher priority as the resident HAM population spends a lot of time on the "usual" bands. He reports 10 MHz is very difficult due to a local noise source that's about 30 over S9, but he will try whenever the noise is absent. QSL is via WB6VGI.

OH0, ALAND ISLAND. A group from Sweden will be active from August 14-17th. Callsigns to be used: OH0/SM0AJV, OH0/SM0EEH, OH0/SM0GNS, 0H0/SM0HJZ, OH0/SM0HPL, OH0/SM0IEA and OH0/SM0IHR. More information about Aland Island and this DXpedition can be found on their WEB page: http://www.mistra.se/oh0/

PIRATE OPERATIONS REPORTED!!!!!
QSL Manager Ray, W8CNL, reports the operation of a 9K2ZZ on the 4th of July was a SLIM. Please DO NOT QSL for this operation. Last operation from 9K2ZZ was on December 4, 1996.

A station recently operating as ZD7HI on CW is reportedly a PIRATE. The real Chris, ZD7HI, only operates SSB. Chris is also not active on 160 or 80 meters at the moment.

QSL INFO AND NEWS.....
Ray, 5R8FK, is asking that we give the widest dissemination as possible for his new QSL route. He asks that "QSL via home call NY3N" be effective immediately.

Paul, N5PG, reports working 9K2RR (May 97) who said, "QSL via K1VKO". K1VKO advises that he is NOT and NEVER HAS BEEN QSL Manager for this station (or any other for the last 5 yrs).

F5LGQ informed Jean, F6AJA, that he is waiting for the XT2DB QSLs from the printer. Some technical problems appeared and it's necessary to wait. PLEASE be patient!

SOUTH AMERICAN VISIT. Before heading to Easter Island (see CE0), Erling/LA6VM and Just/LA9DL plan to be active during a holiday trip now until July 26th as OA/LA6VM and OA/LA9DL. They also plan to vist Bolivia from July 26-29th, Chile from July 29-31st, and Brazil from August 5-7th. They have not received the licenses for these countries as of yet, but expect to receive them upon their arrival. Suggested frequencies and modes are the same as the CE0 operation.

SPECIAL PREFIXES. From now until 2400z September 15th, be looking for the following special prefixes to be active to commemorate the "Centenary for Victorian Order of Nurses for Canada" (Regular prefixes/Special prefixes): VA2/XL2, VA3/CI3, VE1/CG1, VE2/CG2, VE3/XL3, VE4/CG4, VE5/CG5, VE6/CG6, VE7/CG7, VE8/CG8, VE9/CG9, VO1/XO3, VO2/XO4, VY1/XN1 and VY2/XN2.

TK, CORSICA. F5UKW will be signing TK/F5UKW from August 12-31st. He will be active on 40 and 20 meters during his evenings. If he can, he will be active from Cavallo and/or Lavezzi (IOTA EU164).

XV, VIETNAM. Rolf, XV7SW, has returned to Hanoi after a month's vacation in his homeland of Sweden. It has been reported that Rolf is scheduled to leave his position at the Swedish Embassy in the middle of September. He will return to Sweden, but plans to keep his license since he expects to visit Vietnam again later in the year or early 1998.

YI, IRAQ. Laci, HA0HW, has recently talked to his good friend, Sanyi, HA7VK, who is currently active as YI9VK in Bagdad. Sanyi's licence allows him to work on 7, 14, 18, 21, 24, 28 MHz CW/SSB/RTTY. Unfortunately, he is forbidden to work on 160, 80, and 30 meters from Iraq. Sanyi sent in an application to use these bands for a week as "experimental" bands. He hopes he will get an answer before leaving for home. Laci reports good news from Sanyi who stated that he can now operate from his place of residence. Last week Sanyi had to operate from The Central Radio Club only, with his work schedule and the open hours of club, his operating times did not work out too well. Now he has full-permission to work from his residence with his own rig. His son Gabi, HA7SK, is also active as YI9SK, but only has permission to operate from the club. They will be trying to get this changed with the help from Mr. Adnan, YI1DX, who is the President of "Iraque Amateur Radio Association". Sanyi will leave July 29th.

Z2, ZIMBABWE (Update). As mentioned in OPDX.311, Cedrick, N9YXA, would be active from here (August 3-21st), but he did not know at that time of the announcement what his callsign would be. Well, it is official now, Cedrick will be signing Z2/N9YXA. Check out his 1997 Zimbabwe DXpedition Website at: http://www.netcom.com/~n9yxa/zimbab/

ZD7. ST. HELENA. Gilbert, ZD7BG, is active on CW 80-10 meters. Last QSNs reported were around 14015 kHz between 1900 and 2100z. QSL to P.O. Box 157, Jamestown, St. Helena Island.

ZK1, SOUTH COOK ISLANDS. Tony, KQ2I, informs OPDX that he will be active on 30 and 40 meter CW as ZK1AAT from Aitutaki, August 1-11th. There is a possibility for him to be active from Rarotonga, July 25-31st. Tony states, "Real signal reports appreciated". QSL via his homecall.

Hi Angelo,
That sounds like a prety good set-up you have there, sure wish I had
the real estate for the tower and beam. However IMHO you already have
the best DX aid - your ears and what lies between them !!! Sure,
software will help to predict which paths are open etc, and you need
some thing to tell you the beam headings for each prefix from your
QTH. There is loads of software to do this but Im not sure whats
available stateside. After that you just need to get loads of
experience of propogation and band conditions, my advice - listen,
listen , listen !!!. I'd put up a vertical for trawling the bands and
finding the rare ones, then swing the beam on them and nail 'em. This
avoids missing the goodies off the back of the beam, it will also let
you follow the stations calling into the pile-up and hopefully
predict the best call frequency.
A very good book is 'The complete DXer' by Bob Locher W9KNI [Idiom
Press Box 583 Deerfild, IL-60015].
There are many good web-sites but the best is a webcluster run by
OH2BUA - http://www.clinet.fi/~jukka/webcluster.html
In addition to band by band DX sightings there are a load of links to
other very good sites including :-
425 DX News from Italy
ARRL Bulletins
Ohio/Penn DX Bulletins
As for awards there are hundreds of them, usually organised by
national radio clubs. The Worked All States and the DXCC [DX Century
Club] are the best known. The RSGB here in the UK runs the IOTA
[Islands on the air] award which is great fun and possibly the nicest
certificate is the Worked All Swiss Cantons. Im one short for this
one!! Hope that this is of some help, dont forget that lots of DX is

CW only.
Good DXing, will listen out for the callsign.

1866. New Concept! Cyberscheds Your Next DX and Satellite Contact!

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-20 00:00:00 UTC
From: intellinews@hotmail.com
Message-ID: <intellinews-2007972353290001@host09.clr.cyberg8t.com>
Source record: 32214

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's. I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.

Greetings! I need writers to contribute fun, interesting, cool and exciting articles for our new ham radio publication called "On The Air! excellent adventures in ham radio". If you enjoy writing about such topics as VHF, DX, building stuff, antennae, fox hunting, packet or atv, or any other related subject, please email me for our writers' guidelines. We want you to join in the fun!

On The Air! is a magazine that does not contain any stuffy, boring, pedantic, predictable, or gruesomely dull copy. Picture Wired magazine. Picture a ham radio version of it. That's On The AIr! If you like, you can send $4.00 for a sample copy. Mail to
On The Air!

1868. DX database sites ??

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-20 00:00:00 UTC
From: phil@zl2tze.mlb.PLanet.gen.NZ
Message-ID: <33d299e6.zl2tze@zl2tze.mlb.planet.gen.nz>
Source record: 32456

Hi,
A group of FBB BBS's around the Globe have got together and are running the
QSL Database written by Dean KE0WO .. KE0W0DX2 ..

These databases are fully user updateable and allow you or a DX /QSL Manager
to send the Data to the sever for Auto inclussion ..

If you are interested in setting up a Database on your local BBS please let
me know ..

This database also uses the same databases as the DX Cluster programs
after being modified with a program that comes with KE0WODX2.

If you produce such a database could you please either send me a copy
or the address of the ftp site I can get it from ..

As I don't have WWW I can't get to some sites so I need ftp site please

------------ Cut and keep the information below for future use ---------

Below is the format for using the DX Server and some of the locations
that it is in ..

Active QSL Databases

Some FBB BBS's now have available this very handy QSL database available,
they are

ZL2TZE New Zealand
VE3YRA Canada
VK4CXX Australia
KE2VW USA
GB7PLY GBR

Others are due online soon ..

If you are a Manager or are planing a DX trip please post your data on the
database, this way you could help many who spend a lot of time trying to
locate the information..

If you have a large amount you can email me and I will place it in the
database ..

***** Note ****

Addresses that are Via a QSL manager or another station are not much good
if the address is not in the database ..

eg h1v1x via h3v3x

There is no real sense in using a remote Database if the only information
you are going to get back is (via another call as above) as the sender
then has to send another REQUEST for the address of H3V3X

So if possible please FULL addresess

****

How to Use the KE0WODX QSL Database ..

In addition the data needs to UPPER CASE as lower case letters are used
internally as abbreviations which are:

Updating the database with DX Updates:

Send a SP message to DX @ BBS with the subject of DX Update
The format is then:

SP DX @ BBS <------ BBS that has the Database
DX UPDATE <------ Must be this Title
BEGIN DATA
DXCALL,DATE (YYMMDD),UPDATED BY,
data line
data line
data line
data line
END DATA <------ Must End with this
/EX
An example would be:

SP DX @ ZL2TZE
DX UPDATE
BEGIN DATA
KE0WO,950131,KE0WO,
DEAN R. MADSEN, KE0WO
P.O. BOX 303
STORM LAKE, IA 50588
END DATA
/EX

To use the server, send a SP message to REQDX.The subject can contain
callsigns
to look up separated by either a single space or comma (,). The text of the
message may contain more callsign to look up. One callsign per line. There
is a maximum of 50 callsigns allowed per message.

SP REQDX @ ZL2TZE or Local BBS running server
callsign search callsign can be title
callsign
callsign
callsign
up to 50 at any 1 time
/EX

The BBS's using The KE0WODX Database are ZL2TZE , VK4CXX , VE3YRA , GB7PLY
KE2VW these are networked so 1 update will travel to all..
Soon to have Russia , France and Brazil

This Database is available from
ftp.funet.fi/pub/ham/packet/bbs/f6fbb/servers/ke0wodx2.zip
KE0WO Dean is the author ..

Greetings from Atlanta

I am taking a family vacation to the NC Outer Banks, around Kitty Hawk, and I thought I might listen in to some ship-to-shore stuff for old times sake. I've been looking around on the net today for a current list of the coast/ ship frequency pairs but cant seem to find any.

Can someone from the rec.radio.amateur.dx group message me and offer some advice as to where to find such a list?

Thanks for your time.

Contact AA2LN via e-mail at aa2ln@juno.com and tell him you would like a
copy of the plans for the so-called "half square" antenna. Lots of
people have used it and swear by it. Basically, its a feed point as
high as you can get it with a 1/2 wave hanging straight down from it,
and another 1/4 wave going straight out horizonal and from the end of
that a 1/4 wave hanging straight down again. Sounds worse than it is.
Said to have good directivity and low angle of radiation.
73 & good luck
Bob

VE7TCP seems to be working fine. One way I've founf to check if it is the system or my account not working is to got check the archives on the web site. Since the archive is a bit behind, if there's something there that you haven't received, it's probably your account.

I think I goofed - the horizontal portion is 1/2 wave. I.e., the total length of wire needed is about a full wavelength. I'm told this design is very scalable - i.e., it can be built for almost any band.

Yup, Lyndon has emailed me to tell me that he cancelled a bunch of subscriptions without prior warning or any notice because others with similar host names had bounced some list mail. I remember he has pulled this childish stunt before. I have never bounced any mail and as I understand it, Lyndon isn't even sure any more who he cancelled.

This is a particular problem for uk amateurs because it affects all the subscribers to the UK largest isp.

Having the dx list in the hands of someone who behaves so childishly and who has such a very limited understanding of internet mail is a tragedy. I frankly admit my hope that the funds drive fails and that this function can pass into the hands of say contesting.com or some other list administrator with a proven record of reliable and professional mail lists administration.

In my personal opinion, this is a really bad idea and ranks high
on my fecal roster right up there with the Knet List Kaptains at
14.247.5 and thereabouts. DX is meant to be sought, hunted,
and worked, not "scheduled".

"Un chasseur sachant chasser chasse sans son chien."

roughly translated means:

"A hunter who knows how to hunt hunts without his dog."

Hello!

For calculation of Sunset/Sunrise times I use next the formula:

Declination of the Sun will:

b=23,46*sin(N-83)+cos(N-83)
Sunrise = (Long+arccos((tg b) * (tg Lat)))/15
Sunset = (Long-arccos((tg b) * (tg Lat)))/15

where

Long - Geographical longitude on West from Greenwich
(east longitudes are designated by negative numbers)

Lat - Geographical latitude to North from Equator
(the southern latitudes are designated by negative numbers)

b - The declination of the Sun (is measured in degrees)

N - number of day from a beginning of year.

You receive time in UT

Seeking QSL information is a common question on this news group. Thought I'd suggest the following:

Visit web pages with listings of QSL information -- several are available such as:
http://pw2.netcom.com/~ac6v/page2.html
Here you will find:

QSL Info System by IK4LZH -- DX Lookup Page for Managers and DX Addresses

DB0SDX -- Managers and Address Databases -- QSL 30992 entries total; Addresses 11776 entries total -- By Frank, DL2CC

DL5MO QSL Info Databases search -- Three Data Bases for DX Lookups.

QSLs By BuckMaster -- US and Some Foreign. Gives Grid Squares, Lat/Long.

DK0TUI's QSL Info Page -- Callbooks for VE, UK, OH, GJ, BV, Contest QSL Info

SM5ARL&#65533;s QSL Info Page -- DX Stations & Managers

K4UTE Quick QSL Manager Lookup -- DX Managers and DX Direct

ARAS Official Canadian Callbook

Unofficial LX Call Book -- Luxembourg Call Lookup

Russian DX/QSL Info -- From Victor RX3DIN

Estonian Call Book Server -- From ES5AAW & ES4RLH

Brazilian QSL Manager List -- From PS7AB

Downloadable QSL Data Base -- Via Unibo FTP Site (Big File Folks)

QSL Information By E-Mail -- Got A Tough One ?? Try This.

QSL's FOR THE CQ WW CONTESTS --by EA5EYJ

QSLs For IOTA Contacts -- From The Island Chasers Pages

YASME Callsign Directory -- via K6PBT's Fine pages

Mike's Amateur Radio Pages -- Over 120,500 QSL Managers and 9200 direct addresses!!

Also US Call Book Servers

QSLs By QRZ -- Search By Call or By Name

University of Arkansas -- Little Rock's U.S. Callsign Lookup. Updated Daily!!

Latest Issued Callsigns -- Summary From FCC's last day's activity

QSLs By BuckMaster -- US and Some Foreign. Gives Grid Squares, Lat/Long.

QSL Info System by WM7D -- Local Map For Retrieved Calls

And Burro Information:
ARRL Incoming QSL Bureau -- "How To" and Addresses of District Burros
ARRL Outgoing QSL Bureau -- Send em by the pound!!
World Wide QSL Bureaus -- IARU List Of QSL Bureaus

E_Mail Adresses are included as well:
AMSAT.ORG Address Book -- The Premier Hams E-Mail

How to use AMSAT.ORG E-Mail Alais -- The Premier Hams E-Mail

Hams On The Internet - E-Mail Adresses -- Click here to go to QRZ.COM

Hams On The Internet - E-Mail Adresses -- Another Excellent Source -- By Karl
Hagenbuchner with assistance from AA9DX

After searching all these sources -- rec.radio.amateur.dx -- seems to have some answers to the rare ones.

Good QSLing

Here is exactly what I said:

To: dx@microvst.demon.co.uk (Anthony R. Gold)
Subject: Re: Am I unsubscribed from the DX List?
In-reply-to: Your message of "Sun, 20 Jul 1997 20:13:49 -0000."
<9709592@panix.com>
Date: Mon, 21 Jul 1997 10:56:42 -0600
From: Lyndon Nerenberg <lyndon@ve7tcp.ampr.org>

I had some problems with DEMON bouncing mail last week, so it's
quite possible you were one of the addresses removed.

In light of that response, let's re-examine Anthony's statements.

>Yup, Lyndon has emailed me to tell me that he cancelled a bunch of
>subscriptions without prior warning or any notice because others with
>similar host names had bounced some list mail.

Where in my response does it say anything about arbitrarily removing
addresses because of similarities to other addresses? Where does it
say *anything* about which addresses were unsubscribed? How about
providing the list of addresses I've unsubscribed over the last week
so we can see for ourselves? (You must have that information in order
to make such an assertion.)

Next, let's examine the "prior notice" claim.

I remove people from the list when their mail bounces. The term "bounce"
means that I am unable to deliver mail into your mailbox. If I cannot
deliver mail into your mailbox, how am I supposed to deliver mail
into your mailbox telling you I am about to unsubscribe you because
I cannot deliver mail into your mailbox? Trust me, if you can pull that
trick off there are a *lot* of people who would pay dearly for the
technology.

>This is a particular problem for uk amateurs because it affects all
>the subscribers to the UK largest isp.

It's a problem for *any* amateur whose mailer is bouncing their mail.

>Having the dx list in the hands of someone who behaves so childishly

What's "childish" about removing broken addresses from a mailing list?

>and who has such a very limited understanding of internet mail is a

Let's see, I've been doing MTA development since 1986, running large mailing lists since 1985, have put two universities onto the internet [and one on BITNET, although I'll never admit *that* in public :-)] (and at one of those universities designed, installed, and managed the campus computing centre), currently work as the lead software architect for my company's IMAP4 and IMSP server products, am a member of the DRUMS, NOTARY, IMAP, and ACAP working groups in the IETF, am a balloting member of the IEEE P1003.1g standards group, and have twice been invited to act as a technical reviewer by O'Reilly and Associates for one of their e-mail related publications (Managing UUCP and Usenet). Among other things.

Obviously I should not be trusted with a copy of Majordomo.

>tragedy. I frankly admit my hope that the funds drive fails and that
>this function can pass into the hands of say contesting.com or some
>other list administrator with a proven record of reliable and
>professional mail lists administration.

Nice of you to step forward and offer your services to help solve the "problem." It's always easier to pass the buck to someone else.

Can we now get back to doing some productive work?

The best way is to send a "which" request to listserv@ve7tcp.ampr.org.
This command can be used to see which mailing lists you are
subscribed to. (Send a "help" request if you're not familiar with
how to use the which command.)

In the worst case scenario the web archives of the list will
be 62 minutes behind the actual traffic on the list.

I don't know a thing about Log Windows, but I do know alot about LoGic
4.
This software does everything you mentioned and a ton more. It's also
very easy to use, and has superb support. There's even a reflector group
concerning it's use.

You can download a trial copy of it at.

Yup, that's it.

First, let me say frankly that I posted when I was very angry, and
that is always unwise. I do regret doing it but I won't lie and say
that what I said was not what I believed then, and still do.

It was and remains my view that what you did was inappropriate and
not professional, just as I freely admit that my response was. But
if what I said isn't true it'll be dead easy for you to prove me
wrong. Doubtless if you run the list in a more organized manner that
I have claimed you will have a record of who you removed from the dx
list and when and why. It's your claim that you deleted people for
bouncing mail. So all that is needed to show how very wrong I am is
to post the date and time when you deleted me and a copy of the
offensive bounce that I committed that made your action appropriate
and necessary.

If I'm wrong, I'll grovel here and anywhere else of your choosing and
also buy you the dinner of your choice in the restaurant of your
choice with the Significant Other or a friend of your choice to show
publicly my true contrition.

To help you in your research, the last posting I received from the list was:

Received: from ve7tcp.ampr.org (listserv@ve7tcp.ampr.org [198.161.92.132])
by ve7tcp.ampr.org (8.8.5/8.8.4) with SMTP
id NAA06585; Thu, 17 Jul 1997 13:33:04 -0600 (MDT)
Received: by ve7tcp.ampr.org (TLB v0.10a (1.2 lyndon 1997/03/11 20:16:46)); Thu, 17 Jul 1997 13:26:58 -0600 (MDT)
Subject: [DX] ARLD031 DX news
X-Mailing-List: w1aw-list
To: QST@ve7tcp.ampr.org
From: w1aw@arrl.org
Organization: American Radio Relay League
Date: Thu, 17 Jul 1997 15:24:58 EDT
Message-ID: <$arld031.1997@arrl.org>
Sender: owner-dx@ve7tcp.ampr.org

So this will show you to look through your logs for the deletion after 13:26 MDT on Thursday, although the bounce you claim to exist may have been somewhat earlier.

When you post the evidence to show how I screwed up, let me know how much I should send for your dinner and any special words you want in the apology I must make.

I made my complaint about you in the open and in a place where you could defend yourself, as you have now done. I note that before posting here you chose to write me with a copy to the dx list, the one from which you had excluded me and so prevented me from answering, that I was a liar. This I do regret, but in view of my criticisms I can not claim that I was surprised.

Regards,

Hi.

I used Logwindows when it was supported by AEA. At that time I wasn't impressed with either the product or the support from AEA. I understand that the product is now being supported by another entity, so my experiences are somewhat stale.

However, before you buy any logging program, I would strongly urge you to check out DX4WIN. This is a superb program, that seems to becoming one of the most popular logging programs available. The software seems to offer more features than those currently available in other programs, plus it has exceptional performance. The support from Rapidan Data Systems is world class. Furthermore, it is VERY reasonably priced compared with the other programs that are available.

You can download a free, fully functioning demo copy from Rapidan Data System's web site at URL: www.erols.com/~pvander.

If you're thinking of laying out hard cash for a logging program, I think it would be wise to check out the options. I feel you'll be very pleasantly surprised by what DX4WIN has to offer.

73 and good luck,

Darrell

NR3Y/G4MZF

ps. Nope - don't have a commercial stake in this program. Just a satisfied user.

You can legally work him cross-mode on 7055 from the States.

Assuming he knows code.

What, a DX station that doesn't know code?

INCORRECT QSL MANAGER. WS4O has been receiving cards for YV30T.
WS4O is not the QSL manager for this station.
- -

I saw this in the latest ARRL DX news. The info I got from
one web site or another was via W4SO, in Hollywood Hills, Fla.

I haven't sent my own card yet, but I'm looking forward to
this one. I worked YV30T early during the IARU HF contest
the other weekend. These guys were the ONLY signal I heard
on 15 meters that early--about 20 minutes after the contest
started.

After the routine exchange, the op said, "If you've got a second,
how about giving us a REALITY signal report?" They had a vertical
set up on the beach, and wondered how it was doing.

After all the routine "59" reports, even when you can barely hear
the other guy, it was refreshing to have to give a REAL report. :-)

I believe they said they were on Las Tortugas, SA 044, for the
IOTA folks. Sounded like they were having a good time, too.
FWIW, YMMV, Close cover before striking.

>You can legally work him cross-mode on 7055 from the States.
>
>Assuming he knows code.
>
>What, a DX station that doesn't know code?
>

Yes you can, assuming he will listen for CW.

It will only count for DXCC Mixed mode and for 40 meters, however.

DXCC Rules:
Section I. Basic Rules.
1. (a) Mixed (general type): Contacts may be made using any mode since November 15, 1945.
(b) Phone: Contacts must be made using radiotelephone since November 15, 1945. Confirmations for cross-mode contacts for this award must be dated September 30, 1981, or earlier.
(c) CW: Contacts must be made using CW since January 1, 1975. Confirmations for cross-mode contacts for this award must be dated September 30, 1981 or earlier.
(d) RTTY: Contacts must be made using radioteletype since November 15, 1945. ... Confirmations for cross-mode contacts for this award must be dated September 30, 1981 or earlier.

I have received from both Lyndon and from Jim Reisert AD1C the news that it is no longer possible to determine what they received that led them to believe that it was appropriate to unsubscribe me and other Demon subscribers. I now accept that they took the actions that they did with only pure motives and in the interests of the well-being of the list and of the majority of its subscribers.

The response from Demon is very unusual and when subscribers go on holiday Demon will return a warning after 7 days that the mail was uncollected. This is not a bounce and also it relates solely to the accounts refered to in the warnings. I believe that Jim and Lyndon started to get many such warnings about subscribers of Demon, this being the time of year when 2 week vacations exceed the 7 day trigger of warnings, and that they acted rapidly in the interests of the lists and in the best way that they knew how in order to stem the tide of mail they were receiving.

> If I'm wrong, I'll grovel here and anywhere else of your choosing and

As I made many mistakes, most especially by writing when angry, I withdraw all my comments and apologise unreservedly to Lyndon for causing this fuss. Also I will donate the $300 he and his friend could have eaten and drunk their way through to his fund drive as my penance for not cooling off before writing about this matter here.

Regards,

Matt,

Welcome to the hobby!

I think that the only rig currently available that has HF, 6M, and 2M is the IC-706. There is an earlier version that is now discounted to around the kilobuck range if you can find it, or look on rec.radio.swap for a used one. I'd go for the latest one, though, and get all the fixes.

The other choice is a decent HF rig and transverters, but your budget doesn't leave much wiggle room for that route. I operate on HF with one rig, on 6M with a rig that is HF+6, and on 2 with a nice 2M rig. I've been accumulating this stuff for quite a while, though. I think the 706 is a very good choice for your needs.

Look at the weak signal portions of the VHF bands. They are a lot more fun than the repeaters.

DX Bulletin 32 ARLD032
From ARRL Headquarters
Newington CT July 24, 1997
To all radio amateurs

SB DX ARL ARLD032
ARLD032 DX news

This week's bulletin was made possible with info provided by Tedd, KB8NW, the OPDX bulletin, The Daily DX, DXNS, 425DXnews and Contest Corral from QST. Thanks to all.

TANZANIA, 5H. I4UFH will be QRV from Zanzibar as 5H3FS/1 from July 27 to August 9. Activity will be on 160 to 10 meters, using RTTY and SSB. QSL to home call.

IRAN, EP. Ali, EP2MKO, is QRV on 20 meters using CW. QSL via UA6HCW.

REUNION, FR. DF2SS will be active from July 28 to August 17 as FR/DF2SS/P. He will operate mostly SSB on 160 to 10 meters. QSL to home call.

PANAMA, HP. Gerard, HP1XBI, hopes to be QRV in the IOTA Contest as HP1XBI/4 from Bocas del Toro. QSL via F6AJA.

SAO TOME, S9. Gary, S92AT, is QRV using CW and SSB. He hopes to be QRV on 160 and 80 meters soon. QSL via NJ2D.

BANABA ISLAND, T33. Jack, VK2GJH, is QRV as T33JH until July 25. He will operate mostly 20 meter SSB. QSL to Jack D Haden, PO Box 299, Ryde 2112, NSW, Australia.

ICELAND, TF. Scott, AE4FY, will be QRV until the end of September as TF/AE4FY, using CW, SSB and RTTY, on 40, 20, 15 and 10 meters. There is also the possibility of some 6 meter activity. QSL via K4GZ.

SAINT PAUL ISLAND, CY9. Robbie, VY2SS, Bob, VY2RO, Bill, VY2LI, Art, VY2KHZ/W3KHZ, and Paul, VY2CD, will be QRV until July 31 as CY9SS. They will operate primarily RTTY and 6 meters. QSL via VY2SS.

LORD HOWE ISLAND, VK9. Jun, JH4RHF, his xyl Kumiko, JR4DUW, and Hiro, JR4PMX, will be QRV as VK9LL in the IOTA Contest. They will also be active outside the contest as VK9LR, using CW and RTTY. They expect to operate as VK9L as well. QSL VK9LR and VK9LL via JH4RHF and VK9L via JR4PMX.

SOUTHERN COOK ISLANDS, ZK1. Tony, KQ2I, will be active from Aitutaki as ZK1AAT on 40 and 30 meters using CW from August 1 to 11. QSL to home call.

INCORRECT QSL MANAGER. WS4O has been receiving cards for YV30T. WS4O is not the QSL manager for this station.

THIS WEEKEND ON THE RADIO. The Venezuelan Independence Day and RSGB Islands-On-The-Air contests, and The Flight of the Bumblebees operating event are all scheduled for this weekend. Please see July QST, page 97 for details.

1911. HOW MANY KC's NEEDED???

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-24 00:00:00 UTC
From: havana@aztec.asu.edu
Message-ID: <5r8p9a$j1q@news.asu.edu>
Source record: 32255

Dear Friends of DX!

To being, sorry for my bad English...so please be patient ?

I sending this message also to John Trampler N0JT or KF0ui in Missouri who is net controler of "DX" net on 14247.00. I writing about same subject on DX Reflector before, but still I asking DXers take control of situation and change this problem !!

Many time "DX" net controller, name is Allan, WA4Jtk, is bragging about his DX net on 14247.00 for "efficiency" and "for putting many guys through" to DX (DX??? it's usually YV and PY stations, maybe sometime FS station - okay it's DX!). I make many questions to ask you guys about this. This Allan say he is "Helping fellow amatures"

IF this "DX" net system so efficient, why these "Allanistas" (remember seeing that word on inter net long ago) demanding all of 4, 5, 6, and 8 (!) kc's of free frequency space??? Many times this Allan starts screaming at other station on 14244, and one time on 14251 or more with "Your Right ON TOP of DX NET - QSY NOW" then keeps screaming to other guys to QSY.

A few days ago now there is station from 4U1WB, I think there was Japanese operator, who is doing great job working many stations in Europpe in USA and SA. The guy is very friendly and is QRV on 14248.7 and working many guys who are calling and they all exchanging infos about name and QTH. Sure enough then this Allan WA4JTK interrupts 4U station and start yelling and screaming about "DX net" on 14247 and commands 4U station to go away. 4U station did not hear this Allan but QHY anyway when other stations relaying problem to him. At leat 4U station is polite gentelman.

My rig have dual receive, so only for amusing me, I listen in on left ear on 4U station and with right ear on 14247.00 stations. With timing for maybe 11-12 minutes, 4U station work over 21 stations and at 14247.00 "DX" net, guys work only 4 station in same time, but only 4 stations with 6 KC's of quiet frequency! (ANd 4u station even taking time to say name and QTH infos with other guys and only thing WA4JTK say besides 'Good Contact" and "Guess again" (RST) he say to one guy "WHY DONT YOU TELL THE DX WHAT SIZE UNDERWEAR YOU WEARING" ...

WA4JTK needs 6 kC's just to saying something that stupid and rude????

6 KC's just for 4 cheap qso's???

so DX Friends -- question is "WHAT's EFFICIENCY on the bands"??
Why we allow for "DX" net using all these free and quiet Kc"S
of frequencies for only just few QSO's with "garden variety"
DX when real DXers like 4U1WB can do it quick, friendly and not
demanding whole spectrum like WA4JTK doing it.

why you never see major DXpedition on 14247.?? Because "DX" net
not really "WORKING" DX - just joke, like sandbox for kids.

Maybe Dx Friends need to stop these ridiculous "DX" nets, but
when???? real DX guys need to require ourselves to use higher
standards in operating and same in DX ethics.

No wonder Wa4JTK get bad QRM all the times he is on the frequency.

Please share comments on this on rec.radio.amateur.dx.

thanks and dx to all, 73 (!) de Geri ex: CO2GC

Tony et al,
I don't know of any listowner who won't drop subscribers when list articles to their addresses begin to bounce; a statement in that regard is almost always contained in the "Welcome" message one receives when they first subscribe.

Listowner Jack of the Boatanchors e-list reminds us frequently of the headaches he gets from running that list; maybe you should wear the shoes of a listowner with several hundred subscribers to baby sit so you'll understand the situation from their view.

I was the inventer and first listowner of the Glowbugs list (devoted to homebrewing with tubes). The second listowner dropped me after articles to my address began to bounce (after the list was moved to another site). It's really no big deal!

Go have a beer and watch the sunset.

if he can receive morse, he might possibly be able to transmit as
well, making a 2way cw QSO.
I believed the problem is that he don't want to listen to cw-callers..
...?
I have seen some complaints that we do not use the proper ssb
operation frequencies in region 1, please be aware that our band
segments are 3.500-3,600 cw, 3,600-3.800 ssb/cw, and
7.000-7.040 cw only, 7.040-7.100 ssb/cw
but we may listen above the band segments, only a lid won't

>

I tend to avoid this net. I've listened to them several times, and it just isn't how I want to work DX. I usually hear an exchange of 5x9, but the net station has to give his call in a half-dozen different sets of phonetics, and he counts up to the numbers in his call sign and signal report. Frankly, if I need to scream, "whiskey alpha one victor hotel tango, washington america one venezuela honolulu toronto, you are 1-2-3-4-5 by 1-2-3-4-5-6-7-8-9, 1-2-3-4-5 by 1-2-3-4-5-6-7-8-9, over?" into the microphone several times, then someone else has to tell me that the DX station copied it, I don't think that I really made a contact.

I had a first-hand experience with their jealous guarding of "their" frequency during the IARU HF contest earlier this month. I turned on the radio to work DX, and heard lots of DX calling "CQ Contest." I'd never operated a contest, so I looked up the basic rules in QST and jumped right in, since that was where the DX was. As I was tuning around 20 meters, working lots of DX, I noticed the 14247 net in operation. I moved up the band until I could no longer hear their splatter. Assuming that if I couldn't hear their kilowatt-and-beam setups, then they couldn't hear my 100 watts into an R5 vertical, I answered a DX station calling "CQ Contest." Almost immediately, an unidentified station came on and told me that I was QRM-ing a net, and they weren't in my "damn contest." I QSY-ed again, leaving them to their DX net while I worked New Caledonia (FK), Senegal (6W), Slovenia (S5), Aruba (P4), and over 20 other countries. Even with my complete lack of knowledge about DX contesting, I wouldn't be surprised if I worked more *countries* then the net made *contacts* during the hour surrounding the "QRM incident."

I found the contest fun, but I can understand how contesting wouldn't be for everyone. If I'd known what I was doing and been prepared, then I would undoubtably have worked many more countries (and gotten a reasonable score.) I learned a lot about operating during the contest. It's nice to learn something new when got your license as a teenager and you've been operating for over 20 years.

What can you do about their tactics? Not much. They're not the only ones who "own" particular frequencies. I was in a small pile-up trying to work a weak Macedonian (Z3) station a couple of days ago. A S9+20 W4 station came on calling four or five stations who didn't respond. When he called his list repeatedly, one of the louder U.S. stations in the pile-up jumped in and said that the frequency was already in use. The W4 came right back and said that yes, the frequency was in use... BY HIM, and we should QSY! I guess that the fact that *he* was using the frequency meant that it was in use, but *we* weren't already using it when he got there. The Z3 jumped up about 5kc, but I never got him in the QRM there.

I find that most DX stations have much better manners than the hams in these examples. If one of these "frequency cops" comes on and tells me that I'm QRM-ing the DX net, I think that I'll apologize and ask him if he can wait for a few seconds while I ask the rare DX I'm working to QSY a little. Two-edged swords can be fun! I give him what he asks for (a wide, clear frequency), while taking what he desparately wants (rare DX.) Often the DX station won't mind QSY-ing if you explain that a net has asked you to (no matter how valid that request was.)

Basically, if you can take satisfaction in working several of the DX stations on 20 meters while they're doing a questionable job of working one Brazilian, they you'll come out a lot better than if you'd gotten upset over it and QRM-ed them, argued with the "cop", or just shut off the radio in disgust. Have fun, in spite of those who try to spoil your fun.

> Geri,
I have to agree with you about people like Allan calling any kind of net. We have had these kind of folks on evening 75 mtr. Mississippi Section Nets. I think they probably have lousy receivers, and probably can hear 6-7 kc above and below the operating frequency. They for sure do not have any filters.
There are several WAS nets and I think its a good thing. New hams frequent these nets and it gives them practice and confidence on the air. I agree with you about DX nets. I got my DXCC my way, mobile by george, and no net to help us meet up either. I use an Icom 730 and bug catcher (8.5 ft.) antenna with top hat and NO amplyfier
I hope to meet you on the air someday my friend, will be listening for you. You listen for me!

I was briefly (when on a mobile kick) "rare DX" for one net. Gave up on it when I realized about 20-40% of the people I "worked" couldn't hear me! (or at least, couldn't hear well enough to have gotten my callsign if the NCS hadn't been repeating it..)

Not all DX/WAS/award nets are bad in this way, but there's certainly other more efficient ways to work DX. If nothing else, get on CW!

73 Doug
(whose pet peeve is when I ask 3 times if the frequency is in use -- get no answer -- call CQ -- and then someone reams me out for stomping on their QSO. My Elmer screwed up; never told me all SSB frequencies were auctioned in the 1950s & if I want to call CQ, I have to lease one from one of the OTs...)

SM6WET, Magnus is on his way to T9. He will work 6m on the trip where it is
allowed and possible. He has been granted permission to operate 6m from T9
when he is there.
The trip started today 25 july and goes via OZ, DL, OE, S5, 9A to T9. He hopes
to be in T9 on tuesday 29 july until wednesday 30 or maybe thursday 31. Then
he goes back probably the same way (maybe via HA) to SM.
On 6m he will use 50.122 +-QRM as QRG and only work SSB.
He also has 2m FM in the car.

SB DX @ WW $OPDX.315
Ohio/Penn DX Bulletin No. 315

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 315
BID: $OPDX.315
July 28, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KA2D, N2OO, NW3K, W3UR & The Daily DX, WD4JNS, K4PK, N4MM, K8CH, KF9YL, 9K2HN, DL1FDV, EA5FKI, G4BUE & DX News Sheet, I4UFH, RW3AH, SM7PKK VE6JY, VU2PAI and ZS5S for the following DX information.

1997 GULF COAST HAM CONVENTION. Bob Walworth, N5ET, President of the Texas DX Society, is pleased to announce that the 1997 Gulf Coast Ham Convention, will be held at Humble Convention Center (location was not mentioned). Guest speaker will be Wayne Mills, N7NG, Chairman of the DXAC. Wayne will do a presentation on his recent Scarborough Reef operation and also on DX in the year 2000. The dates of the Convention are October 17, 18, & 19th. For more details on the convention, contact Bob via E-mail at: walworth@worldnet.att.net

3D2, FIJI. "The Daily DX" reports well known DXer Ron, ZL1AMO, will once again be active from here as 3D2RW from August 13-20th. He plans to be active on 160 meters. On August 21st, he heads to Japan and will be staying with Zorro, JH1AJT. Ron will return to Fiji on September 8th. QSL via ZL1AMO.

4F, PHILIPPINES. The "DX News Sheet" reports that Hans, PA3GKI, a member of the Dutch DX Group (DDXG), will be active from August 8th to October 8th as 4F2DX. While visiting his family, he will be traveling to different islands in DU-land, starting with Luzon Island (OC-042). Activity will be on CW/SSB 80-10 meters. QSL via DDXG direct only.

5A RUMORED, IS JUST WHAT IT IS! Rafa, EA5FKI, states the information that he was going to 5A in September, which was reported by several DX bulletins (including OPDX), is not true. No other details were given.

5H1, ZANZIBAR ISLAND (Tanzania). Fabio, I4UFH, will activate AF-032 from July 27th to Agust 9th. He will be signing 5H1FS and will be active on 160-10 meters, SSB and RTTY. He states he will be using his

Icom 706 and a vertical R7, plus a wire for 80m/160m depending on space availability. He will be looking for the West Coast and JA areas using the normal DX frequencies. QSL to I4UFH through the bureau or direct from the callbook address.

9K6POW (SPECIAL EVENT. ATTENTION PREFIX HUNTERS!). This station will be active in remembrance of the "Kuwaiti's POWs" during the Iraqi occupation of Kuwait. The station will be on the air from August 1st 1200z until August 3rd at 2359z. There is a possibility for RTTY and satellite (AO-10) operations. PLEASE NOTE that this is the first time the 9K6 prefix will be on the air, and maybe it will be the last!! If you are WPX hunter it is your chance to work a new one!! QSL will be via 9K2RA.

9X, RWANDA. Andy, RW3AH, reports to OPDX that he may be active again from here as 9X/RW3AH. He will be here starting August 24th and stay for several months.

AC2P/200 (SPECIAL EVENT). Members of the Long Island DX Asscocaition will operate from the radio room of the 200 year old Montauk Point Lighthouse (located in the rare grid square FN41, NA-026 and USIA NY-03-S) during the National Lighthouse Weekend celebrating the bicentennial of the "Lighting of the Light". Activity will be on SSB on the IOTA frequencies, CW as announced. A special color QSL certificate will be available. QSL via AC2P CBA, SASE please.

AP50, PAKISTAN. Start looking for stations in Pakistan to begin using the special prefix AP50 to celebrate their 50th anniversary of independence. There will be a special certificate available. Listen for details by the operators.

CH6RCH (SPECIAL EVENT). To celebrate 100 years of Orthodoxy in Canada and the first visit of the church leaders to Canada, specifically to Andrew, Alberta, CH6RCH will be active from the QTH of VE6JY. Activity will be from July 26th 0000z through July 27th 2359z, operating on as many bands as possible, conditions permitting. QSL via VE6BEX: Tom Evans, RR # 1 Andrew Alberta T0B 0C0. A color certificate/QSL is available for the proper return postage, otherwise regular QSL cards via the bureau.

DXCC-2000 PROGRAM. During the ARRL's Board of Directors (BoD) meeting, which was held July 18-19th, in Rocky Hill, CT, John Kanode, N4MM, as DXCC-2000 Chairman, presented the BoD with a written report from the DXCC-2000 Committee, and a summary of the committee's recommendations for changes to the DXCC program. The BoD VOTED that the report of the DXCC 2000 Committee was received. The Board also finds that the committee is moving in the right direction. The DXCC-2000 Committee's final report will be presented at the January, 1998, board meeting. The committee's current items on their agenda are discussions on the DXCC Field Representative Program, other specialty DXCC awards, review of the Accreditation Criteria, use of electronic logs, contest log credits, and other DXCC related items the committee wishes to review. At this time, the committee has two major concepts to present to the board for approval. The first concept addresses changes to be made to the DXCC Countries

List Criteria and the second concept addresses the DXCC Awards Structure. [From the Minutes of the ARRL Board meeting.]

KP2, VIRGIN ISLANDS (Also 9M0 and 9M6). Before his big DXpeditions to Spratly and East Malaysia, Bob, N2OO, will be in St. Croix with his XYL Beth, KF2BQ, until July 31st. Also part of the KP2 crew is John, N2LD (ex WB2HPU). Everyone will be signing KP2/callsign after their activity in the IOTA Contest (this past weekend). They plan to have two stations active on CW/SSB on 160-10 meters. JUST A QUICK REMINDER AND UPDATE: Bob/N2OO, Bob/N0RN and others will be using the special callsign 9M6HIL to celebrate the grand opening of the Hillview Gardens Resort (August 5-24th). Activity will be on 40-10 including WARC bands, CW/SSB and RTTY! During their stay (between August 14-18th), N2OO and N0RN will be going to Layang-Layang Island (Spratly) for a sidetrip. They will have 2 rigs and 2 beams and an antenna for 40 meters. They will also operate CW, SSB and RTTY. The call is still not set. It will either be 9M0OO or 9M6OO. They will return to Kota Kinabalu on August 18th and will take a 2 day break at Mt. Kinabalu. Bob, N0RN, leaves August 20th and then Alan, VR2KY/ZL1TX, arrives that same evening where they move back to Keningau to wrap up from 9M6HIL operation until August 24th. The permanent callsign for the Hillview Gardens station after the grand opening celebration is over (October??) will be 9M6AAC. QSL all KP2/callsigns via home calls. QSL 9M6HIL, 9M6AAC and 9M?OO via N2OO.

QSL INFO AND NEWS......
The group from South Florida, who operated from the Little Cayman Island, July 10-15th, and particapated in the IARU HF World Championship Contest, wants to remind everyone to QSL to the following operators: QSL ZF2DN/ZF8 via KP4AM, ZF2DE/ZF8 via N4BP, ZF2PU/ZF8 via W4OVU, and ZF2JS/ZF8 via WD4JNS.

Didier, FK/F5PXQ, has included the following note in his QSLs that he wanted passed along to other hams: "Dear OM, Please note that $1 is equivalent to 100 XPF and stamping for North America, South America, Asia cost 130 XPF. Perhaps can you tell this to your friends and write this in the magazines to inform others OM's of your country."

A reminder from Mats, SM7PKK, currently active as 5X1Z, states that about 70% of individuals continue to QSL to his old address from the CallBook. This address is wrong and he has not lived at this QTH for more than 6 years. Some mail has gotten lost there. PLEASE QSL ONLY to: Mats Persson, Zenithgatan 24 #5, SE-212 14 Malmoe, Sweden.

Jim Wise, W4PRO, reports that he is not the QSL Manager for SV5TS. Anyone who works SV5TS should QSL via CBA.

5K3W via HK3SGP, Francisco "SISO" Hennessey, P.O.Box 170030, Bogota D.C., Colombia S.A. (E-MAIL: hk3sgp@impsat.net)

T9, BOSNIA-HERZEGOVINA. Mario, DL1FDV, will be active from August 24th to September 4th. He will try to be active on all HF bands in CW and SSB. He will be signing T94DX. QSL via DL1FDV, direct or via the bureau. His

address in the callbook is wrong! The correct address is: Mario Lovric, Hagebuttenweg 4, 61231 Bad Nauheim, GERMANY.

V4, ST. KITTS. Joe, VE3BW, will be active again from here as V47CA for two weeks from November 16th until December 1st. He will be an entry in the CQWW CW Contest. Before and after the contest he will be active on the WARC bands. Also, if propagation allows, he will be on 6 meters with a vertical and a 100 watts. QSL to VE3BW.

VU2PAI/50 (SPECIAL EVENT). Pai, VU2PAI, will be active using this callsign until September 31st to commemorate the 50 years of India's independence. QSL direct via Box 730, Mangalore 575003, INDIA. Pai states he is an avid stamp collector, and any (new/old) stamps are welcome to his collection.

W4, SUNSET BEACH ISLAND (NA-112). Don, K4PK, will be activating this IOTA in the North Carolina State West Group from August 2-15th. He plans to be active on the IOTA SSB frequencies on 40, 20, and 15 meters as conditions permit. He will be running his new rig (IC-706) thru a Ten Tec tuner connected to a dipole cut for 80 meters. QSL to: 705 Lenoir Ln, Hardy, VA 24101.

This seems to explain the reason why everybody today use the 59
report...?
I am not so much QRV on HF bands, more VHF CW, and some HF operators
are frustrated when I send 559 reports ....saying "why can't you use
the same report as everybody else"
my reply is that "559" is easier to send, but creates a problem when
as one usually don't need to receive the report to have a confirmed
2-way QSO
I have a logarithmic S-meter (MC3356) and give reports using my
S-meter

>73 de G3NYY

Hi Walt. You've got to thank all those 10-10 folks for keeping 10m alive during the low-propagation years. Their operations are all legal, and a good number are old-timers. They periodically sponsor contests that help to further populate our sunspotless 10m band.

The FCC applied the "Use it or lose it" rule to the amateur's 11m band back in the late 50s. It would be a terrible loss to have the same actions taken to our beloved 10m.

GERI CASTANEDA wrote:

I have to agree with Geri big time. The DX net on 14247 is a bother and just uses up valuable bandwidth. If you consider the band restrictions for some USA HF licenses (General-class for example), you only have 75kc of good DX [14225-14300]. You run into DX above 14300 sometimes, but not too often. Depending on what mood the DX net is in (how far away you have to be so they won't scream at you), they are eating close to 15% of the bandwidth for those General-class ops.

And yes, 4U1WB is almost always quick, efficient and courteous. I have usually heard an op named Masa and he is one of the best SSB pileup runners I have had the pleasure to listen to, and work. From what I hear on 14247, that just doesn't happen.

And yes, I have to agree that working DX on a net is not really working DX in the classical sense. Sure you get your QSL card eventually and your DXCC stickers, but that's really not the point is it? Steve Jobs (of Apple computer fame) said this a long time ago and it still holds true for lots of things:

The Journey is the Reward

From: Robert Lyons <boblyons@umich.edu>
Message-ID: <33DD092F.1F3C@umich.edu>
Source record: 32148

As a new DXer, I'm confused about how to request and/or send QSL cards. I've primarily worked 20M phone so far, and would appreciate it if anyone could answer the following Q's: Will a QSL card be sent to me only if I request it during the QSO? only if I send one first? or perhaps after *any* qso it is expected that I will send a qsl card? Perhaps I should send cards that request a card in return? How about during contests? I got my rig on the air first during the recent Field Day and made quite a number of stateside qso's. Are they expecting cards? (I'm imagining the operators who made > a thousand contacts trying to send all dem cards - ughh). How about the operators in last weekend's IOTA event?

Thanks for any answers.

>should send cards that request a card in return?

Not all hams automatically QSL every QSO. It can't hurt to
ask during the QSO (but not in a DX pileup or a contest!).

If you send them one with "PSE QSL" on it, the vast majority
will return the favor. If you QSL direct, enclosing an SAE
and postage will greatly increase your return rate. For DX
stations in common countries, the bureau is usually the
best way to go.

>How about
>during contests? I got my rig on the air first during the
>recent Field Day and made quite a number of stateside qso's.
>Are they expecting cards? (I'm imagining the operators who
>made > a thousand contacts trying to send all dem cards -
>ughh).

Right...most contesters don't QSL every QSO, but again if
you send them one direct with return postage, or via the
bureau, most will oblige.

> How about the operators in last weekend's IOTA event?

Some groups, e.g. 3905 Century Club, have their own bureaus;
IOTA may have one, I am not sure though.

Happy QSLing,

> >qso it is expected that I will send a qsl card? Perhaps I
> >should send cards that request a card in return?

A simple rule of thumb. If you respond to the CQ and want a card, send it. Very rarely will the other station initiate the QSL. It is not expected, nor is there really any definitive rules. If you send direct to the station, first check to see if there is a stateside QSL manager. In this case a SASE is very helpful as well as an economical way to get a quick QSL. If direct to the foreign station, a SASE with foreign postage works excellently. There are several sources for buying single units of postage. Check with some of the local QSL'ers for help. An IRC (International Rate Coupon) is another way but they are more expensive than dropping in the traditional greenstamp ($1). Some countries need more than 1 IRC or greenstamp, as the exchange rate doesn't cover airmail postage with a single coupon or buck.

The ARRL outgoing bureau is another way to send cards and many stations will respond with a "OK via the buro" You need to be a member of the ARRL as well as a subscriber to your local incoming buro. Again, the local dx'ers ion your area should be able to help.

They are not expecting cards, but I find that with a SASE they will return a card to you. It may take some time as the callsign used is usually an individual as opposed to a club call sign.
>
> > How about the operators in last weekend's IOTA event?
>

From what I saw (callsign wise) there are a number of stiffs (those who won't QSL if their lives depended on it) However, a vast majority do QSL with some regularity. Unless you need the country for a DXCC first one, I'd qsl all contests via the buro.

BTW, the best QSL'ers The Germans, Italians, Spanish, Japanese, British. Expect some problems with the Central American countries, as well as a few of the "Russian" countries.

Oh...I qsl ALL foreign contacts, irregardless. When first sending out, I went direct to get the county confirmed (very expensive). Now, I only send out direct for 40 and 80 meter contact (working towards %band DXCC)

Good luck Happy DX

Hi Bob:

Check out AC6Vs home page at http://pw2.netcom.com/~ac6v/index.html
This is the mega home page that is a handy reference to many aspects of
the hobby. There is a section on QSLing, including protocols, cards and
links to many QSL manager databases. If you get tired of that you can
browse a few hundred other topics on the homepage incld CW, homebrewing
etc etc. Book mark it - it's a gooder.

The primary service is government. 170.245 is a specific freq allocated
on a secondary basis for wireless microphones.

In the UK that part of the band is in the transmit section of the PMR band, with the RX section around 166MHz. I also know that the British military use AM on about 170.0125MHz.

Most VHF xtal-controlled rigs for the 2-meter band should be re-tuneable up there, possibly needing the odd capacitor/coil reduction if it cannot be tuned exactly. Replacing ferrite slugs with brass will often do the trick too.

I have some 2-meter stuff on my homepage, but it is somewhat limited (ZN414 receiver and a simple FM transmitter) for your application.

Source record: 32068

I recently purchased a Sony 2010 SW radio from Grove. When I ordered it
I asked about buying an interference filter for the lower AM frequencies
since I live close (about 800 feet) to an AM radio station tower.
They said that a filter wouldn't work since I was so close to the
station. If that is true under what circumstances would you use such a
filter? Also is there any thing that can be done to reduce interference
in such a situation.
Just wondering.

Hi Bob. You sound Like me a few months ago!

Send out what you can or want. I ALWAYS respond
with a card if I get one.

If someone really wants my card, I'll wait for theirs
and respond. If the OP is obviously working for a
special award and makes multiple mention during the
qso, it is obvious I should send one.

The big thing in the contest, (MY Belief), is to actually
log, and keep, each contact in the log. IF you ever need
to actually QSL card someone, you can.

You'll do fine. Hey, I hand draw each of mine and put
it in an envelope and send it for 32 cents.

Better to get postcard stock and send for 20 cents.

good luck!

Hi Robert,

When sending cards for contest QSOs (many people do that, including myself, as this is a great opportunity to work certain countries) take care to find the right QSL maganers. Many stations use special contest callsigns or operate from a clubstation.

For example, club station 3V8BB has different operators in almost every contest and you should address your card to the operator, not to the club call (I successfully exchanged cards this way).

Outside USA, where callsigns of four characters are quite normal, any short call might be one that is for contest use only. For example, some stations from Great Britain used calls like M7D, M7G, or M7T, in the recent IOTA contest, but those are not their regular callsigns.

Some station simply have a QSL manager. For example, cards for QSOs with ZD7WRG can be sent to WA2JUN.

There are many online databases giving such information. For example, look at:

http://www.systemtechnik.tu-ilmenau.de/ham/hamqsl.html

Every activity on the spectrum "uses up valuable bandwidth".
I do not participate in WA4JTK's net at 14.247, the IOTA net
a bit higher in the band (14.260?), the county hunters net, or
any number of other special interest nets on various bands.
But they perhaps don't care about some of my activities on the
bands and perhaps feel that I "use up valuable bandwidth".

Reality check here.... very few of us still are operating under
crystal control ... if you don't wish to participate in the activity
on a particular frequency, feel free to manipulate that largish
looking knob near the center of your radio and go use up
some different valuable bandwidth.

If I want a qsl card from the station I worked I send them my card and
an addressed envelop plus a stamp or $1, if it is out of the US. I
don't think I would receive any cards outherwise as most people have
all the 6 land cards they want.

1977. Who is Who on the Top Band

Newsgroup: rec.radio.amateur.dx

Dear fellow top-banders,

I don't want to take up a lot of your time and I'm not asking for much
but you would be doing me a great favour if you could send me a short
e-mail with the following information:
your callsign, number of DXCC countries and zones confirmed.

This information will assist me in compiling the largest and most
up-to-date rankings of top-banders on the Internet.

I'm sure many of you have spent years reaching your current level so
please spare a few moments and share your achievement with the rest of
us.

Unfortunately, this may be insufficient: for example, in DL, a normal
letter to outside Europe costs 3 Deutschmark which is about 2 US$
(depending on the actual exchange rate which, this year, was between
1.34DM/$ and 1.80/$).

The 170.245 MHz frequency is governed under FCC Part 90, 90.265.a/b. It is usable by eigibles (Sec.a; Power, Petroleum, Forest Products, Special Industrial, Business and Railroad Radio services) for low-power, wireless microphone operation subject to the following:
1. The emission bandwidth shall not exceed 54 KHz
2. Output Power shall not exceed 50 mw
3. Stability shall be +/- 32.5 KHz of assigned freq.
4. Unprotected from interference from other licensed operations in the band. If Government or non-Government users are interferred with, operations must cease. Also, applications are subject to Government (Federal; other than FCC) coordination.

Summary, if you're not one of the listed elgibles, its not legal. However, given the Friendly Candy Company's record of enforcement in the amateur bands, it's likely you could put up a KW wireless mic and never receive a notice of violation. Only public safety frequency interference is still treated as a serious matter at the Commission nowdays.

Hope This clarifies.

Regards,
Rick Tannehill, P.E.
Ariz. Dept. of Public Safety

1985. WEB-Site DXpedition Tortuga Island YV30T

Hi DX'ers !

I just installed on my WEB-site a BRANDNEW section of the DXpedition
to Tortuga Island (Caribbean Sea), we made 3 weeks ago (July '97).

You will see pictures of our group, and the beautiful Island.
(IOTA SA-044).

The URL you find this, is:

http://www.qsl.net/dl2gg/index.html

If you like to know (see) also about Aves Island (YV0), you
also find a section. (I have been operator 3 times from Aves and
what you see, is from all those DXpeditions)

I hope, you enjoy your "cyber-trip", hihi :-)

1987. Re: QSL Card Protocols

Newsgroup: rec.radio.amateur.dx
Date: 1997-07-31 00:00:00 UTC
From: terrybu@netman.ens.tek.com
Message-ID: <5rr8gn$hse@netman.ens.tek.com>
Source record: 32084

Having been out of the QSL chasing game for sometime I don't spend
much time trying to get them. Would you believe I still haven't sent
off for my VK0IR card yet (great procrastinator that I am). But since
it has been asked I thought I'd give some of the rules as I remember them
for QSL'ing.

1) QSL's are a courtesy, not an obligation. There are no rules that
a station MUST QSL you. DON'T demand a card from someone, just ask.

2) IF you want a card bad enough, include an SASE or green stamp (dollar
bill) or IRC's so the DX/county/etc. operator can afford to send you a
card. If his name is Baruk he might just charge you $2-$5 for a card and
finance his DXpedition with the proceeds...it happened! Or was he just
paying for his yaught. Be a little careful sending green stamps to countries
that object to this practice, not that too many countries are above accepting
the mighty dollar.

3) QSL'ing 100% is fine for some people but personally I think it's a pain
and just takes time away from operating. I used to do it when I first got
started but now that it's been a few years and I have all those european,
african and asian cards I'd rather spend my time operating and looking for
a new one.... For this reason I don't QSL unless someone sends me a card
with an SASE or I need them for DXCC. You can figure alot of people who
have been operating for several years feel the same way. Sometimes I feel
a little guilty about not QSL'ing everyone but trying to do that with a
thousand contacts in a DX contest is alot of work. Especially if you don't
have a computer program that does it automatically. I don't and probably
alot of other people don't too. Imagine how someone is Zimbabwa or Pitcarin
who just scaped together enough for a TR4 or Atlas and a wire dipole to get
on the air feels. They are the people I enjoy talking to the most, not the
'big guns' with stacked monobanders running a pair of 4-1000's or 8877's.

4) As far as how to QSL:
A: Bureau takes 1-3 years but works, is easy and cheap (realatively)
B: Direct get great overseas stamps, cost green stamps and/or
IRC's, and takes only a few weeks to ???
C: QSL Managers the best for the DX station and in many ways the
best for the DXer. Gives the DX more time to operate,
gives the manager the 'fun' of doing the cards and
getting the stamps, and is efficiant. Usually takes
a week to 3 weeks if the DX is prompt with his/her
logs.
D: Buying overseas stamps and sending SASE's to the DX
Never did much of it but is probably the best way
to be sure of getting a rare one. Gets costly and

takes time and is tedious.
E: Don't QSL unless they do Don't expect much from DX'er who
get hundreds, even thousands of cards a year. For
stateside it is fine unless you are chasing counties
or maybe states. Personally I just never did go in
for WAS.

F: Join the ARRL and use the Overseas QSL Bureau Great
way to afford to send lots of cards, especially if
you are a contester or very active DX'er. This per-
sonally is the only reason I see for joining the
ARRL other than updating you're DXCC totals but that
may not be how you see them.

5) Remember, some people don't want to just give out signal reports and QSL cards. This is especially true if you are a DX station in a rare county and want to make friends on the air. YOU CAN'T EVEN GET ON WITHOUT A PILEUP DEVELOPING AND THOSE JERKS JUST WANT TO SAY 'HI, you're 59, goodbye'. Let the DX station choose how he or she want's to operate and don't keep trying to break into someone's conversation just to get a signal report.

But...if the DX station takes breakers, it's there own fault so go with the flo. JUST try to show some curteousy and class. Maybe the DX station will be more inclined to QSL.

Windows WAS MAP is a computerized version of the blank US maps that for a long time hams have loved to color in as they work new states. There is increased interest in working all states on various bands and modes with awards for 5 Band WAS, Single Bands, SSB, CW, OSCAR, SSTV, RTTY,etc. Windows WAS MAP gives you a colorful display of your "states worked status" for each of 20 types of WAS awards. It is designed to be run entirely with a mouse; however shortcut keys are provided. It can easily be used to keep track of your status. It works easily with manual record keeping as easily a computer logs. (You still have to set each state with a simple mouse click). I personally keep my qsl cards in a file cabinet and use Windows WAS MAP to keep track of the status. Since it is a windows program you can have it quickly available to check your status by running it in the background and using Alt. Tab to retrieve it. Load up Windows WAS MAP and start keeping track of your status as you work toward various WAS awards.
Program on 3.5" disk. Order the Windows WAS MAP program by sending $5 shipping/handling,copy fees to:

SB DX ARL ARLD033
ARLD033 DX news

This week's bulletin was made possible with info provided by The 599Rpt, Tedd, KB8NW, the OPDX Bulletin, The Daily DX, the DXNL, 425DXnews and Contest Corral from QST. Thanks to all.

MALAWI, 7Q. Eli, IN3VZE, will be QRV as 7Q7CE on 20, 15 and 10 meters from August 2 to 25. QSL to home call.

OMAN, A4. A45XL is active from Masirah Island, IOTA AS-014. QSL via G4VUO.

PAKISTAN, AP. Pakistani stations will use the special prefix AP50 to celebrate their 50th anniversary of independence. There will be a special certificate available. Listen for details by the operators.

JERSEY, GJ. Juergen, GJ/DF3OL, is active as a QRP station from St. Saviour. He will be here until August 9. QSL to home call.

GRENADA, J3. IV3ZJR, with IV3NVN and IV3TMV are QRV as J38AH and J38AI, respectively, until August 21. They will put emphasis on the newer bands. QSL via IV3TMV.

SVALBARD, JW. Jack, JW0M, is QRV from the Polish Academy of Science. QSL to PO Box 35, 80-325 Gdansk 37, Poland.

ARUBA, P4. Several Germans will activate P40XM from August 1 to 26. Activity will include the Worked All Europe CW Contest. The operators are DL3XM, DL4LQM, DL5LYM and DL8WAA. They may also go to the Netherlands Antilles and St. Maarten. QSL via DL3XM.

MIDWAY ISLAND, KH4. Ted, NH4/NH6YK, is QRV on 10 and 6 meters. He will be here until August 20. QSL to home call.

EASTERN KIRIBATI, T32. T32Z is QRV and has been found on 15 meters around 0230z. QSL via N7YL.

INDIA, VU. Pai, VU2PAI, will be active as VU2PAI/50 until September 30 to commemorate 50 years of India's independence. QSL to home call.

ZIMBABWE, Z2. Cedric, N9YXA, is part of a communications convoy here and will be QRV as Z2/N9YXA from August 3 to 21. He can be found on 40 to 10 meters. Some RTTY operation is planned as well. QSL to home call.

CALL SIGN CORRECTION. As reported in DX bulletin ARLD031, the call sign of the Hillview Gardens Resort in Eastern Malaysia will be 9M6AAC, not 9M6A.

THIS WEEKEND ON THE RADIO. The ARRL UHF, Ten-Ten International Net Summer Phone and YO DX contests, and the QRP ARCI Summer Daze SSB Sprint are all on tap for this weekend. Please see August QST, page 95 for details.

Hi there
I was wondering if any of you can answer a theoretical question. Right now, I have a 50 watts 2 meters transmitter coupled to a Ringo Ranger ARX2B antenna and this setup gives me about a 75 miles range on FM using repeaters. If I added a 160 watts rf amplifier with a 20 db receive preamp and used a 13 elements beam with a gain of 15 db, what kind of range could I get on 2 meters FM using repeaters again? I know this question might sound silly but I wonder if it is worth it to upgrade my rig. If I can't get interesting performance with that kind of setup, I just might have to pass my cw test at 5 wpm and go to HF! I would like answers from hams who have tried something like that.

73 de VE2CJW in Quebec Canada.

I don't claim to be an expert on 2 meter DX, but I think you'll
find antenna _height_ to be the biggest player in establishing
range. My personal DX records on 2 meters (FM) not counting
repeaters are 105 miles on 1.5 watts and 125 miles using about
3 watts. Both were with rubber duckie antennas. The trick?
The 105 miles was from Mt. Katahdin, Maine (5400') to St. John's
New Brunswick, and the 125 miles was from Mt. Pisgah, Vermont
(3800', Mt. Snow Ski Area) to Mt. Washington, New Hampshire (6388').
I got into the Mt. Washington repeater, and the range _from_there_
could go another 100-150 miles.

...and you're only getting 75 miles?... ;-)

RS-10, mode A will do OK on 20-40 watts with a ground plane antenna.

You *can* DX on 2-meters. A small number of folks have WAS on 2-meters, and a smaller number have DXCC on 2-meters. But DXing through FM repeaters will not get you there, and is usually considered to be bad form. Most 2-meter terrestrial DXing is done on SSB or CW, or through satelites.

Here is why. Most repeaters, at least in North America are coordinated by a volunteer coordination body to avoid interference when used in a "typical" manner. Frequency protection is granted, such that no two repeaters use the same input frequency within a circle of "xx" radius, centered on each repeater.

To illustrate the problem caused by overly powerful FM stations, suppose that the "protection distance" is 50 miles, and that in some given direction from your QTH there are repeaters located exactly 5, 55, 105, and 155 miles. Lets also suppose your new 160W with 13-el-yagi@50FT rig can poke a signal out 175 miles.

Now you key up you rig on that bearing. All 4 repeaters will perhaps hear you and repeat your signal, but because of capture effect, you will only hear the repeater 5 miles away. Anyone answering you on a more distant repeater will not be heard by you, but you will be QRMing their repeater talking to some guy 5 miles away.

While the above is an artificial situation, you can see that high power FM in the repeater sub-bands might be considered bad "spectrum citizenship".

73, de Hans, K0HB/4ID

1996. Taiwan new callsign

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-01 00:00:00 UTC
From: bv5af@ms1.hinet.net
Message-ID: <33e22406.88784174@news.cis.nctu.edu.tw>
Source record: 32093

Hi all
From now, Taiwan will have new callsign prefix.
There are 3 new stations will be on air,

Period: from Aug 01 till Oct 01 1997

BM0BV, from CTARL
Chief opr: bv2ew, bv5af, bv4fh and bv4yb

BX0YL, from CTARL YL group.
Chief opr: bv4bo, bv5ag, bv5ev and bv4yl

BW0TW, from CTARL
Chief opr: bv7wb and bv7ya

Pls note:
while bv4yb, bv4yl and bv7ya are of CTARL club stations.
bv4yl is of YL club station.
CTARL = Chinese Taipei Amateur Radio League

QSL via BV buro, P.O.Box 73, Taipei 100, Taiwan.

Now Jeremi has a sense of humor !

A single frequency transmitter with a PLL..... :-)))

and Paul probably doesn't have a clue about crystals and multipliers.
:-(

I would recommend the Amateur Radio Handbook produced by the ARRL except
he would probably end up building a PLL based transmitter.... :-&

PAUL <-- get yourself a 9.458 crystal, then build an oscillator
followed by one doubler and two tripler amplifiers. Viola! you are
transmitting on 170.244 MHZ. A simple tweak of the oscillator tuning
capicator later and you are on 170.245 - sans modulation - cept maybe
some HUMMMMM if you don't have a stable power source..... :-)

Jim :-b

Hello all,

Once again I'll be out Calling CQ on 50.400 AM

Sat and Sun..10:00-20:00pdt (17:00-03:00)z

I'll call CQ on the hour and on the half.

Last time I had a tree trimmer running his grinder all weekend.
Had too much QRM and s9 of ac type noise.

There were a few opening though.

Lets hope for a good "open" weekend.

If you want more details on the 50.400 AM test Check out my home page.
http://www.geocities.com/Hollywood/5860/50am.html

Also I'm running a Swan 250/60 watts/Vertical ar-6/

There is a lot of info there.

Thanks everyone!

The RS wireless mike kit can be modified to transmit on 170.245.
Instructions on how to do this can be found in the book NOW HEAR THIS
by Winston Arrington and CRB use to carry it. The schematics Mr.
Arrinton discusses in detail are the same basic circuit of the RS kit.
BTW - The book gives schematics to modify a xmitter from 30-300mhz.

2004. One Ham's Prediction on Sunspots/Global Cooling

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-02 00:00:00 UTC
From: Mike Flaugher N9LLX <flaugher@thepoint.net>
Message-ID: <01bc9f7a$d831cc60$bea2f6ce@flaugher.thepoint.net>
Source record: 32101

All right, here it comes. Crazy Mike is at it again. I try to hold my peace but I just can't stand it anymore. Doesn't ANYBODY see that Earth temperatures have started cooling, the sea levels are turning toward decline, and cloud cover is going nuts around the globe? Does no one see the correlation between the weather events of the last three years and what's happening (or not happening) with sunspot cycle 23? We are dead in the water for solar flux, folks, and we just went another couple of days with NO spots on the sun. Granted, spots are just an artefact, but they ARE an indication of what else is happening on ole sol. We SHOULD be well into a big increase in flux and spots by now, a year and three months into the new sunspot cycle, especially since everyone and their pooch predicted that Cycle 23 would be the Grand Poobah of all cycles. Well, 23 is a flop so far, which is really wierd for an odd-numbered cycle. This hasn't happened since the late 1790's, two decades before the Year Without a Summer in 1816.

I believe another solar minimum event like the Wolf, the Sporer or the Maunder may be coming. Three times in just the last thousand years alone the sun has gone into a period of quiescence and (coincidentally) the Earth has been hit with global COOLING that has brought the same patterns of drought/flood/harsh winters we're beginning to see acelerate around the world today. Just look at the number of climate records we're breaking that go back to the early 1800's or even to the Little Ice Age/Maunder Minimum itself 300 years ago.

I've been a ham radio operator 31 years, and I'm used to observing sunspot cycles as well as dealing with oscilloscopes, spectrum analyzers, and fourier analyses. I look at the waveshape of 14-C and 10-Be isotopes extracted from two thousand years of ice cores and tree rings and what I see is another cold epoch on its way. In fact, we SHOULD have had one begin around the turn of the 19th century, but one of the components of the climate waveform (it's probably tri-modal and somewhat unstable) pushed the sun back up again for a global warming hump that lasted through the 1800's. I don't see this happening again. Call me a boob but I think everything is lining up for another big dip in solar activity. It HAS already started, and what's outside our windows is the evidence.

In the 13th century, this thing drove the Vikings from America and destroyed the Anastazi culture as well as bringing Medieval Europe to its knees. The most recent episode, the Maunder Minimum, caused or helped to cause the General Crisis of the 17th Century (worldwide famine, rebellion and social collapse). Germans are finding out today, the hard way, just WHY the old, original Oder River dikes were built so far back. I'm not saying that the weather and the sun will completely wreck our world, but it's NOT something we should turn our backs on. We DO have much advanced science today, especially in agriculture, but we also have many, many more people

on the planet now than the last time this all happened.
What's crazy to me is how The Environmentalists refuse to give up insistence on man-induced global warming. Sure, the theory may be correct about CO2, but we're understanding now that man's efforts are just a drop in the bucket comapred to the power of the sun. Some Enviros are running around like chickens with their heads off claiming "data calibration errors" and "bad satellites" while desperately cashing in on anything and everything governments will let them get away with before the roof caves in. The truth, to me, is that a climate shift is coming, and we'd better get ready for some major crop production problems in the coming decades along with some big-time layouts of disaster relief funds. Over the course of the next decade, we will drop our global warming fears like a hot (or not-so-hot) potato. If this cycle to come is anything like the Wolf, Sporer or Maunder, we may not see real weather mildness throughout the ENTIRE NEXT CENTURY!
I am NOT a professional scientist. I am an amateur. Please understand this as I give my prediction for the future. I think we're going to see some climate "stabilization" or slight improvement for the next five or six years as we get into the peak (although a low peak) of sunspot cycle 23. Following that, it's Katie bar the door. I think by 2004 or so we're going to see some real global cooling with strong North Atlantic blocking and very influential "ridging and troughing" patterns on the continents; much more so than now. Strong droughts will form under/near the pressure ridges while the low pressure troughs will act as conduits for polar/arctic air and lots of rain. I do NOT think alpine ice caps are going to melt anytime soon.
What really sinks my heart is that so many good scientists are starting to see this coming, but are afraid to say a word out of fear of The Environmentalists. This is really sad. Oh well, I don't mind going out on a limb like this if it sparks some more very needed discussion.
Hey, Ray, what'ya think of this tri-mode thing?

Hi Mike,
Are you sure you're on Earth? Here in the Pacific, it's just been reported
that a 7-mile piece of Alaskan glacier has melted. And over the years,
Pacific atolls have noticed a rise in ocean level (Australia has volunteered
to relocate Pacific islanders who will be displaced if their islands become
inundated {Jim KH2D, I hope you like kangaroo meat :}). Also, note that
that Florida, due to having beaches with very shallow slope, has one-time
beachfront property now under water. (Numerically small inclination amplifies
the slightest change in ocean level.)

Why do you believe the earth is cooling? Please cite your references.

No we shouldn't see a big increase in spots by now. We just went through transition from 22 to 23. It does take awhile for things to start cooking.

This is just plain silly. Things are looking normal at the momet as far as
sunspot activity is concerned. The new cycle has started and it IS increasing
albeit solwly. Have patients

Well, it seems to me that someone out there ought to jump
on this and blame the ARRL for the sun spot situation. In its
mad grab for power, you'd think the ARRL can fix the sun spot
cycle that it's obviously been messing with.

Mike
KC7RHR

P.S. Perhaps while the ARRL bashing is in full swing, someone
can accuse it of taking out JFK, Bobby, MLK, and putting
Hinckley up to it.

2014. qsl route VK9XL (06/02/96) ???

In article <5s0cerevr1@newsy.ifm.liu.se>, Gert Carlsson
<d91gerca@isy.liu.se> writes
>I worked X5CL the other day. I can't find this prefix in the
>DXCC or ITU lists or anywhere else. Does anyone know to which
>country it belongs? His name was Zelko, so I suspect it is
>somewhere in ex-Yugoslavia.

Sorry Gert, you have been caught by the long-term scam. ALL X5...
callsigns are *pirates*. No such prefix has ever been issued and the
"country" given by these operators is in fact a province of Bosnia-
Hercegovina.

Even if you did get a QSL it would be worthless for any purpose.

I understand a few silly individuals are trying to make some obscure
political point here. Precisely how pirating a ham radio callsign is
going to further their independance demand is beyond me.

If you doubt the above, please contact your national radio society.

2016. Help! Need VE5 and VY2

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-03 00:00:00 UTC
From: "Robert G. Schaffrath, N2JTX" <rschaffrath@worldnet.att.net>
Message-ID: <33E4FF85.3C55@worldnet.att.net>
Source record: 32162

I am currently trying to contact Prince Edward Island (VY2) and
Saskatchewan (VE5) on 20M for the RAC CANADAWARD (see
http://www.rac.ca/awards.htm#CANADAWARD). So far I have managed to
contact the other ten provinces/territories and I am awaiting QSL
cards. Would anyone in these territories be willing to setup a brief
contact on 20M so that I can get these last two confirmed? I am on
located on Long Island, NY (IOTA NA-026).

Thanks!
Robert de N2JTX

SB DX @ WW $OPDX.316
Ohio/Penn DX Bulletin No. 316

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 316
BID: $OPDX.316
August 4, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W3CF, W3UR & The Daily DX, N4AA & QRZ DX, K8NA, DJ5AV & DX News Letter, EA5ZI, G3USF, G4BUE & DX News Sheet, PY1CAS, SM0KCO and ZR5DTS for the following DX information.

5W, WESTERN SAMOA. Perry, WH6XY, who is active as 5W1PC until November, can be found mostly weekends operating SSB on 15, 17 and 20 meters using a FT-757 and delta loop. He is currently working as a schoolteacher there.

7Q, MALAWI. The "DX News Sheet" reports that Eli, IN3VZE (ex-9J2CE), will be active now until August 25th as 7Q7CE. Operations will be on SSB, 20, 15 and 10 meters. QSL via homecall.

BT, CHINA. Lou, PA0LOU, will be active from September 4-16th with the special callsign BT1IARU while attending the IARU Region 3 Conference. Operations will be from a hotel in Beijing where he is staying along with other delegates.

FW, WALLIS & FUTUNA ISLANDS. Paul, FW5IW, will continue to be active from here until August 14th. Reports state he will be active on CW only on 15, 20, 40 and 80 meters. Most of the QSNs reported so far have been on 20 and 40 meters. QSL via OH5UQ.

IOTA NEWS....
ED5HQ and EF5HQ will activate Columretes Islands (IOTA EU-069) from August 7-10th. Look for them on the following suggested frequencies: SSB - 3700 (under) and 21200 kHz and CW - 7025 kHz.

CT1FMX and CT1AXS will activate Berlenga Island (IOTA EU-40) from August 10-16th as CQ1I. Operations will be on 80-10 meters. They will pay special attention to all stations in the Pacific and also JA and VK land. This team will also operate, if they have good conditions, the other islands near Berlenga for the FIRST time ever. QSL by CT1FMX.

G3ZAY, GM0UGG, G0PCE, and G0PYA will be active from the Scottish Island of Shiant (EU-112) August 16-17th (weather permitting). QSL via G3ZAY: 41 Enniskillen Road, Cambridge, CB4 1SQ, England, or via bureau.

NEW IOTA! BG7IA, BG7IB, BG7KR, BG7KT, BG7LP, BG7NI, BD7JA, BD7JG, BG7JK, BD7KW are in the planning stage of putting a new Island On The Air (IOTA). This island is DanGan Island which is part of the Wai-Lin-Din Archepelego (NE of HongKong) and is listed in the Guangong Province East Group without a reference number. They are planning for this to take place August 15-17th.

KH2, GUAM. Ray, WH6ASW, will sign WH6AW/KH2 from here again from mid-August until December. QSL via VK4FW.

KH3, JOHNSTON ISLAND. Al, KK5ZX, will be active every third and fourth day during his stay beginning August 23rd. His activity will be from the club station there and operations will be mostly CW but, there will be some SSB on 160-10 meters.

KP2, U.S. VIRGIN ISLANDS. Long time DXpeditioners Doug, W3CF; and Dick, K3MQH; will be active from Windwood, WP2Z, from October 22-30th. During their stay, they will participate as a Multi/Something entry in the 1997 CQWW Phone Contest. These charter members of V26B will focus on WARC bands and RS-12 during free time. QSL W3CF/KP2 to his QSL Manager Koos, KK3S. QSL K3MQH/KP2 to his home call, K3MQH. QSL contest call "WP2Z" for THIS CONTEST ONLY (1997 CQWW PHONE) to KK3S. Windwood is a rental property, so many different QSL routes will apply. Pay close attention to announced QSL routes in specified time periods and specific contests. For more information, E-mail this operation (1997 CQWW Phone) to: W3CF@aol.com

NEW BEACONS....
Martin, G3USF (IARU Region 1 HF Beacon Coordinator), reports that the latest IBP HF beacon to become operational is OA4B. It transmits on 14100, 18110, 21150, 24930 and 28200 kHz in the worldwide beacon network sponsored by NCDXF. OA4B transmits for 10 seconds on each of these frequencies in turn between LU4AA and YV5B. Like the other NCDXF/IBP beacons, the power steps down from 100 watts to 0.1 watts. Martin also reportd that 5Z4B, the Kenya beacon in the same network, is currently off the air due to power supply problems.

Carlos, PY1CAS, reports that a new 6 meter beacon is on the air. The Brazilian League (LABRE) now has a beacon in Rio de Janeiro working on 50052.0 MHz. It is running 5W on a Ground Plane.

P4, ARUBA. The "DX News Letter" states DL3XM, DL4LQM, DL5LYM and DL8WAA will be on the air as P40XM from August 1-26th, which will include activity in the WAE CW Contest. They will also try to activate PJ2 and PJ7. QSL via Gunter, DL3XM (ex DL8WXM), via bureau or CBA 1997.

QSL INFO AND NEWS......
The GI7J 1997 IOTA Contest Team (GI0KOW/Robert, GI0NWG/Andrew, GW4VEQ/ Tony, EI6FR/Declan, EI2GX/Tony, EI7DSB/Liam, EI7HF/Emmet and EI9IF/ Alan) would like to thank everyone who made a contact with them during

the contest. Also, they would like to remind everyone that QS cards for GI7J will be handled by Tony, GW4VEQ.

If you were lucky to work Ray, G3NOM/9M2OM as 9M2OM/P, from an island in the Selangor/Negeri Sembilan State Group off the West Coast of West Malaysia (IOTA AS-074), QSL via G0CMM.

Ted, K8NA, is the QSL Manager for KH2D, Guam Island (IOTA OC-026). K8NA has the computer logs for KH2D dating back to January, 1986. All those needing QSL confirmations for KH2D, may send to K8NA direct or via the bureau.

T4, CUBA (Attention Prefix Hunters). Members from Kvarnberget Amateur Radio Club (SK0UX) and Radio Club Las Tunas will activate Cuba with a unique callsign T48RCT during the 1997 CQWW CW Contest November 29-30th. Operators from Sweden will be SM0DRD/Goran, SM0JHF/Henryk, SM0KCO/Carlos, SM0MO/Ingvar, SM0AIG/Ingemar and SM5DSB/Kare. Operators from Radio Club Las Tunas were not listed in the release. The station will be active one week before the contest, and one week after. Activity will be on CW, SSB, RTTY which inclues operations on the WARC bands. QSL via SK0UX. A SK0UX QSL-server will be available on Internet to download your cards instantaneously at URL: http://ham.te.hik.se/clubs/sk0ux. For more information about the expedition, check out the WEB page at URL: http://ssa.te.hik.se/clubs/sk0ux/T48RCT.html -or- via E-mail at: rsa.rsacr@memo.ericsson.se

TY, BENIN. Sigi, DJ4IJ, will be active once again from now until September 10th as TY1IJ. His activity will be mainly 160, 80 and 30 meters. He has a sked on 18140 kHz during the weekends (no times were given). QSL via DK8ZD.

V31, BELIZE. Joe, K8JP, and his XYL Bev will be traveling here on August 12th and then return home on August 21st. He is currently waiting for his callsign to be issued. He reports to us that he will operate on 80-6 meters, but maybe 160 is possible. Joe will be active mostly on CW with some SSB operations. At times they will be active mobile depending on how bumpy the roads are (Joe.."They are all bumpy, some are just worse than others.") QSL via: Joe Pontek, K8JP, P. O. Box 59573, Schaumburg, IL 60159-0573, U.S.A. SPECIAL NOTE: His Indiana or any other addresses are no longer good.

VK9, NORFOLK ISLAND. According to "The Daily DX", Kevin now signing VK9NX is here for about 2 weeks celebrating his 60th birthday. He was heard active most days on 80 meters between 1000 and 1200z. QSL via VK2CE.

VK0, MACQUARIE ISLAND. Tom, VK0TS, has become increasingly active over the last few days. Watch for him on 14222 kHz starting around 0400z (sometimes with Jim, VK9NS). Reports also indicate he sometimes goes to 40 meters (7075 kHz) around 1100z to work VK, ZL and JA operators. If he is not around 40 meters this time check 80 meters (3799 kHz).

XU, KAMPUCHEA (Cambodia). Both Mike, XU6WV, and Harv, XU2FB, continue to be active on 20 meters looking for NA and SA stations. Look for them to

be on between 1130 and 1430z. Frequencies reported on were: 14192, 14195 and 14226.5 kHz.

ZD9, TRISTAN DA CUNHA. Ian, ZD9IL, is active from here and can be found on most bands. JA operators have heard Ian on 14202 kHz between 1500 and 1600z working mostly JA stations. There were no other QSNs reported.
His QSL Manager is Edwin, ZS5BBO, and QSLs can be sent direct to:
Edwin Musto, P.O. Box 211032, Bluff, 4036, SOUTH AFRICA. Edwin does have an E-mail address: Edwin@mec.co.za

In Novmeber you'll have no trouble finding either in the ARRL
Sweepstakes, if not before that. Would probably be more satisfying
finding them on your own than setting up a sked using the Internet.

If you want to work VE's just park your rig on 14.140. This is
the unofficial VE calling frequency. A 'CQ VE5' or 'CQ VY2' should
scare up the needed contacts in no time.

Announcing NEW
Ham Radio.FAQ

This is the second generation of the original file that was
a regular USENET posting entitled

"rec.radio.amateur.misc Frequently Asked Questions"

The NEW Ham Radio.FAQ is a HyperText document that is on the
WWW and it contains 3 chapters plus hundreds of LINKS to radio
related sites!

1 - Introduction to the Ham Radio.FAQ
2 - Amateur Radio Organizations, Services, and Data Sources
3 - Amateur Radio Advanced and Technical Questions

Please provide a copy of the Ham Radio.FAQ to any new or
soon-to-be Hams that you know or share with them the URL to this
site:

http://www.mv.com/ipusers/wd1v

Send me an EMAIL <or packet with your Email address> if you want the
FAQ text file sent to you as an attached <120 K> file with the words
"HAM FAQ" on the subject line.

Send me a formatted disk with SASE disk mailer if you want the
FAQ text file sent to you on disk. PC or Mac are fine.

Dear fellow top-banders,
I don't want to take up a lot of your time and I'm not asking for much but you would be doing me a great favour if you could send me a short e-mail with the following information:
your callsign, number of DXCC countries and zones confirmed.

This information will assist me in compiling the largest and most up-to-date rankings of top-banders on the Internet.

I'm sure many of you have spent years reaching your current level so please spare a few moments and share your achievement with the rest of us.

4U1WB is in Washington, DC. I heard the pileup this weekend and really
wanted to work them. Unfortunately they have only seemed to be working
on 20M and are too close here in Long Island. Maybe someday they will
try 40M (sigh). On the other hand, I have worked 4U1UN on the
groundwave and was able to break through a substantial pileup.

2030. Yaesu VL-1000 HF/6M Amplifier?

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-05 00:00:00 UTC
From: darrell.earnshaw@sap-ag.de
Message-ID: <EEGFxI.LJK@sap-ag.de>
Source record: 32176

I noticed that July '97 edition of Radcom hints that Yaesu are about release a new 1Kw HF/6M amplifier, called the VL-1000. Anybody have any other info on this product? (Yaesu's home page doesn't mention it - at least not Yaesu-USA.)

73, Darrell (NR3Y).

2031. Re: A question about possible range on 2 meters

The antenna is a key issue. I can talk to San Diego, CA
from my home, total distance of about 150 on my HT. Yes,
I do put 2 watts into an amplifier coming out with 30 watts.
Send this to my mobile whip and hit a repeater on Santa Catalina,
distance about 40 miles, then the QSO gets through. This last June

during Field Day, our club made many contacts to San Diego
using 25 watts, no repeaters. We did us a beam and a rotor
to make our signal very directional.

Just my 2 cents,

Bill, KD6UQB

2032. Help END UPS Strike!

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-05 00:00:00 UTC
From: notspams@nowplace.org
Message-ID: <33f9674b.15228811@news.exis.net>
Source record: 32178

Let me start out by saying that I don't work for UPS in any way. Rather, I am just one p-o'ed individual tired of being made a victim by one group or another.

Those of us who are hams and who might have a shipment in limbo with UPS in the form of a new rig, repair, part, or other hobby related item are being held hostage by the Teamsters Union.

Unfortunately, the Teamsters new president wants to flex his muscle while at the same time, holding millions of innocent businesses and individuals hostage in the process. We hams are caught up in the Teamsters unfair job action.

My UPS driver is a hard worker and a decent and honest person. I would not want to work as hard as he does in the cold and heat. UPS works the heck out of their people. Still, he does make $19.75 an hour plus benefits.

One of the main sticking points is with regard to UPS taking back administration of their pension plan. The Teamsters Union does not wish to surrender administration of the UPS employees pension plan. In fact, they will not even allow their union members to vote on the matter.

I can only wonder why the Teamsters Union is so adament about loosing control of the massive dollars involved with the UPS pension plan. It is my opinion that perhaps, they have spent some of it in an unauthorized manner and don't want that to be exposed?

With the Teamsters past track record on pension plan administration and diversion of funds, I'd be concerned also.

For the Teamsters Union to try and justify a strike for MORE is like calling a rape a "social problem." The Teamsters action is an outrage!

I am fighting back and ask you to help. Here's how:

Call or better yet, FAX your Senators and Congressmen. Let them know you feel they should urge President Clinton to take steps to use his Presidential powers under the Taft-Hartley Act to intervent and get UPS and the affected businesses back to work..

FAX :Labor Secretary Alexis Herman at (202) 219-8822 or e-mail at aherman@dol.gov

Finally, FAX The President of the United States and ask him to get involved as above:

Mr. Bruce Lindsey
Assistant to the President and Deputy Counsel
The White House
2nd Floor, West Wing
Washington, DC 20502

FAX: (202) 456-2983

It is my opinion that the Teamsters Union is the villian here. Lets try an get things turned around before UPS is forced to hire replacements and terminate employees.

If you are going to use the cards for DXCC or other awards, then you must print them on paper. Since there are all kinds of printers, the same cards would look different depending on the printer you are using.
On such a card it would be very easy to duplicate and manipulate the callsign before you print it.

So I hope it will not be acceptable as proof of a contact.

Hello reader,

My friend got the dual band handy (Kenwood TH-79A) transceiver.
It is for U.S.A and Canada market version. It can transmit on 70cm band
from 440 to 450 MHz. However he wanted to have a general market version. It
can transmit form 430 to 440MHz.
I think it is not so difficult to modify from US version to General version
but I don't have no information so far.
If you have any information about it, please let me know.

UPCOMING USI ISLAND EXPEDITION !!!!!

Sunday August 24th 1997 from 11:00EST till 4pm EST operating on 28.450 USB and 14.260 +/- QRM N2QXD/M will be operating from Governers Island in NY harbor.

This will be a new activation...the operators will be n2qxf and n2qxd respectivly.

As this is a US Coast Guard facility and not really accessed by the public anymore if at all this is truly a rare one. Info from the Coast Guard is that this will be the last public access of the island base for sometime if allowed at all in the future.

The island may be turned over by the feds to NY state if they want to purchase it...or it may just remain a stagnent piece of federal property.

Operation will be continous with no breaks....and will end promptly as we cannot miss the USCG ferry.

QSL Route will be via:

N2QXF
POB 99
Glenwood, NJ 07418

SASE's for regular QSL's or 8.5x11 SASE plus $2 or 3 IRC's for certificate

Thanks and hope to work you on the 24th,
73
Nick
N2QXF
Greg

2038. Macintosh Ham Radio Users Group

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-07 00:00:00 UTC
From: john@wd1v.mv.com
Message-ID: <john-0708970734130001@wd1v.mv.com>
Source record: 32184
Cross-posted to: rec.radio.amateur.space,rec.radio.amateur.dx,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc

There is an informal group of amateur radio operators that use Macintosh computers called "Macnet" with > 800 members world-wide.

We stay in touch with each other via packet & Internet and we have a HyperCard stack that tells the story of each of us called "Macnet Roster" that list

o CALL SIGN @ HOME PBBS
o FULL NAME
o Street ADDRESS
o CITY, STATE, ZIP
o INTERNET ADDRESS
o MACS USED
o RADIOS USED
o SOFTWARE USED
o PASSIONS
o COMMENTS

Macnet members can then communicate with one another directly or use our Macnet Moderated Mailing List to pose comments or questions to all of us on the Net.

To join Macnet, put YOUR INFO (via EMAIL or via disk using TEACH TEXT on a formatted disk in a self addressed and stamped disk mailer that is in a large envelope clearly marked "ROSTER").

http://www.mv.com/ipusers/wd1v/Page2.html

-------<sent to all new Macnet Subscribers & Macnet Roster Updates>---------

Welcome to Macnet!

A trip to my home page also reveals there are many superb files and programs for amateur radio operators that want to use Mac computers. See more details in January 1997 QST, page 100. http://www.mv.com/ipusers/wd1v/

* Ham Radio Test Simulators - where you can go from Novice to Extra Class practicing the actual tests right on your Mac! Check out the info on the new NO CODE license or scramble your neurons and learn Morse on the Mac too!

* Macnet Email Reflector - send an Email to all Macnet users on the Internet.

* Macnet Roster - a virtual "Who's Who" HyperCard stack with > 800 entries giving the names, addresses, phone numbers, of radio operators all over the world that are using Macs. Check out their projects and

their passions and put a design on your Mac Radio future. See what neat things are being done with Macs and Ham Radio!

* Mac Ham Radio Software Listing - as the name implies, its "The List" of the latest - much of it with FTP links so what you see is what you can get your new programs with just a click.

* Ham Radio.FAQ - compiled on a Mac with a lots of links to great Mac FTP sites for radio, electronic engineering, and similar data.

>Walt Davidson Email: walt at dial dot pipex dot com
>
>

As far as I know, the card must still have either the signature or rubber stamp. Probably the amount of scrutiny the ARRL puts on the cards is proportional to the rarity of the DX. I receive many EU cards which simply have a computer-printed label and no signature or rubber-stamp over the label. It could be very easy to fake such a card from a station in England or France, etc, but why bother? (Unless on a more difficult band such as 160 meters or 2 meters.)

OTOH, an XZ1 or VK0IR card would probably be examined closely if at all suspicious. DXCC Desk may even contact the QSL manager to verify the QSO.

2041. Ham Radio and SWL - Equipment choice?

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-07 00:00:00 UTC
From: "Mondoray Inc."
Message-ID: <33ea79b1.0@news.netway.com>
Source record: 32187

Basically the subject says it all.
I want to purchase a HF Transceiver which can double as a SWL rig.
And I want to spend no more than $1500 (Power Supply excluded)
It must have easily obtainable filters for SWL and CW (250)
I'm thinking about the FT-990 as it's on closeout (FT-920 replaces it)
I'm into CW and a dedicated Ham. But I enjoy SWL etc.

So...What's the best overall HF plus DX receiver for the money?
Let's talk NEW vs. (If you can get to a flea (I have) then look for a
real deal on ???)

Edward, Robert and some other US DXers wanting a QSL from outside
the states,

please note that there are countries out there where postage is not as
cheap as in the US. A standard overseas letter from Germany is 3.00 DM.
Converted to the (very strong) US$ that's 1.67$! It used to be more than
2$ some years ago...

One buck doesn't even buy a surface mail reply (2.00 DM = 1.11$ currently).
So, don't be surprised if your direct request with one $ note is answered
via buro!

An alternative for Germany is one IRC (International Reply Coupon) that
you can buy for 1.05$. It is good for a standard airmail letter, however,
the return procedure is a very nasty one. It took me more than one hour
in the post office to mail 145 overseas letters using IRCs last winter.
Since, in Germany, IRCs are not changed to stamps, I have to go to the
post office every time that I receive an overseas letter with an IRC in it.

And again, please note that one IRC does not buy an airmail reply letter
in all countries of the world!

Here it is....

Here are the mods for the Kenwood Th79-A dual band hand held. I cannot
take
credit for any of the mods, however they were given to me so I thought I
would
share them. By the way if you have any mods for any other Amateur
Equipment
please email them to me and I will be more than willing to share them
with
others.

Thanks and 73...Steve VE9SHM

Kenwood TH79 Dual Bander Modification and Feature Guide r1.5 9/13/94
==========
Clayton Wagar, KD4IDN
920 West Crawford Street #7
Dalton, GA 30720

Here is a compiled list of modifications and features I've found for the
Kenwood TH79 Dual Band HT.

Thanks to the following for their contributions to this document:
Mike Musick, N0QBF
Cole Cunningham, AA7RD
Duane Voth, KC5BGV
Chuck Scott, N8DNX

Having had many other radios in the past, and certain to have many in the future, I understand the anticipation of Amateur Radio operators to find modifications to their equipment. I started this document because I want to see _quality_ information circulated as quickly as possible, in order to save a lot of time and effort for others.

If you have any other comments, mods, or information you would like to see
included in this document in the future, please send them to:
Clayton Wagar KD4IDN
yensid1@aol.com

Outstanding questions at the time this document was released:

* Rumor of a keypad modification to the radio for "Wide band" TX, RX. If you
know of this mod, please write to me, even if you wish it not to be published. This would save a number of poor radios from useless torture!

Hope you find all of this information useful. Again, please send corrections
or additions to yensid1@aol.com

73 de Clayton
KD4IDN

I. Disclaimer
++

Well, don't you get sick of this stuff? I know, I know. However, I must say that I cannot and will not be responsible for anything that might happen to your radio, your person, your dog, or other operators you might talk to with your th79. In addition, if you decide that, with your newly modified HT, you just absolutely must cause unlawful interference with another ham or another radio service, I won't pay your NAL. Really.

Oh, and while we're at it... The extended RX/TX modifications may require you to solder or desolder really, really small components. If

you want to know how small, look at the tip of an average ball point pen.
Smaller than that. It takes about 1/2 of a second to wipe out several components as well as fry the board inside the 79. Please be careful.

++
II. TH79 Description and Impressions, by Mike Musick, N0QBF
++

Lulled by the sexy small size, I succumbed (or, rather, the credit card succumbed) and bought a Kenwood TH-79 dual-band H-T recently. Already owning a TH-78, the comparison comes easy.

SPECS. The TH-79A is a U.S.-spec dual-band transceiver, featuring coverage from 144-148 and 438-450 MHz. Receive coverage is extended on the 2M side from 118 to 174 MHz with AM in the aircraft band; there is no extended UHF coverage without modification. Max power is rated 5W on VHF and 3.5W on UHF with a 12V source; max power with stock 600 mAH nicad pack is 2.5/2.0. There are three power levels for each band - high, low, and extra-low (30mW). There are 80 memory channels, with no evident expansion capability. U.S./Canada version comes with the CTCSS encode/decode option. Going price at a 7/17/94 hamfest was $480.

GENERAL IMPRESSIONS. Tiny, tiny, tiny. Imagine putting a small duckie on the ARRL Repeater Directory - except that the 79 is narrower by about an inch. With the standard battery and not counting the belt clip, the dimensions are roughly 2" wide, 5" tall, and 1" thick. The belt clip adds 3/8" to the thickness; I left it off so it would be pocketable, and, frankly, it fits moderately comfortably in my work slacks' front pockets, which was surprising. It's tiny! (Oh, I said that already.)

The 79's keyboard has larger buttons than it's predecessor (lacks the cover, too) which are much easier to use. Control layout in general is better and even in just a couple of days I appreciated the change. No more ambiguous power switch - it's in the primary band volume knob in a normal OFF/ON/VOL setup. Secondary band volume control is on the "ring" of the freq/channel encoder knob in a coaxial arrangement.

There are no squelch knobs; it a key+knob function for both bands. Squelch control was, well, interesting. There are only six "settings", with usually only the lowest setting opening the squelch under no signal. Reading between the lines in the manual, apparently the squelch circuit is semi-automatic. I expected some limitations, but had no complaints under actual use - it worked well.

With my expected habit of putting it in my pocket, I like the control lock switch - it's *not* an F-key function, but, rather is a slide switch next to the PTT. No more fumbling around to

unlock it. Unfortunately, the lock function does not lock PTT - that has to be disabled with the "Tx Stop" menu setting. I found this out the hard way by putting it in my pocket and inadvertently keying-up a repeater.

The 79 has an alphanumeric display capability of two lines of 10 characters, which is used in several ways. First, there is a "guide" facility, which provides online instruction for most operation features with a scrolling display. Then there is a "menu" function, which provides access to the settings which were normally done with obscure F-key commands in the 78. Setting the various functions is very clear this way. There is also a status review mode, where the more important settings are displayed.

Finally, the alphanumeric display can be set for each programmed channel. Seven characters positions are available, and almost the entire extended ANSI character set - that's right: lower case, symbols, and accented characters - can be used. However, alpha display is mutually exclusive with frequency display. Frequency display mode can be selected in case you forgot what was "underneath" your programmed channel ID.

++
III. MARS/CAP Modification provided by Mike Musick, N0QBF
++

Here is the MARS/CAP modification for the new Kenwood TH-79A dual-band HT. Usual disclaimers about doing mods apply.

1. Remove battery.

2. Open case by first removing 3 screws (#00 Phillips) on back and 1 screw on side hidden underneath the rubber flap covering the DC power jack. Gently pry apart starting at top; BNC connector will move with back, knobs with front.

3. Spread unit out. Wires will "hinge" on the side with the PTT button.

4. Looking on the back of the keypad (front) half, locate green wire on upper left, just below the CTCSS decoder module.

5. Neatly cut this green wire, and tuck back in so ends won't touch each other or other components.

6. Reassemble.

Programmed memory will be lost since the CPU will notice the strap change and reset itself.

End result -

Before: VHF RX - 118.000-173.995 TX - 144.000-147.995
UHF RX - 438.000-449.995 TX - 438.000-449.995

After: VHF RX - 118.000-173.995 TX - 142.000-151.995
UHF RX - 420.000-449.995 TX - 420.000-449.995

Automatic repeater offset and shift selections remain normal.

And this tip comes from Duane Voth, KC5BGV...

"The MARS/CAP mod can be made without opening the entire case up. You can fairly easily cut the green wire by simply (and carefully) removing the CTCSS decoder cover and using a small pair of diagonal wire cutters."

++
IV. "Wide Band" Modification, provided by Cole Cunningham, AA7RD
++

Following is a modification for the Kenwood TH-79A Dual Band HT which opens it up to tuning from 67-174 MHz and 400-511 MHz. Actual receive was
85-135.995 AM and 136-179.995 FM with reasonable (0.5 microvolt or better) sensitivity at all the points I measured. Transmit was 136-179.995 and 400-511 with power dropping off at the ends but still usable (about 0.5w on the high scale at the band edges).

As usual, I take no responsibility for the mods, or your use of the unit after mod. Please exercise good judgement and don't endanger our ham bands
with your irresponsible actions.

The observations noted are all I tried and I have no further data. This is such a delicate operation that one shot was all I wanted to do, and when it worked I quit!!!

WARNING-CAUTION-LOOKOUT-ETC!!!
The diodes to be moved are microscopic!! About 1mm long by 0.5mm wide. This mod should be done by professionals on a closed track only. Children, do not attempt this at home. Requires extremely small soldering
tools and MUCH skill. I had a professional surface mount facility do mine...

1. Open the unit by removing three screws from the back and one under the
DC power input cover. Carefully separate the front and back pieces. The two case halves may be disconnected by pulling the wired plug and by
prying the brown latch on the ribbon cable connector up enough to release it.

2. On the front PC board in the lower right corner as viewed from the rear
with the knobs pointing up there are seven spots for diodes in a row, with one diode missing.

```
|
o o o o x o o |
_______________|
2 3 4 5 6 7 8
```

The numbers are D302-D308, left to right, with D306 missing.

3. Remove D304, and D307. Put them away in a safe place (Just in case...)_

4. You should now have:

```
|
o o x o x x o |
_______________|
2 3 4 5 6 7 8
```

5. Reassemble and good Luck.

Enjoy, but don't create problems with the new capability...Wouldn't it be
nice if Kenwood would make a RX only mod with these capabilities and we wouldn't have to worry about accidental transmissions where we shouldn't be transmitting. I, for one, don't want or need to TX, just RX...

73, Cole, AA7RD
August 11, 1994

(Note - This mod also adds 2 more menu settings. One of which is an AM/FM demod selector for the 300-400 Mhz band. To access this band, select the VHF band, press F, then press the Low/Hi key. Repeat to return to 144 Mhz. The AM/FM selector will allow you to listen to Military transmissions in the 300Mhz band in either AM or FM.
- Clayton)

++
V. Remote Base Operation with Kenwood 732/733
++

Kenwood has now simplified remote base operation of their mobile rigs with the TH79.

I will not give a step by step on how to control the mobile rigs, since they are different. Hoewever, to really understand this feature, I would first get to know the remote control feature on the mobile very well. This
makes the following explanation a little clearer!

To access this feature, hold [PTT] and [MR] while [POWER ON].

The display will indicate -RC-, which I presume means 'Remote Control'.

If you have correctly matched your DTSS codes, frequencies, etc, the dual bander's keypad now becomes a function pad. Pressing certain keys enables or disables functions on the mobile rig by sending the DTMF

sequences for you.

Please note that all this fuction does is send the DTMF tones over the
air
to control your mobile rig. I have not made a list of what each key
does,
but as the 79 sends the DTMF tones, the display will indicate the
function.
(i.e. - RPT ON, RPT OFF, TONE ON, TONE OFF, etc.)

73 de Clayton
KD4IDN

And this from Chuck Scott, N8DNX...

"The "RC" function is configured to directly control radios such as
the TM-732. In fact, if you look at the layout of the microphone remote
commands for the 732 it very closely matches the key assignments for of
the "RC" mode. Since I have a TM-732 installed in my car, I had a
chance
to try this out and it's VERY convenient. Everything from direct
frequency
entry with the "F" key to enabling X-Band repeat. I'm really surprised
they aren't marketing this feature of the radio."

++
VI. Post Modification Spec Sheet, by Clayton Wagar, KD4IDN
++

Here is a small chart showing the measured specifictions of TH79
S/N 60300272 after modification. The measurements were made with an
IFR 1200S Service Monitor, on the bench, with a 6V power supply.
Your milage may vary - these are just what happened with mine, and
I would suspect that most units are pretty similar.

73 de Clayton

++
VII. Cross Band Repeat, from Chuck Scott, N8DNX
++

The TH-79 does go into X-Band repeat. Press the "F" key then the
"MONI"
key to enter repeat mode. Use the same to return to normal. There is a
10 min transmit limit so it's not useable for long duration monitoring
of
a continuous transmission. That's understandable in light of the number
of horror stories I've heard of people frying their HT's in repeat mode.

++
VIII. Other Observations, Ramblings, Etc.
++

>From Chuck Scott, N8DNX....

"Regarding the lack of a memory Lock Out function, I talked at length
with the Kenwood people. They have been inundated calls about this and
have told me that they are preasuring Japan to come up with a processor
replacement to fix this, perhaps as a retrofit. I encourage any owner
of
a TH-79 to write to Kenwood insisting on such a modification at no cost
and asking that they be informed when it is available. I think this is
justified for several reasons. First, I have been told by another ham
that the official brochure indicates that such a feature is included.
Second, and more important, it is arguable that the radio is not suited
to the application without memory lockout. After all, it's an 80
channel
radio. To make effective use of that many channels REQUIRES a channel
lockout function. Without effective use of that many channels, the
radio
is not comparable to the current standard for such a unit.

BTW, close inspection of the RF deck in my radio shows no obvious
missing parts. I didn't remove the board to check the other side, but
my suspicion is that the 800 MHz parts are installed. I'd be interested
in input from others on that. So far I've not discovered how to make it
display any 800 MHz frequencies though."

Indeed. I think it safe to say man didn't cause the last ice ages,
little or big... :)

I think it equally important for scientists to have to read literature
as it is for literates to learn some science... :)

Perhaps in the case of the former, Kafka's, "The Bucket Rider", will
do for starters. As to the latter, perhaps Gamov's "One, Two Three...
Infinity!" would, perhaps be motivational....

Granted, it is hard to keep you're perspective about the orders of
infinity, when you are simply a donkey endlessly walking on a
twisted plane........ but in space, recall, no one can hear you bray!

Well, to be truththful, I don't have proof that the earth is cooling off. Much of the data in from the last four years (satellite data) is in question now so I guess I'll have to say I THINK the earth is cooling off, or I think it SHOULD be. Is that good enough? Uh...

Obviously what is mean by global cooling and warming refers to the "mean" temperature of Earth, not to temperatures in one specific locale. During the Little Ice Age there were places that were warmer than normal. The hallmark of these events is that global cooling cycles bring sharply differentiated patters (drought in some places, flooding in others) and that global warming seems to bring with it much milder conditions and a more even weather pattern. Of course the earth is always cycling between these two modes, warming or cooling, but the cooling periods seem to have a sudden onset which is followed by 2-4 centuries of gradual warming.

Look, most of what I'm concerned about has happened only since mid-1994. It will BE awhile before most of this data is analyzer and available for public digest. Plenty of e-mail I've gotten from actual researchers tell me cooling trends are already apparent even though some areas like yours may continue to warm. North Atlantic Oscillation, for instance, and El Nino may lag behind other climate forces. There's some thought that the current El Nino building up may have been aided or even caused by energy we received during sunspot cycle 22's peak which was ten years ago.

He's some links. Enjoy.

rec.radio.amateur.dx

Are you tired of that long url, which users have to type in just to get to your site? Well, we now have web site redirectors, to shorten that process.

These are currently only available for licensed amateur radio operators, and cost just $5.00 per month. Your web url will appear as kb8uyz.com/yourdirectory, where yourdirectory is the name you choose, such as your callsign.

The redirectors are intended for use with Netscape 2.0 or Internet Explorer 3.0 or higher, but a text hyperlink is available for those users not yet using these browsers.

For more information, reply to this email message, or see our web site at http://kb8uyz.com/redirectors.htm.

The DX packet cluster in the greatter Seattle area is undergoing some changes. Here's some data I've been able to gather:

1. NV6Z is off the air
2. Two nodes still regularly active:
a. W7PKT 145.75 Covington(Maple Valley)
b. N7FSW 145.77 Burien
3. Sometimes up
a. K7XXX 145.73 Marysville
4. Plans in work to get another node back on line in North Seattle with a link to Oregon per W7BA, Bob.

When I was in the Air Force, I used to tune receivers which had very wide IF filters. We'd tune with a spectrum analyzer and noise generator. Then, the first time I saw pictures of all 22 sunspot cycles together, I knew I'd seen those patterns before. By studying the diagrams one who had sone this type of electronics work can easilly see what looks for all the world like a multiple-stage filter being tuned. My guess is that there are three separate stimuli involved. But whether three or two, the solar signal which caused the warm-up before and after the Maunder Minimum, and from 1900 to present, is obviously one of the major players. So what I'm saying is based on my "eye" and my intiution, rather than a good statistical series.

By the way, everyone please excuse me for being a bit "outrageous" with my original article. I was just trying' to get somethin' goin'.

It impresses me that Earth has always been able to compensate through feedback mechanisms. What strikes me strange about these global cooling episodes however is that there is a strong correlation between cooling and ocean level drop. One would think the oceans would rise as more moisture is transfered out of the atmosphere. But it has also been found that during solar Minimums the ice fields begin a slow expansion. Surely this is a complex situation, but then I guess it's not out of line to think of more water being transferred into ice during such an episode. That system may be aided by the fact that cosmic ray intensities increase due to the calmer solar wind and inter-planetary magnetic field. Cosmic rays also directly affect cloud cover.

What a fascinating new corner of science this is.

SB DX @ WW $OPDX.317P
Ohio/Penn DX Bulletin No. 317

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 317 (Packet, DX Reflector and UseNet Version)
BID: $OPDX.317P
August 11, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, N1BB, N1SP, WF1B, KA2D, KC2X, W2UD, WB2YQH & WB2RAJ THE 59(9) DXReport, N3AF, WB3LHD, WA4JQS, AC7DX, EA5RD, G3XTT, G4BUE & DX News Sheet, GJ4ICD, PA3ERC and VE2CND for the following DX information.

9M0, SPRATLY ISLANDS. (The complete news release will be sent to all OPDX InterNet Subscribers as an additional bulletin!) With the activity of two groups being active from here this month, a third group has announced that they will also be active from here. A multi-national group of DXpeditioners, primarily members of the UK's CDXC (Chiltern DX Club), the UK DX Foundation, will operate from Layang Layang Island in the Spratlys in February, 1998. Exact dates will be announced later, but the intention is to operate soon after the island re-opens to visitors following the typhoon season in order to maximize the opportunities for good LF propagation. It is also hoped that sunspot numbers will by then have started to increase, and that the expedition will enjoy favorable HF propagation.
The team is expected to include: G3NUG, G3OZF, G3WGV, G3XTT, G4JVG, G0OPB, K5VT, VK2BEX, 9M2OM/G3NOM and 9M6SU. It is planned to keep four stations on the air round the clock to maximize band openings. All HF bands will be activated on SSB, CW and RTTY. The group will also have equipment for 6 meters. The team will use a wide selection of monoband and multiband antennas including phased verticals for both 40 and 80 meters. The callsign 9M0C has been provisionally allocated. A Web page is available at http://members.aol.com/spratly98 with up-to-the-minute expedition news. G3SWH will be QSL manager, and QSLs will be available through the bureau or direct.

AP, PAKISTAN. Hiro, JA1EZM, is reportedly here until August 19th. He has applied for his own callsign AP2AP. Another JA operator, possibly JA8WPP, may be with him. Most of the activity will be on 160, 80/75, 40 and 30 meters, but if conditions are good, look for them on 20, 17, 15 and 12

meters. Main frequencies also mentioned are 10105 kHz and 7005 kHz. QSL to JA1EZM: Hiro Tabuchi, 242 Kumagawa, Fussa City 197, Tokyo, Japan. Meanwhile, AP2JZD has been active on the 14226 DX net around 1500z.

CARIBBEAN TOUR. Peter/PA3BBP, Rob/PA3ERC and Ronald/PA3EWP will be active from Cap Estate on St. Lucia (J6), from August 21-30th, as J6/PA3BBP, J6/PA3ERC and J6/PA3EWP. They might be active as J68BP, J68RC and J68WP, but they haven't received a confirmation yet. From August 30th through September 11th, they will be active from Pigeon Point on Tobago (9Y4) as 9Y4/PA3BBP, 9Y4/PA3ERC and 9Y4/PA3EWP. They will have 2 stations on the air with activity on 160-10 meters with operations on CW, SSB and RTTY. They will also try to work some Satellite RS-12. Their focus will be mainly on the WARC bands and the low bands for Europe during their grayline. Both locations will have an excellent take off to the US and Europe. A special InterNet Web Page will be setup at the URL: http://www.igr.nl/users/pa3dmh/tour1997.html
This page will contain daily uploaded logs and digital images of the expedition. Special wishes can be sent to Alex, PA3DMH, the Webmaster of this page. They like to make as much contacts as possible, however, THEY DO NOT ENCOURAGE PEOPLE TO WORK THEM DOUBLE! QSLs for all the above callsigns go to PA3ERC, via the bureau or direct to: Rob Snieder, Van Leeuwenstraat 137, 2273 VS, Voorburg, The Netherlands

CY0NCD, SABLE ISLAND (UPDATE). Due to some transportation problems and adjustments, the CY0NCD operation had to start earlier than expected, and by the time you read this the operation will probably be winding down (August 12th). QSL via VA3NCD (bureau or direct and PLEASE consider QSL bureau delays - up to 18 months to receive some cards.) Film materials and pictures will be available upon request to anybody who might wish to see them. (For video, both NTSC and PAL will be available). Inquiries can be sent to Jarek's, VA3CND, E-mail address: jpawlega@perle.com

DOCUMENT #30. OPDX InterNet Subscribers will receive a copy of this document which contains the DXCC 2000 AD HOC Committee Interim Report and Recommendations that were presented at the ARRL's Board of Directors meeting which took place July 20th.

EA9, CEUTA. Frank, EA5RD, and Kim, EA5ND, will be active from Northern Africa September 6-7th. During their activities, they will sign EA9/homecall. They plan to have two stations active on CW/SSB/RTTY on 80-10 meters (in the usual DX-windows). Contacts made with these stations will be valid for the "Spanish Castles Awards", with the reference number CCE-049 and the location will be the Muralla Real. A special color QSL card will be available. QSL via the bureau or direct to homecall signs.

FG, GUADELOUPE. John, EA3CB, is currently staying on Guadeloupe Island (NA-102) and plans to go to Les Saintes Island (NA-114) next. Look for John to be active as FG/EA3CB until August 14th on Guadeloupe and Les Saintes August 15-17th. Activity will be on CW/SSB/RTTY with operations on 40-10 meters (WARCs included). QSL via EA3CB.

FP, ST. PIERRE & MIQUELON. Rich, K2RW, of the North Jersey DX Association is planning a RTTY operation from St. Pierre starting August 14th through 18th as FP5AA. He will be active in the SARTG RTTY Contest August 16-17th. QSL via his home call K2RW.

JD, MINAMI TORISHIMA. "The 59(9) DXReport" states JD1/JG8NQJ will QRT in late September, one month earlier than expected . He is can be found active on 7010, 10103 and 14027 kHz. QSL via JA8CJY.

LIGHTHOUSE ACTIVITY. Look for members of the Great South Bay ARC, Islip ARES and Long Island DX Association to operate from the Fire Island Lighthouse (ref #670, IOTA NA-026, USIA NY-013-S), August 16th and 17th, between 1400-2200z signing W2GSB/p. SSB activity will be on the usual IOTA frequencies, CW will be announced. A special color QSL certificate will be available. QSL via AC2P CBA, #10 SASE please.

MORE 6M BEACON NEWS.....
Steve, KC2X, states the KC4XX beacon on 50.077 MHz is located in Orlando, Florida (EL-98), and is running 2 watts.

Another new beacon was announced in the USA. It is on 50.0628 MHz with the callsign KB6BKN. The beacon is running 30 watts using a 3 element beam pointed at the east.

GB3IOJ/IN89 on 50.065 MHz has just had a new antenna fitted. The beacon now uses the new Alinco "V" antenna.

P4, ARUBA, Ray, WF1B, be active from here September 24-30th and will operate in the 1997 CQWW RTTY Contest this September. He will be operating some SSB before and after the RTTY contest. He has be issued the callsign P40TT. No CW or 160 meters operation is planned.

QSL INFO AND NEWS.....
Ron, WB3LHD, states he has been waiting for a QSL from PY2AEI since Novemeber, 1995. After 3 requests, Ron received a reply from PY2AEI's wife saying that Julio had passed away in 1989. It would appear that the November 1995 operation was a PIRATE.

Les, WF5E, received a letter recently from Abubaker Alzway, the operator at 5A1A, stating that the 5A1A is the only station in Libya working SSB since July, 1995. Any other operation is a pirate operation and they have no permission to operate. Abubaker has returned some 5A0A QSLs as they are no good. He also states any operation from Joe from the Czech Embassy in Tripoli is no good because he has no permission to operate as of this date. He also mentions that he has returned some QSLs from his 5A27 operation where he was the op in September, 1996 (this was in celebration for their 27th Anniversary of the Alfath September Revolution). Les states he is not the QSL Manager for 5A1A, although he might be able to obtain your QSL if you worked Abubaker as 5A1A. Les's E-mail address is: wf5e@startwo.apex2000.net

7Q7EH QSLS. The W1 QSL Bureau is receiving quite a number of cards for 7Q7EH via W1EH. The W1 Bureau states they cannnot contact W1EH and he does not subscribe to their bureau. The GO List shows AA9HD as QSL

Manager, and their sorter has attempted to contact AA9HD, but has failed to elicit any reply. The W1 Bureau cannot handle cards for 7Q7EH. Some list somewhere is in error. To those who sent via W1EH; resend trying AA9HD.

Ron, AC7DX, informs OPDX that he is now the new QSL Manager for contest station ZZ2Z (Cesar py2yp). QSL to: Ron Lago AC7DX, POB 25426, Eugene, Oregon 97402.

T32Z QSLS. Ron, N3AF, informs OPDX that after sending several SASEs, he made a phone call to Janice, N7YL, QSL Manager for T32Z. Janice told Ron she has not received any logs from T32Z in over a year. She told Ron that as soon as she gets some logs she can begin to respond to everyone's QSL requests.

S2, BANGLADESH. The "DX News Sheet" states that Jim, VK9NS, may be active October/November as S21ZA.

SPECIAL EVENT STATION. Look for W4MT to be active on September 6th between 1300-2100z on 20 and 10 meters. The station's activity are in celebration of the U.S. Air Force's 50th Anniversary. Special QSL's will be available via KE4WMG.

SSIDXG NEWS. Tony DePrato, WA4JQS, Director of Operations for the South Sandwich Island Dx Group, released the following: Mark Parrin, N7MQ (ex-N7MCA), legal advisor for SSIDXG, announces that SSIDXG is now Incorporated as a non-profit DX group and all donations are non taxble. SSIDXG would also like to welcome our newest member of the team DR. Frank Weigelt, N0DX. Frank is with the University of Iowa, College of Medicine, Department of Radiology. He will be assisting Jerry, AA6BB/7, in the fund raising operations for the upcoming Bouvet oeration until it is time for his departure as a team member of the DXpedition. With the new tax status of SSIDXG, all donations can now go directly to Jerry, AA6BB/7, and have a positive tax implication for our supporters.
The current Board of Directors of SSIDXG is made up of the following members:
Luis Chartarifsky, XE1L, Mexico City ,DF
Terry Dubson, K6JL (ex W6MKB), Escondido, Calif.
Gary Jones, W5FI (ex W5VSZ), Hattiesburg. MS.
Sam Brown, WA4IUM, Knoxville, Tenn.
Tony DePrato, WA4JQS, Ferguson, Ky.
Jerry Branson, AA6BB/7, Junction City, Org.

Hello everyone,

The crew of the Radio Club Mallorca is glad to announce that from 15 to 17 of August is going to activate the island of Na Moltona, a tinny island located near the southern coast of Mallorca at JM19MH.

The island is valid for the IOTA award as EU-004 and for the spanish islands award (DIE) as E-130.

We are going to be active on all WARC bands, mainly on SSB.

A beatiful coloured QSL will be send TO EVERYONE achieving a contact with us. QSL's can be sent to the QSL manager EA6VC either via buro or direct.

Please spread around this information.

Hope to meet you.

Gabriel - EA6VQ (g_sampol@redestb.es)

2064. Another QSLing question....

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-11 00:00:00 UTC
From: n9fh@qsl.net
Message-ID: <5sm0hu$j06@uwm.edu>
Source record: 32014

Hi guys,

I've been using these little "air mail" envelopes along with IRC's etc to get cards direct from people outside the USA. They seem to work fairly well (could be superstition on my part). The problem is that they no longer stock them around here. I've looked at all the Office Depot type places and can't find any. They're about 3.5" x 6.5" and have red and blue stripes and "air mail" written on them. My last box was made by Stuart Hall model #3915. Before I write to the company does anyone know where I can get something like this ? What do people normally use for international SAE's ?

Also, does anyone have a QSL route for JT1BL?

Thanks & 73,

Fred, N9FH

2067. Re: QSL Card Protocols

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-11 00:00:00 UTC
From: VK1FF@contesting.com
Message-ID: <33ef2a93.0@herald.canberra.edu.au>
Source record: 32017

While there was some good info in the posting, there was also some misleading comments made. Terry is certainly entitled to his opinion, but IMHO a few of his comments would certainly not be considered standard QSL card protocols.

terrybu@netman.ens.tek.com (Terry Burge) KI7M wrote:
>3) QSL'ing 100% is fine for some people but personally I think it's a pain
>and just takes time away from operating. I used to do it when I first got
>started but now that it's been a few years and I have all those european,
>african and asian cards I'd rather spend my time operating and looking for

Should this read.....I don't QSL much anymore because I've got everything I need confirmed???

>a new one.... For this reason I don't QSL unless someone sends me a card
>with an SASE or I need them for DXCC. You can figure alot of people who

Do you QSL via the bureau?

>have been operating for several years feel the same way. Sometimes I feel

I've been operating for over 20 years and respond to all QSL requests. If the card comes via the bureau - the reply is sent back the same way. If it arrives direct - then a return goes back the same way.

>a little guilty about not QSL'ing everyone but trying to do that with a
>thousand contacts in a DX contest is alot of work. Especially if you don't

I work a few thousand contacts a year during contests/DXing and only receive QSL requests for about 1/7 of the contacts (or roughly 150 out of every 1000).

>4) As far as how to QSL:
> A: Bureau takes 1-3 years but works, is easy and cheap (realatively)

Can be quicker.

> E: Don't QSL unless they do Don't expect much from DX'er who
> get hundreds, even thousands of cards a year. For

Send a QSL if you need/want a QSL. If you don't need their card...but they need yours....wait for their card to arrive and send a reply in return.

> F: Join the ARRL and use the Overseas QSL Bureau Great
> way to afford to send lots of cards, especially if
> you are a contester or very active DX'er. This per-
> sonally is the only reason I see for joining the

> ARRL other than updating you're DXCC totals but that

The overseas QSL bureau is a good service....but there are lots of
other good reasons for joining the ARRL too.

> may not be how you see them.

2071. AP2AP is Slim

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-11 00:00:00 UTC
From: K0HB@usa.net
Message-ID: <871327786.3726@dejanews.com>
Source record: 32021
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.amateur.info

The following is transplanted from the internet DX reflector

- - - - - - - -

The Pakistan Amateur Radio Society (PARS) advises all radio
amateurs that the call "AP2AP" being used by JA8WPP
and/or JA1EZM is a fake. No such call has been issued
by the licensing authorities to anyone and these "Amateurs"
have no permission to operate in AP temporary or otherwise.
There has been no change in local licensing regulations.

PARS requests all amateurs to discourage this type of piracy
by not responding to CQs or QSO requests from this fake call.
Such activity can only be detrimental to the genuine hams in AP.
The operator should also be advised that it is known that he is a pirate.

ARRL & JARL are also being informed by copy of this notification
so that QSL cards from this station are not accepted for any awards.
This is in addition to any legal or punitive action the local authorities
may take against the operator/s for illegal operation of a transmitting
station under the relevant laws.

Sent on behalf of PARS
by Tariq/AP2TJ.

2074. 5R8DF QSL Help Needed

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-11 00:00:00 UTC
From: Steve <kc0uh@pcisys.net>
Message-ID: <5sn95b$b0a$1@newman.pcisys.net>
Source record: 32024

Worked 5R8DF in Oct. 1992 and sent a qsl to JH8JWF and have never received anything back. Just last month I ran into JH8JWF's E-Mail address and inquired about the QSL and again received no reply. Is there anyone who might be able to supply any information on 5R8DF and/or JH8JWF. This is the only 5R I have been able to work and to receive this card will allow me to finally submit for Honor Roll, so you can see it is very important to me. Also if anyone knows any other information on a 5R operation going on at this time maybe I can try and work that as the station has come a long way since 5R8DF.

Thanks
Steve

Hi ! (Dear sirs !)
You have a chance to put a question to the Russian Space Agency chief !

Russian state broadcasting company «Voice of Russia» presents its new program «Vis-a-vis with the world» to your attention.

Switching on to next Vis-a-vis with the World program you'll be able to look at:
... further fate of the Russian space lab «Mir» ...
... a view of the next few years of international space ventures ...
... all that and much more in «Vis-a-vis with the World» that highlights contributions by Russian Space Agency Director Yuri Koptev !

Our E-mail address: letters@vor.ru
The August 14-15 meeting with Yuri Koptev will be broadcast in the Russian on Real Audio (http://www.wrn.org/stations/vor.html).
The exact airtimes for this same program in other languages will be announced additionally.
The text of our interview with Yuri Koptev will be available on the Voice of Russia Website in the «Vis-a-vis with the World» chapter.
On Russian:

2084. August Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-11 00:00:00 UTC
From: ids@nol.net
Message-ID: <33ee5f9a.32083181@news.nol.net>
Source record: 32210

PROPAGATION - by AD5Q HOUSTON, TEXAS -- AUGUST 1997

It is past mid-summer, and the weather is still hot and humid here in south Texas. Equinox time is only six weeks away, and with the low sunspot activity this means an early transition to lowband season.

Conditions on 20 are starting to change. Nighttime paths are beginning their deterioration, with fewer signals on in the evening. The grey line will be aligning itself over the pole. In recent months, we have enjoyed good morning conditions into Asia because the grey line has lead in that direction.

Another summertime phenomenon is the thinning of the ionosphere due to overheating by the sun. This has the benefi-cial effect of lengthening the DX window to Asia in the morning on 20, but at the peak of the cycle it closes 10 Meters for high latitude DX work and attenuates openings on 15. These are not problems for us now, since 10 & 15 are dead anyway. This overheating effect (and I don't have a proper technical name for it) dissipates during August and September and daytime MUFs begin to rise. 15 Meter operators can look forward to improved conditions in October.

Meanwhile, the morning pipeline to Asia will deteriorate, as will the late afternoon path to Europe. These were greyline paths. The good news is that daytime propagation in these directions is improving. Europeans are workable throughout the day on 20, but most of the signals are from the better equipped stations. Daypath signals are stronger the closer you are to the DX (i.e. the East Coast can work the weaker Europeans and we can't). We still get an EU propagation peak in the late after-noon, but this will shift to the morning when the transition to lowband season is complete. Asian daypath propagation begins in the afternoon after the Japanese sunrise, and continues through the evening. After dark, nightpath propagation remains good to the Pacific and Australia. Africa is good in the afternoon and evening, and the repositioned grey line path over the pole will bring Siberia and Central Asia in nicely both in the morning and early evening.

Evening DX activity is already moving back to 40, which is in excellent shape. Signals from the weaker stations can be heard amidst the static crashes, and the high summer QRN level remains the most serious problem. This is especially true here in Texas, where the end of summer is stormy and also the peak of hurricane season. The 40 Meter opening to Europe lasts through the evening, with good signals from many parts of Russia. Asia comes in throughout the early morning with a peak after sunrise. We can look forward to improved conditions

with lower QRN levels, though in winter these DX windows are shorter
due to lower nighttime MUFs.

Good question. I can't remember all the details (as the club was formed some years ago), but I do remember a conscious decision being made that we would not pursue a new DXCC country status. It may well have been that the World Bank is NOT part of the U.N., only a specialized agency, and this fine distinction made the difference. I do recall that we needed the FCCs blessing for the 4U prefix, and a letter from the U.N. indicating that it didn't have a problem with us using one of its prefixes. Other than that, my memory fails me. Sorry.

It is very rare that anybody listens for CW on 14.140Mhz but your best chancesare to call on CW 40m at 7055. Most operators there are CW "able" and could
either call for the stations you are looking for or arrange a QSY to 20m.

Another solution is to wait for the Winter Canada Contest and you will find VE
stations above 14.150 (Check the RAC site for dates).

2089. 7Q7EH

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-12 00:00:00 UTC
From: chris cieslak AA9HD <ccieslak@uiuc.edu>
Message-ID: <5sqopesvk1@news5.ais.net>
Source record: 32038

REGARDING 7Q7EH QSLs

There has been some confusion regarding my status with 7Q7EH, and I would like to clear it up.

I am a college student, and am moving to a new apartment. Due to the fact that i was away at school, the 9th area sorter could not contact me regarding the 7Q7EH QSLs he was holding for me. (Any messages regarding the matter he left for me were never forwarded to the school QTH by the folks at home.) As soon as he was able to contact me, i picked up the QSLs waiting and will ship them to 7Q7EH shortly. Also, any QSLs sent to the W1 bureau for 7Q7EH
via W1EH (his home call) are being forwarded to me and will be shipped to 7Q7EH.

I would like to emphasize that ALL CARDS SENT VIA BURO will be sent to me and forwarded to 7Q7EH.

Please keep this in mind when QSLing 7Q7EH:

1. W1EH is an incorrect QSL route. QSL 7Q7EH via AA9HD.

2. My home QTH will remain the same (I am moving to another apartment at school.) The address is:

Chris Cieslak AA9HD
810 N 16th Ave.
Melrose Park, IL 60160-3829

3. All direct QSLs sent to the above address have been shipped to 7Q7EH on a regular basis.

4. I have worked out a schedule with my bureau sorter so that he has no problems in contacting me. Cards sent via bureau will be picked up on a regular basis.

You do not need to resend any buro cards, even if they were sent "via W1EH". I will be receiving all cards sent via buro and will forward them to 7Q7EH as soon as possible.

I hope that this clears up any confusion. If you have any more questions regarding the matter, please feel free to contact me at ccieslak@uiuc.edu.

I apologize for any delays this mixup and my time constraints may have caused. I intend to continue serving the DX community to the best of my abilities.

73 and Best DX,
Chris Cieslak AA9HD

The U.S. FCC also has an excellent interference page with pictures.
It goes beyond weather & propagation interference and also shows
antenna/receiver defects and interference from various other sources.
Look at www.fcc.gov/cib.

I'm trying to remember the exact wording -- but actually I do think Scotland and Wales would not qualify as countries under the new criteria. (even if Scotland does get its own parliament - is that still in the plans?) However, as I remember it they didn't plan to actually delete any currently-listed countries.

I think some of it is a feeling on the ARRL's part that they messed up
by accepting 4U1UN and 4U1ITU as DXCC countries. (given the large
number of UN installations around the world - and the geographical
separation between them - the DXCC list could have grown to several
thousand copies!)

I note with interest they're now looking at setting specific criteria
for what constitutes "separate administration".

Doncha just love the way that you can make a label list and print them
using your cdrom from QRZ or Buckmaster?? Works real slick if ya ask me.
I think we all should support the program and get some more features in
it. The terminal program could use a tad of help as far as emulation goes
because you can make it dialup on your LL modem too. That voice announce
for the DX cluster will get ya going too. All in all it is a winner.

DX Bulletin 35 ARLD035
From ARRL Headquarters
Newington CT August 14, 1997
To all radio amateurs

SB DX ARL ARLD035
ARLD035 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, the 425 DX News, The 599 Report, The Daily DX, The DXNS and Contest Corral from QST. Thanks to all.

SVALBARD, JW. Kjell, SM7NAS, will sign JW/SM7NAS from August 29 to September 1, from the QTH of JW5E. Expect operation on 20, 15 and 10 meters, plus the newer bands if possible. QSL to Kjell Adolfsson, Dalbovagen 16B, S-59096 Overum, Sweden.

NEPAL, 9N. 9N1BV has been active on 14015 and 14180 kHz between 1200 and 1500z. QSL via JA1PBV.

MAYOTTE, FH. Look for Volkmar, FH/DF2SS, on CW on 18077, 10109, 3505 and 1840 kHz. QSL via DF2SS. Giuseppe, IK4NQW, will be QRV from August 21 to September 2 as FH/IK4NQW/P. QSL via home call bureau or direct.

IRAQ, YI. Duraid, YI1US was heard working stateside on 14254 kHz just after 2000z. QSL via WA3HUP.

LIBYA, 5A. The OE1XIC 5A28 DXpedition is expected to be QRV from August 31 to September 7. QSL via OE2GRP.

CEUTA, EA9. Frank, EA5RD, and Kim, EA5ND, will be active September 6 and 7, signing EA9/home call. Look for them on 80 through 10 meters using CW, SSB and RTTY. QSL via the bureau or to home calls.

GUADELOUPE, FG. John, EA3CB, will be active as FG/EA3CB until August 14 and then from Les Saintes August 15 to 17. Check 40 through 10 meters on CW, SSB and RTTY, including the newer bands. QSL via EA3CB.

ST. PIERRE and MIQUELON, FP. Rich, K2RW, is planning a RTTY operation August 14 through 18 as FP5AA. He will be active in the

SARTG RTTY Contest August 16 and 17. QSL via his home call.

SOUTH KOREA, HL. Members of The Hanyang University Wave Research Club will be active on SSB and CW as HL0C/4 from Mara Island (AS-026) from August 13 to 16. QSL to Hanyang University Amateur Radio Station, 17 Hangdang Seongdong, Seoul, Korea.

PITCAIRN ISLAND, VR6. Tom, VR6TC has been active on 14188 kHz at 0130z and will give out CW QSOs as well. QSL via WD6GUD.

IRAN, EP. Ali, EP2MKB, has been found on 3505 kHz around 2110z.

THIS WEEKEND ON THE RADIO. The KCJ Contest, SARTG RTTY Contest and SEANET Contest, phone, are on tap for you radio pleasure. Please see August QST, page 95 for details.

2106. callsign database

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-14 00:00:00 UTC
From: James Sawle <qmation@dial.pipex.com>
Message-ID: <01bca905$e597e940$6ff682c1@default>
Source record: 32055

Can anyone out there help me!

I have been trying to compile (as near as dam'it) a callbook on PC formatted CD-ROM.

This has been a very large task with around 70% of theUK entered and most USA states entered, but with the ever growing numbers of operators, etc, it will continue to be an ongoing project, so far 3 years down the line I have a CD-ROM with access to over 7.8 Million operators world wide.

I now wish to get this to a stage nearer publishing.

IF ANYONE CAN GET ME ANY CALLSIGN DATABASES IN DBASE3/4 FORMAT (PC BASED).

In return I will mail them (NOT E-mail but land mail, as it is TOO big) the curent version free of charge, and the finished version, later this year when it goes to press (FREE OF CHARGE), with a mention of your name and callsign (if applicable) for the help that you have given me to complete this task.

If anyone can help, please e-mail me on qmation@dial.pipex.com

All the best

James Sawle

I am building a transmitter, and the schematics/plans that I acquired
say to make an inductor by wrapping enamel wire around a ferrite slug.
I have the wire, but I have been unable to find anything made of
ferrite, let alone something that might make a decent core. Any ideas?

Try Amidon Assc. or RF Parts. Both advertise in QST and/or CQ and 73 Magazine. You might try a web search - I'm pretty sure RF Parts has a web page. I'm curious about how old the schematic for the transmitter is? Most modern gear calls for torroidal inductors as opposed to slugs. Good luck,

Hello

This fall I will be travelling to A3, and was wondering if any of you
is interested in receiving SWL reports. Since I have no license for
HF, I'm only allowed to listen to HF, and if there is enough interest,
then I'll take my receiver, and start listening for you.

Martin, thanks, but I've got a better idea. First, get a
Dutch HF amateur license. Bring a rig with you to A3, and
when you get there, put up a rhombic aimed right at North
Carolina, USA.

Email me when you've gotten that far and we'll set up skeds,
OK? But *don't* work anybody else until after you've worked
me, got it? Just listen for AC4RD.

Take a look inside a junk TV set. You will find a fistful of slugs
and ferrite cores.

I wish I could, but the CW-examns are in december, but then I'm
back already, so it's too late :-(

But some people mailed me privately, saying that listening on the
other side of the world, would be a nice experience as well, so
they convinced me, and I will take my RX.

SB DX @ WW $OPDX.318
Ohio/Penn DX Bulletin No. 318

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 318
BID: $OPDX.318
August 11, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 216-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, K4PC, N4GN, W4FOA, W4NS, WB2YQH & WB2RAJ THE 59(9) DXReport, AA7AV, K7JJ, AP2TJ, BV/N0IAT, CX8DX, EX0V, 9M2OM/G3NOM, 9M2TO, G3SWH, G3SXW, G4BUE & DX News Sheet, JA4DND, PS7AB, RA1QHJ, SM7NAS, SP2FOV, VK4LW and VK4AAR for the following DX information.

5H, ZANZIBAR ISLAND (Tanzania). Phil, G3SWH, will be active on CW only all bands from 80-10 meters, conditions permitting. From September 16-22nd, he will be active from mainland Tanzania as 5H3/G3SWH and from September 22-29th, he will be on Zanzibar Island (IOTA AF-032) as 5H1/G3SWH. Phil will be using one of the IOTA Committee's Yaesu FT-900AT transceivers with 100 watts to wire antennas. This is a holiday operation, and activity will probably be restricted to 3 or 4 hours per day. There will be a special printed QSL made available, either from his home address: Phil Whitchurch, 21 Dickensons Grove, Congresbury, Bristol, BS19 5HQ, United Kingdom, with SAE and adequate return postage or via the RSGB bureau.

5V, TOGO. The Voo-Doo Contest Group has announced they will be active as 5V7A in the upcoming 1997 CQ World-Wide DX CW Contest on November 29-30th. They will enter the Multi/Multi category with eleven team members, eight one-kilowatt stations (all TS930 and Alpha amplifiers), 18 antennas (including nine Force 12 and Cushcraft yagis; and also balloons/kites for a 160 meters 132 foot vertical). This is an expanded operation from their 1996 project which secured a first-place contest finish. A sea container is en route from UK with 100 ft. of tower, 2500 ft. of hard-line and 2000 ft. of rotor cable. Full details of this Contest/DXpedition are available on their Web page (thanks to Warren, K7WX) at the URL: http://www.getnet.com/~k7wx/5v7a.html. The WEB site contains many photos, maps, QSL cards and much more. Please drop by and also check the "Flash" section from time to time for latest news. Team members will activate their personal call-signs outside of the contest, including WARC

bands: G3SXW/5V7A, G3ZEM/5V7ZM, G4FAM/5V7FA, GM3YTS/5V7RF, K5VT/5V7VT, K7GE/5V7JL, K7PN/5V7PN, KC7V/5V7MF, N7BG/5V7BG, N7MB/5V7MB and W6RGG/5V7BV. QSL via home-call except 5V7A which goes to GM4AGL. They will also welcome E-mail requests for bureau replies for 5V7A cards. Send request to: g3sxw@compuserve.com

9M0, LAYANG LAYANG ISLAND (Spratly Islands). If you missed the N2OO's operation from here last week, you will have a second chance this week. Pekka, OH2YY, currently based in Beijing, will be making another short operating stint from the Layang Layang Resort. Currently his call sign is still pending, but it will be issued upon his arrival in Kota Kinabalu, East Malaysia, his port of departure to this DXpedition. Pekka's expected arrival is during the morning of August 19th, local time, and his departure will be on the morning of August 22nd. He plans to be active almost immediately following his arrival. The equipment is a Yaesu FT-840 transceiver and Cuschraft R5 and 40M dipole antennas. If arrangements can be completed, the beam antenna used by N2OO will be left behind for this operation. The "regular" bands 7, 14 and 21 MHz will be employed, almost exclusively on SSB. Watch 7045, 14195 and 21295 kHz. Pekka is no stranger to DX in his native Finland and has recently joined the spirit of the South China Sea DX Team in preparation for exploits to several rare countries in the region. Pekka is extremely thankful to Alfons, 9M6MU, and Doris, 9M6DU, who have provided extremely valauble assistance in making this operation possible. QSLs for his Spratly operation will be handled by Martti Laine, OH2BH, Nuottaniementie 3D20, 02230 Espoo, Finland.

AP2AP IS A PIRATE! The following was sent to OPDX on behalf of PARS by Tariq, AP2TJ: "The Pakistan Amateur Radio Society (PARS) advises all radio amateurs that the call "AP2AP" being used by JA8WPP and/or JA1EZM is a fake. No such call has been issued by the licensing authorities to anyone and these "Amateurs" have no permission to operate in AP temporary or otherwise. There has been no change in local licensing regulations.
PARS requests all amateurs to discourage this type of piracy by not responding to CQs or QSO requests from this fake call. Such activity can only be detrimental to the genuine hams in AP. The operator should also be advised that it is known that he is a pirate.
ARRL and JARL are also being informed by copy of this notification so that QSL cards from this station are not accepted for any awards. This is in addition to any legal or punitive action the local authorities may take against the operator/s for illegal operation of a transmitting station under the relevant laws."

AP50, PAKISTAN. Tariq, AP2TJ, reports to OPDX that the digital station AP50NK will be active in Amtor/Pactor/Gtor (auto-reply) on mark frequencies 14065 kHz (0300-1700z) and 7038 (1700-0300z). Contacts with AP50NK will qualify as a QSO for the AP50 Golden Jubilee award.

BU, TAIWAN. Prefix Hunters start looking for this new prefix "BU". Look for BU0DX on the ham bands, especially 20 meters CW. QSL to BV200: c/o CTARL, PO Box 73, Taipei, Taiwan, Republic of China.

ER, MOLDOVA. Chris, K4PC, will be leaving with a team of workers on September 27th for a two week missions trip to work in some children's orphanages in Moldova. They will be installing hot water heaters, weatherstripping windows and installing FM radio receivers for the children to listen to broadcasts. If any spare time becomes available, Chris is hoping to operate RTTY, CW and SSB on 40, 80 and 160 meters. He has been in contact with Sergey, ER1AN, by E-mail and fax about obtaining a license, and he is almost sure Chris will be issued a license. All the paperwork has been faxed to him and forwarded to the PTT for approval. Sergey and Chris hope to hear about the results within a few weeks. He will not be taking any equipment, so he will have to try and operate from a home or club station. More updates and details are forthcoming.

EX0, KYRGYZSTAN. Valery, EX0V (ex-UM8NU), reports he is now active on RTTY (thanks to Juanjo, EA3CB, for a gift computer). Look for him on 14080 kHz +/- QRM around 0100-0300 and 1200-1800z. He also plans to be active on the other bands (80-40-30 meters). If any person wants to make a schedule with him, send E-mail to: EX0V@amsat.org. QSL EX0V (and UM8NU, UM8NAP, UM93NU, UM1N) to N6FF (ex KL7H/W6).

HB0, LIECHTENSTEIN. Henry/SP2FOV and Kazik/DL2SBY will by active from here as HB0/SP2FOV and HB0/DL2SBY, from Augsut 20-27th. They plan to be active on 80-10 meters on CW, SSB and RTTY. QSL via home call.

HELP WANTED (one spot filled). Rick, VK4LW, from ODXG reports they have filled one of the two operators needed for the upcoming Willis DXpedition. The new operator added is Bill Snider, K6KM. Bill, within the past year, has operated as TI2/K6KM, TI4/K6KM, M/K6KM, OH2/K6KM and OH0/K6KM. He has also operated from EP, DL, KH5, KH2 and GU. Bill's perfered mode is CW, but he does operate the SSB contests. ODXG still needs another operator ASAP!!!!! They have had a few interested parties but none confirmed as of yet. The DXpediton has a mixture of OM's or YL's. If interested, you will need to be in Cairns ready to go at the boat by 1230z, September 9th. You will return approx. 24th September. Please contact Rick if you are interested at: zerk@keylink.com.au.

HR6, HONDURAS. The same group of Uruguay Dx Group that activated CX0XY, P40AN/CR and last year FO0/ALE/CAA/REB will be on Roatan Island (IOTA NA-057) from August 23th to September 3rd. Look for HR6/CX3CE, HR6/CX4CR and HR6/CX3AN to be active on all bands including 6 meters and the WARC bands. Activity will be mostly SSB, but with some CW. QSL via CX3CE, Box 244, Montevideo 11000, Uruguay-South America.

HZ, SAUDI ARABIA. Vic, N7CVJ, at HZ1AB says the gang there is making big plans to be in the 1997 CQ WW RTTY Contest, September 27-28th. Most likely this will be a Multi/Single all band effort.

IOTA NEWS.....
COUVES ISLAND (IOTA SA-028, also DIB 70 [new DIB]) will be active October 9-12th. The callsign to be used is ZW2E with activity on CW/SSB on the usual IOTA frequencies. QSL via PY2YW.

Chuck, N4BQW, will be active on the Hawaiian island called Terns Island (IOTA OC-055) from August 27th to September 5th. He will concentrate on Europe during openings. QSL via WA4FFW.

Tex, 9M2TO, will be active from Pulau Perhentain (IOTA AS-073) as 9M2TO/P from August 30th to September 1st. Tex is traveling to this island with his diving team, so his operating time will be limited. Activity will be mainly CW, so check the normal DX frequencies on 20/17/15 meters. QSL via JA0DMV direct or via JARL bureau.

A group of JA operations will activate OKI Archipelago (IOTA AS-41) September 13th (starting at 0600z) to September 15 (ending 0200/0300z). Callsigns to be used are: JA4AHV/4, JA4DND/4, JI4POR/4, JM4BPV/4, JM4MAQ/4 and some other JA4s. Operations will be on 160-6 meters with activity on CW/SSB/RTTY. Check the DX and IOTA frequencies. QSL to home callsign via the bureau or CBA.

IRCS (Special Request). Alan, VK4AAR, sent your editor the following important message: "Hello Tedd... I must plead with DXers to make sure that their post office puts an official imprint on the left hand side of IRCs when they purchase them. If they use 2nd hand IRCs that don't have this stamp, I suggest they try to "unload" it/them at their local post office and thereby remove them from the system. In any case, don't send them to me if you need me to supply a QSL card. My post office (the only one for 80 Kms!) has suddenly woken up that I have been tendering the occasional invalid IRC for stamps and now is refusing them. I have paid the postage for a few people but that will now cease... I can't afford it on my pension.
PLEASE MAKE SURE THAT THE IRC(s) ARE CORRECTLY VALIDATED AT YOUR POST OFFICE WHEN YOU PURCHASE IT (THEM). I WILL NOT (N-O-T) BE ABLE TO REPLY TO YOUR REQUEST IF THE IRC(s) ARE INVALID. I would appreciate it if you could publish this on behalf of QSL managers everywhere.
Thanks..... 73 de Alan, VK4AAR"

J3, GRENADA. Harry, W8KKF, will be active in the 1997 CQ WW SSB Contest as J37K. He is also looking for more operators to join him. You can contact Harry via his E-mail address at hflasher@dayton.net or via the telephone at 937-434-9616. QSL via home call.

JW, SVALBARD. Kjell, SM7NAS, informs OPDX that from August 29th to September 1st he will sign JW/SM7NAS. He will be operating from the QTH of JW5E (the local ham club in Longyearbyen, Svalbard). He states the antennas that are available there are a 5 element beam up 100 ft for 10/15/20 meters and a full size delta loop for 40 meters. If possible, he will operate on the WARC bands and the low bands as well. The low bands will be difficult due to the sunlight that is almost round the clock. All QSLs go to SM7NAS via bureau or direct: Kjell Adolfsson, Dalbovagen 16B, S-59096 Overum, Sweden.

KH0, MARIANA ISLANDS. Skip, JE2HCJ, is planning to go to Saipan in the Northern Mariana Islands from August 22-25th. He plans on using the callsign N2PQE/KH0. Activity will be CW/SSB/RTTY on 40-10 meters. QSL via JE2HCJ. If you want make schedule for North America or Europe,

please contact JE2HCJ via E-mail at je2hcj@ibm.net.

QSL INFO AND NEWS.....
If you had a chance to work Ray, 9M2OM/G3NOM, from Pulau Besar Island (AS-097, which is part of the Johor West/Melaka State Group located in the Malacca Straits off the West Coast of Peninsular Malaysia) as 9M2OM/P, QSL via G0CMM, John Bell, 28 Stiles Avenue, Marple, Stockport, SK66 LR, England, UK. Please mark clearly the /P, and IOTA Number on the card. A special card will be printed for the Malaysian Islands operations.

REGARDING 7Q7EH QSLS (Update by Chris, AA9HD). "There has been some confusion regarding my status with 7Q7EH, and I would like to clear it up. I am a college student, and am moving to a new apartment. Due to the fact that I was away at school, the 9th area sorter could not contact me regarding the 7Q7EH QSLs he was holding for me. (Any messages regarding the matter were never forwarded the school QTH by the folks at home.) As soon as he was able to contact me, I picked up the QSLs waiting and will ship them to 7Q7EH shortly. Also, any QSLs sent to the W1 bureau for 7Q7EH via W1EH (his home call) are being forwarded to me and will be shipped to 7Q7EH. I would like to emphasize that ALL CARDS SENT VIA BURO will be sent to me and forwarded to 7Q7EH. Please keep this in mind when QSLing 7Q7EH:
1. W1EH is an incorrect QSL route. QSL 7Q7EH via AA9HD.
2. My home QTH will remain the same (I am moving to another apartment at school.) The address is: Chris Cieslak AA9HD, 810 N 16th Ave., Melrose Park, IL 60160-3829
3. All direct QSLs sent to the above address have been shipped to 7Q7EH on a regular basis.
4. I have worked out a schedule with my bureau sorter so that he has no problems in contacting me. Cards sent via bureau will be picked up on a regular basis.

I hope that this clears up any confusion. If you have any more questions regarding the matter, please feel free to contact me at: ccieslak@uiuc.edu. I apologize for any delays this mixup may have caused. I intend to continue serving the DX community to the best of my abilities....." 73 and Best DX, Chris Cieslak, AA9HD

UE1QQQ/1 "Polar-97 DX-Pedition" QSLS. Albert, RA1QHJ, states the QSL cards are currently being printed. Albert: "Please don't worry about them. All stations which are "in the log" will receive QSL cards from us." QSLs are "OK" by direct mail, but remember that 1 IRC is insufficient for reply. Please send 2 IRCs or 1 Green stamp for direct reply (usually letters will cost 3500 Russian rub., but 1 IRC = only 3000 rub.).

To avoid delays, QSL both AH7X and AH7X/AH0 via JP1NWZ.

TT8, CHAD. Burns, W4FOA, talked\worked Jim, TT8/WA4KKY, who is in Chad repairing/installing some sort of communications system. He passed along the following info: He and John (WB4MBU) will be alternating in/out of

TT8 for what he said was more or less permanently. Jim indicated he (and John) will be active around 18150 kHz, although he was worked today on 14225 kHz. Also, he stated he is hearing quite well on 75 meters and will be on 3928 around 1100-1230z which he indicated was his "gray line" (some confusion on this point). He also stated he had just moved, so his callbook address is not correct and was telling all to QSL via the WA4 bureau. Jim also mentioned that plans are for John to bring some digital stuff with him when he arrives around 6-7th of September. He did not further identify what digital equipment he would be bringing.

VR6, PITCAIRN ISLAND. "The 59(9) DXReport" states Tom, VR6TC, has been active on 14188 kHz at 0130z and will give out CW QSOs as well. QSL via WD6GUD. Tom is the real OT of Pitcairn Island!

2121. Thee Callsign Database

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-17 00:00:00 UTC
From: James Sawle <qmation@dial.pipex.com>
Message-ID: <01bcaaf0$d1610280$e8f582c1@default>
Source record: 31972

Hello there,

Is there anyone out there that can help me with collecting callsign databases from around the world for a project that I have been doing for the last three years.

I have at the moment a database of Ham Radio Callsigns from the following areas:

UK about 60-70% complete
Northern USA about 30% complete
Southern USA about 40% complete
Europe about 40% complete
Asia about 20% complete
Australia about 5% complete

This database is in (PC Formatted) dBase 4 format and currently holds over 7.8 Million callsigns, names, addresses, locations, and notes if applicable.

What I am after is more information to enter into this database, If anyone can either e-mail a database with callsign information in dBase 3 or 4, or ASCII Text delimited. so that I can add the information to my database, in return I will send them the database as I have it so far (on CD-ROM), and when hopefully I can get to a stage where I can publish it, which I am aiming at later this year, I will send the the finished article FREE OF CHARGE later this year.

I look forward to hearing from you

All the best

James sawle

At long last we have now updated/added many links and our own pages re
50MHz.
The 50MHz News pages is still hitting around 1000 hits per day and now
includes the previous days Solar news from DXLC.(very accurate news!)
There's also the start of a 50MHz DDS CW/SSB TX/RX as a winter project
with many additions including, Super Keyer 3, Digital Voice Recorder,
Audio Bandpass filtering, digital Display etc.....

2123. TT CHAD AFRICA UP & RUNNING

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-17 00:00:00 UTC
From: wa4kky@aol.com
Message-ID: <19970817195401.PAA03909@ladder02.news.aol.com>
Source record: 31974

WA4KKY & WB4MBU are up and operating in the Republic of Chad, Africa. Jim
WA4KKY has been operating as TT8/WA4KKY has now been assigned TT8JWM.
The QSL INFO to Jim is 822 Orangewood Rd., Jacksonville, Fl. 32259.

John WB4MBU / TT8JFC will post QSL in Sept.

The station is logging up to 200 stations an hour with massive pileups.
We will work as fast as possable. Please remember to include a SASE or
green stamps as the cost of mail is very high at 200 stations an hour.

WHEN BANDS ARE OPEN ON US/AFRICA PATH look for me 14.225-14.250
also 18.150 +- on weekends.....

Bye De TT8JWM / WA4KKY

2124. Need QSL info CG4VV and CG7CFD

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-17 00:00:00 UTC
From: "Kenneth E. Harker" <kharker@cs.utexas.edu>
Message-ID: <33F79DD0.61AB9865@cs.utexas.edu>
Source record: 31975

Worked CG4VV and CG7CFD in the NA QSO Party this weekend and they don't seem to show up in any of the databases, etc. that I know of. Anyone know of QSL routes for these stations?

Also, is the CG prefix some special Canadian contest prefix? VE4VV and VE7CFD both look like good callsigns, is there some relationship there? Is there some general method by which I can divine the routes for these special Canadian prefixes?

2130. QSL ROUTE-5R8DE ???

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-19 00:00:00 UTC
From: ns4m@iname.com
Message-ID: <33f91fa5.52889397@news.bhm.bellsouth.net>
Source record: 31981

I need help with qsl route for 5R8DE,worked Nov. 92.I have the qsl
manager as 7K1PGO.The problem is I can't find his address.
I have looked on several searches for many dx/qsl sites on the web,but
have turned up nothing.All searches give 7K1PGO as manager,but no
address.Surely Iam not the only one to work this station,but probably
the only one that needs it confirmed.HI !!
tu es 73, Rick NS4M

Would like to become a QSL manager for any DX station.
Would have to work out the details if interested.
Have plenty of free time on my hands and could handle the bulk.
Would guarantee 24 hour turn around to U.S. stations once contact was
confirmed by your log. Your cards would then be forwarded by
Postal Service. Will not forward cards by Bureau.

Use of email for log confirmation would be preferred.

Thanks for you interest.

What does "range" means here?

You can use the G5RV for all bands but to use the same vertical on all
bands will be difficult.

Overall, the vertical (if well installed) will beat the G5RV hands down
on DX.
If too much clutter and aluminium sidings in the surroundings, raise the

antenna above the house with elevated radials and voil&#65533;.

You can make a very cheap adjustable vertical that will work from 10 to
20m
with one of these telecopic aluminium poles used for painting and found
in
hardware stores. You have to put shorts made with small hose clamps and
a piece of coax shield at each junction because it is made of plastic
and
tubes are not electrically connected. Once you found the correct length
for
each band and MARKED that on the top or bottom tube, you just go there
unclamp the short, adust the lenght and you are on a new band.....

Que veux dire "range" ? Pour beaucoup de VE2 contacter l'autre bout de
la
province est consid&#65533;r&#65533; comme du "range". Si c'est vraiment du DX qu'on
parle la vertical est meilleure quand elle est bien install&#65533;e. La G5RV
est
une antenne m&#65533;diocre 90% du temps sauf si elle est parfaitement
install&#65533;e

horizontale une hauteur appr ciable ce qui n'est pas facile pour le 80/40m.

S'il y a trop de maisons autour il suffit de la sur lever et de mettre des radials
lev s. Mais pour le multibande ... avec la verticale ce n'est pas facile faire
mais pour le DX un simple tube de 4.8m et on peut aller sur le 20m et faire
le Japon ou l'Australie.

Si l'antenne est au sol, on peut en faire une verticale ajustable en utilisant ces
tubes t lescopiques en alu pour peindre(il y en a chez R no Toto). Ils ont de
15 17 pieds et on peut ralonger le bout pour aller sur toutes les bandes de
10 20m. NOTE: Il faut mettre des colliers et des court-circuits la jonction
des sections car le syst me de blocage est en plastique et donc isolant.

73 Salut

SB DX @ WW $OPDX.319
Ohio/Penn DX Bulletin No. 319

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 319
BID: $OPDX.319
August 25, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & WB2RAJ THE 59(9) DXReport, K4FXN, WA4JQS, AC7DX, WT0Q, CO3CL, DJ2BW, DJ5AV & DX News Letter, JA1QGT, ON6TT, PA3CSR, PS7AB, UA9KM, VK4LM, VK1AUS, VK4FW and ZS4Y for the following DX information.

SPECIAL NOTE: OPDX Bulletin #318 contained information supplied via "Joe and Tam BV/N0IAT." Although an appropriate credit was made at the top of the bulletin, Joe Fitter, BV/N0IAT has claimed that the information he supplied was copyrighted and was used "in violation of Federal law". As a result, OPDX will no longer publish any information supplied by this source, and other bulletins are advised to follow a similar course, or you, too, may be threatened with "prosecution" for a claimed voilation of U.S. and international law.

IMPORTANT NOTICE! Users of the online BARF-80 BBS (Home of the OPDX Bulletin) take note, the area code has change as of August 16th. The new 440 area code will replace the 216 area code. Currently both area codes can be used, but the 216 area code will be permanently replaced in April 1998. BARF-80 BBS online at 440-237-8208 28.8k-1200 Baud 8/N/1

4F, Luzon Island (PHILIPPINES). Hans, PA3GKI, now signing 4F2DX, has been active on 20 and 40 meters. Activity seems to be between 1200 and 1400z, mostly on CW, but SSB is also an option. It has been mentioned that other bands will follow shortly. Hans will also visit another rare island in DU-land in the coming weeks. QSL 4F2DX via his home call PA3GKI.

5X, UGANDA (Update). Peter, ON6TT/5X1T, has just concluded his 7th tour in Africa. He reports that despite his heavy work load and his family being there, he was able to make about 11,000 QSOs (with about 500 on RTTY) between mid March and mid August. Peter states he put up a TH11 logperiodic which helped him in finally getting through to some USA stations on 10 and 12 meters. He is currently on holiday in Belgium for about 6 weeks, after which he will return to 5X until March of next year

(minimum, depending on the how the regional crisis develops). Peter wants to remind everyone that 5X is still well provided for with operations by Mats/5X1Z, Joe/5X1P and Paul/5X4F, who are all quite active. DJ1US is currently awaiting his license.

9M8, EAST MALAYSIA. There has been a report that Hans, DF5UG, may be active from here in September. His activity will include operations from Pulau Satang Besar and/or Pulau Satang Kecil Islands. His callsign will be 9M8QQ. QSL via homecall.

CL, CUBA (Rare region!). Look for Cuban station CL3FL, operated by Fernando, which is active every day on 10 meters between 28800-28900 KHz. This station is very rare because of two reasons. This station has a third class license in Cuba (CL), and it is located in the 3rd region. This region is needed for the Cuban Award. QSL via CO3CL: Jose Carlos Leon Ortega, Box 59 C.P. 33600, Guira de Melena, Habana, CUBA.

FH, MAYOTTE. Hermann, DJ2BW, and XYL Margot, DL2DK, will be active from here October 9-22th, as FH/DJ2BW and FH/DL2DK. They will be active on all bands from 160-10 meters, mainly CW and RTTY, but there will be a little SSB. Hermann states Low-Band (160/80 meters and RTTY) is prefered.

PIRATES! Mamuka Kordzakhia, The President of the National Association RadioAmateurs of Georgia (NARG) reports to OPDX that stations UF6VAI, UF6VBS, UF6VBI and UF6VBI are pirates operating from the Republic of Abkhazia which is an integral part of Georgia, and they should be using 4L. The prefix UF6 is a Russian prefix, and they do not understand why they are using UF6V. The Georgian Republic prefix of 4L has been in effect since August 1, 1994. Also, 4L6JR and UA6JR have been mentioned as pirates. They recommend NOT to work these stations.

PR5, SAO FRANCISCO ISLAND (Brazil). Look for this Brazilian island, which is located in the Santa Catarina State North Group (IOTA SA-27 and DIB-08), to be on the air September 1-15th. The callsign to be used is PR5L. Activity will be on SSB and CW with operations on 80-10 meters. QSL via: Jay Lira, Box 08, Florianopolis/SC, 88010.970, Brazil.

QSL INFO AND NEWS....
Carsten, DL6LAU, informs OPDX that all direct QSLs and also the first bureau cards for his/their J75T trip have been answered. He also reports they received a lot of direct QSLs with insufficiant return postage (Carsten.. yes, I also think that the 3DM <-> nearly 2 US$ from our German Post is a little bit too expensive...). Therefore, Carsten states they sent most of the U.S. cards to Jim, KF8VX, and his wife Cathie, KG8QL, who put them in the U.S. mail for them (Special thanks to Jim and Cathie!). Carsten will continue to answer the direct and bureau cards.

R9, ASIATIC RUSSIA. Members of the Nadym DX Club from Yamalo-Nenetskiy region (UA9K) of Russia will be active from Belyy Island in Karskoe Sea. Operators Nick/UA9KM, Alex/UA9KAS, Serge/UA9KG, Serge/UA9KL, Mike/UA9KO, Leo/UA9FL and Valeriy/RW4HW will be active between September 8-18th, using

the special call R9KM. This island is part of IOTA AS-083, but the team hopes for this to become a new one. All documents have been sent to the IOTA committee (Special TNX to UA9OBA). Operations will be on all HF band, including the WARC bands, on CW, SSB and may be RTTY. QSL via UA9KM: Nikolai Kuprin, 626711, Nadym Tyumen obl., P.O. Box 158, Russia. Please SASE, no "green stamps" only 2 IRC.

S2, BANGLADESH. The "DX News Letter" reports rumours are circulating stating that Jim, VK9NS, could be active as S21ZA in Oct/Nov.

SPECIAL EVENT STATION. ZS45TWR is a special callsign that will be used during 1997. It celebrates the 45 years of Trans World Radio, a Christian SW Radio station operating from different areas of the world, including Southern Africa. The callsign has been activated a number of times during the past 8 months. So far no QSL cards have been printed. This will happen later in the year, so please be patient. All direct QSLs with a U.S green stamp or 2 IRCs will receive a direct reply - it might just take a while. The QSL manager is ZS4Y: Leon M Foot, P.O.Box 1561, Welkom, 9460, Rep of South Africa. The street address appearing in most callbooks is also OK.

T9, BOSNIA-HERZEGOVINA. Kent, WT0Q, is in Bosnia, Croatia and Hungary with the U.S. Army. He will be on the air soon in Bosnia as T9/WT0Q, mostly on 20 meters SSB, but he will be getting a key soon and plans to do some CW. He has a vertical up for all bands from 10 to 40 meters including WARC bands. Kent told OPDX, that if someone wants to have him go to a certain band to work Bosnia, let him know by his E-mail address: wt0q@mailcity.com Also, Dale, N2NDY (T9/N2NDY), is at the same base as Kent. Dale also has a station set up, too (no details given). They both are near the city of Tuzla, which is 120 km north of Sarajevo.

TL, CENTRAL AFRICAN REPUBLIC. Information from "THE 59(9) DXReport" states Eric, TL8MR, is reportedly active from here and will be here for 1 year. QSL via F6FNU. There have been no QSNs reported yet.

TT8, CHAD (Update). OPDX received an update direct from Jim, WA4KKY, who is currently here (read OPDX.318). Jim (who was signing TT8/WA4KKY) has now been issued the Chad callsign of TT8JWM, and TT8/WB4MBU has also been issued a new Chad callsign of TT8JFC. TT8JWM has been active on 20 meters SSB between 1900 and 2230z (keep a lookout on or around 14219 kHz).

VK2, ISLAND OF MONTAGUE (NEW IOTA!). The JARA (Japanese Amateur Radio in Australia) members will activate VK2IOM (Island Of Montague) September 13-14th (UTC: Approx. Sept.13 0000z- Sept. 14 0400z). There is an unsigned IOTA reference number for this island because this island has never been aired before. This island is in the New South Wales State South Group. The JARA has received permission from the NSW National Parks and Wildlife Service in the Narooma District to operate from here. The operators will consist of: VK2BEX/Atsu, VK2IY/Ken, VK2TJH/Kyoko and possibly VK2IAZ/Ken. Suggested frequencies: CW - 7006, 14026, 21026 kHz +/- QRM and SSB - 7055 (for U.S.A. listening 7206), 14260, 21260 kHz +/- QRM. QSL to VK2BEX via the bureau or direct to: Mr. Atsu Asahina, P.O.Box 195, Killara, NSW 2071,

Australia.

VK9W, WILLIS ISLAND (UPDATE: All spots filled!). It has been reported that Doug, VE5RA, has just been confirmed and added to the team. Doug has been active from many locations and has operated from: VP9, VP2M, VP2V, V2, 8P6, ZF, ZF8, ZF9, J7, KH6, KH5K and 3D2. The complete team now consists of: WA1S/Ann, IV3FSG/Elvira, 7K3EOP/Noriko, VK4MR/Bob, VK2AEA/Vlad, VK4FW/Bill, AF7O/Darryl, FK8GM/Eric, K6KM/Bill and VE5RA/Doug. Also, the ODXG has announced that the callsigns on Willis are as follows:
YLS will use VK9WY
OMS will use VK9WM
On Holmes Reef they will all be using VK4YN. QSLs for all these operations go to VK4FW.

VK0, MACQUARIE ISLAND (UPDATE). Simon, VK1AUS, spoke to Tom, VK0TS, and states he has been very busy with repairs to equipment on Macquarie, so he was away from the main camp for over a week. Tom says look for him (if time permits) during the following times and frequencies:
Thursday 0930-10:45z 40m 7075 or 7070 kHz
Sunday 1000z- 80m 3570 and 3798 kHz
Monday 0930-1030z 80m 3570 and 3798 kHz
Tuesday 0400-0445z 20m 14222 kHz

WP2, U.S. VIRGIN ISLANDS. Dan, K4FXN, will be active from St. Croix, November 27th to December 6th, as WP2Z. He will be an entry in the 1997 CQWW CW Contest (November 29-30th). QSL via KU9C.

AA6BB/7 SILENT KEY. Well known QSL Manager Gerald (Jerry) Branson, AA6BB/7, became a "Silent Key" last Sunday (Aug. 17th) morning in his home at Junction City, OR. Many knew Jerry from his work on the W7PHO net and as QSL Manager for many DX stations. The South Sandwich Island DXpedition Group and The Midway-Kure DX Foundation announced the formation of a DX scholarship fund to honor the memory of Jerry. The scholarship, "The Jerry Branson Memorial Scholarship" will , in general, be awarded to entering freshmen who have distinguished themselves in DXing achievement. Applications and details will follow in a separate announcement and in the DX bulletins.
ADDED NOTICE: In July 1994, Jerry Branson set up the Joanie and Jerry Branson Trust, with Mark Perrin/N7MQ and Ron Vincent/WJ7R as trustees, and with Valley Radio Club as the beneficiary. Then the Trust and the Valley Radio Club entered into a memorandum of understanding, for the Club's members, particularly the DX-Contest Group, to provide QSL services in the event of Jerry's death or disability. While certainly all the DX stations will decide whether the Trust and Valley Radio Club will continue on for the next 60 or 90 days, the QSL mail sent to Jerry's address will be handled efficiently by those he selected to do this work in the event it was needed. If all DXers will continue to QSL via AA6BB until further notice, then their mail will be processed promptly. They know they cannot replace Jerry, but they will carry on for him as he asked them to do.

DX Bulletin 37 ARLD037
From ARRL Headquarters
Newington CT August 28, 1997
To all radio amateurs

SB DX ARL ARLD037
ARLD037 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, The Daily DX and the DXNS. Thanks to all.

TUNISIA, 3V. Mashiko is QRV from the 3V8BB club station. His length of stay is unknown. QSL via JF2EZA.

VIETNAM, 3W. Hiro, JA2EZD, is QRV again as 3W6KA. QSL via XW2A.

LESOTHO, 7P. Bob, 7P8BO, is QRV using CW and SSB. He can generally be found on 30 meters at 1945z, and on 80 meters at 2100z. His length of stay is unknown. QSL via W4YBO.

TAIWAN, BV. Special prefix station BU0DX is QRV and can be found on 20 meters. QSL via BV8BC.

AZORES, CU. Maike, DL4XS, and Dieter, DL3KDV, will be QRV from September 1 to 15 as CU2/homecalls. Look for activity on 160 and 20 meters. QSL via home calls.

PHILIPPINES, DU. Hans, PA3GKI, is QRV as 4F2DX from Luzon Island, using CW on 40 and 20 meters. It is reported he will visit another rare DU-land in the coming weeks. QSL to home call.

MAYOTTE, FH. Giuseppe, IK4NQW, will sign FH/IK4NQW until September 2. QSL to home call.

THAILAND, HS. Francois, TK5AE, is QRV until September 22 as either HS0/TK5AE or HS0AC. He is using CW and SSB, and can be found on 80 through 15 meters. QSL via home call.

KURE ISLAND, KH7. The Midway/Kure DX Foundation DXpedition should be QRV with the call AH0W/KH7K. The DX team will be traveling with a team of wildlife scientists who are conducting a research project

here. QSL via KE7LZ.

BRAZIL, PY. PP5LL will be QRV on 80 to 10 meters, using CW and SSB, as PR5L from Sao Francisco Island, IOTA SA-027, from September 1 to 15. QSL to home call.

CAMEROON, TJ. Mark, TJ1US, is QRV and can be found using RTTY on 20 meters from 1800 to 2100z. Look for CW activity on 80 to 20 meters, including 30 meters. QSL via NW8F.

CHAGOS ISLANDS, VQ9. Pres, N6SS, is QRV until November as VQ9SS. He enjoys operations on 160 meters. QSL to home call.

ALBANIA, ZA. Mike, K5KWG, is active as ZA1MH. He will be QRV on 160 to 2 meters using CW, SSB and RTTY. He is operating from a remote village where he is working as a missionary setting up radio communications. QSL via Z32KV.

Announcing NEW
Ham Radio.FAQ

This is the second generation of the original file that was
a regular USENET posting entitled

"rec.radio.amateur.misc Frequently Asked Questions"

The NEW Ham Radio.FAQ is a HyperText document that is on the
WWW and it contains 3 chapters plus hundreds of LINKS to radio
related sites!

1 - Introduction to the Ham Radio.FAQ
2 - Amateur Radio Organizations, Services, and Data Sources
3 - Amateur Radio Advanced and Technical Questions

Please provide a copy of the Ham Radio.FAQ to any new or
soon-to-be Hams that you know or share with them the URL to this
site:

http://www.mv.com/ipusers/wd1v

Send me an EMAIL <or packet with your Email address> if you want the
FAQ text file sent to you as an attached <120 K> file with the words
"HAM FAQ" on the subject line.

Send me a formatted disk with SASE disk mailer if you want the
FAQ text file sent to you on disk. PC or Mac are fine.

73,

John Seney

Message-ID: <5u85hp$k8u$1@vixen.cso.uiuc.edu>
Source record: 32006

In a previous article, thompson@mindspring.com (David L. Thompson) says:

>The ARRL DX Bulletin said the AH0W DXpedition should be QRV now. I
>looked through all the bulletins (several types) back to July 1 and
>don't find anything on frequencies, dates etc. Anyone know where the
>info is??? Need it on 17 and 12 meters!
>
>Dave K4JRB
>thomson@mindspring.com
>
>

The ARRL Bulletin said it would be QRV with the call AH0W/KH7K. It
didn't exactly say NOW, although the way it was worded it could be taken
that way.

The actual scheduled dates are Sept 26 through Oct. 3, 1997.

And I need it for an all-time new one!

Good luck.

73, Zack W9SZ

2158. DX ALERTBox Wanted

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-30 00:00:00 UTC
From: Ted Pauck <k8na@ix.netcom.com>
Message-ID: <5u9g44$k2b@dfw-ixnews6.ix.netcom.com>
Source record: 32009

Some years ago, there was a device that took Packetcluster DX spots and transformed them into
voice spots, to be sent out over the local 2-meter DX spotting repeater. The unit was called
"DX ALERT". I have one, used it for may years with my node, but during one of my many-many
lightning hits, the DX ALERT box got wiped out. I have done extensive repairs on it, with many
hours of time spent for repairs. Still not working. I find that the PAL Chip is bad, but cannot
get the software to reload a new PAL. The people who originally built the unit, do not support it
anymore, and cannot supply parts or copies of the software ...

Does any one know of a DX ALERT box that is not being used, and can be bought, or not working and
can be bought for parts, etc .....

Ted,

Someone did a survey of DX Alert users about one year ago on the
Contest reflector (cq-contest@contesting.com). I will send you the
list when I find it,,,

Our coordinator in Atlanta in Neal NU4D. I also understand that K3LR
made something like Dx Alert (its in the Amateur Radio Mail Order
Catalog and Resource Directory). His company is LTA.

sorry, this BID is impossible to use here!
I resend this bulletin via packet to @NOR, but the local mailbox
rejected the BID $arld037. It had already received it (last year), so
is it possible to repeat the bids only after two years???

I have been using LOG-EQF for the past couple years and have been happy ever since... I also was in the same boat not wanting to pay an arm and a leg without getting to see if I liked it first... Its shareware but I don't remember the price... I know I registered soon after trying with support on his BBS (back then) and his web page... I think you can get a demo ver @ www.itis.net/eqf/ ... Its got packet cluster, callsign database support, WAS/DXCC etc. support, you name it... The last newsletter was even stated he was working on rotator con-trol which I would like to see...

Check it out...

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 320
BID: $OPDX.320
September 1, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KE2VB, WB2YQH & WB2RAJ The 59(9) DXReport, W3UR & The Daily DX, NF4W, W6OTC, K8SM, NW8F, WT0Q, A41JT, DJ5AV & DX News Letter, DL7VSM, EA3NY, EI6FR, F5NZO, F6AJA & Les Nouvelles DX, G4BUE & DX News Sheet, OK1MD, ON6TT, SM0DRD, and 4X6UO for the following DX information.

3W, CON DAO ISLAND (Vietnam). The "DX News Sheet" reports Yuki, JI6KVR, will activate a new Vietnamese IOTA October 14-20th. This island is in the Con Son Group (b). The callsign was not given. QSL via JJ6LXX (JA) and EA5KB (others).

5A, LIBYA. By the time you read this, an Austrian group here will activate their 5A28 operation. Activity should last until September 7th. QSL via OE2GRP or bureau.

5H, TANZANIA. Harald, DL7VSN, informs OPDX that he will be traveling to Uroa/Zanzibar from September 7-27th. He has already received his licence from the Tanzanian Communication Commission. The callsign he will use is 5H/DL7VSN. He added that Fabio, 5H1FS/I4UFH, was the last person to receive a real Tanzanian callsign for a temporary stay. Harald plans to be active on 80-10 meters mostly in CW. If conditions are right (along with the palmtrees and other factors), he will also try to be active on 160 meters. QSLs are OK via the bureau. After his travel, Harald will publish the log on his WEB homepage:
http://home.t-online.de/home/0309314613-0001/dl7vsn.htm

5X, UGANDA (160 meters!). Paul, 5X4F, states, "Yes I'm still set up for 160. The band is very noisy yet. I will start listening 30 minutes before sunrise after September 9. Sunrise is approx. 0350z on the 9th and 0346z on the 30th. I also get on some times between 2300-2400z, if I'm not too tired. My usual frequency is 1.824."

A4, OMAN. The "DX News Sheet" reports that Chris, SP5EXA (ex A71CW), will be going to Oman on September 11th where he will be active for the next five years. He is currently waiting for a licence.

A4, OMAN (ROARS 25th ANNIVERSARY). The Royal Omani Amateur Radio Society (ROARS) will celebrate its 25th Anniversary (Silver Jubilee) from October 1st to December 31st. All A4 stations should use their callsigns followed by /SJ to commemorate the 25th anniversary of the Society. The Society will be operating a Special Event Station at their site on Athaiba Beach under the callsign A43XXV during the period from December 17-21st. To commemorate their Silver Jubilee, the Society has introduced the "ROARS Silver Jubilee Award" for the Radio Amateurs worldwide. ADDED NOTE: Details on this award will be sent to all OPDX InterNet Subscribers (Thanks to 4X6UO).

A6, UNITED ARAB EMIRATES. "The Daily DX" reports that David, K3LP, will be operating from November 22nd to December 2nd as A61AJ. Activity will be on all bands CW and SSB. David will also be an entry in the CQ World Wide CW DX Contest as a single operator on all bands with two rigs. QSL for this operation only to K3LP (ex AA6DC.)

AP, PAKISTAN (Update). Hiro, JA1EZM, continued to be active as AP2AP despite the message put out by the PARS stating he was not properly licensed (refer to OPDX.318). However, Jun, JA7SSB, states he has talked to Hiro and he insists that his license is good. Hiro will expand his operations during September.

CU, AZORES. Maike, DL4XS, and Dieter, DL3KDV, will be active from here again as CU2/DL4XS and CU2/DL3KBV, from September 1-15th. Look for them on 20 and 160 meters. QSL to CBA (via bureau).

FS, SAINT MARTIN. Eddie, EA3NY, will be active as FS5PL during the CQWW RTTY Contest (September 27-28th). He will try to use more than 150w during this contest, but he has a problem with power lines. Eddie will use 3 diferents modems, 3 diferents DSP filters, 3 diferent computers, and he will be able to receive on 3 diferents stations on different frequencies at the same time. He suggests to PLEASE BE PATIENT, he knows that most people need FS in RTTY and he will do his best.

HV, VATICAN. With the efforts of IK0FVC and I0JBL, look for HV4NAC to be active during the 1997 CQWW RTTY Contest (Sept. 27-28). Other operators will include W6OTC, K6AW and W6OSP. Before the contest, look for activity on CW and SSB as time permits.

J2, MOUCHA ISLAND (Djbouti). Dominique, J28YC, and some others will be active as J28YC/P from his Djiboutian island located in the Gulf of Aden Group (IOTA AF053). This will be a short operation from September 3rd (on the afternoon) to September 5th. They will be active on all bands (except WARC bands) on SSB.

KH3, JOHNSTON ISLAND. Just a reminder that Al, KK5ZX, should be active from here by the time you read this. He will be on the island until October 1st. Activity will be from the club station on 160-10 meters, mainly CW, but there will be some activity on SSB. QSL via K3SX,

5008 Red Hill Road, Keedysville, MD 21756 USA.

KP5, DESECHEO ISLAND. Several DX bulletins report that Vance's, W5IJU, request for landing permission on KP5 has been denied due to "unsafe and dangerous conditions on the island".

QSL INFO AND NEWS....
Michael Taylor, NF4W, of South Carolina (USA), states he would like to become a QSL manager for any DX station. He also states he has plenty of free time on his hands and could handle the bulk and would guarantee 24 hour turn around to U.S. stations once contact was confirmed by the DX station's log. Use of E-mail for log confirmation would be preferred. If you are interested, Michael can be reached via E-mail at: nf4w@mindspring.com

Declan, EI6FR, from the WestNet DX Group, informs everyone he is still awaiting the delivery of the GI/EI7NET Rathlin Island (EU-122) QSL cards. These cards are being printed in Italy by IK1MPL. As soon as he has the cards he will immediately answer the direct requests followed shortly thereafter by a bureau posting to all stations in the log. "Thank you for your continued patience," Best 73's de Declan EI6FR

All direct QSL requests for HP1XBI/4 for Bocas del Toro (IOTA NA088) have been sent out.

F6BFH states he has sent all direct QSL requests for G/F6BFH from Scilly Isles operation (during last July) have been sent out.

F5LGQ states he has sent all direct QSL requests out for XT2DB.

QSLs for OL7HQ (IARU HF Contest 1997) go to QSL Manager OK1MD via the bureau or direct: Mlados Doucha, OK1MD, Kodanska 87, CZ-10100 Praha 10, Czech Rep.

CO8TW can now be QSLed via W3HNK, Joe Arcure, P.O. BOX 73, Edgemont, PA 19028. Juan, CO8TW, can still be contacted at: Juan Carlos Veranes, PO BOX 8, Santiago de Cuba CP 90100, CUBA or via InterNer E-mail at: co8tw@co8rci.uo.edu.cu

Didier, F5NZO, states he is still QSL Manager for FT4YD (1991), FT5XL (1997), PA/F5KBF (1992) and also OY/ TF/ and TF7/F6AMI (1991). He can be reached via E-mail at F5NZO@AOL.COM.

WP2Z, the Windwood Contest Station on St. Croix, USVI, is a very active ham radio rental property which normally has a different operator for each major contest. This means that there is usually a different QSL Manager for each operation. Well, the QSL confusion may have come to an end. Steve Wheatley, KU9C, has agreed to become the QSL Manager for WP2Z. Please QSL all future WP2Z operations via KU9C. They hope that directing all QSL requests to one manager will end the confusion regarding WP2Z QSL routes. Please forward all WP2Z QSL requests to Steve at either: POB 5953, Parsippany, NJ 07054 or via the bureau.

QSL Online! The following was written by Goran, SM0DRD: "An interesting idea is developing at SK0UX. You may search logs for your QSOs and then download QSLs immediately to your own printer. We believe this is a first and the concept has already generated a lot of interest. The potential savings are enormous. We have already received requests from hams who want to set up their own QSL Servers and have one beta test site in the works. QSLs special event calls which we have used are SK0HQ and SK0RQ as well as club members are also available. During the CQ WW CW in November, we will make a field test on making QSLs from our expedition to Cuba (T48RCT) available within hours after your contact! Logs will be 'uploaded' to Sweden to the QSL Server via AMTOR. This concept conserves trees, time, and many other good things. Check it out for yourself at http://ham.te.hik.se/clubs/sk0ux.
The QSLs are typografically the same as a 'snail-mailed' card and may have pictures. Suggestions are very welcome since new possibilities are developing almost daily, E-mail to: goran@tjansteforbundet.se."

T9, BOSNIA (Update). Kent, WT0Q, has sent the following update to the information that was reported in OPDX.319 last week. QSLs for T9/WT0Q need to go to his home call, WT0Q, which is okay in all callbooks for the past 5 years. Dale, N2NDY (T9/N2NDY), needs his QSLs sent to DA2DM, his German call, where he will return to this fall. Dale is currently using a dipole at 50 feet with an MFJ Tuner. His radio is a TS-450SAT. Kent is using an IC-761 into a Hygain DX77 vertical at 8 feet, also via an MFJ tuner. They will be on the air as their respective schedules permit for the next 4 to 8 weeks.

TJ, CAMEROON. Cecil, NW8F, who is the QSL Manager for Mark, TJ1US (ex-J5UAI), provides the DX community with the following schedule which will be Fridays only for now with Saturday coming at a later date:
1800-2100z - 14085 kHz RTTY 0200-0400z - 7020 kHz CW
2100-2130z - 10104 kHz CW 0400-0500z - 3510 kHz CW
2130-2200z - 14050 kHz CW
Nothing has been mentioned about 160 meters yet, but Scott, K8SM, is in communication with NW8F to help or advise in obtaining something for 160 meters. For those of you that have interest in 160 and would like to help Mark get some kind of antenna, contact NW8F@JUNO.COM.

TY, BENIN. Sigi, DJ4IJ, is now active until September 19th as TY1IJ. Activity has been on 40, 30 and 20 meters, CW and SSB. QSL via DK8ZD.

V3, BELIZE. "The 59(9) DXReport" states Jay, K0BCN, will sign V31MX from Caye Caulker, October 21-29th. Activity will be on 20-10 meters, CW and SSB.

V4, ST. CHRISTOPHER AND NEVIS. The "DX News Letter" reports Joe, V47CA, will be active again around the CQWW DX CW Contest between November 16th and December 1st. QSL via homecall VE3BW.

VQ9, CHAGOS ISLANDS. Start looking for Pres, N6SS, to be active once again from here as VQ9SS. Activity will last until November. Look for him to be active on 160 meters. QSL via CBA.

ZG, GIBRALTAR. Martyn, G3RFX, will be active as ZG2FX from September 3-10th, to help celebrate Gibraltar National Day. Outside the celebration, he will sign as ZB2FX. QSL to home call.

I would like to take this time to thank, all of you for your input. I have been tryting to find a logging software. But i have found that i would be better off making my own software. What i am going to try to make is a softwra that can be used for normal dx logging and contest logging.
thier is going tobe another part of the software that im adding but dont want to say right now. cause i dont want another software programs to takemy idea's. So when i finish this project i will let you aqll know where you can get it.. you will be able to use this program for all you logging needs.. i'll keep you up to date..
thsnk you for reading..

2169. Re: Antarctica - CQ Zones

Newsgroup: rec.radio.amateur.dx
Date: 1997-08-31 00:00:00 UTC
From: Richard Ferch <ferch@storm.ca>
Message-ID: <34093420.110A@storm.ca>
Source record: 31821

Hi Jim,

You asked about CQ Zones in Antarctica. I'm guessing the info is for the project we've corresponded about before. If you need the official information, you should ignore my ramblings and consult the WAZ Award Manager, who is Jim Dionne, K1MEM, 31 De Marco Road, Sudbury, MA 01776. I can't resist the challenge to do a bit of detective work, though, so here goes:

First off, Rod (AC6V)'s info about Zone 32 was a bit off - Zone 32 definitely is one of the Antarctic zones, according to the official WAZ rules.

Here are my guesses on the sectors in each CQ zone (south of around 60 S; the South Pole, KC4AAA/KC4USN, can count for any of the 7 zones):

Zone 12 - 120 W to 70 W
Zone 13 - 70 W to 26 40W (i.e. 26 deg. 40 min. west)
Zone 38 - 26 40W to 38 E
Zone 39 - 38 E to 77 40E
Zone 29 - 77 40E to 129 E
Zone 30 - 129 E to 170 E
Zone 32 - 170 E to 120 W

The above are what I deduce from the info I have, and are not official. I only have cards from a very few Antarctic stations, and my solitary WAZ certificate (20m CW) doesn't qualify me in any way to pass judgment -- K1MEM is the final arbiter. My primary information source is the map that K1MEM sends out with the WAZ application form, along with the printed rules, supplemented by information from the 1991 ARRL Operating Manual and my 1973 Oxford World Atlas. Most of the above boundaries are only approximate, since almost none of the information about CQ Zones specifies exact longitudes. There are some ambiguities, as follows:
The map shows the line between Zones 32 and 12 as at exactly 120 W. The rules list Byrd Station (KC4USB) as Zone 32, but my atlas claims it is (or was) at 80 01S, 119 32W, which would put it in Zone 12 according to the line as drawn. Either the the position in my atlas is wrong (the ARRL manual lists Byrd Station at exactly 120 W), the line is at 119 30W (or even farther east), or Byrd Station should be in Zone 12.
The line between Zones 12 and 13 is well east of 75 W on the CQ Zone map, although far enough west to put all of the stations on the Antarctic Peninsula in Zone 13. 70 W appears to be about right, but there is an anomaly: The WAZ rules list Siple (KC4AAD) in Zone 13, but as best I can tell from the map in the ARRL manual, it is a long way west (around 85 W), which would put it well into Zone 12 (much too far

west to agree with the zone map). Since the map in the ARRL is only an outline map, it may not be an accurate reference, and this may be a red herring.
I estimated the line between Zones 13 and 38 at 26 40W, so as to put all of the Cape Verde Islands to the east, the various PY0 islands and the South Sandwich Islands (26.7W - Zone 13) to the west, and Halley Bay (75 31S 26 38W), which I am guessing is VP8ME (since it's the farthest east VP8 I can find) into Zone 38, as listed by the WAZ rules. This one is a tight fit.
The line between Zones 38 and 39 is quite close to 38 E. Marion Island, ZS8, at 37.8E, is in Zone 38; 8J1RL, in Zone 39 according to the WAZ rules, appears to be at around 39 E).
The line separating Zones 39 and 29 appears to be somewhere around 80 E. Amsterdam Island, FT8Z, is at 77.6E in Zone 39. The WAZ rules list VK0GM as in Zone 29. This is likely to be the Casey station at about 110 E. It can't be Mawson or Amery, because they are too far west and must be in Zone 39. If it is Davis station, at 77 58E, then the zone boundary must be close to 77 40E, but if it is Casey station, the boundary could be farther east, perhaps at 80 E or even farther. You may need an official ruling on this one.
The line between Zones 29 and 30 is the same as the border between South Australia and Western Australia, which as best I can tell is at 129 E.
The line separating Zones 30 and 32 is west of 165 E at its northern end (so as to bypass New Caledonia), but south of New Zealand and Auckland and Campbell Islands it takes a jog to the east on the CQ Zone map. From the info in the rules, it should be at least far enough east to put Scott Base and McMurdo Sound into Zone 30 (assuming that these are ZL5AA and KC4USV, as listed in the WAZ rules for Zone 30), and that puts the line at at least 167 E. On the CQ Zone map it looks more like 170 E.

To repeat, these are only guesses; perhaps some of the other folks on the newsgroup have better info.

I don't; sorry. I'm not even CLOSE to needing Mt Athos ... but
I couldn't resist adding a big smiley-face about propagation
finally improving. :->

In several years of HF ops, I had never HEARD a 5X; then
this weekend I bagged two of them in 20 minutes. And on
15 meters, my favorite band--which hasn't been open like
this in a while. :-) Heck, there was a DU on 15 at midmorning,
the first one I've ever heard who was strong enough that I had
a chance at working him. :-) (Lost him due to a sudden flare
in the "aggravated-wife-index," unfortunately.) <shrug>

C'mon, sunspots! :->

Ken Kuzenski AC4RD kuzen001@acpub.duke.edu

2178. Possible out-of-band operation

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-02 00:00:00 UTC
From: Barry Schwartz <godzilla@panix.com>
Message-ID: <Pine.SUN.3.94.970902144812.21850A-100000@panix3.panix.com>
Source record: 31830

OFFICIAL OBSERVER ADVISORY NOTICE

Radio: N2VGC, your call was heard working 247 DX NET and DA0SBB, signing as: N2VGC/AG alternately as N2VGC/AG/mobile, at approximately 2245UTC on 31 August 1997, frequency: 14.247 MHz, mode SSB, rst 59+20 to two O.O. stations.

The following is noted in the interest of maintaining Amateur Radio's reputation for good operating/technical practices: *Improper Identification *Out-of-Band.

Remarks: If upgraded to General Class license on or after 8-21-97, the latest updates of the FCC, QRZ, and ARRL databases do not indicate an upgrade for your callsign from Technician to General. A number of local ARRL VECs and W5YI VECs do not have your name on file as having taken any recent upgrades; however, not all VECs may have submitted results since or after 8-21-97. If upgraded, you may wish to indicate where the upgrade took place so that records may be expediently annotated.

In the event that no upgrade has taken place, please refer to 47 CFR 97.5, 97.9, 97.103, 97.119. Please take a few minutes to determine what equipment factors or operating practices might have contributed to this apparent departure from the rule or the good amateur practice standard. The intent of this notice is to alert you to the above noted operating condition. Thank you for your attention and any cooperative efforts to enhance the high standards of the Amateur Radio Service which we all share with pride.

NLI Section O.O.

Too bad you weren't listening earlier in the day to 14132 to hear the W5
station in a voice QSO with a VE4 station. He was a VE demonstrating
ham radio to a candidate. I tried to alert him via code that he was
out-of-band for SSB emission and he told me via voice to move to the
code segment of the band. Last I heard, 14132 was code for U.S.

I guess no good deed goes unpunished...

I need to seel a 2M mobile unit I have purchased several months ago. I am
unable to
pursu my Tech License at this point in my life and need to sell this unit.
It is brand new
still in the box. It was tested only once to be sure the unit is operional.
I am selling this
for $150.00. I will pay the shipping charges. I will accept a Money Order
or Cashiers Check
and will send to you COD.

Unit Model: HTX 242 Advance 2M Mobile (Radio Shack)

Sincerely,

Gerhardt

wow, is this bogus or what??? obviously someone with a great deal of
spare time on their hands. The posting OO is required by regulations to
give his or her own callsign I know of no NLI (north long island??)
section O.O.

What a hoot. If per chance this N2VGC does read this, tell the poster to
go pound salt or fish or whatever My understanding is that an "pink
slip" is suppose to be mailed and not posted here. If it were me I'd
tell this supposed O.O. to go f**k himself, but that's another story

I would appreciate any advice on building an efficient AM loop antenna for DXing. I do not know a great detail about antennas or theory, so extra details will be especially appreciated.

Thank you in advance.

R. Olson

2187. Re: Possible out-of-band operation

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-04 00:00:00 UTC
From: W2CE <W2CE@prodigy.net>
Message-ID: <340F131E.128A@prodigy.net>
Source record: 31839

Hi Walt,

AND, the OO is wrong.

Messages were waiting at ARRL this morning when the guys reached their desks. Dave Sumner, K1ZZ, replied that it had already been passed over to Rick Palm, K1CE, to deal with as the Manager of Field Operations.

Later in the day it was tracked that N2VGC did truely upgrade to General Class as claimed.

One must question here the intentions of the OO in failing to verify his facts and for the wide "broascasting" of what is supposed to be a confidential matter.

ARRL OO Bulletin - A friendly notice by another amateur with no official authority base to it.

FCC White Notice - A request for explanation of a violation reported to the
FCC by someone else. Responce is required in 14 days.

FCC "Pink Slip" - A request for explanation of a vio;ation monitored by an
FCC Field Operations employee. Also requires a writen
explanation within 14 days.

Both FCC actions are to bring a violation to an operators attention and to have the operator understand what rule was violated and promise never to do it again. Rarely does anyone ever have an action made against their license except for continued violations of the same regulations.

2190. ARRL SEPT.VHF QSO PARTY ?

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-05 00:00:00 UTC
From: LittleBILL@webtv.net
Message-ID: <5up5hg$4r8$1@newsd-102.bryant.webtv.net>
Source record: 31842

Hello, help a new ham out. Next weekend Sept 13, 1997, the arrl vhf qso party contest will begin. I wanted to try and participate in it.My main purpose is not to contest but to help other VHFers gather up some points for their totals.

My problem is , I use a FM 2-meter radio. Rules state use freq. from 144.90 to 145.00; 146.49, 146.55, 146.58 and 147.42 also 147.45 , 147.48, 147.51, 147.54 and finally 147.57.How do you annouce yourself on the air. I know in HF contesting on ssb the say CQ CONTEST! But is it different on the VHF bands? I dont think it is. But i was curious.

Any help would be appreciated!! Have a good day! KF4SXG

On the 4th Sept last I made contact with 9K2GS in Kuwait.
He gave me his QSL details but I am sure I have written
it down wrong.

Could someone please help me out.

many thanks in advance...de Jim ZL2BMH.

Message-ID: <wb6siv-0509972326340001@host34.clr.cyberg8t.com>
Source record: 31846

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's. I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.
Post Date: Sept. 6, 1996

This same message was posted on the DX reflector and the 425 DX
reflector. Whoever the character is who posted it, I seriously doubt he
is a real OO. If he is, the ARRL has no doubt been notified by at least
dozens of members of the abovementioned reflectors about it, and he
probably won't be an OO much longer.

The past year has seen a dramatic reduction in the cost

of term life insurance from many quality companies.

The San Fransisco Chronicle reported, "Price War Creates

Consumer Bargains in Term Life Insurance," and the New

York Times, "Premiums have fallen to record lows."

You may not be aware that your life insurance company

could now be charging new policyholders less than you

are now paying for the same coverage. Your traditional

life insurance agent has access to a small number of

life insurance companies. Through the internet, you

can compare rates to every other policy available.

Our free price comparison service gives you access to

over 550 term policies from over 175 life insurance

companies.

For a free comparison please go to:
http://www.2plan.com/quote.htm

2202. IOTA fees

SB DX @ WW $OPDX.321
Ohio/Penn DX Bulletin No. 321

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 321
BID: $OPDX.321
September 8, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WA1S, N2AU, WB2YQH & WB2RAJ The 59(9) DXReport, W3UR & The Daily DX, K4MZU, K4PC, W4WX, K7ON, K7BV, K8XP, AH0W/OH2LVG, DL7IO, EA3ELM, EA4DX, G3USF, G4BUE & DX News Sheet, OZ1LQH, T93Y and VK3EW for the following DX information.

3D2, FIJI. Ron, ZL1AMO, is once again active from here as 3D2RW. His length of stay is unknown and he can usually be found on CW (but he does work some SSB). Look for activity on all bands, especially the WARC bands. QSL via CBA.

6 METERS NEWS. Good news for 6 meters OPs. The DXNS reports that Omar, YK1AO, from Syria, has received permission to operate on 6 meters (50-54 MHz). The bad news is that he plans to be active on 6 meters in early 1998.

8Q, MALDIVES. Roberto, EA4DX, will be active as 8Q7XX from September 9-21st. Activity will be only SSB on 80-10 meters. Special atention will be paid to 17 and 12 meters. QSL via callbook address to EA4DX.

8R, GUYANA. The "DX News Sheet" reports that Tere (YL op and ex-XE1ASF and YJ8AS) will be active for the next two years as 8R1ASF. Her activity will be on 40-10 meters, including the WARC bands. QSL via XE1MD.

9K, KUWAIT. Edin, T97M, has received an invitation from Abdullah, 9K2GS, to visit him and operate during CQWW CW Contest (November 29-30th). His activity should begin one week earlier and activity is planned on all HF bands. The callsign used during that period will be 9K2/T97M. During the contest Edin will work Single Operator 14 MHz as 9K2GS.

C6, BAHAMAS. Jon, EA2KL, and Lluis, EA3ELM, members of LYNX DX Group, will be active from Abaco (IOTA NA-080), from November 1-8th, as EA2KL/C6A and EA3ELM/C6A. Their operations will be on CW/SSB on all bands (including 12 and 17 meters). QSL via their home callsigns.

CIA SPECIAL EVENT STATION. To commemorate the 50th anniversary of the U.S. Central Intelligence Agency (CIA), a special event station with the callign NN50CIA will be active during the entire month of September from CIA facilities in Northern Virginia. Suggested frequencies are: CW - 3550, 7050, 14050, and 21050 kHz; and on SSB - 3850, 7250, 14250, and 21350 kHz. QSL to KB4EFP (SASE please).

ER, MOLDOVA (UPDATE). Chris, K4PC, reports the callsign ER0PC has been issued to him by the PTT in Kishinev to operate in ER later this month. With the help of Sergei, ER1AN, the PTT processed all the paperwork and the license. Chris leaves on September 27th and will be in Moldova for 2 weeks helping with missions work in children's orphanages. He will then return on October 12th. Since the purpose of the trip is to do the work required in the orphanages, Chris is not sure how much spare time he will have to operate. Sergei has asked some of the ER hams if he can operate from their homes which will be OK. Chris states he would like to operate on 40-160 meters on RTTY, CW and SSB since ER is needed on the low bands. There is also a chance to operate on satellite. QSL via K4PC, Chris Penick PO Box 1926 Boone, NC 28607.

FR, REUNION ISLAND. Yas, JA8NFV, will be on air from here September 16-20th. Activity will be all bands SSB/CW. He plans to work the Low bands as well. There was no mention of callsign. QSL to his homecall.

HF BEACON NETWORK UPDATE. Martin Harrison, G3USF, the IARU HF Beacon Coordinator, states the ZL6B beacon is now operational in the NCDXF/IBP worldwide network on 14100, 18110, 21150, 24930 and 28200 kHz. The beacon is located near Masterton, New Zealand and runs 100 watts stepping down to 100mw. Meanwhile, the 5Z4B beacon is once more operational on the same frequencies, but the 4X6TU beacon still remains off the air with transmitter problems. Currently 16 of the planned 18 beacons in the worldwide network are now in place.

HS, THAILAND. "The 59(9) DXReport" informed OPDX that Francois, TK5AE, will be active until September 22nd as either HS0/TK5AE or HS0AC. His operations will be on 80-15 meters CW/SSB.

KC4, ANTARCTICA. Bob, K4MZU, reports that Jaime at KC4AAC states he will be leaving on or about October 6th. Jaime said he will look for Europe starting at 1830z to 1930z Sat/Sun on 14270 kHz each weekend through to early October. Meanwhile, the "DXNS" reports that Roman, EM1KA, will be active from the Ukrainian research base at Vernadsky for another year. His activity includes 6 meters, and he is regularly on 160 meters at 0400z on 1827 kHz. QSL via JA2JPA.

KG4, GUANTANAMO BAY. KG4GC will be a multi-single entry in the CQ/DX RTTY Contest September 27-28th. Operators will be: Bill/KG4GC [W4WX], Wayne/KG4WD [KD4OHH], Rusty/KG4AU [WV3N], Ken/KG4MN [WV3R] and Cory/KG4CM [N1WON]. QSL via bureau or SASE to: Bill Gallier, 4094 Sandy Run Drive East, Middleburg, FL 32068. Guest operators will be active September 29 to October 3rd on all bands and modes.

KH7K, KURE ISLAND (Update). With only a few weeks away for this DXpedition to take place, Frank Smith, AH0W/OH2LVG, from the Midway-Kure DX Foundation (MKDXF), provided OPDX with the follow update. The following operators will be active from Kure Island September 26th through October 4th:

UA3AB - Andy Chesnokov SM0AGD - Erik Sjolund
KH7U - Kimo Chun W0MY (ex W0RLX) - Burt Myers
JA3IG - Yuhi Yoshitani N9NW - Michael Goode
K0EU - Randy Martin AH0W/OH2LVG - Frank Smith

The DXpedition will be an all band all mode effort with plans to operate four HF stations continuously. They will also be equipped with two antennas for each band including a number of Force-12 antennas for each band in addition to antennas by Cushcraft and Titanex. As with their Midway operation of last year, they will be placing much emphasis on working DXers in difficult propagation areas, especially Europe and Africa, yet with the increased number of stations, antennas and operators they expect to be able to fulfill band and mode needs from all areas. Also, there will be three support "pilot" stations assisting the MKDXF team: Wayne, AL0E (ex WB6EQX), Terry, W7KW and Bob, KE7LZ. QSL Manager will be Bob Johnson, KE7LZ, 5627 West Hearn Road, Glendale, Arizona 83306. Additional information can be obtained via AH0W/OH2LVG at the E-mail address of: ah0w@primenet.com

QSL INFO AND NEWS.....
Art, N2AU (QSL Manager of ZD7HI), would like to remind everyone again that if you worked ZD7HI on CW, do not bother to QSL the QSO. Save your card and greenstamp. This was the work of a PIRATE. Chris does not work CW. In the past month he has received 50-60 cards.

Frank, IK0XBX, reports he is the QSL Manager of following stations: IQ0A, TK/IK0XBX (EU-100), IH9/IK0XBX (AF-018), EI/IK0XBX (EU-115), and EJ/IK0XBX (EU-121). QSL via the bureau or direct to:
Fucelli Francesco, Str. S.Lucia 38, 06125 Perugia, Italy

SO, WOLIN ISLAND (Poland). NODXA member Holger, DL7IO, and other German operators will operate as SO5OE/1 from this Polish island located in the Baltic Sea Coast West Group (IOTA EU-132). Activity will start around 2000z on October 3rd and last until October 6th. There will be two stations active on all bands. QSL via DL7VRO.

TF, ICELAND. Petr, OK1CZ, will be active from Iceland as TF/OK1CZ/P with various area prefixes from September 13-19th. He will be active with an IC-706 and a windom antenna. He hopes to activate Vestmann Island (IOTA EU-071) for a couple of nights.

VK9W, WILLIS ISLAND (Update provided by Ann, WA1S). The team of 10 operators will depart Cairns on September 9th to head to Willis Island. They expect to get the first staion on the air sometime on September 11th and plan to be active for 11 to 12 days. Operators include 3 YLs (Ann/WA1S, Elvira/IV3FSG, and Noriko/7K3EOP) and 7 OMs (Bob/VK4MR, Vlad/VK2AEA, Bill/VK4FW, Darryl/AF7O, Eric/FK8GM, Bill/K6KM, and Doung/VE5RA). The callsigns will be VK9WY for the YLs and VK9WM for the

OMs. After Willis Island, they will depart for Holmes Reef where they will spend approximately 30 hours (New, IOTA OC-???). The callsigns for Holmes Reef and Maritime mobile will be VK4YN and VK4YN/mm. QSL via VK4FW. More information can be found on the Oceania DX Group's (ODXG) WEB site: http://www.odxg.com/odxgwillis95.html

WEBSITE FOR DXERS/CONTESTERS. Dennis, K7BV, Editor of the National Contest Journal, reports the magazine now has a WEB Site. Dennis states the site keeps current with information regarding DXpeditions for contests coming up in the near and far future. The NCJ website can be found at: http://www.waterw.com/~ncj/xpedit.htm

ZA, ALBANIA. "The 59(9) DXReport" states that Mike, K5KWG, is active as ZA1MH from a remote village. His activity will be on 160-2 meters, CW, SSB and RTTY. He is a missionary setting up radio communications. QSL via Z32KV.

ZD7, ST. HELENA. Johnny, ZD7WRG, is now active on CW/SSB and has been heard operating RTTY on 20 meters (on 14084 kHz). Most of his activity seems to take place between 1830 and 2200z. Check 20 and 15 meters. QSL via WA2JUN. Desmond, ZD7DP, is also active on RTTY on 20 meters. Check on 14089 kHz between 2020 and 2200z. Also, look for ZD7BG to be occasionally active on 40-15 meter CW.

ZK1, PENRHYN ISLAND (North Cook). The Dateline DX Association is in the final stages of its preparation to activate the island of Penrhyn during the period of September 20 through 27th. OPDX InterNet Subscribers will receive an additional bulletin containing the latest press release.

-=-
IMPORTANT NOTICE! Users of the online BARF-80 BBS (Home of the OPDX Bulletin) take note, the area code has change as of August 16th. The new 440 area code will replace the 216 area code. Currently both area codes can be used, but the 216 area code will be permanently replaced in April 1998. BARF-80 BBS online at 440-237-8208 28.8k-1200 Baud 8/N/1

How about forgetting the word DELETE as in no longer eligible and think of INACTIVE instead. Once the time limit has been reached a country is inactive and no longer considered part of the total. It would still exist and be required for #1 DXCC but would reduce the HR number based on ACTIVE countries.

No one looses anything. Some will gain as the HR calculation will drop.

>
>I, for one, enjoyed the tough challenge. I thought the whole concept of an
>award the the challenge it provided. BTW, I lost credit for my 70 qso and
>still need P5. I look forward the the days when I can try to work them.

Dean, you've missed the main point: many of us will not be here 20-30-40 years from now and would really like to have a level playing field for those countries that exist.... and operational! North Korea is not a country that allows it's hams to operate... PERIOD. Why should it be kept on the list for DXCC countries when, if their government decides to allow its citizens to operate, then they could almost instantly be put back on the list. What's wrong with that. Don't you remember Albania? 40 years! Do you expect to be alive in 40 more years? I don't. And most hams won't since we are an "old man's" pursuit (look at the age of the hams at hamfests).

I can't see the sense of keeping a country on the DXCC list if the government won't let its citizens operate for a period of 5 years or more. I support the 5-year test for determining a countries ability to remain accredited as a DXCC country. When the country's government is so paranoid that it will not allow its own citizens to operate, I think they should be removed.

You make light of, and trivialize, others efforts. I am sorry that you do. I believe that you "tuned in late" and didn't fully understand the original statements. If I am wrong, I apologize.

By the way, I worked Peking China in 1956 as VP7ND. In fact, I was the last station that XU2CB (a apparently ligitimately licensed station) worked. That is another story of which I am not proud.

2211. CW-124/GRA-4 Antenna for trade ATTN: DXers SF Bay area

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-07 00:00:00 UTC
From: Tom Montgomery <monty55@ix.netcom.com>
Message-ID: <34134DE3.1AA0A7C0@ix.netcom.com>

Cross-posted to: rec.radio.swap,rec.radio.amateur.dx,rec.radio.amateur.equpment,rec.radio.amateur.homebrew,alt.ham-radio.vhf.uhf,alt.ham-radio.hf,alt.ham-radio.dxing
Body handling: HTML body converted to readable text

I have in my garage a complete GRA-4 military antenna pole set made by Guytronics. I am a novice at antennas, so I am offering this great trade for someone in the SF Bay area.

I really need someone to manufacture for me a directional antenna with as much gain as possible for the 118-136 commercial aircraft band. (I don't know the term but I think it is a yagi) I need to stress the maximum amount of gain is needed. I saw one for sale at a hamfest but as usual it was cut for 2 meters.

I know there is someone out there in the SF Bay area that has the materials needed to make this for me. In return I will trade you the GRA-4 antenna.

I don't know how high it will go but I believe it is really up there. The fella I got it from says you need to put the guy wire rings at the 3rd, 5th, and 8th poles.

It is a complete set including the small sledge to pound it in. This is a heck of a deal for anybody in the SF Bay area that can call me back the fastest. I would really like to pick it tomorrow if possible. I will deliver the antenna set if you're close or meet you half way if not. It would be too expensive too ship anywhere

This is a great deal for someone that needs a set for weekend dxing to get your antenna really up high.

Call me and let me know how much gain I can expect from your design or one you already have..

Thanks,
Tom Montgomery

2212. September Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-08 00:00:00 UTC
From: ids@nol.net
Message-ID: <34137e2e.17147702@news.nol.net>
Source record: 31715

PROPAGATION - by AD5Q HOUSTON, TEXAS -- SEPTEMBER 1997

September is usually a month of dramatic seasonal improvement on the high bands. In addition, this year we are beginning to see substantial improvement in solar activity. As I write this the solar flux is over 100, and has been in the 80's and 90's for the past couple weeks. The sunspot pundits are jumping up and down, as it definitely looks like the new 11-year cycle is underway.

The current levels of activity are not sufficient to open 10 Meters, but we can look forward to an improved season on 15 (and 17). The season will peak during October, and it is time to start watching this band now - maybe even call some optimistic CQs. 15 tends to surprise us at sunspot minimums with unexpectedly good conditions in the CQ World Wide Phone Contest. Even so, conditions last year were very marginal as the cycle was at rock bottom. This fall season, watch for signals from Europe in the morning and initially expect the best openings to the westernmost areas (especially Spain & Portugal). From W5 we should not anticipate pipeline conditions to all of Europe yet, but there are many well equipped stations in Eastern Europe that will easily get through. Significant openings to Russia are not expected from here, but the US east coast will have a different perspective. Stations in western North America will miss much of this action, but can look for improved conditions into Asia.

Conditions on 20 are off from recent months due to a declining nighttime MUF. The improved flux levels will help keep the band open, as it does not take much solar activity to bring dramatic improvement on this band. Flux levels of about 120 are sufficient to provide good nightpath conditions for much of the year, but we are not there yet. We are currently in transition between summer and winter conditions, ie. from nightpath to daypath openings across northern latitudes. Euro-peans are workable through much of the day, but conditions are usually marginal. The best window to Asia begins in late afternoon and lasts into the evening. This opening will improve and eventually peak around sunset. Any improvement in solar activity will also help long path propagation, so the morning Antarctic path should be watched.

40 Meters is predictably is great shape, and the higher solar activity will help this band (especially through the winter). For now, we can enjoy a broad opening to Europe and Russia beginning in late afternoon. Signals from the well equipped stations are loud, and the weaker ones are very workable. The Asian opening begins well after midnight (around 0800Z) as sunset approaches Japan. The 80 Meter season is only beginn-ing, but equinox time provides optimum

opportunities for contacts into the southern hemisphere because
atmospheric static is at moderate levels at both ends of the path.

2215. Greatter Seattle DX Packet Cluster Status

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-08 00:00:00 UTC
From: K7UU <kurt.w.heidergott@boeing.com>
Message-ID: <34148957.4D32@boeing.com>
Source record: 31718

September 8, 1997

The DX packet cluster in the greatter Seattle area is undergoing some changes. Here's some orginal plus updated data I've been able to gather since I first placed a note here on the news group:

1. NV6Z is currently off the air but should return as K7PA within a couple
of weeks. (This info is nearly two weeks old as I update this note, haven't heard anything more firm.)

2. Two nodes regularly active and connected together
:
a. W7PKT 145.75 Says Kent when one logs in. My
earlier report said Covington/Maple
Valley)

b. N7FSW 145.77 Burien

3. On the air for the last several days

a. K7XXX 145.73 East Hills of Marysville, I believe tied
to VE7 Nodes but I can't connect to
confirm.
147.00 repeater, via W7LFA, echos
reports
however.

Kurt, K7UU

Dear friends;

I need with urgency, of an information.

It would like that they informed me, on what there is of better quality in United States, with relationship there are mixers of channels of Television in VHF (2 at the 13) and sign amplifiers between 40 and 50 dbs. Please inform, which the ones that are better shielded against RFI. Very Thankful.

PY1VU - MEIRA

Bob,

Why don't we simply ask the FCC to issue a DXCC certificate, and Honor
Roll plaque, with each new license. Then we won't have to worry
about equalizing the Honor Roll for all you whiners.

This notion of making it easier to attain Honor Roll or, #1, is
another example the decline of Dxing.

73,

Gene

There's no doubt it has started with a bang!
Yesterday (8/9/97) Solar flux levels were nearly 120, and sunspot numbers were 57.
28MHz was open from Europe to VE/USA and also LU\PY\CP with signals S9+.

Last Sundays RSGB news stated that the solar flux would drop to the 80's!
It's still rising and should top 120 today!

Time to turn off your PC's and work some dx!

There was also a good 50MHz opening on Sunday via ES to 5A28 for 2 hours.
The expedition worked:
G: GJ: GM: GW: and France. A total of around 30 stations from Tripoli were worked for the 1st contacts with 5A (ARRL Approved).

Gud dx.

2222. Trade SGC 2000 for linear

Newsgroup: rec.radio.amateur.dx

From: donstone@gate.net
Message-ID: <5v32h4$13pa$2@news.gate.net>
Source record: 31724

I have a brand new SGC 2000 150 watt transceiver complete with both analog and adaptive DSP heads (either can be remoted), plus an SGC autotune coupler. This is a perfect setup for a ham/marine radio installation and has never been used. Will trade for the best offered linear amplifier with preference for Alpha (ETO) 87A. 73, Don, W6TNS donstone@gate.net

P.S. I don't have room in cabinet for Henry linear.

2223. QSL Route FO5QE

Worked him last night on 20 meters (at 9pm PDT even). Just got off the I-net and tried all the QSL servers but could not find ADD for him. I lost him before he said what QSL route was (I didnt want to stay on too long to let more of you work him :)).

Anyway if anyone has QSL information for FO5QE Pierre, let me know here or via E-mail.

2226. Callsign databases?

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-10 00:00:00 UTC
From: jamesd@sonic.net
Message-ID: <5v5j2f$sg2$1@ultra.sonic.net>
Source record: 31728

I am new to HF and DX. So far I have only done CW on the 40 meter band and I have gotten 13 states and BC Canada. The farthest contact so far is Florida from California.

Here is my question. The other day I heard a station with the call sign XE2LF, he was in the Extra band so I could not return his call but I was curious about where he was from. I entered his call into QRZ and Buckmaster but they do not give his name and address. Is there a place on the internet that I can use when I start to get forgien DX to know who I have contacted and where to send QSL cards?

Hmmm .. that remembers me to a very nice QSO on 17m, which I had recently.
Someone from the Midwest was CQ-ing. I responded to his call and that was,
more or less, the conversation."

He: "delta kilo three .. what???"
Me: "my call is delta kilo three victor november, do you copy it?"

He: "delta kilo three victor november ... hmm ... where is your QTH?"
Me: "my QTH is a small town near Koeln (Cologne)"

He: ".. hmm .. where are you in Mexico??"
Me: ".. aehm .. I am a german station ..."

He: ".. a german station .. .. you are in Germany and not in Mexico?"
Me: ".. no, I am not in Mexico, I am in Germany"

He: ".. that's in Europe, right??"
Me: ".. you are right, I am in Europe, in the little country of Germany .."

He: ".. hmmm .. I have my beam to Mexico and you are not in Mexico?"
Me: ".. no, please put your beam to Europe, then you will have a much better
copy of me .."

He: ".. Europe, Europe .. hmm .. aeeh ..."
Me: ".. put your beam to the north-east .."

He: ".. wait a moment .. .. .. now I have my beam to the north-east .."
Me: ".. that's fine my friend, thank you .."

He: ".. boy, you are very loud now .. and you are not in Mexico???"
Me: ".. aeeeehmmmm ...."

Love HAMRADIO .. :->)

XE2 is mexico, you should get one of this ham radio maps from ARRL
I believe they are worth the 12$ (?). ICOM had a DXCC list (small
poster)
that dealers were giving for free. It also has a US band plan..

You can find the DXCC list at:
http://oak.oakland.edu:8080/pub/hamradio/arrl/bbs/general/dxcclist.txt
(it is not up to date but it is a beginning)

Look at the ARRL bbs site at
http://oak.oakland.edu:8080/pub/hamradio/arrl/bbs
you will find a lot of other interesting stuff.

My hamradio/DX page has also some links on QSL info, DX and propagation.

The following news story caught my eye.

- - - - - - - - -

Spaniard Alberto Porta has declared himself a country. Porta, who now goes by the name Zush, says he got the idea from a schizophrenic he met in a mental hospital in 1968. "Evrugo Mental State" consists of one inhabitant -- himself -- and he has issued himself a passport so he can move around. Zush has grudgingly adopted a state flag. "I don't need flags and hymns," he says, "but the only way people accept that you have your own state is by using symbols of state. It's purely for diplomatic reasons."

-- From Reuter's news service, 28 April 1996

2239. WA4JTK SAYS HE'LL QRM DXPED

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-11 00:00:00 UTC
From: kalevi@aztec.asu.edu
Message-ID: <5v9io0$sg6@news.asu.edu>
Source record: 31741

From past message, you readers know I am not licensed here in USA (moved from Estonia and am now SWL for time being). so no callsign, sorry.

On yesterday an interesting threat was made by Allan Strause WA4JTK from Florida, who is "net controller" of very insipid mess called a "DX" net - mainly bunch of kids in the sandbox pretending they working DX (WOW! they even had a YV station on the other day!!)

This is same allan Strause who made a death threat one day against ham in Georgia - threatening to shoot this other guy in Jackson, Florida - even stating what weapon he would use, he saying "I'll bring my 38) and then told another ham to mail a pipe bomb to this guy.

ISN'T IT ILLEGAL TO MAKE DEATH THREATS ON THE AMATEUR FREQUENCIES???

Anyway, this buffoon telling EVERYONE on 14247 yesterday he is planning to QRM an upcoming DXpedition and false accusation made against another ham, a "Frank", for making QRM so now Allan making QRM for DXpedition to "you know where", he said. This also illegal to QRM. Anyway, there was a "Frank" on 14267 same time Allan saying this, and this "Frank" was enjoying perfectly friendly QSO with other ham when all this going on below. Allan knows this is truth, yet he try to deny everything.

So, DXers, if you hear QRMing on DXpedition frequencies, just remember Allan WA4JTK made statement he would QRM frequencies like this. Maybe allan Jealous of real DXers going on real DXpeditions and make Allan and his silly litter-box "DX" net look like wanna-bees - great word, by the way, you americans guys use. Hi hi. This is same Allan who tell everyone crazy things like Sri Lanka is in Africa, and like Seborga is same as any state in USA, and who say T88T is San MArino, and who is always insulting Mexicna hams, (he say one time "You would think there's no end to them), and who make up convoluted explanation for Heard Island , like "it's somewhere south west of Florida". I guess DX net on 14,247 teach you lots of "true" things. hi hi. No wonder whole world QRMing this Allan everytime he move his lips on the air!!! (I never heard QRMing of john NOJT and never hear QRM on 14226.5!)

The problem for this WA4JTK is he has puny, puny signal, so I doubt DXpeditions in Pacific even here his insignificant QRM! But now we know where it coming from: FLorida!!!

Greetings,

Below is the URL for a little app named "Beacon Wizard".

Beacon Wizard helps id the new IARU/NCDXF beacons. The new
system is really useful and fun.

Beacon Wizard displays the following information:

o Active beacon
o Distance between your location and beacon
o SPath & LPath Azimith
o Local beacon time
o Sunrise/Sunset UTC time at beacon
o Users local UTC Sunrise/Sunset time
o Gray line flag between beacon and user

Beacon Wizard also has the following features:

o Run on Windows 3.1 and above
o User can edit beacon file to update as needed
o Bring up Windows clock from Beacon Wizard
o Info tip hot spots on display

Please help yourself to this freeware applet from the Wizard URL
below my signature. You will also find KCal and a DXCC list in WinHelp
format.

Thanks & 73,
Jim - KU5S

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 599Rpt, QRZ DX, The Daily DX and Contest Corral from QST. Thanks to all.

MALDIVES, 8Q. Roberto, EA4DX, will be QRV as 8Q7XX until September 21. Activity will be SSB only on 80 to 10 meters. Special attention will be paid to 17 and 12 meters. QSL to home call.

CHINA, BY. The IARU Region III Conference in Beijing will continue until September 13. During this conference delegates will be able to operate using the callsigns BT1ARU or BT1IARU from a special station set up in the hotel where the conference is taking place..

SAINT PAUL ISLAND, CY9. VA3RU, VA3EU and HA5IJ will be QRV as CY9DX from September 12 to 22. They will be active in the SAC and WAE contests as well. QSL via VA3RU.

SABLE ISLAND, CY0. Alex, VE3PIG, is QRV as CY0PIG until September 12. Activity is expected on 160, 20 and 15 meters using SSB. QSL to home call.

ANGOLA, D2. Look for CT4KO to be QRV as D2AI starting September 15. He will be active on 80 to 10 meters, including 24 and 18 meters, using SSB and RTTY. Some RS-12 satellite activity is expected. He will try to schedule some activity on 6 meters. QSL via CT1EGH.

THAILAND, HS. Fred, K3ZO, will be QRV using mostly CW as HS0ZAR from a club station from September 14 to October 6. Look for him on 40 to 10 meters. There will be no newer band activity. QSL to home call.

ITALY, I. Special Event Station IY1EY will be QRV on all bands, using CW, SSB and RTTY from September 20 to 28 to celebrate the

radioeletric experiments made between 1919 and 1936 by Guglielmo Marconi from his ship the ''Elettra'' in the Ligurian Sea. QSL via IK1QBT

TURKEY, TA. The Telsiz Radyo Amaterleri Cemiyeti club will be QRV on all bands until September 21 as YM4WAG for the World Air Games. QSL via TA1KB.

CAMBODIA, XU. Yoh, 7L1MFS, and Hiro, JA2EZD, will be QRV as XU2C and XU2A, respectively, from September 13 to 15, using CW, SSB and RTTY. QSL to home calls.

WILLIS ISLAND, VK9W. The ODXG DXpedition has begun and operators are signing VK9WM. Look for VK9WY as well. Operations are expected to continue until September 22. QSL both calls via VK4FW.

THIS WEEKEND ON THE RADIO. The ARRL September VHF QSO Party and the Second Annual American and Canadian Islands and Worked All Europe Phone Contests should keep you active this weekend. Please see September QST, page 105 for details.

Hans:

Only if he joins the ITU, gets himself a callsign prefix, and then issues
himself an amateur radio license. He'd also have to meet all the other
DXCC requirements.

Hmm .. but only, if I had seen my laywer first.

OK, guys, it's weekend here (local time: 3:30 pm) and this evening we
have a festival in our little town in Germany, not far away from Koeln.
A local brewery will put out 180 different kind of beer. Will try and
test 20 of glases .. but then someone has to take me home .. :->)

Have fun ..

Allen is referring to Frank Smith, AH0W, and the upcoming DXpeition to Kure Island. I'm sure that if QRM starts someone is going to look closely at Allen and possibly pay him a personal visit to verify it. If he ever did it his net would be over as retalliation took place.

I believe it was last week I heard the words to K4YE that they would meet at a mid point in FL and that both shouls bring their guns along. Nothing like being stupid in arguing or proclaiming nonsense that you'll never do.

In a message dated 97-09-12 09:46:58 EDT, you write:

<< From: kalevi@aztec.asu.edu (KALEVI KOTKANEN)
Subject: WA4JTK SAYS HE'LL QRM DXPED

From past message, you readers know I am not licensed
here in USA (moved from Estonia and am now SWL for time
being). so no callsign, sorry. >>

I would suggest that this newsgroup is for topics of interest to DX'ers.

Character asassination does not fall into that category whether you like or dislike Alan or his net. Most Estonians that I know are honorable people and would not step that low.

Incidentally if you have a tape recording of the alleged threat that you mention, you should turn it over to the proper authorities, (i:e: the FBI).

well, this seems like working 2E stations who are not aware of other
countries than England..... some have never heard of the prefix LA,
and sometimes somebody believe that all callsigns have 3 letters, why
somebody never understand they have more than two letters, I am often
called "LA8AKA" by Germans.... and a few "amateurs" could never hear
more than two letters, they believed my callsign was G5BF instead of
G5BFV

I recently came across a book published by Fielding Worldwide (travel guides) titled _The World's Most Dangerous Places_ by Robert Young Pelton, Coskun Aral & Wink Dulles.

The book has some very interesting and useful information for Dxers and Dxpeditioners, including coverage of the Spratly Islands. You may want to check it out. Price: U.S. $19.95, Can. $25.95, U.K. L13.95 and Aus. $26.95.

BTW, I found the info about ST & ST0 helpful to understanding the situation in that part of the world.

73 & good DX, Robert KD7H

Depuis quand un FT840 peut &#65533;tre achet&#65533; par un CBiste. Si mes souvenirs sont exacts il est ill&#65533;gal en France d'acheter et de vendre un appareil de radio-amateur pour du CB.

Il y a assez de QRM comme &#65533;a sur les bandes pour qu'un CBste s'amuse avec 100W HF sur le d&#65533;cam&#65533;trique.

Les PTT vont vous couper les ... oreilles mon ami. :)

(remove NOSPAM from my e-mail to reply)

Dear friends,
I'm looking for someone who could join me on the Lord Howe Is. (VK9L) during
CQWW C - CW part in November. Departure is planed for Nov.25th ex Sydney.
Costs: $2500US per person incl. flight, 7 day accommodation (nothing fancy, but right on the beach) and breakfast. The main goal of this mini DXpedition is low-band activity before and after the contest. Do not expect thousands of qso's and big pile-ups! There will be no easy contacts -only blood and sweat!
To qualify for this masochistic journey, you must be a cw freak and low-band maniac. This expedition means only hard work without public reword and, even worse, most likely we will operate under my callsign: VK2ICV/LH. Operating environment is unknown and chances for failure are extremely high so everything could go wrong! But if we are lucky, we will return to Sydney with empty pockets and nice long list of Europeans and US East coast in the log...
I also urgently need following:
1. Relevant information from someone who had operated from Lord Howe Is,
2. Someone (in VK) who is willing to hire: light mast for a tribander; coax and vertical for 80/160;
Your general input is welcome, too.

I must have your answer as soon as possible, definitely before the Tuesday 16th of September.
Thanks,
Nick VK2ICV

ACHETEURS EVENTUELS ATTENTION!
Il est absolument interdit d'utiliser ce type d'appareil en émission
sans autorisation.
La mention "à tous" précisée par le vendeur est donc MENSONGERE, et
pourrait, s'il insiste lourdement en postant ce message de façon
répétée dans de multiples groupes, entraîner des réactions de nature
judiciaire. Par ailleurs, une action va être entreprise auprès de son
fournisseur d'accès Internet.
Seuls les radioamateurs titulaires d'une licence délivrée par
l'Administration chargée des radiocommunications peuvent faire de
l'émission sur les bandes couvertes par cet appareil.
Dans le cas contraire, il existe un risque de confiscation du
matériel, d'amende élevée, et même de peines plus lourdes (voir le Code
des Postes et Télécommunications).

Ohio/Penn DX Bulletin No. 322

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 322
BID: $OPDX.322
September 15, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AD1C, WB2YQH & WB2RAJ The 59(9) DXReport, NG3K, W3UR & The Daily DX, N4GN, W5KFT, W6RRG, KH7U, N8AC, W9XY, 9K2HN, CT1EGH, G3SWH, G3SXW, G3USF, G4BUE & DX News Sheet, ON6TT, PA3DMH, PA3DZN, PY1KS, VE9DX, VK2ICV and ZL2AL for the following DX information.

5H, TANZANIA (and Zanzibar). Phil, G3SWH, sent OPDX the following update: "Hi there, and thanks for reading this. Just a reminder that I shall be active on CW only all bands from 80 to 10 metres, conditions permitting, between 16th and 22nd September from mainland Tanzania as 5H3/G3SWH and between 22nd and 29th September from Zanzibar Island (IOTA AF-032) as 5H1/G3SWH. I shall be using one of the IOTA Committee's Yaesu FT-900AT transceivers with 100 watts to wire antennas. This is a holiday operation, and activity will probably be restricted to 3 or 4 hours per day. Specially printed QSL's will be available either from my home address:
21 Dickensons Grove, Congresbury, Bristol, BS19 5HQ, United Kingdom,
with SAE and adequate return postage or via the RSGB bureau.
73 and I hope to work you during this trip. Phil G3SWH"

7th ANNUAL W5 DX BASH. The DX BASH will be held on October 3-4-5, 1997 at Lake Buchanan near Austin, Texas. This is a very informal, relaxed, get together for all DX'ers, contesters, antenna nuts, VHF contesters, big guns and little pistols. All are invited. Details can be found at the following website: http://www.dxer.org/w5bash.html. SPECIAL NOTE: OPDX InterNet Subscribers will receive the complete details and press release as an additional bulletin.

9A, CROATIA. The DXNS report Helmut, DF9NW, will be active until September 21st as 9A/DF9NW/P from Murter Island (non-IOTA) which is near Sibenik. It is believed to be on the air for the first time on HF. QSL to homecall.

AM9, MELLILA. "The 59(9) DXReport" states EA9 stations may use the AM9 prefix to celebrate the 500th Anniversary of their town. The length of activity and band operations were not provided.

CY9, SAINT PAUL ISLAND. The CY9DX DXpedition which was to be active from September 12-22nd, had to delay their operation. According to the CY9DX Web page (http://www.dipole.com/cy9dx.html):
CY9DX-NEWS: Bad news Good news: We had to delay our trip because 2m operation is not ready and a couple of important problems have to be solved. The new schedule date is 23 Oct.-02 Nov. '97. Because of this delay we are going to be able to prepare ourselves better. And don't forget CONDX is getting better and better.

D2, ANGOLA. Mr. Dias, CT4KO, will be active as D2AI from Luanda now until at least September, 1998. He will be using a Yaesu FT-920, a Log. beam for 3-30 MHz, dipoles for 40/80 meters and a yagi for 6 meters. Suggested frquencies/modes:

SSB - 3797, 7050, 14202, 18165, 21302, 24925 and 28402 kHz
RTTY - 14085, 18102, 21085, 24895 and 28185 kHz

Also look for activity on RS-12/13 satelite and possibly some scheduled 6 meters operations. QSL via CT1EGH.

HS, THAILAND. Fred, K3ZO, will be active until October 6th as HS0ZAR from a club station. His activity will be mostly CW (but some SSB will take place if conditions are good) on 40-10 meters. Check 40 meters between 1000 and 1300z and 15 meters after 1400z. There will be NO 160/80 meters or WARC bands activity. Special permission is only given for those bands for special occasions. QSL to the bureau or direct via K3ZO.

JY8, JORDON. Bob, W9XY, will once again be going to Jordan to visit with friends and plan to reactivate his call sign as JY8XY during the stay. His arrival date is October 6th, and he will be there until October 27th. There are two stations readily available to him. One is a TS-830 with a Clipperton amp using a TH6 at 60 feet, and wires for the low bands; the other is a TS-830 with TH3 at 60 feet. Please note that overnight arrangements must be made to be able to work the (local morning) openings on the low bands, so check primarily on Friday and Saturday nights for his sunrise openings. Also, there have been some TVI problems in the past, so he will probably not use the amp during evening 'prime-time' hours. Suggested frequencies are as follow:
CW: 1826, 3505, 7005, 14025, 21025, 28025
SSB: 14195, 14240, 21295, 28495

Additionally, please note that Bob will ask local operators to provide more WARC band and RTTY activity as requests for operation for these endorsements have been received. QSL w/SASE to home callsign or via bureau: Bob Johnson, W9XY (ex: WB9YXY), W5514 Grouse Drive, Endeavor, WI 53930.

NEW BOARD OF DIRECTORS. The Northern California DX Foundation is pleased to announce the addition of two new members to its Board of Directors.

They are Glenn Vinson, W6OTC; and Al Burnham, K6RIM. The complete list of Officers and Directors is as follows: K6ANP/President, W6RGG/Vice-President, NW6P/Secretary, W6OSP/Treasurer, K6TMB/Director, K6RIM/Director, W6OAT/Director, W6DU/Director, N6ST/Director, W6OTC/Director and W6ISQ/Director. The Board of Directors receives counsel on various issues from these appointed Advisors: W6WB, WZ6Z, K6KR, N6EK, W6RJ, W6NL, W6RQ, W6CF, K6DC N6OJ and K6KEO. Beacon Project Manager is W6ISQ. Webmaster is K6KR. A bi-annual newsletter, edited by Steve Thomas, N6ST, is mailed to all Foundation members.
The Foundation maintains a library of DXpedition and operating slide and video shows which may be borrowed by clubs for presentation at their meetings. For information on their availability, please contact Ron Steiner, K6KEO, at 3154 Dominic Drive, Castro Valley, CA 94546-1938. The inclusion of an SASE will hasten your receipt of his reply.
For further information on the Foundation, and to send e-mail, please check out their web site at: http://www.ncdxf.org
Mail may be sent to: NCDXF, P.O. Box 2368, Stanford, CA 94309-2368

OOOPPSS DEPARTMENT. In OPDX.321 there are a few corrections to report. Please note that the callsign for Michael Goode is N9NS not N9NW and the Japanese operator's name is Yuji Yoshitani not Yuhi. Also, we mentioned that the National Contest Journal website can be found at: http://www.waterw.com/~ncj/xpedit.htm
This is NOT the address of the NCJ as a whole. It is the address for Dennis's Contesting/DXpedition home page for the magazine. The magazine can be found at: http://www.waterw.com/~ncj/

OH0, ALAND ISLANDS. The following press release was received by Tim, N4GN, from Martti, OH2BH: "THE SCANDINAVIAN ACTIVITY CONTEST - The famous OH0W contest site was given a complete tuneup during the exceptionally nice summer and the station is now ready for another contest season. The equipment includes the recently introduced, highly advanced, computer-controlled Kachina 505DSP transceiver fed into a multi-directional yagi array. See the Kachina Web Site at: http://www.kachina-az.com for more information.
Finnish Antenna Ltd--the duo of OH1JT and OH2HE--has installed a lineup of monobanders and ferrite broad-band, high-power splitters.

The operating team of Martti, OH2BH, and Jukka, OH2MAM, is now ready to compete against their fellow contesters in the Nordic countries. They welcome all contacts and specifically those semi-rare ones that are always highly appreciated in any contest. Their station is fully equipped to quickly QSY for multi-band QSOs. The station callsign OH0BH will be used as follows:
SAC CW contest Sept 20, 1500 UTC to Sept 21, 1800 UTC
SAC SSB contest Sept 27, 1500 UTC to Sept 28, 1800 UTC

All QSOs will be confirmed with colorful QSLs through OH2BH.

QSL INFO AND NEWS.....
Michael Taylor, NF4W, is interested in being a QSL Manager for a DX station. He works a very limited schedule and has the time and ability

to provide this service. Michael can be reached via E-mail at:
nf4w@mindspring.com

The D25L logs for the IARU HF Championship contest are now available
on the log search WEB-site page at:
http://www.igr.nl/users/pa3dmh/logs/log_search.html
On an added note: Alex, PA3DZN, reports he will be leaving Angola on
September 15th, and heading back to PA-land for about 2 weeks before
taking up another assignment.

Andy, VE9DX, reports their contest station has a Web page up and
running with log search and QSL possibilities. The logs for last
years CQWW SSB and CW contest are there. This has been up and running
for about a year now. The address is: http://www.inetmarket.com/ve9dh/
He also mentions they will again be active and use the callsign CI9DH
for the CQWW SSB Contest, but is not sure yet what the CW call will be
(it will be something 9DH). The page contains photos of the SSB and
CW operation of last year's contest plus a few other goodies.

Roger, G3SXW, reports to OPDX that there has been a change for QSLs
for 1997 5V7A operation. QSLs will now go to GM4FDM and not to GM4AGL
as previously announced. Direct replies can be requested (with return
envelope and postage) via: Tom Wylie, GM4FDM, 3 Kings Crescent,
Elderslie, Renfrewshire, Scotland, United Kingdom or via RSGB bureau.
E-mail requests for bureau replies go to: wylie@colloquium.co.uk
E-mail requests should show: your call-sign, date, time, band. E-mail
acknowledgements are not promised. Any queries about the 5V7A operation
go to: g3sxw@compuserve.com

Hamad, 9K2HN, reports he has just finished with bureau cards (1220
cards for 9K2HN) and they will be in the bureau the Monday after the
WAE Contest. He has also sent out about 350 QSLs for 9K2F via the bureau
last week. If there is any problem, please contact 9K2HN direct via
his E-mail address at: 9k2hn@moc.kw

R1, ANTARCTICA. Valentin "Wally", R1ANZ, is active from Mirnyy Base in
the Antarctica around 14190 kHz after 0330z (short path to U.S.). Also,
check around the same frequency around 1130z (long path to the U.S.).
He has also shown up on 40 meters CW around 1000z. QSL via RU1ZC.

S9, SAO TOME. The DXNL reports that Hugo, S92AF, hits the airwaves on HF
and RS12 from September 17-30. He may also activate Principe (AF-044).
QSL via his homecall HB9AFH.

SO, WOLIN ISLAND (Update) As we mentioned last week in OPDX.321, a German
group will operate as SO5OE/1 from this Polish island starting around
2000z on October 3rd, and last until October 6th. OPDX has now received
the list of operators which include: DK20E/Mike, DL7IQ/Birgit, DL7IO/Holger,
DL7VRO/Fritz, DL7VYL/Gerda, DL7UBA/Roy and DL1YFF/Hans-Juergen. QSL via
DL7VRO.

"WHO'S WHO ON THE TOPBAND". Nicholas, VK2ICV, states check out the
following WEB site: http://www.watch4you.com/160

ZL7/ZM7, CHATHAM ISLAND. This island will be activated October 22-27th, on all bands by a team from New Zealand. There will be four stations active most hours of the days and on most bands. During the CQWW SSB contest, the callsigns to be used will be ZM7A and ZL7AA. These callsigns will be used for the few days before and after the contest. The team will consist of: ZL2AL, ZL2HU, ZL2TT, ZL2ST, ZL2RR, ZL2LF and ZL2GI (YL op). Some of the operators are part of the team that activated ZL8RI last year. CW will be not be used during contest time. Yagis will be used and WARC bands will be activated. There is no Commercial sponsorship of this DXpedition. Costs are borne by the members of the team. QSL ZL7AA and ZM7A via: Lee Jennings, ZL2AL, PO Box 54, HASTINGS 4201, NEW ZEALAND or via ZL2AL CBA or bureau.

ZV1/ZW1/ZX1, ILHA GRANDE ISLAND (Brazil). This Brazilian island (IOTA SA-029, DIB 11) will be on the air from October 3-5th. Three operators will be active on CW/SSB, 80-10 meters plus plus 6 meters and VHF. It is important to pay close attention to the callsigns being used. Look for ZW1A to be operated by PY1OB/Fabio (SSB). Also look for ZX1A to be operated by PY1SL/Soni (CW) and ZV1A to be operated by PY1JH/Campos (6 meters, VHF and UHF). QSL ZW1A, and QSOs made with ZV1A on SSB via PY1OB's CBA or via Labre-RJ, P.O. Box 58, 20001-970 - Rio de Janeiro - Brazil. QSL ZX1A, and QSOs made with ZV1A on CW via PY1SL's CBA or via Labre-RJ, P.O. Box 58; 20001-970 - Rio de Janeiro - Brazil.

ZW2, ILHA DAS COUVES (COUVES ISLAND, BRAZIL). Look for activity by ZW2E from this Brazilian island (IOTA SA-028, DIB 70) during October 8-12th. Operation will be on 80-10 meters CW and SSB. Check the usual IOTA frequencies. QSL via PY2YW.

Cushcraft A3S Antenna with A743 40 meter add-on. Yaesu G-450XL Rotor and Controller. Radio Shack Scanner Antenna RS 20-013. Cables, mast, etc. I have box for Rotor and manuals with receipts for all items. All in excellent condition and less than 1 year old. I must move. I originally paid about $800 total. You must take down these items from my Rohn 25G 50' tower in Columbus OH. I do not climb. $200 cash only.

I was on the receiving end of this kind of idiot two years ago. I was
operating as KG4TJ from Guantanamo Bay Cuba...not the rarest of DX,
but I put Gitmo on 80 and 160 CW which is rare...for the five days I
was there on U.S. Gov't business (After I was done with my days work).
This was a serendipitous operation, I had a friend who had been there
before, knew how to make sure the ticket was waiting for me, and
granted me access to the club facilities there. I gave nearly a 1000

QSOs , mostly in those two bands. As I am operating, some idiot decides for himself that I am a "pirate" and starts jamming me with sending "Pirate" on my frequency (in morse). Now the potential for this operation was announced shortly before it occured, I certainly had ample proof that I was there (I have a picture of me with the entire Guantanamo Radio Club) and several responsible hams, all U.S. Armed forces commissioned officers could verify the legitimacy of my operation, if need be. It is hard to challenge someone in morse, but I did, by announcing that upon my return to the states he could contact me via my stateside address, an I would produce documentary evidence of this operation. Licence, photographs, witnesses, air tickets, government vouchers for my official travel. Ah I did long for the bands of 40 years ago when virtually all operators were gentlemen (and ladies) and among gentlemen, religion and politics and jamming were never discussed on the ham bands.

ACHETEURS EVENTUELS ATTENTION!
Il est absolument interdit d'utiliser ce type d'appareil en émission
sans autorisation.
La mention "à tous" précisée par le vendeur est donc MENSONGERE, et
pourrait, s'il insiste lourdement en postant ce message de façon
répétée dans de multiples groupes, entraîner des réactions de nature
judiciaire. Par ailleurs, une action va être entreprise auprès de son
fournisseur d'accès Internet.
Seuls les radioamateurs titulaires d'une licence délivrée par
l'Administration chargée des radiocommunications peuvent faire de
l'émission sur les bandes couvertes par cet appareil.
Dans le cas contraire, il existe un risque de confiscation du
matériel, d'amende élevée, et même de peines plus lourdes (voir le Code
des Postes et Télécommunications).

2275. FS: 5CX1500 Eimac NEW tube !

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-15 00:00:00 UTC
From: Dan W7RF <radiodan@earthlink.net>

I have a BRAND NEW in the box 5CX1500 Eimac tube that I bought a few years ago for when my Henry 4K needed a new tube. I sold the amp (working just fine) with the old tube in it and never needed the NEW tube.
It runs over $1300 new from Eimac.
This tube has been and is still in the possession of Ted Henry of Henry Radio. I kept it there because I thought I would put it on consignment. Well they no longer do Ham Radio as a retail business, so I offer it here. You can call Ted and he will vouch for this tube!

I ask $475 plus shipping.

If you're tired of duds or other junk tubes, you will be pleased to solve your tube problems with this NEW tube. Probably last as long as you do!

73, Dan

Another QSL question.

I made contact with a Caracas station on Sept. 14, 1997 at 22:05/z and have his call tape recorded.

What I have for sure is YV5 EH but there is some potential for another letter. I have looked up variations of the call and came up with two stations in Caracas: YV5EH (Hernandez) and YV5LEH (Pratko).

If someone worked the same station (note date and time frame) maybe you could advise me as to which one is correct.

Thanks to those who responded to my Croatia question.

Hello all,

Having recently started vhf dx I'm after a source for beep tone kits, you know, you de-key the mike and a beep is transmitted. Pretty good for marginal conditions which is most of the time with 2.5 watts! I'm after the straight beep, nothing fancy like a K tone, and preferably one that goes inside the mike.

I just spoke with Victor Keller XE1VIC about this. (I was on the XF4M team with him in 1994). The garrison there (Armada pesonnel of approx. 40-50) is okay - no problems. Vic was able to place a satellite call to the island and will be checking on them again tomorrow morning. If anything different, I'll post the info here.

|>

I thought that M calls were used only for contest calls, like M7D for example.
Do they now issue regular M calls?

2289. What HF Multi-Band Beam would YOU recommend??

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-16 00:00:00 UTC
From: John@datasafe.demon.co.uk
Message-ID: <341f9f58.7719611@news.demon.co.uk>
Source record: 31791

I am looking for a new HF beam and was considering the TH7 or TH11DX
from Hygain.

I would appreciate any views or recommendations.

Regards

John

PS What rotator?

.....
et moi je r�plique en disant ...

Il est vrai que la justice a autre chose a faire que de sanctionner des
internautes qui poste des message de mani�res r�p�tes...!!!!
la seule chose envisageable pour le s�vices juridique de HOL...ce serai de
radier mon abonnement.....et encore...je suis pas certain de ca....!!

enfin.....Mr Jacques Assael a un titre: il me disais recement qu'il �tait
" En tant que responsable national des probl�mes d'intrusions
radio�lectriques sur les bandes
de fr�quences attribu�es au Service d'Amauteur, "(couper/coller)...

Ce doit �tre le seul titre qu'il n'est jamais eu.....tout comme moi
l'orsqu'a mes 24 ans...j'ai eu mon BTS .....jetais tr�s fier ...!!!

J'ai marque.."a tous" dans des news groupes de Radio ham.....ce qui voulais
tout simplement dire " a tous ..messieurs les RA."...c'est �vident ...
et m�me lorsque que je marquais " Offre destin�e � tout le monde "Radio
Amateurs, Cibistes, M�caniciens, plombiers, Electriciens...etc...!!!"

Jacques Assael consid�re peut-�tre que toutes les personnes qui serai
"Cibistes, M�caniciens, plombiers, Electriciens...etc...!!!" ne peuvent pas
�tre "titulaires d'une licence d�livr�e par l'Administration charg�e des
radiocommunications"
cette licence n'est absolument pas r�serv� a une �lite....!!!

d'autant plus que je suis absolument pas habilit&#65533; a contr&#65533;ler les acheteurs potentiels...et je le veux pas .....j'ai vraiment autre chose a faire moi !! que d'emmerder les internautes ....!!!

bon...voil&#65533;..pour ce soir !!!

bye

Tophi !!

DX Bulletin 40 ARLD040
From ARRL Headquarters
Newington CT September 18, 1997
To all radio amateurs

SB DX ARL ARLD040
ARLD040 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, The 599Rpt, Richard, VK2SKY, QRZ DX, DXNS and Contest Corral from QST. Thanks to all.

RWANDA, 9X. Andy, RW3AH, is QRV as 9X0A. QSL to home call.

GAMBIA, C5. Mako, JA1OEM, will be QRV as C56/JA1OEM September 25 to October 9. Activity is expected on 40 to 10 meters using CW and SSB. QSL to home call. Brendan, G0UCT, is QRV now as C5DI until September 25. QSL to home call.

MOLDOVA, ER. Chris, K4PC, will be QRV as ER0PC September 28 until October 12 while on missionary work. He hopes to be active on 160 to 40 meters, using CW, SSB and RTTY as time permits. QSL via K4PC.

REUNION, FR. Hito, JA8FCG, Yasu, JA8NFV and Mitsu, JR8FEK, will be QRV as FR/homecalls on 160 to 10 meters until September 20. There may be some RTTY activity as well. QSL to home calls.

JORDAN, JY. Peter, DK1RP, is QRV until September 23 as JY8RP from the Dead Sea. He is active on all bands using CW and SSB. QSL to home call.

ALAND ISLANDS, OH0. Martti, OH2BH, and Jukka, OH2MAM, will be QRV as OH0BH from September 20 to 21, and again from September 27 to 28, in the Scandinavian Activity CW and SSB Contests. Activity is expected on all bands. QSL via OH2BH.

ANTARCTICA. Wally, R1ANZ, is active from Mirnyy Base and can be found around 14190 kHz after 0330z. He has also shown up on 40 meters using CW around 1000z. QSL via RU1ZC.

WESTERN SAHARA, S0. S0RASD has been QRV on 20 meters between 1730 and 1800z working into Europe. QSL via EA2JG.

GABON, TR. Jean, TR8XX, is regularly QRV using CW on 40 meters at 0600z. After which, he will QSY to 30 and 20 meters. QSL to home call.

AUSTRALIA, VK. The Wahroonga Amateur Historical Radio Association will operate Special Event Station VK2WAH on September 22 to commemorate the first wireless message sent directly from the United Kingdom to Australia. QSL as directed by operator.

PITCAIRN, VR6. Meralda, VR6MW, has been QRV on 20 meters at 0200z. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL 10 Ghz and Up Cumulative Contest, the Number 1 QRP Afield, Air Force 50th Anniversary QSO Party, Washington State Salmon Run, The Scandinavian Activity CW Contest, and the latter part of the YLRL Howdy Days operating event are scheduled for this weekend. Please see September QST, page 105 for details.

CatScan provides computer control for the Yaesu FT890 (and similar)
transceivers. It complements the facilities found on the radio, and adapts
the radio better to a radio facsimile monitoring environment.

*** It provides a simple way to use a Station database, and to browse the
bands selectively.

*** It has Advanced scanning facilities, to help you find the best signal on
the bands.

*** It has Short-cuts to otherwise awkward functions, such as Direct
frequency key-in, Write memories to radio and Side-band/filter toggle.

*** It has a Command line interface so that scripts can be used to control
the radio from within other programs.

It is free, and available for downloading at:
http://www.geocities.com/SiliconValley/2504/catscan.htm

73's from Brian.

SB DX @ WW $OPDX.323P
Ohio/Penn DX Bulletin No. 323

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 323 (Packet Version)
BID: $OPDX.323
September 22, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & WB2RAJ The 59(9) DXReport, WB4UBD, N5KO, AC7DX, W7TSQ, AG8L, KG8CO, AH0W/OH2LVG, 9A6JYL, DL2HEB, DL7UFR, DL7IO, EA1QF, F6AJA, G4BUE & DX News Sheet, G4ZVJ, JA1ELY, JH8RZJ, T77WI, VK9LX, ZP5FGS and ZS6NW for the following DX information.

3B8 & 3B9, MAURITIUS AND RODRIGUEZ ISLAND. Look for Toshi, JA1ELY, to be active from 3B8 Mauritius before he goes to 3B9 Rodriguez. He hopes to be active from 3B9 by September 23th. He will be joined by Roddy, 3B8DL, and the two operators will be active as 3B8DL/3B9. Activity will be on SSB, CW and RTTY with operations on 80-10 meters. Activity will last until the morning of September 28th. QSL via JA1ELY.

3C0, ANNOBON ISLAND (DXpedition update). Angel, EA1QF, 3C0DX Annobon DXpeition 1997 Coordinator, reports his team has decided to suspend the expedition to Annobon (which was to take place during October). The complete press release will be provided to all OPDX InterNet Subscribers as an additional bulletin.

3D2, ROTUMA ISLAND. Well known DXer Ron, ZL1AMO, who is currently active from Fiji as 3D2RW, was heard saying he was once again trying to make plans and arrangements to go to Rotuma.

9A97WPC (SPECIAL EVENT STATION). The station will be active during the 6th World Puzzle Championship (with countries-participants from all over the world) being held in Koprivnica, Croatia, from September 23-28th. Amateur Radio Club of Koprivnica and its members will activate the special event station 9A97WPC on all HF bands, including WARC bands on CW and SSB. A special full color QSL cards will be available to all "Log-in QSOs". QSL to the bureau or direct (Callbook adress) to QSL Manager 9A3KQ.

9G, GHANA. A group of British operators will be active during the 1997 CQWW CW Contest from Accra. They will be active as 9G5VJ as a Multi Op/ Single Transmitter category. They plan to be active on all bands 160-10 meters. The team of operators will be: Steve/G3VMW, Ken/G4RWD and Andy/G4ZVJ. Outside the contest, between November 21st and December 2nd, the operators will sign with their own 9G callsigns, concentrating on CW on the WARC and low bands. Please QSL via home calls: 9G5VJ via G4ZVJ, 9G5SW via G3VMW and 9G5WD via G4RWD. For more information check the following WEB site: http:\\www.bramham.demon.co.uk

9M8, EAST MALAYSIA. JH3GAH, JR3WXA and JA2SWJ will be active from Miri, Sarawak, October 23-26th. They will sign 9M8TG for CW/RTTY and 9M8YY for SSB. The trio hopes to give a new one for low banders and WARC chasers.

C5, THE GAMBIA. Mako, JA1OEM, will be active from here between September 25th and October 9th, as C56/JA1OEM. He will be in the city of Banjul. By the way, Mako is 73 years old and you may remember working him last year from PZ and FY. Activity will be on SSB/CW with operations on 40-10 meters. He does prefer CW but operates at a very slow speed. QSL to his home callsign.

FR, REUNION. Jan, N3NW, will be here for the CQWW RTTY Contest (September 27-28th). His callsign will be FR/N3NW. He plans to enter as a 15 meters single band entry. QSL via N3NW. All contacts will receive a card via the bureau.

FP, MIQUELON. KG8CO, N8CC, K8AEM and W8MC have announced that they will be operating from here October 23-28th. They will be an entry in the 1997 CQ WW Phone Contest running Multi/Multi (callsign or callsigns were not provided, we will keep you updated). QSL via K8AQM.

HC8, GALAPAGOS ISLAND. Operators N5KO, VE3EJ, W6NL, K6BL and HC1OT have announced that they will be active as HC8N during the CQ World Wide SSB Contest as a Multi/Single entry. QSL via AA5BT.

HR, HONDURAS. Sigi, DL7DF, and his crew (Tom/DJ6TF, Tom/DL2RUM, Tom/DL7BO, Frank/DL7UFR and 3 YL's) will start Sigi 10th DXpedtion from October 17-29th. They plan to operate especially on the low bands and on CW, but SSB and RTTY are also possible. They will also be in the CQWW DX SSB Contest. They will be using 3 tranceivers with amplifiers with the following antennas: 3 element beam for 20, 15, 10m, 6 element beam for 20, 15, 10m, 3 element beam for 17 and 12m, GP for 30, 40, 80 and 160m and beverages to Europe and Japan. There was NO CALLSIGN provided, but QSLs will be via DL7DF.

IOTA NEWS.....
Ulli, DL2HEB, will be on the air from Laes Island (EU-088) from the September 27th to October 5th. Activity will be mainly in CW and QRP using the call OZ/DL2HEB/p. Look for him on the following frequencies: 14040, 14060 and 14260 kHz. He will also try to use the digital modes (RTTY, Amtor, Pactor I and II). QSL to his homecall DL2HEB directly, or via the buro.

Giancarlo, T77WI, will operate from IOTA OC-046, Moorea Island, from September 29th to October 10th. Activity will be mainly SSB, with a possibility of some CW. QSL via I0LTX via CBA (for this operation ONLY). Giancarlo is not sure the assigned call-sign (it might be /FO8 or a FO8?? temporary call).

Ryozo, JH3JYS, will stay on Yonaguni Island (AS-024) in Okinawa for two months beginning October 1st. He wants to provide this rare IOTA number to as many IOTA chasers as possible. QSL to JH3JYS direct or bureau. Ryozo Goto: A9-202, 5 Fujishirodai 3 chome, Suita, 565-0873 Japan.

JG8NQJ/JD1 QRT'ED BY MOTHER NATURE. Take, JG8NQJ/JD1, in Minami Torishima (Marcus), has reportedly been hit by typhoon #20, which hit the island, and his shack was swallowed up by mountainous sea waves (10 meters high). For more information, check the following WEB site at: http://www.asahi-net.or.jp/~nb8k-mtd/

KH7K, KURE ISLAND (Update). Frank, AH0W/OH2LVG, member/teammate of the Midway-Kure DX Foundation, sent out a final press release on the upcoming DXpedition stating a special callsign has been issued for use by this DXpedition: K7K (Kilo Seven Kilo). OPDX InterNet Subscribers will receive the complete press release as an additional bulletin.

KP2 & WP2, U.S. VIRGIN ISLAND. Dave, AG8L, reports he will be active from the Windwood contest station for a week in October, and a week in November (no specific dates mentioned, probably around the CQWW contests). He will be using two callsigns: KP2/AG8L outside of contests, and WP2Z for contests. Activity will be on 160-10 meters, including WARC bands. Dave states he now has the NOVA satellite tracking software, so he will make an effort to get on RS-12 as time permits. The QSL routes are as follows:
QSL KP2/AG8L via KM6ON (now NN6C)
QSL WP2Z via KU9C (This is the new standard route for WP2Z)
Inquiries or comments should be send to AG8L@aol.com

OKDXA 1997 DX BANQUET. The Oklahoma DX Association (OKDXA) proudly announces the 1997 OKDXA DX Banquet featuring presentations by OKDXA member and DXpeditioner Frank Smith, AH0W, and Bill Kennamer, K5FUV, Manager of the ARRL's DXCC Program. It will take place November 8th. The banquet facility will be provided by the Broken Arrow Church of Christ, located at 505 E. Kenosha in Broken Arrow, OK. SPECIAL NOTE: OPDX InterNet Subscribers will receive the full detailed press release as an additional bulletin. For the latest banquet details, check out the OKDXA web site at: http://www.pcok.com/~n5ogp/okdxa/

QSL INFO AND NEWS.....
The 5A28 Log Search is now active on the 5A28 Austrian DXpedition web page located at: http://www.point.at/point/5a28.htm

Jean, F6AJA, reports that he has the HP1XBI logs up to August 25th and all direct request are on the way.

The following calls have a new QSL Manager of AC7DX: AH2BE/KH9, HL9MM, 8P9GI and KB6DAW/KH2/KH6/KH9. The new manager's address is: Ron Lago,

POB 25426, Eugene, Oregon 97402 USA

N7QXQ/HR6 CARDS. Bob, W7TSQ, reports that he has been receiving several cards for Gary without an SASE or postage. All direct requests will be answered, BUT the ones without SASE or postage will be sent by the bureau!!

Frank, ZP5FGS, has asked OPDX to report to its readers that K7OXB is not his QSL Manager and has never been. The wrong route was released a couple of years ago, then published in the German "QSL-Routes", but was later corrected there. Frank does not have a QSL Manager and all QSL cards are answered via the bureau or direct to the callbook address: Francisco Schubeius, P.O.Box 1059, Asuncion, PARAGUAY. To obtain a skeds with Frank or QSL help with ZP-stations, send inquires via E-mail at: fgs@infonet.com.py

VK9WM QSLS. It was reported that the group on Willis Island has asked that everyone QSL to: ODXG Willis Effort, P.O. Box 929, Gympie, QLD 4570, Australia (instead of VK4FW). Check for updates and details on their website.

SO1/SO5, WOLIN ISLAND (Update). NODXA member, Holger, DL7IO, provided OPDX with another update to their upcoming activity from this Polish island (Please refer to OPDX.322 and OPDX.321). Holger states that they have received a second callsign, SO1HH. So the German team will now use SO5OE/1 on SSB and SO1HH/EU132 on CW. They have also received permission to use the hotel roof (5 floors up) for their antennas. They will try to have two stations on the air all the time using FT-990's (with a little help) and R7, HF6V, dipoles for HF. Also, they will have 2m/70cm all mode equipment there which should be of some interest for Europe. Remember, activity will be October 2-5th. QSL route is DL7VRO. Via the bureau is "OK". It is also "OK" to send QSL request via E-mail to "DL7VRO@aol.com" and they will send cards via bureau.

TI, COSTA RICA. "The 59(9) DXReport" states K6CT and K9VV will be active as a Multi-Single entry in the CQ WW CW Contest as TI5KD.

TM7, FRANCE (Special Event). The special call sign TM7RL will be used from October 3-5th. The activity will be mostly in CW on 80-10 meters. QSL via F5LVL.

V8, BRUNEI. It has been announced that JO1RUR will once again be active from here for the CQWW DX Phone Contest. He will sign as V8EA and will operate as a Single OP/All Band entry. He placed 8th in the world last year as V85HG and hopes to do better in the ranking this year. He plans to set up better antennas for 160 and 80 meters. QSL to JH7FQK.

VK9L, LORD HOWE ISLAND. It has been announced that Nick, VK9LX, will be active from November 23rd to Decemeber 1st. Activity will include participation in the CQWW CW Contest. Operations will be 160-10 meters. QSL VK9LX: c/o VK2ICV Nick Hacko, P.O.Box 730, Parramatta 2124 NSW, Australia.

VS6, HONG KONG. F5PRH is reportedly in Hong Kong for at least the next 6 months and hopes to obtain a licence.

ZK1, PENRHYN ISLAND (North Cook). Just a little reminder! The ZK1XXP operation is now active and will be on the air until September 27th. Refer to OPDX.321 for details.

Hi Paul,

Take a look at HFx the web site is:

http://www.psrv.com/hfx/

(demo download was not working but info is available)

I have been using it for about a year. I run it under Win-95 on a 586 color laptop. It is not as complicated as some of the other DOS based software but I have been getting good results with it. Just last week I was able to keep a sked 7 out of 8 days with a US Navy ship traveling between the Azores and the New Orleans. I used HFx to predict time of best contact on 17 meters for his estimated coordinates all the way across the Atlantic and into the Gulf of Mexico. I was very impressed with the program.

I just upgraded to a newer version (for free) and the manufacturer told me the program would be on sale for $99 USD. Regular price is $130 I think.

Hope this helps.

I'm looking for any documentation on a very old (tube) HF set: SBE model 33 (15, 20, 40 and 80 meters). Probably made in USA. The 40 and 80 meter band starts at 7.15 and 3.8 MHz, but in Europe it is UP TO these frequencies. Want to modify this set to use it as a receiver. Anyone know anything of SBE??

I'm also looking for a European adress of the importer of ADI VHF/UHF transceiver. As you probably already noticed my call is pd1ADI so I want to ask those guys whether they can sponsor me while I'm like a living commercial for them (hi).

Any info is welcome!

Thnx

73! PD1ADI

PRESS RELEASE - Re: HAM LOG 3.1 by Robin Gandevia VK2VN

Many users have advised me that the program Ham Log is so well written and easily understood, that quite often the manual is not used. This is because the program is so simple and intuitive to operate. Further, if a user has a query about some aspect of the program, the extensive context sensitive help available throughout the program (F1) is usually more than sufficient.

So we now have the new "Environmentally Friendly" version of Ham Log. This version includes a copy of the manual on disk so that it can be referred to if needed, and can of course be printed.

And the best news is that the environmentally friendly version will be more 30% less than the normal version. Furthermore, the package and post charges have been reduced to NIL for Australasia and just $2 for the rest of the world. This saving also will be appreciated by many from non English speaking countries.

At this stage, the demonstration version of Ham Log 3.1 - HL3DEMO.EXE (or the ZIP version HAM_LOG3.ZIP) have not been updated to include this advice.

Yours sincerely,

Robin Gandevia VK2VN

There are certainly no regulations in the US (and I would doubt elsewhere) that give exclusive use of these frequencies to DXpeditions. While many hams do stay off of these frequencies (e.g., 14195, 21295, 28495) in the hope of hearing some rare DX, nothing requires them to do so, just in the same way that no net "owns" a specific frequency.

QTH.Net Digests and Archives (for subscribers)
k7on@qth.net

What about Digests and Archives?

A. Digests

All lists at QTH.Net have digests available.

You can subscribe to a digest and periodically receive the compiled
messages rather than individual messages.

All list digests are configured for a size limit of 40,000 bytes.
However, most of the files are around 16k to 30k. This is because
majordomo will NOT send a digest larger than the limit. If a new
message pushes beyond the limit, it sends the accumulated, putting
the new message in the NEXT digest.

If you are switching from non-digest to digest, you must unsubscribe
wallpaper and subscribe wallpaper-digest.

It is an entirely seperate subscription, but both digest and non-digest
subscribers are permitted to post to the non-digest list.

TO: majordomo@qth.net
SUBJECT:
BODY: subscribe wallpaper-digest
unsubscribe wallpaper

B. Archives

All messages sent via reflector are archived and are available for
access through majordomo.

You can send a command to majordomo@qth.net and in the body type:

index wallpaper-digest

and get a list of files that are available by request.

Here is an example:

>>>> index wallpaper-digest
total 116
-rw-rw---- 1 majordom 45 14169 Sep 2 18:09 v01.n042
-rw-rw---- 1 majordom 45 18100 Sep 3 11:27 v01.n043
-rw-rw---- 1 majordom 45 15322 Sep 4 14:11 v01.n044
-rw-rw---- 1 majordom 45 13490 Sep 6 11:15 v01.n045
-rw-rw---- 1 majordom 45 16382 Sep 9 18:39 v01.n046
-rw-rw---- 1 majordom 45 14823 Sep 11 08:40 v01.n047
-rw-rw---- 1 majordom 45 16872 Sep 12 01:04 v01.n048

To retrieve one of these files, send an email to majordomo@qth.net.

In the body of the message, type:

get wallpaper-digest v01.n048

The file will be emailed to you, automagically!

C. Archives on WWW

You may view the archives online.

Point your web browser to: http://www.qth.net/wallpaper-digest.archive

Temporary QSL/QTH.Net Disruption

Due to circumstances beyond control, there is a
temporary disruption of service at QSL/QTH.Net
for possibly as long as a few days.

This includes all mailing lists and the WWW server.

All steps possible are already being taken, but
this will be a temporary annoyance - there is no
way around it!

Please be patient for a couple days.

I can be reached by email at: shortckt@primenet.com

To all radio amateurs

SB DX ARL ARLD041
ARLD041 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, 425DXnews, The Daily DX, QRZ DX, DXNS, Frank, AH0W and Contest Corral from QST. Thanks to all.

RODRIGUEZ ISLAND, 3B9. Toshi, JA1ELY, and Roddy, 3B8DL, will be QRV as 3B9/3B8DL on 80 to 10 meters using CW, SSB and RTTY. They may operate primarily on 20 meters. QSL via 3B8DL.

REUNION, FR. Jan, N3NW, will be QRV as FR/N3NW as a 15 meter Single Band entry in the CQ WW RTTY Contest. QSL to home call.

SVALBARD, JW. LA8XM will be active from Bear Island as JW8XM until September 29. QSL to home call.

GUANTANAMO BAY, KG4. KG4GC will be a Multi/Single entry in the CQ WW RTTY Contest. Some of the guest operators will also be active from September 29 to October 3 on all bands and modes. QSL via WT4K.

KURE ISLAND, KH7. A multi national team plans to activate K7K until October 4. The team expects to be QRV on all bands and modes with up to five HF stations operating continuously. Emphasis will be given to working stations in Europe and Africa where KH7 is most needed. QSL via KE7LZ.

ALAND ISLAND, OH0. Martti, OH2BH, and Jukka, OH2MAM, will be active in the Scandinavian SSB contest from the OH0W contest station. QSL via OH2BH.

CORSICA, TK. Vaclav, DL4FF, will be QRV as TK/DL4FF until October 10. QSL to home call.

CHAD, TT. TT6SE and TT6EB are QRV until January 15, 1998, using CW, SSB, RTTY and SSTV. QSL via F6FNU.

CHAGOS, VQ9. Look for Rick, WB0BNR, to be QRV as VQ9AI until mid November. He can be found daily on 20 meters around 1300z. QSL to home call.

GIBRALTAR, ZB. Jimmy, G3HBN, will be QRV from September 30 to October 14 as ZB2/G3HBN. QSL to home call.

PARAGUAY, ZP. Ernesto, LU2BRG, will be QRV as ZP5XF in the CQ WW RTTY Contest as a 15 meter Single Band entry. QSL to home call.

THIS WEEKEND ON THE RADIO. The CQ WW RTTY Contest, and the Scandinavian Activity SSB Contest will keep you busy this final weekend of the month. Please see September QST, page 105 for details.

Hello everyone,

I will be calling CQ on 50.400 AM all this weekend.

Fri 9/26/97 16:00-22:00(PDT 23:00Z-05:00Z
Sat 9/27/97 07:00-22:00(PDT) 14:00Z-05:00Z
Sun 9/28/97 07:00-20:00(PDT) 14:00Z-03:00Z

I'll be calling CQ on the top and bottom of the hour.

Lets all get out on 50.400 AM and have some fun.
Solar conditions are favorable!

Equipment being used will be:

Gonset G-50 25w into ARX-6
Swan 250 40w into G5rv
Icom IC-726 into Marage A1015 150W into ARX6

If you have not seen my 50.400 AM page please check it out and let me
know what you think.

http://www.geocities.com/Hollywood/5860/50am.html

I think this will be a FUN weekend!!!!!
Everyone let me know how you all did and what equipment you used.

Thanks for your participation!

From: Dave Heil <k8mn@clinet.fi>
Message-ID: <342CE2ED.4E8E@clinet.fi>
Source record: 31955

I just returned late Thursday night from the midweek OH0/K8MN trip to Brando Island. The island, part of the Aland archipelago, is IOTA number EU-02. A couple of thousand QSOs were made on SSB and CW on 80 through 15 meters. If you made the logs, QSLs can be obtained (U.S. with SASE, rest of the world with IRCs) from WA8JOC. His address is:

Ken Scheper WA8JOC
5875 Cedaridge Drive
Cincinnati, OH 45247
U.S.A.

For those of you who missed my operation, OH2BH is operating this weekend in the SSB portion of the Scandinavian Activities Contest from the same site.

73,

Dave Heil OH2/K8MN
OH0/K8MN
downtown Helsinki

2354. Re: Lookin for SBE model 33 old tube HF set manual and European ADI UHV/VHF equipment import adress

I think I am missing something here. I thought the SBE-33 was the first
all solid state transceiver, not tube. I believe the SBE-34 was also
all solid state.

SB DX @ WW $OPDX.324
Ohio/Penn DX Bulletin No. 324

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 324
BID: $OPDX.324
September 29, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2YQH & WB2RAJ The 59(9) DXReport, W3UR & The Daily DX, WA4FFW, N5FG, K7ZD, OH2/K8MN, NN9K, AC0X, CT1EAT, DJ1US/5X1S, G4BUE & DX News Sheet, G0PSE, OZ5AAH, T77WI, TA3YJ & TA3J, VK4AAR and ZS6Y for the following DX information.

5X, UGANDA (Update). Steve, DJ1US, reports he has finally received his 5X license that he applied for on July 27th. Look for him to be active as 5X1S. Steve states to please be patient with the QSLs - they are not printed yet. QSL to DF2RG via the bureau or direct to: Gerhard Jaeger, Ruhseugstr. 6, 92421 Schwandorf, Germany. ADDED NOTE: For those of you who would like a Uganda stamp, Steve's Ugandian address is: Stefan M. Bauer, TSU, c/o UN WFP, P.O. Box 7159, Kampala, Uganda (but don't expect an answer until late October or so!).

A5, BHUTAN. The "DX News Sheet" reports that well known DXer Jim, VK9NS, is having a visa application being processed, and he will be meeting the Bhutanwese Ambassador to Bangladesh in Dhaka. For those who do not know, Jim was previously active from Bhutan in 1990 as A51JS. KYFC!!!! ADDED NOTE: Jim has renewed his S21ZA licence and may be active from Dhaka after his visit to the UK while attending the RSGB HF Convention.

C5, THE GAMBIA (Update). It been reported that Mako, JA1OEM, had to postpone his September 25th, C56/JA1OEM operation as he was unable to obtain a visa.

FO0, MOOREA ISLAND (Update). Giancarlo, T77WI, has received the callsign FO0MOT to activate this Polynesian island (OC-046). Activity will last until October 12th. Refer to OPDX.323 for more details.

GB0, LUNDY ISLAND. The Taunton and District Amateur Radio Club (TADARC) will be activating the special callsign GB0LI on Lundy Island (EU-120) from September 30th to October 6th. Activity will be on 160-10 meters with operations on CW and SSB. They plan to use IC-725 and IC-735 with

100 watts to R7000, wire dipoles and Long Wire. Operators will be G3WNI and G0PSE. QSL to G3WNI or G0PSE via bureau, or to the following addresses:
G3WNI - Bill Lindsay-Smith, Way Close, Madford, Hemyock,
Devon EX15 3QY, England.
G0PSE Tom Taylor, 19 Derwent Grove, Taunton,
Somerset TA1 2NJ, England.

JY, JORDAN. "The Daily DX" reported that King Hussein, JY1, made a very rare visit to the bands this past week. His Royal Highness showed up on 14280 kHz at 2100z. QSL via WA3HUP.

KH4, MIDWAY ISLAND. By the time you read this, the Midway-Kure Dx Foundation team should be active from Kure as K7K, but there are also plans for a very brief operation from Midway Atoll just after the team returns from Kure. Their tentative plans are for the team to operate on Midway from October 5th and 6th only. The special callsign for the Midway operation will be K4M (Kilo 4 Mike). QSL via KE7LZ.

QSL INFO AND NEWS.....
R1ANZ QSL INFO. Alan, VK4AAR, reports that lately several DX bulletins have provided the wrong QSL information for Wally, R1ANZ. Alan has spoken with Wally many times, and he gives his home callsign for QSLs :--> UW1ZC (***NOT*** RU1ZC). His mailing address is: V. N. Mykitenko, Akademgorodok 2-1, 184340 Loparskaya, Murmansk, Russia (Wally added "Murmansk" as it helps the postal people). By the way, Wally's XYL, Natalie, is handling QSLs until Wally returns home.

KH4/KH7K QSL UPDATE. Mac, WA4FFW, reports that with the help of WJ4T, all QSL cards received to date, including bureau cards, have been processed for the N4BQW/KH4 (Midway) and N4BQW/KH7K (Kure) operations. All cards were mailed 9/20/97, and most should be received as you are reading this. Anyone who does not have their card after 2 weeks needs to resubmit. Mac states he will begin processing cards received for the recent Tern Island (N4BQW/KH6) operation. They will be mailed within the next two weeks.

NEW QSL MANAGER. Pete, NN9K, reports he is assuming the QSL Manager duties for V51MA, Mike Alberts, starting with contacts made after September 15, 1997. His address information is as follows:
Peter E. Beedlow, NN9K, 741 Greenway Avenue, Colona, IL 61241-9337

WRONG ADDRESS. Lou, AC0X, reports that the address for TY1IJ's QSL Manager DK8ZD is incorrect on the Buckmaster Callsign Lookup WEB page (it gives a "Moss Beach, CA" address). Cards sent to that address get returned by the post office. The correct address is: Jochen Errulat, Berlinerstrasse 31-35, D-65760 Eschborn, Germany. This address is from the DL5MO QSL Manager WEB page:
http://www.systemtechnik.tu-ilmenau.de/ham/qsldb_gate.html
A card sent to that address with a SAE and 2 green stamps resulted in a card in about 2 weeks.

Dave, OH2/K8MN, in downtown Helsinki, reports to OPDX he just returned late Thursday night from the midweek OH0/K8MN trip to Brando Island. The island is part of the Aland archipelago (IOTA EU-02). A couple of thousand QSOs were made on SSB and CW on 80 through 15 meters. If you made the logs, QSLs can be obtained (U.S. with SASE, rest of the world with IRCs) from WA8JOC. His address is: Ken Scheper, 5875 Cedaridge Drive, Cincinnati, OH 45247 U.S.A.

S9, SAO TOME & PRINCIPE. Francisco, CT1EAT, reports to OPDX that he will be in S9 from October 21st until November 4th. His planned operations will begin from Sao Tome Island (AF-023) from October 22-30th, using the callsign S92FC. Activity will be on 80-10 meter including the WARC bands with operations on SSB, RTTY and RS12 satellite (Mode K). Francisco has requested the special call S97A to operate during CQWW DX SSB Contest only. He plans to be a Single/Op/Multi Band LP entry. Outside of the contest he will concentrate on RTTY. This will be his first time on this mode, so PLEASE be nice. Francisco reports that the RS12 satellite is currently in mode A (as of Sept. 28th). So, if it doesn't return to Mode K, no operation will be possible. From October 31st to November 4th, Francisco will go to Principe Island (AF-044) and use the callsign S91FC. Operations will be SSB only with activity on 20-10 meters including the WARC bands. His equipment will be a FT890 (100w), R5 and dipole. QSL all callsigns (S91FC, S92FC and S97A) via the CT Bureau (REP) or direct to: Francisco Costa, P.O.Box 172, 7800 Beja, Portugal. SPECIAL NOTE (from Francisco): "If I 'disappear' during a QSO, it will be almost sure due to lack of energy. Energy failure happens several times a day... Also, this isn't a Dxpedition. I'm going on holiday and I'll take my radio with me. I'll only be on the radio a few hours a day..."

THE 1997 MAGNOLIA DX ASSOCIATION'S DX FORUM AND BREAKFAST will be held in conjunction with the MS. Coast Amateur Radio Assoc. Hamfest. The dates for this year's DX activities will be on Saturday, October 11th, in Biloxi, MS. The DX breakfast will be at the Lady Luck Casino, located on Casino Row, at 7:30 AM. The speaker will be Bill Musa, K5YG, with details about his trip to VP5 land. If you wish to attend the DX breakfast and want details please E-mail Floyd, N5FG, at: floydgee@datasync.com
The DX forum will be at 2PM. The speaker for the DX forum will be Rick Roderick, K5UR, the Delta Division Director. The subject will be DXCC 2000...

TF, ICELAND. Preben, OZ5AAH, will be active here October 26th through November 10th as TF/OZ5IPA. The callsign OZ5IPA is the club callsign of the IPARC (International Police Association). Preben is the chairman of the association. Priority of operations will be CW, WARC and low bands. QSL via home call.

TR, GABON. "The 59(9) DXReport" states Jean, TR8XX, is regularly active on 40 meters at 0600z, then QSYs to 30 and 20 meters.

YM3, TURKEY (Special Event). Look for "YM3SV" to be active starting 0000z Saturday, October 25th and ending 2400z Friday, October 31st. This station is commemorating the "Friendship, Neutrality, Reconciliation and Arbitration Agreement" between Turkish and Greek Rebuplics. This agreement

was signed by Turkish President Mustafa Kemal ATATURK and Greek Prime
Minister, Eleutherios (Kiryakos) VENIZELOS on October 30, 1930, in Ankara.
In accordance with the authorization from the Izmir Directorate
Radiocommuniciation, TA3YJ, TA3J and possibly others will be active from
the TA3YJ amateur radio station with the special callsign YM3SV in low power.
Activity will be Phone only on 80, 40, 20, 15, 10, 2 meters and 70cm.
QSL via TA3YJ, Nilay Mine Aydogmus, Box 876, 35214 Izmir, Turkey

ZS9, SOUTH AFRICA. Be looking for ZS6Y to activate the callsign ZS9F
during the CQWW SSB Contest at the end of October. Activity will be
on all bands. QSL to KK3S via the bureau or CBA.

Cross-posted to: rec.radio.amateur.space,rec.radio.amateur.dx,rec.radio.amateur.antenna,rec.radio.amateur.digital.misc,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.swap,alt.ham-radio.marketplace,alt.ham-radio.packet

Announcing NEW
Ham Radio.FAQ

This is the second generation of the original file that was
a regular USENET posting entitled

"rec.radio.amateur.misc Frequently Asked Questions"

The NEW Ham Radio.FAQ is a HyperText document that is on the
WWW and it contains 3 chapters plus hundreds of LINKS to radio
related sites!

1 - Introduction to the Ham Radio.FAQ
2 - Amateur Radio Organizations, Services, and Data Sources
3 - Amateur Radio Advanced and Technical Questions

Please provide a copy of the Ham Radio.FAQ to any new or
soon-to-be Hams that you know or share with them the URL to this
site:

http://www.mv.com/ipusers/wd1v

Send me an EMAIL <or packet with your Email address> if you want the
FAQ text file sent to you as an attached <120 K> file with the words
"HAM FAQ" on the subject line.

Send me a formatted disk with SASE disk mailer if you want the
FAQ text file sent to you on disk. PC or Mac are fine.

73,

John Seney

2362. QSL.Net/QTH.Net Available

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-28 00:00:00 UTC
From: "Short, B.K." <shortckt@primenet.com>
Message-ID: <342F015D.626C@primenet.com>
Source record: 31870

QSL.Net/QTH.Net Available

It is taking some time for the new DNS entry
to propagate, but you *CAN* access QSL.Net as:
209.60.242.81

And QTH.Net as: 209.60.242.87

Just enter:
http://209.60.242.81/

It may be a few days before the IP number gets
associated with the QSL/QTH domains.

Source record: 31959

I do know by now that 14.195 kHz is NOT a DX frequency by any rules and
regulations,
but more by a " gentlemans agreement " should be keep clear for the
DXspeditions, for their traffic.
So WHY can't we all be GENTLEMEN, and do so ???????

BeaconClock is FREEWARE for DXers!

Two new versions of BeaconClock are now ready for download from the KaWin/SA Watch Home Page - URL below .

For Win95/NT users only, BeaconClock 2.0 is a new native executable code version. Download and install the NEW RUNTIME files, RUNTIM97.EXE, before attempting to install BeaconClock 2.0.

For Win3 users, BeaconClock 1.08 fixes two bugs.

Both versions correct the LP headings in the "List" and permit entry of Lat/Lon information using either the "." or "," as the decimal indicator, depending on your system's "Regional" settings.

73 and DX,

Stan

2373. FB9DX

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-29 00:00:00 UTC
From: mike@Hawaii.Edu
Message-ID: <60op9o$c85@news.Hawaii.Edu>
Source record: 31875

I worked WB9DX last night on 15 meters SSB. Op was Charles and he said he was using an Icom 700 series tranciever with 50 watts into a dipole. Copy was difficult due to a fairly weak signal and horrendous local urban static and hash.

He gave the QTH at one point and I swore I copied it as north of Wallis Island at XIFR? Later he was giving the QTH as just Wallis Island after several attempts with the XIFR information.

Anyone recognize XIFR? as any type of designation?

mike@hawaii.edu AH7R

PS Worked K7K, other local hams reported them on 15 meter SSB, I heard them on 15 meter CW and other hams reported them on 17 meter CW. I worked them on 14195 split to 14202 SSB.

2374. Circuits Galore

Newsgroup: rec.radio.amateur.dx
Date: 1997-09-30 00:00:00 UTC
From: Harry Lythall <rharris@arcturus.net>
Message-ID: <3430B58F.5C2B@arcturus.net>
Source record: 31876

Circuits Galore

Hi all, I'm back!!

Two weeks abstenance has meant little work on my homepages. I have replaced the counter to another that works. During the last two weeks the pages have had '0' visitors although 130 of those have sent me E-mail. Strange!!

PMS OTA
Just before the holiday, my old PC-jurassic blew itself to bits so my packet PMS, with all the radio, circuits is off the air but Ron, G0TLA, is still holding strong.

VALVE (tube) RX
The 'valve receiver' has seen a little more work done to it and the tracking across the lower MW band is much improved. With the new coil winding data the LO/RF tracking is almost perfect. Far better than expected.

OSCILLOSCOPE
Loads of comments about the basic oscilloscope information. The general opinion so-far is that it is not so basic, what do you think? Have I forgotten anything?

SYNTHESIZED RECEIVER
The ORIGINAL circuit diagram for the 'Synthesized Receiver' project was 100% accurate. The VCO and Phase Detector chips are NOT CMOS. Thanks to E-mail, I have now been spared the laborious task of taking my own synthesizer to bits to get the information for the homepage. I will now be updating the project hopefuly before Friday. Many thanks to the kind soul who took the 'time and trouble' to sort out my cryptic mess for me and provide the information.

REQUESTS
I have had requests for VHF and UHF RX preamps Not being so interested in VHF they will have to wait a couple of weeks, but it sounds like a good idea to me.

SOON
Coming soon is an AM TX for the MW band so that old vintage radios may again 'beat' to the rythm of Perry Como, or Dave Brubek.

DC RC HITS VLF
My Direct conversion RX was sucesfuly used on the VLF bands

from 15KHz upwards, I am awaiting a response from the gent concerned so that I may add the details to the homepage.

NOT AGAIN!!!
Finally if I get just one more request for circuit diagrams to locate lost model aircraft I will scream!!!! I the best method is to write your name, address, and telephone number on the wing. You could also offer an 'unspecified' reward for its return. Readers Digest are always giving away their 'valuable' pocket calendars, printed on genuine paper.

URLS
Ok then nothing else of interest to add so here is the URL, just in case you have not bookmarked the page. You will not be dissapointed.

http://user.tninet.se/~acz732k/ Main site
http://hem2.passagen.se/sm0vpo Mirror site

Have fun with radio Homebrew / QRP / Hamradio / Wireless.
Best regards from Harry, Upplands V�sby, Sweden.

PS Several E-mail massages have begun "I am not a licensed Radio Amateur, but ... ...". My page is not exclusively dedicated to HamRadio, QRP, but includes ALL aspects of homebrewing (including the booze - Hic!) and electronic construction.

KAGOLD will run both ports at the same time, you can connect to the
cluster on VHF/UHF and do anything you want to with the HF port.
Matter of fact, you can connect to 10 clusters and do what you want
with the HF port.

Check http://www.interflex.com for information about the software.

It's a special callsign so you can't tell; it's an expedition
to Kure Island. One of our locals worked them yesterday on
40 CW. It's definitely a rare one.

Dear FRS Friends,

Sunday October 19th FRS-Holland hopes to celebrate its 17th birthday. Also this year we highly appreciate your involvement. Your contribution will be read out/played and is part of the special programming on the 19th. You can
send us...

* a taped message
* a written message via Box 2727
* an Email

In order to allow us to prepare everything, we must have your contribution on Wednesday October 8th 1997. As far as the content of your birthay greeting is cooncerned: we leave it in your hands but keep in mind: do it "Just a bit different"!!
Any nice/special FRS-Holland memory is of course a good (and welcome) possibility. We count on you,

73's, FRS crew.

Ps: More news about times, frequencies and content of shows will follow in the week before the actual on air celebrations.

Hey Rafael,

Based on the questions you ask your best solution is to really look
around for software that probably meets your needs. And if you really
can't find your "new tricks" out there already, hire a programmer if you
want to get it done in less than a couple of years.

2386. KH2/Guam QSL Information

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-01 00:00:00 UTC
From: kh2d@kuentos.guam.net
Message-ID: <60vood$hbf@lehi.kuentos.guam.net>
Source record: 31888

KH2 QSL Bureau Information - Please Pass This Information on
to DX Lists and Reflectors.

The KH2 QSL Bureau in Guam is becoming a repository for a very
large number of unclaimed QSL cards. A large majority of
the cards received here are for 2x1 calls so this document is
an attempt to address the correct QSL routes for Guam 2x1 calls
only. The MAJORITY of extra class call signs issued for Guam
are NOT issued to hams in Guam - they are issued to hams who
were at one time in Guam and no longer are here, hams who came
to Guam and operated for brief periods, and hams who have never
been in Guam but obtained Guam callsigns via the vanity call
program. Judging from the cards received here at the Guam
bureau, a number of hams worldwide would like to receive a card
from a Guam station, but sending them via the bureau is
not, in most cases, the way that obtaining a Guam QSL card can
be accomplished. Hopefully this list will assist people in
getting the cards from Guam they need.

If you have sent QSL cards to hams on the following list via
the bureau system, your card is probably here unclaimed. Please
QSL again via the route mentioned in the list.

This list was complied on October 1, 1997 and is correct to the
best of our knowledge at this time. Please email any corrections,
additions, additional information to kh2d@kuentos.guam.net or
mail it to the KH2 QSL Bureau at P.O. Box 445, Agana, Guam 96910.

If you are activly using an AH2, KH2, NH2, or WH2 callsign and
you are not in Guam but want your QSL cards that arrive here,
please email kh2d@kuentos.guam.net and I will provide you with
details on how to get your cards forwarded to you. All unclaimed
cards at the KH2 bureau will be destroyed on January 1, 1998 and
thereafter unclaimed cards will not be kept on file or returned,
but will be destroyed on arrival. If you are activly using an
AH2, KH2, NH2, or WH2 callsign and operating on HF, PLEASE make
the people you talk to on HF aware that you are operating from
parts of the world other than Guam and that cards sent via the
bureau system will not be received.

If you have specific questions about QSL routes for Guam stations
not listed here, please email me and I will attempt to provide
you with correct information.

A few other notes:

1. The KH2 bureau does NOT handle cards for KH0. Please don't
send KH0 cards to this bureau.

2. Most active KG6 calls are NOT Guam stations. If you work
a KG6 station, he is probably in California. KG6ASO is
the only know KG6 station active from Guam at this time.

3. KP2 is not the same country on the DXCC list as KH2.

4. A callbook address in Guam is NOT an indication that the
station is currently in Guam. Some known hams have been gone
from Guam for years but still have Guam addresses in the
U.S. callbook.

See the table at the bottom of the list for definitions of the
LEGEND column.

QST de W1AW
DX Bulletin 42 ARLD042
From ARRL Headquarters
Newington CT October 2, 1997
To all radio amateurs

SB DX ARL ARLD042
ARLD042 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 599 Report, Fabio, PY1OB, The 425 DX News and Contest Corral from QST. Thanks to all.

SAO TOME AND PRINCIPE, S9. Francisco, CT1EAT, will operate from October 21 to November 4. He will begin operations on Sao Tome Island on October 22 until the 30th using the call sign S92FC, then move on to Principe Island from October 31 to November 4 as S91FC. Check 80 through 10 meters, SSB and RTTY, including the newer bands and RS-12. QSL via the CT Bureau (REP) or direct to Francisco Costa, P.O. Box 172, 7800 Beja, Portugal.

CHAGOS ISLAND, VQ9. Rick, WB0BNR, is active as VQ9AI until mid-November. He can be found daily on 14186 or 14260 kHz around 1300z. QSL via home call.

NEPAL, 9N. Rich, 9N1RHM, is now active on RTTY. QSL via KV5V.

GABON, TR. Jean, TR8XX, is regularly active on 40 meters at 0600z, then QSYs to 30 and 20 meters.

UGANDA, 5X. Steve, DJ1US, reports he has received his 5X license. Look for him as 5X1S. QSL to DF2RG.

BRAZIL, PY. PY1OB, PY1SL and PY1JH will be active as ZW1A on SSB, ZX1A on CW, 80 through 10 meters, and ZV1A on 6 meters, SSB and CW from Grande Island (SA-029) from October 3 through 5. QSL SSB contacts with ZW1A and ZV1A via PY1OB. QSL CW contacts with ZX1A and ZV1A via PY1SL.

ICELAND, TF. Preben, OZ5AAH, will be active October 26 through November 10 as TF/OZ5IPA. OZ5IPA is the club call sign of the IPA (International Police Association). QSL via home call.

TURKEY, TA. Look for Special Event Station YM3SV to be active October 25 to 31. Activity will be SSB only on 80, 40, 20, 15, 10, 2 meters and 70cm. QSL via TA3YJ, Nilay Mine Aydogmus, Box 876, 35214 Izmir, Turkey

SOUTH AFRICA, ZS. ZS6Y will use the call sign ZS9F during the CQWW SSB Contest. Activity will be on all bands. QSL to KK3S via the bureau or CBA.

MAURITIUS, 3B8. Skip, JE2HCJ will be visiting Jacky, 3B8CF, from October 3 to 12. Skip will be active as 3B8/JE2HCJ on 80 through 10 meters CW, SSB and RTTY. QSL via JA2JSF.

PITCAIRN ISLAND, VR6. Mey, JA6CT, has recently become active as VR6CT. QSL to JA6CT via the bureau.

THIS WEEKEND ON THE RADIO. The VK/ZL/Oceania Contest, Phone, and the RSGB 21/28 MHz Contest, Phone, are on tap for this weekend. Please see October QST, page 107 for details.

I used to have an SB-101 and SB200 a long (20 yrs) time ago. I would tune the XCeiver first, then turn on the amp and tune it. I had a wattmeter between the amp and an antenna switch that hooked up a 5-band vertical, a 2-el quad (10-15-20), a dummy load and various dipoles.

All antennas were resonant for the portions of the band that I used. I'd tune up into the dummy load, then switch to the antenna and fine tuned the amp. Got to be a habit after a while and I could tune up just be watching the power out on the watt meter.

From the Dx Reflector:

The 10/1/97 issue of the Wall Street Journal has an article titled "The Internet Generation Taps Into Morse Code" on page B1. Among other things, it says that many "techno-savy" types are becoming morse code fans because of the internet.

It is a nice story for anyone who enjoys CW.

N1PGW Harry A Webber

Does anyone know how to reach Harry Webber N1PGW?

I have my cashed check for $375 (cashed 08-04-97)
and the UPS Strike etc has confused matters, but I
was last promised a tracking number several weeks
ago. No package or tracking numbers received.

I need to get in touch with Harry to determine what
has happened as this really dragging out...

We made our deal for the FT-101zd and SP-901 speaker
back on July 28, 1997. That was a long time ago!

Any help greatly appreciated.

AGIS tried, but the judge said that CyberPromo had to be let
back on the backbone, at least for two more weeks.

If you're a Unix sysadmin, you have sufficient power to cancel
Usenet articles. Problem is, there are more spammers than
sysadmins willing to police Usenet.

David, you are not alone in concerns!

2399. BS7H Qsl Cards

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-03 00:00:00 UTC

Message-ID: <343561EE.3974@gold.tc.umn.edu>
Source record: 31901

Have all of the BS7H cards gone out. I haven't received mine yet, and I looked at the Web site and I am in the log. I sent W4FRU a request and a donation but nothing yet. I know they used paper logs and that the cards have to be filled out by hand. That may be the problem. If anyone knows W4FRU's e-mail address, I would appreciate getting it and I'll contact him directly. Thanks for your help.

Message-ID: <613jra$m6g$1@calvin.risq.qc.ca>
Source record: 31902

Hi there
Here are the facts:
1- I have a G5RV at 22 feet and can't go higher. (Installed flat top)
2- I am limited to the 80 meter band for now.(legally)
3- I could install a vertical on the house with the base at 22 feet over
the ground.
4- I can't or won't install a tower, too expensive.
5- I would love to work DX on 80 meter.
6- I will be using other bands when I pass my 12 wpm cw test but that could
take a year, so I am stuck on 80 meter for now.

Questions:
Would a vertical be much better for everything considering my height
limitations?
Would DX be much better on 80 meters with a vertical?
What vertical antenna(s) would you suggest?
Are there good verticals that don't need radials and do they really work?
Is a trap dipole better than a G5RV? (Reduced length, no space.)
Opinions and suggestions sollicited please.
73 de VE2CJW
Michel Morin.
Quebec, Canada.

Hello old man,

From this day on, the DXpeditioning mailing list is available.

DXpeditiong offers a forum to all interested, for the discussion of
organizing DXpeditions.
Are you planning a DXpedition, do you have experience with
DXpeditioning, are you interested in
knowing what's involved with organizing a DXpedition? DXpeditioning
has been set up for you.

You can subscribe to DXpeditioning by sending an e-mail to
majordomo@fibo.hogent.be, with in the
message body 'subscribe DXpeditioning e-mail@adress'. You can also
instead put 'help' in the body.
Posts go to DXpeditioning@fibo.hogent.be.

Hope to welcome you soon!

dxpeditioning-owner@fibo.hogent.be

Note also that this is NOT the final report.

To: DXAC
CC: DXCC2000
Fm: K8CH

The DXCC 2000 ad hoc Committee reported to the BoD this weekend.
In their July 20 meeting they asked me to forward this to you for
your information. The ad hoc committee will finish their work in
January when they deliver the final report to the BoD.

73, Chuck K8CH

[From the Minutes of the Board meeting:]

49. On motion of Mr. Olson, seconded by Mr. Butler, it was VOTED that the

report of the DXCC 2000 Committee is received. The Board finds that the
committee is moving in the right direction.

DOCUMENT #30
Revision 1
DXCC 2000 Committee Interim Report and Recommendations

June 28 1997

FOR BOARD APPROVAL

At this time, the committee has two major concepts to present to the
board for approval. The first concept addresses changes to be made
to the DXCC Countries List Criteria and the second concept addresses
the DXCC Awards Structure.

DXCC COUNTRIES LIST CRITERIA

Point 1, Government. For a country to be on the DXCC List, by reason
of Government, it must meet one of the three listed requirements:
1. Be a Member State of the United Nations.
2. Be a member of the International Amateur Radio Union.
3. Have an official ITU assigned Call Sign Allotment.

Point 2, Separation by Water.
1. The 225 mile requirement is replaced with 350 kilometers.
2. The 500 mile requirement is replaced with 800 kilometers.
3. Paragraph 2(d) is changed so that the "minimum-size" is defined as,
"must consist of two points separated by not less than 100 meters of
connected land above the high tide mark, as demonstrated on a chart of
sufficient scale. For the purposes of this award, any island less than

this size shall not be considered in the application of the water separation rules."

Point 3, Separation by another DXCC Country.
1. The 75 mile requirement is replaced with 100 kilometers.

Point 4, Ineligible Areas.
1. No changes proposed.

This new DXCC List Country Criteria would go into effect in 1998. The new DXCC List Country Criteria would not be applied retroactively, however countries may be withdrawn from the list in the future using the Deletion Criteria.

Discussion:
After reviewing the DXCC Country List Criteria, it was determined that Point 1, Government section was unclear and open to many interpretations.

Others expressed a concern with the fact that the ARRL is determining what is and is not a country, even if it is only for an Amateur Radio award, could have some
undesirable consequences that could result in actions that are harmful to the Amateur Radio service. The Karen State, the Northern Cyprus situation and X5, Republic of the Serbs may have caused problems and with the ever changing situation in the Middle and Far East, other potential future problems could arise. It was decided that it would be better to use a different, mechanism to determine Point 1 Countries. The different mechanism must be as objective as possible. Further it should be one that Amateur Radio operators understand and one that can not be influenced easily.

The committee saw no reason to make major changes to Point 2, Point 3 and Point 4. The measurements will be conducted in kilometers and rounded off as close to the existing distance as practical. There is a outside chance that one or two new ones may come about as a result of this change. Reference: 800 km=497.2 miles, 2.8 miles reduction; 350 km=217.52 miles, 7.48 miles reduction; 100 km=62.15 miles, 12.85 miles reduction. The 10,000 square foot area was replaced with the 100 meter straight line. This will make it easier to determine minimum size.

DXCC AWARDS STRUCTURE

The new DXCC structure can be divided into two major categories for the purposes of this report.

1. The Mode Awards Program.
2. The Band Awards Program.

Mode Awards:
The Mode Awards Program consists of the five mode awards, with the country level endorsements and honor rolls and the 5BDXCC with its five single band endorsement plates.

In the Mode Awards Program, deleted countries would still count for overall totals but future countries that are withdrawn from the DXCC list would not be added to the deleted list.

Band Awards:
The Band Awards Program consists of 10 single band awards with country level endorsements, but NO honor rolls. The bands are 160, 80, 40, 20, 17. 15. 12, 10, 6 and 2 meters.

The 5BDXCC award continues unchanged. As before, deleted countries would not count for 5BDXCC and its endorsements.

Two new cumulative DXCC awards are being created by using the totals from nine of the single band awards. (160-6 meters)

Deleted and withdrawn countries will not count for the Band Awards Program.

The DXCC 2000 Challenge Award:

* One point is awarded for each band country credited on bands 160-6 meters (30 meters not included).

* Appropriate certificates, plaques/trophies and pins are available at: 1000, 1500, 2000 and 2500 point levels.

The DXCC 2000 Championship Award:

* This special trophy is awarded to the overall leader of the DXCC 2000 Challenge Award on record as of September 30 of each year. There is no charge for this award and there is a life time limit of one per person.

Example: If W4DR wins the Championship in 2000, he is awarded the trophy. If W4DR continues to lead the pack for the next 5 years, no further trophies are issued. When someone else takes the lead, they will be awarded a trophy. Should W4DR retake the lead, he will not be issued another trophy.

Note: If any new Amateur Radio bands are obtained in the future, they will be included in the DXCC Mode and Band Awards unless such activity is restricted by IARU or International Radio Regulations.

Special DXCC 2000 Award:
A special DXCC 2000 award will be offered in the year 2000. It will be offered for working 100 or more countries in the year 2000. It is non endorseable and QSL cards are not required. There will be an appropriate fee for this certificate award.

PUBLISHED RECOGNITION FOR THE DXCC PROGRAMS

Annually QST- Honor Rolls and Standings:

The Mixed, Phone, CW and RTTY Honor Rolls combine into " The Honor Roll." It will be a single (Alphabetic ordered) call sign listing of all who qualify according to the current Honor Roll

criteria. A "P, C, and/or R" after the call sign indicates which modes the individual qualifies for. Those who qualify for the Honor Roll and who have ever been at the top spot on the Honor Roll, will have their call listed in bold face print. This change is limited to the presentation of the Honor Roll as printed in QST.
The top finishers of DXCC 2000 Challenge Award holders will be listed annually in QST.

Monthly QST Listings:

Only new awards issued will be published in the monthly DXCC Listing. This includes the 1000, 1500, 2000, and 2500 point levels in the DXCC 2000 Challenge Award.

Standing changes from endorsements will show in the Annual List.

DXCC Yearbook- Annual List:

Call signs will be shown in alphabetic order grouped by number of current countries. Life time totals will be shown parenthetically after the call sign. This is the same as today's Honor Roll listing. The listing will include ALL Honor Roll members and other DXCC members that have been active (made an application) during the (October through September) year.

FUNDING FOR DXCC PROGRAMS

Appropriate changes to the fee structure will have to be made before the enhancements to the programs are implemented. This is to limit the burden on the remainder (non DXers) of the ARRL membership. The committee recommends that DXCC fees should be sufficient to pay up to 90% of ARRL's direct costs.

Respectfully Submitted,
John C. Kanode, N4MM
Chairman, DXCC 2000 Committee

Got THAT right, mate! So far I'm hearing mostly LU/YV on
ten, when I'm in the car in the afternoons. It'll be darned
nice to meet some of you G and GW and GM and GI boys again
on ten, though.

From my location (Raleigh, North Carolina; around the middle
of the USA's eastern coast, 200km inland) we've had really
nice openings to Africa on 15 lately.

"Three cheers for improving propagation!" is my motto. :-) 73!

Hi Ken
Also we are getting steady openings mainly to Africa / S.America but
it was great to bridge the "pond" today. Also heard a VE rather weakly.
The opening lasted only about 40mins but it was fairly steady.
Rather a nice write up about Solar cycle 23 is available at:

www.sel.bldrdoc.gov/info/Cycle25.html

Gear this end: Drake TR-7 runs about 100W and a homemade 2 ele ZL-
Special at 12m AGL but sits on a ridge overlooking an old river bed so
excellent take-off to the States.

Look for you Ken & others soon..

No... the SB33 and the SB34 are nearly identical in terms of circuit design. There are two main differences. The SB34 includes both 117VAC and 12VDC power supplies while the SB33 includes only the 117VAC supply (the 12VDC was an external option). Also, the SB33 was constructed using 1950's techniques (transistors socketed as if they were tubes and point-to-point hand soldered wireing) while the SB34 was constructed mainly on printed circuit cards.

I happen to own a functioning SB33, The good news is that I also have the manual for it. The bad news is that it's currently stored in another state, so I can't easily get a copy.

If the problem is a need to shift the specific frequency coverage of a specific band, it's a matter of identifying the crystals for the 1st converter and replacing the appropriate crystal with one for the desired range. There is no need to worry about damageing a crystal filter by mistake, the SB33/34 has no crystal filter = it uses a Collins mechanical filter which looks NOTHING like a crystal!

Good luck! - Seventy Trees - Glenn wb6w

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, The ARRL Letter, WB2YQH & WB2RAJ The 59(9) DXReport, W3UR & The Daily DX, K4WJ, WC5P, KH6BZF REPORTS, NE8Z, 9K2HN, CO3CL, DL5EBE, DU9RG, EA3BT, EI6FR, F6AJA, G4BUE & DX News Sheet, HA0HW, IK1WVQ, IK1QBT, VK4AAR and VE3BW for the following DX information.

5A, LIBYA (Update and Reminder!). As mentioned in OPDX.312, a group of Germans will be active from here November 24 through December 4th. The operators will be Andy/DJ7IK, Dieter/DL3KDV, Felix/DL8OBC, and Thomas/ DL1GGT, of the RRDXA. Activity will included the CQWW CW Contest as a Multi-Single entry with two stations on the air from the 5A1A club station. They will operate CW/SSB and RTTY on 160-10 meters (including the WARC bands). An InterNet E-mail reflector has been set up by K7ON. You can send a message to "libya@qth.net" with the command "subscribe libya" in the message body, and they will keep you up-to-date. Also, check out their WWW page at: http://www.afthd.th- darmstadt.de/5a1a/ Donations can go to DL8OBC. QSL via DL3KDV.

8P, BARBADOS. The "DX News Sheet" reports David, VE3VET, will be active once again as 8P9IJ. Activity will be on SSB and RTTY all bands. His operations will take place October 5-12th, from Warleigh Plantation in St. Peter Parish (while on his honeymoon!). QSL via home call.

9K, KUWAIT (Special Event). Look for 9K2BI to be active in the 40th World Scout JOTA, October 18-19th. This station will be on the air with the coordination of the Kuwait Amateur Radio Society "KARS" (9K2RA) and Kuwait Boy Scouts Association "KBSA" and will participate in the above mentioned event for the first time. The KARS helped established a Radio Station at the HQ of KBSA under the callsign of 9K2BI and the station was provided with all required pieces of equipment and their accessories. The station will eventually become permanent. During the special event, the station will be operated and administered by the members of KARS with the participation of KBSA's members including

ex-scouts.

CM/CO, CUBA. Do you need a card from here? Jose, CO3CL, reports the following four stations are very active from the island, even on the WARC bands. Look for:
CM3IP on 40 meters 0000-0400z on CW. QSL via WD4OIN.
CO3ET on 30 meters 2200-0400z on CW. QSL via WD4OIN.
CL3FL on 10 meters (check 28800-29000 kHz) 1900-2100z on SSB. QSL via CO3CL.
CO3CL on 12 meters (check 24900 KHz +/- QRM) 2300z +/- 0030z on SSB. QSL via W3HNK.

DX1, PHILIPPINES. Look for DX1S to be on the air for the CQWW SSB and CW Contests. This is the callsign of the Filipinas DX Society recently organized by Roger, DU1KT, and Robin, DU9RG, as founding president. Membership is open to DXCC holders, both local and foreign. QSL via: 818 Acacia Ave., Ayala Alabang Village, 1780 Muntinlupa City, Philippines.

EL LIBERIA. Joe, K3KN, currently active from the U.S. Embassy, will be operating as EL/K3KN until November 6 or 7th. He operates SSB (CW on request) on 40-10 meters with his IC-706 and log periodic. He was heard this past weekend on 24954 kHz at 1330z, 10113 kHz at 2145z and 21264 kHz at 1745z. QSL via KB3U.

EP, IRAN (Special Event). On Friday, October 3rd, around 1225z, a station with the call EP23TIE was active on 14200 kHz. This Iranian special event station will be on the air until October 10th to mark the 23rd Tehran International Exhibition. EP23TIE will be on the air from 0530 until 1330z daily. QSL to the Directorate General of Telecommunications, Box 931, Tehran, Iran.

FJ, SAINT MARTIN. Jacques, F6BUM, will be active as FJ/F6BUM from ST. Barthelemy October 24-31th. Activity will be on SSB and CW with operations on 40-10 meters. This French island has an IOTA of NA-146.

HB0, LIECHTENSTEIN. A a Hungarian team will once again be active from Triesen, on October 31st through November 8th. They will participate in the HA-QRP Contest with HB0/HA5RT/p callsign. They will run a QRP station on 3511 kHz 24 hours a day between November 1 and 7th. The leader of team is HA6NL/Laci, and the operators are HA0HW/Laci, HA4GDO/Tomi, HA4XG /Geza, HA6PS/Zsolti, HA6PX/Csaba, HA6ZV/Tibi, HA9AX/Imre and HA9RR/Pista. The operators will use their home calls after HB0/ prefix. Activity will be on all bands 160-10 meters including the WARC bands, CW, SSB and RTTY. QSL cards for HB0/HA5RT/p s QSOs should go to HA6NL and all others should go via their home calls. Direct and bureau cards will be answered the same way. They mentioned that they would like to work a few days from 4U1ITU between November 3-6th. Suggested frequencies:

CW - 1831, 3511, 7011, 7025, 10104, 14011, 14025, 18071, 21011, 21025, 24891, 28011 and 28025 kHz
SSB - 1841, 3789, 7089, 14189, 14240, 18141, 21289, 24941 and 28489 kHz
RTTY - 7042, 14080, 21080 kHz

HP0, SOUTH SHETLANDS. "The Daily DX" received a report that states Stan, SP3BGD, will be leaving Poland on October 20th, to head for the Henryk Arctowski Station located on King George Island in the South Shetland Islands (VP8). He will be taking a boat trip to the island which will take about 40 days to get to the Antarctic base. Once on the island, Stan will relieve Marek (Mark), SP3GVX, who has been operating the club station HF0POL. Stan will leave the island and head back to Poland on December 15th. Since 1991 this club station has made over 25,000 QSOs.

HR6, ROATAN ISLAND (Honduras). Joe, VE3BW, will be active from this Honduran island, February 1-22nd, as VE3BW/HR6. He will be active in the ARRL DX CW Contest. Look for him on the WARC bands before and after the contest. ADDED NOTE (Reminder!): Joe will also be active from St. Kitts from November 17th through December 1st as V47CA. He will be active in the CQWW CW Contest. QSL via Joe's homecall: Joe Adams, 5 Romko Court, St Catharines, Ont. Canada L2N 7A1

IOTA NEWS. Tony/IK1QBT, Nino/IK1ZOZ, Gigi/IK1WJI and Mauro/IK1CJO plan to be active from Gallinara Island (rare island of Ligurian group) IOTA EU-083. Depending on the weather, activity will be between October 11th and 12th or 18th and 19th. Operators will sign IP1/homecall. Their activity will be on CW/SSB with operations on all HF bands (WARC bands included). Check around the standard IOTA frequencies. There will also be activity on 6 meters and VHF in SSB. The reference number for the Italian Island Award (I.I.A.) is SV-01. QSL via their respectives home calls via bureau or direct.

IOTA NEWS. Laci, HA6NL, will spend his holidays on Corfu Island (EU-052) and will operate as SV8/HA6NL/p between October 15-22nd. He will operate mainly CW but some SSB and RTTY operation are also expected. Suggested frequencies on CW: 1831, 3511, 7011, 7025, 10104, 14025, 18071, 21011, 21025, 24891, 28011 and 28025 kHz. QSL to his home call via the bureau or direct.

KH5, PALMYRA (and KH5K Kingman Reef). The South Sandwich Island Dxpedition Group (SSIDXG) announced that one of their team members, Chuck, N4BQW, will go with the USFWS to Palmyra Island in two weeks. Chuck will be flying to Christmas Island where he will meet up with the USFWS. From there Chuck will take a 3 day boat trip to Palmyra Island. Chuck will operate as N4BQW/KH5 for 8 days. The dates of operations were not announced. (ed. It sounds like the operation will take place within a couple of weeks.) He will operate 80-10 meters including WARC bands. He has managed to get permission to take a beam with him this time but no amp. He will operate CW and SSB and possibly RTTY. Chuck has spoken with the Ship's Captain, and he informed him that barring unforeseen problems, there would also be a 48 hour operation from Kingman Reef after they leave Palmyra Island. QSL via WA4FFW: Mac McIntyre Sr., 2903 Maple Ave., Burlington N.C. 27215. Out of pocket cost of this operation for Chuck will be $4000.00 USD. Support can be sent to the:
SSIDXG DXPEDITION FUND, 93787 Dorsely Lane, Junction City, OR 97448
-or- to WA4FFW home address.

PACIFIC ISLAND HOPPING. Maurice, ZL2MF, and Ken, JA3MVI, are currently island hopping in the Pacific on a business tour. By the time you read this, they probably have left Rarotonga (South Cook). Thanks to Alan, VK4AAR, who talked to Maurice and has provided the following schedule below. The information includes duration of operation, callsigns to be used and QSL routes in the ( ) and bands available.
Until Oct 5th - ZK1MJF (ZL2MF) and ZK1MVI (JA3MVI) - 15/20/40m
Oct 6-9th - ZK2MF (ZL2MF) and ZK2KY (JA3MVI) - 15/20/40m
Oct 10-16th - A35KY (JA3MVI) - 15/40m
Oct 12-16th - YJ0AMF (ZL2MF) - 20m
Oct 15-17th - 3D2MF (ZL2MF) and 3D2KY (JA3MVI) - 15/20/40m

They are travelling together, except Ken will be in Tonga while Maurice is in Vanuatu. Ken has an inverted vee for 15/40m and Maurice has the 20m dipole. When they are together, they will be able to share antennas and visit different bands. (Alan.. "The last stop in Fiji starts on 15th which is the day before they leave their previous locations. I suppose this has something to do with the International Dateline?")

P4, ARUBA. Rick, NE8Z, will be active as P4/NE8Z from here, October 25th through November 1st. Activity will be mainly CW on the WARC bands. QSL via K8LJG.

QSL INFO AND NEWS....
Declan, EI6FR, reports that QSL cards for GI/EI7NET Rathlin (EU-122) are back from the printers, and the replies to all direct requests are starting to go out. A bureau mailshot will be done in the coming month.

Dominik, DL5EBE, DX-editor of CQ DL-magazine, informed OPDX on the status on the VP8CTR and R1ANF QSL cards. He states Roman, VP8CTR, sent him an e-mail reporting that he has already made about 13000 QSOs from Vernadsky Base. Meanwhile, Dominik reports that he has received the beautiful pictured QSL cards from the printer. The cards where donated by Northern California DX Foundation (NCDXF), FUNKAMATEUR-Magazine (printer) and the German DX Foundation (GDXF). He currently has the logs up to the IOTA-contest, and all cards until this date will be sent out within the next couple of days. As soon as he receives the next log-files via e-mail, he is ready to continue QSLing as fast as possible. Dominik is also the manager for Vic, R1ANF, who belongs to the current wintering team of Bellingshausen Base, South Shetlands. He reports that logs, so far have not arrived yet. Please be patient. He also mentions that he is NOT managing cards for the last operation of R1ANF, Op. Oleg (UA1PBA). These cards are being handled by Nick, RK1PWA.

T32, CHRISTMAS ISLAND. Paul, WC5P, reports to OPDX that he will be in Eastern Kiribati from November 19th to Decmeber 2nd, operating as T32BE. Activity will be on all HF bands, mostly CW. He will be active in the CQWW CW Contest. QSL via WC5P.

TM5, FRANCE. Dominique, F5SJB, will be using the callsign TM5CW from November 22nd to December 1st. This will include participation during the CQWW CW Contest.

V6, MICRONESIA. Aston, V63BR, is reportedly now active on RTTY. There were no QSNs reported. QSL via AA4US or direct to: Aston Nakayama, P.O. Box 305, Chuuk Island, Micronesia.

XE, MEXICO. Josep, EA3BT, and his wife Nuria, EA3AOK, who will be active from Cancun, on October 12-18th, will be using the callsigns XF3/EA3BT and XF3/EA3AOK, respectively and from Cozumel Island (NA-090), October 19-26th, they will use the same callsigns. Their activity will be on 40-10 meters, including WARC bands, possibly 80 meters. Operations will be on SSB and RTTY and some little CW if needed. They will also take part in the CQWW SSB Contest. QSL via EA3BT.

Z2, ZIMBABWE. "The 59(9) DXReport" states that DF3XZ will be active from here October 15-30th, as Z2/DF3XZ from Z21HJ's QTH. QSL via homecall.

2413. simple radio controlled project/circuit???

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-05 00:00:00 UTC
From: ccn011@email.mot.com
Message-ID: <875937483.12178@dejanews.com>
Source record: 31666
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.boatanchors,rec.radio.amateur.dx,rec.radio.amateur.homebrew,rec.radio.amateur.misc

Hi,
I always interested in radio controlled stuff, like
radio controlled car, plane, boat, etc. I used to have a radio
controlled car (which I still do) and a radio controlled glider (i
never got it up to the air though!).
What I really interested to know is the receiver and the
transmitter
part. I have yet to find out how they actually work. I was just
wondering whether you know if there is any simple radio
controlled project/circuit around that I can build. I did look through
the web , but dont seem to find any. If you happen to have or
know a site, please let me know. Thanks in advance.

p/s: please reply to ccn011@email.mot.com if possible.

Are you fed up of counting up and down manually you listing of the DXCC
countries in order to know your current status?
Are you tired of copying your listings of worked and confirmed countries
from one sheet to another every time there is an addition of deletion of a
country?
Don't you want to say "I have worked 150 countries, more or less" any more?
Have you ever spent an evening searching that paper or notebook where you
used to trace your DXCC status?

Here you have the definitive solution. The DXCC Worksheet.

HTTP://www.redestb.es/personal/g_sampol

What is the DXCC worksheet?
It is an Excel worksheet that helps you trace your status of DXCC
countries. You only have to fill the cells with your worked and confirmed
countries and the totals will be automatically updated. You don't have to
make any calculation !

What do I need for using the DXCC worksheet?
You need a computer running Microsoft's Excel Version 5.0 or 7.0(97)
Availability for former versions of Excel can be studied on demand.

Which are the facilities of the DXCC worksheet?
It provides an updated listing of the DXCC countries (including the deleted
ones). This listing includes:
Common prefix/prefixes
Name
Continent
ITU zone
CQ zone
Provides information on the date of insertion or deletion of the country.
Allows to enter data for any band from 160 m. to 23 cms. plus a
customizable band (3 cms, etc.).
Allows to enter separate data for SSB and CW plus a customizable mode
(RTTY, SSTV, etc.).
Automatically calculates:
Number of worked countries per band in SSB
Number of worked countries per band in CW
Number of worked countries per band in the customizable mode

Number of worked countries per band in mixed mode
Number of confirmed countries per band in SSB
Number of confirmed countries per band in CW
Number of confirmed countries per band in the customizable mode
Number of confirmed countries per band in mixed mode
Total number of countries worked in SSB in the WARC bands
Total number of worked countries in CW in the WARC bands
Total number of worked countries in mixed mode in the WARC bands
Total number of confirmed countries in SSB in the WARC bands
Total number of confirmed countries in CW in the WARC bands
Total number of confirmed countries in mixed mode in the WARC bands

How can I get the DXCC worksheet?
You can download it from my web site at:
HTTP://www.redestb.es/personal/g_sampol

2416. 1000MP Specific Mail List

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-05 00:00:00 UTC
From: jeff@jehosophat.com
Message-ID: <slrn63f7le.ah5.jeff@photuris.jehosophat.com>
Source record: 31669

Just created a new mail list specifically for FT1000MP users.

The list is not supported or endorsed by Yaesu. The list is
meant to be a place where 1000MP users can gather and "hang out"
with each other, exchanging information and ideas. As such the tone is
informal, and people communicate as if they were all good friends.

You can find out more from this Web page:

http://jehosophat.com/1000mp/

Or subscribe to the list by sending an email message to:

1000mp-list-request@jehosophat.com

with a Subject of : subscribe

73 es good DX,

>>> all solid state.
>
>No... the SB33 and the SB34 are nearly identical in terms of circuit design.
>There are two main differences. The SB34 includes both 117VAC and 12VDC
>power supplies while the SB33 includes only the 117VAC supply (the 12VDC
>was an external option). Also, the SB33 was constructed using 1950's
>techniques (transistors socketed as if they were tubes and point-to-point
>hand soldered wireing) while the SB34 was constructed mainly on printed
>circuit cards.

(snip)

OOPS! My earlier posting may have been a little off topic. Both the SB33 and
SB34 were all solid state EXCEPT for the transmit driver (I think it's a 12BY7)
and the final (a pair of oddball TV sweep tubes).

2418. October Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-06 00:00:00 UTC
From: ids@nol.net
Message-ID: <34387df5.13705952@news.nol.net>
Source record: 31670

PROPAGATION - by AD5Q HOUSTON, TEXAS -- OCTOBER 1997

15 Meters is back! Openings to Europe are better than we've seen in a while, and many stations are on testing out the path. From Texas, we are getting good openings to all of Europe, including Scandinavia and Eastern Europe. We are not getting Russia, but the East Coast probably is. It will take a higher solar flux to open up the polar paths, and this will not occur in the current season. This band will add much excitement to the CQWW SSB contest this year as long as disturbed conditions don't strike on contest weekend. 15 will be an important rate band for serious contesters, while packeteers and other wanna-bees will pile up on any DX station that's loud enough to hear with a G5RV. Afternoon openings to Asia are good, and stations on the East Coast are currently able to work the BV's and HL's that show up on the band. The afternoon JA runs will be good, with plenty of nice African pileups to crack in the interim after the band closes to Europe. East/West paths will open on 10, which should also be watched for African signals.

Though many are focused on the encouraging solar statistics, the major factor bringing us these band openings is seasonal. October is the peak of the fall DX season, especially for high latitude paths on the high bands. We are still near the bottom of the cycle, and the current openings to Europe and Asia are the best we will see for now. There will be no such openings on 10 Meters, and the 15 Meter openings will begin to deteriorate after CQWW weekend as winter darkness spreads over the north pole. Until we see higher flux levels, openings in the winter will usually be marginal. This fall DX season will be a short one: enjoy it!

20 Meter daypath conditions are improving, and Europeans are workable in the morning from here. This band is closing earlier in the evening, but remains open for the Pacific and South America until late evening. We still get good polar openings in both the morning and early evening due to the position of the grey line paths, but these continue to shift and polar windows will become more difficult with the approach of winter. Excellent openings to the Antarctic occur around sunset, with long path opportunities into southeast Asia and Indonesia. Morning long path to the Middle East should also be workable from Texas, while the East Coast (especially W4) will get a narrow morning window to India and the West Coast will hear East Africa and Europe. Southern hemi-sphere night paths are opening up.

Most nighttime DX activity is currently moving to 40, which is in excellent shape. The main path to Europe occurs before Texas sunset,

and the East Coast gets the best of this opening during contests. Through the evening we follow the sunrise area across Russia and eventually across Europe. Openings to the Middle East occur amidst the Russian signals, which are numerous. The band continues to quiet down from the summer QRN levels, and the expanded area of darkness in the northern hemisphere increases opportunities to reach remote areas of the world on 40. On 80, we tune for DX from Africa and Europe.

Yes ... Qsl to JA6CT via the JARL buro. Don't bother
to look for his home address ... he told me during one
of my QSOs with him that via the buro is okay.

Every month, like clockwork, an envelope is (usually) mailed
to each JARL member with their QSLs. Only JARL members are
serviced by the JA buro ... but it does run pretty well.
All costs are pretty much covered by membership fees.
It's pretty efficient, so don't be concerned about sending
QSLs that way.

KC1XX doesn't count, Matt makes his own propagation<g>..

But seriously, conditions have been pretty good lately. Several southwestern Europeans were heard here in the Nashville, Tennessee area about 1600Z Saturday. 24.9MHz has been consistently opening for about a week, with several F and EA QSOs today. (and UA3DPX managed to squeak through somehow, though at ESP signal levels.....)

Looking forward to working some Gs soon..

As Promised and thanks to the sponsorship of MFJ,
TT8JWM and TT8JFC will be on the air from
Chad on AMTOR, PACTOR & RTTY (maybe SSTV). MFJ provided a
1278B/DSP modem and Windows Software. I will
let the newsgroup know When we will start operations.

I hope to get QSL's out ASAP. A new TT8 sponsorship
by Personal Database Applications, the writers of LOGic 4
has provided us with logging software to get rid of the "log-jam".

Thanks, and good DXing

CW does not live. It is outdated, and has no real place in ham radio, other then the people that are accustomed to using it, or are to single minded to change. I don't want this to be a cutthroat discussion. I'm not a codeless tech, in fact I'm over the 20 wpm standard. I have tried hard to accept CW. I just don't see the point of sending info with dits and dahs when you can do it at over 150 wpm voice, and alot faster digitally. To me cw is a "tradition", and not a practical way of communicating.

My 2 and a half cents worth

Out of those 150 voiced words, how much "intelligence" was conveyed? You
could probably elminiate many of those 150 words ("well", "ahhh", "yeah",
"dog gone it") and compress the needed info to 20 CW "words" so that
during a one-minute transmission, exactly the same data was passed using
either mode.

Actually I believe it belongs in a DX group. As a nearly "codeless advance",
hi, I missed contacts with VK9W and probably K7k because I run 100W into
wire antennas. Best opportunities for me were on 40 m. I called the VK9W
crowd at 0430 (EDT) and they basically couldn't hear me on SSB.

In order to work some DX I know I'll need to improve my CW skills. Therefore
to me at least, CW has a real place in amateur radio, regardless of what
international licensing requirements are.

Despite the presumably humorous discussion of why this could
be considered appropriate in r.r.a.dx, it is NOT. It would
be darned nice to end this thread in the group, IMO.

Want something on topic? One of the locals worked the 9X group
on 10 meters while mobile yesterday. That's a good catch, eh?

2444. Global Ham Radio Licensing Priviledges

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-09 00:00:00 UTC
From: wa2rsx@worldnet.att.net
Message-ID: <343d0593.42478829@netnews.worldnet.att.net>
Source record: 31696

I recently installed an antenna for 30 meters; my very first use of WARC band followed.

I have been wondering if non-US Ham operators are permitted to use the Baudot RTTY mode on the 30-meter band? For that matter, can they operate RTTY on any WARC band? Thus far, I have found none to exist on 30 meters and listening on other WARC bands is also disappointing to this RTTY activist.

Please, can anyone advise me where I can browse on the WEB to find this information. Is there any known website that includes such info?

Actually, I am curious about not only priviledges for Baudot RTTY, but the licensing structure of Hams around the world. Info such as RF power input/output, requirements for morse code and the rate of sending/receiving cw sigs, lenght of license term, any fees involved, mode of operation permitted each license class/level, etc., etc. Please advise me of any website that would include this information also.

If this type of information is not presently available on the web, then perhaps it is time that someone publishes the data. Please, if possible help me to get a handle on this.

Thanks for taking time to read this posting.

73s es best of DXing,
Vince

QRV: 7085kHz/10.125kHz/14.085kHz w/Baudot RTTY

: >1.830 to 1.840 Intercontinental CW QSOs only.
: >1.840 to 1.850 Intercontinental SSB QSOs only.
: >1.850 to 2.000 SSB

: It's all right for people with enough space for a decent antenna. My
: backyard is 40 feet long.

How far UP does it go? ;-)

: By the way, you won't hear much European CW on 1800 - 1810 kHz. Our
: lower band-edge is 1810 kHz. Also, in the UK we are limited to a
: maximum 32 watts PEP output on frequencies above 1850 kHz. (400 watts
: PEP is allowed between 1810 and 1850 kHz).

Good information. From North America, look for the DX stations between
1.820 and 1.845, with the DX on CW _typically_ centered around
1.830 +/- 5 KHz. There plenty of exceptions, of course!

On North America, best chance to hear DX for the beginner is 0430Z to 0615Z,
roughly European sunrise, and for the half-hur before and after your local
sunrise (for VK/ZL and other Pacific stations). There are some very potent
signals out there with receivers to match!

People on the East Coast recently worked the K7K (Kure) DXpedition with 100
watts to an 80-meter dipole! Try what you have: you might be surprised!

I agree, there are better topics for the DX forum.
I worked TZ6VV on 15 meters last Sunday for a new one...number 282 or something like that. Heard a 9N1 on 20meters last Sunday afternoon for those needing him, Now, if I could just catch that 5X on 15 meters.

This information can be found in most allocation charts. My 1993 chart
shows that CW, RTTY & data are permitted on the entire 30 mtr
allocation. These sub-bands for 17 and 12 mtrs are 18.068-18.110 mHz
and 24.890-24.930 mHz respectively.

>Let the voice boys try and work with that ...

No problem. Slice the 3 kHz voice bandwidth into 30 equal segments
and transmit them sequentially. Reassemble them in order and replay.
Regarding the power level, I've worked Japan from California on six
meters AM (the old fashioned kind) with less power than that, and
using a homebrew ground plane made by a teenager who didn't really
know what he was doing. Piece of cake.

Got a REAL challenge?

2454. FT-767 info/opinions?

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-10 00:00:00 UTC
From: sbabb@lpub.NoQRM.com
Message-ID: <61l7rc$qbl@news-central.tiac.net>
Source record: 31706
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.amateur.space

I'm looking for a "new" HF radio.

My Icom 730 has served well, but I'm looking for something that will cover 160 meters and give me more sensitivity and better filtering (particularly on SSB.) I like dxing, ragchewing, rtty/amtor/packet, and contesting. I live down the road from KC1XX, so I don't even see myself as a "little pistol" in contests (maybe more of a "rusty slingshot") but I enjoy seeing what I can do with my R5, doublet, and 100 watts.

I saw a Yaesu FT-767 GX II at the Rochester, NH hamfest last weekend. I didn't get much of a chance to look at it because someone bought it (for $1400 or so, I think) within minutes of me starting to look at it. It had modules for 6M, 2M, and 70cm. This interested me because I'd like to take a shot at the satellites, and it would also let me operate 6M dx and maybe a few of the local repeaters.

Since then, I've poked around dejanews and the web looking for info on this radio. As often happens, I found more questions than answers. So I've brought my questions to you:

1. What is the difference between a FT-767, a FT-767 GX, and a FT-767 GX II?

2. How are the filters in this rig? As 20 meters gets uglier, better filters seem to be what I need the most (followed by more receiver sensitivity.)

3. You can contest with any radio, but some are better than others. Do any contesters have comments on this rig?

4. Anyone want to comment on their experiences with the VHF/UHF modules and satellite work?

5. Are there other rigs that are as versatile as this one appears to be?

Thanks and 73,
Scott WA1VHT

I'm posting this for my friends at Alpha...
please respond directly to them:

SAVE! ** ALPHA "SUNSPOT" SALE! ** SAVE!

Long after sunset Saturday night, I switched on
the xcvr & ALPHA. Before you could say " porpagation",
two 9n1's, an AP2, and a string of Siberians were
in the log. Signal reports ran to S9+20 just like
old times. Sunspots are back!

Dave AA0RS/G3SZA, Brad K0HM, and I all love DXing,
so ALPHA/POWER is throwing a SUNSPOT SALE to celebrate
long nights with 20 wide open to everywhere all night!

CALL NOW and buy a brand new ALPHA 87A for $5,995, an
'89 for $3,795, or a '91B for $2,695. Standard warranty
and 30 day money-back guarantee, of course. Quantities
are limited, so call Dave, Brad, Barbara, or Scott and
mention that you saw this promotion to save on your new
ALPHA. Sale ends 12/19/97 in any case.

Dick Ehrhorn, W0ID

2462. Best Base

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-11 00:00:00 UTC
From: JEEPMON <jeepmon@interaccess.com>
Message-ID: <61o71v$ng4$1@nntp3.interaccess.com>
Source record: 31616

I am interested in purchasing a used HF xrcvr rig. I m looking
for at least a triple conversion receiver one. All bander of course. I am
willing to spend upwards of $1000. I am currently looking at a Kenwood
940SAT and an Yeasu 757. Are both of these bases and have their own power
supply?? Do these have 6M also. I don't care about digital. Can u recommend
a GREAT H.F. rig base (with internal power supply)? How do the 940 and 757
compare? Any other suggestions? I know that ICOM makes a model 706 (I and
II) that are H.F. xrcvrs with both 6M and 2M, but it is a mobile. Is there
any Base H.F. rigs that cover 160-10M with 6M also (2M is not that
important now as I would like to get a separate 2M base after an H.F.
base). I hear that Kenwood , Icom, Yeasu all make top of the line equipment
but the tech and general support from Kenwood is severely lacking... I am
perfectly willing to purchase an older unit such as an FT101 or something
similar but I don't know what all those older radios do nor any of their
specs. Is their a book that has pictures of all those old radios and newer
ones to with general specs? I would pay lots for a book like this. It may
sound silly to say but aesthetic do mean something to me, to the respect
that I want a one piece base unit not separate speakers, power supplies,
tuners, and separate VFO's, etc.
Please help me if u can thanx!

2463. Meteorological info for predicting condx ??

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-11 00:00:00 UTC
From: la8ak@online.nospam.thanks
Message-ID: <343fdc14.45368@news.online.no>
Source record: 31617

Hi
Earlier newspapers showed meteorological maps indicating isobars and clouds. Unfortunately this practice has now ceased, perhaps this is unlikely wise as long as meteologists too often mixes the expression "low pressure" with rain, and they do not understand that fog is not cloud. with high pressure in summer they seem too often to inform us that a low pressure area is approaching, but as long condx to Scotland on microwaves are well above normal, one understand that they lie.

so is it any site where I can find such meteorological maps to indicate that low pressure area is approaching UK - to create ufb condx from LA to F...?

2467. Whiskey-2-India-Mike on 3642.0 AM

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-12 00:00:00 UTC
From: geoffm@humus.cs.huji.ac.il
Message-ID: <61qnav$d6j$2@news.huji.ac.il>
Source record: 31619

Last night (about 1800 utc) I was listening on 3642 khz and heard a
womans voice repeating "whiskey-2-india-mike" using am. The signal was
peaking at s9 which for me is usually only achived by broadcast
stations.

At first I thought it was an awfully strong beacon, coming from W2IM in
the US. Then I remembered that 3642 was CW only in the US and then I was
really confused. A bootlegger maybe? The signal faded out........

A few minutes later the same recored voice came on with repeating a string of
letters and numbers. Oh well, another numbers station.

73,

Geoff.

SB DX @ WW $OPDX.326
Ohio/Penn DX Bulletin No. 326

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 326
BID: $OPDX.326
October 13, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, W1RM, K2PF, KA2AEV, K4QD, W4WX, KD6WW, KG8CO, N9NC, W0YR, 9K2HN, 9V1YC, CT1BOH, EA3ELM, F6AJA, FK8GM, G3NYY, G3SXW, G4BUE & DX News Sheet, HB9BYU, I1JQJ, IK4TVP, PA3DZN, PA3AXU, RA3AUU, VK2ICV and VK4AAR for the following DX information.

3A, MONACO. Mike, W0YR, and Tom, N9NC, are planning a RTTY and CW operation from here, October 23-27th. On RTTY they will be concentrating mainly on North America contacts. They do NOT anticipate operating in the CQWW Phone Contest that weekend. Both have received permission to use the special prefix 3A7G which marks seven centuries of rule by the Grimaldi family. So, look for Mike to use 3A/W0YR or 3A7G/W0YR and Tom to use either 3A/N9NC or 3A7G/N9NC.
Meanwhile, the "DX News Sheet" report that Luc, I1YRL, will be active once again from here between October and December as 3A/I1YRL. QSL via home call.

3D, FIJI. Gerard, PA3AXU, reports to OPDX that the authorities of the Republic of Fiji have issued him the licence/call 3D2XU. He will be here from November 4-8th. He is planning to operate CW/SSB on 10/15/20 meters with 100 watts into groundplane. Gerard also states this is "No real expedition but just a holiday stop...." QSL to PA3AXU: Gerard Dijkers, Dr P.A.Cornethof 3, NL-6669 AZ Dodewaard, The Netherlands.

3W, VIETNAM. Just a reminder that a new IOTA will be aired this week. From October 14-20th, look for 3W6VT to be active from Con Dao Island which is part of the Conson Group. Refer to OPDX.320.

6V, SENEGAL. Chris, 6W1QV, and Didier, F5OGL/6W1AE, will be active as 6V1C for both CQWW SSB and CW Contests. QSL via 6W1QV: Christian Saint Arroman, Po Box 3263, Dakar, Senegal.

8Q, MALDIVES. Bruce, KD6WW, will be operating as 8Q7AJ from October 30th to November 10th. Activity will be mostly on CW and RTTY. He will be

active on all bands from 160-10 meters with an emphasis on the low bands and the WARC bands except for rtty. QSL via KD6WW direct, or via W6 bureau. Bruce will also take InterNet requests for bureau replies at: kd6ww@inreach.com. He asks that the request be titled "8Q7AJ QSL Request" and contain the usual information. Also, he asks that InterNet requests not be sent until after November 12th when he returns.

9U, BURUNDI. Alex, PA3DZN, will go to Bujumbura for a period of three months, possibly (probably) much longer. He will arrive there during the week of October 20th. With the assistance of Alfredo, 9U5CW, and Jean-Pierre, 9U5DX, he has applied for the callsign 9U2L. Alex states HAL Communications Corp. has sponsored one DSP4100 modem for digital operation, and Wyvern Technology Inc. included the latest version of the WF1B RTTY Contest/DXpedition software. Other equipment that he will take along is a Kenwood TS570S, a Ten-Tec Centaur amplifier, and a Force12 C4 (10-40m) beam. Antennas for the low bands are something that he will have to sort out locally with wire antennas, depending very much on the location. He also noted that he will be there on a work assignment. Therefore, operating time depends very much on the spare time he has. QSLs for this operation will go via PA3DMH, who also holds the logs for 9X5EE, 9Q2L, 9R1A, D25L, and ZS6/PA3DZN. Log search is available at: http://www.igr.nl/users/pa3dmh/logs/log_search.html.

A4, OMAN. Mary, G0BQV, will be operating as A4/G0BQV from October 16-24th. She will be on CW only, operating mainly on .025 each band. There was no info provided on 80 or 160 meters. QSL via G0BQV.

CORRECTION AND UPDATE. As mentioned in OPDX.325, Maurice, ZL2MF, and Ken, JA3MVI, will be Pacific island hopping. They have made a correction/update on the final leg of their Pacific islands tour. They will be active from the 3D-land as 3D2MF and 3D2KY from October 17-23rd, NOT 15th to 23rd as first reported.

C6, BAHAMAS. The CCDXA (of North Florida) will be active from Treasure Cay October 21-28th. The club will be a Multi/Single entry in the CQWW SSB Contest using the callsign C6AJT. Members will be active before and after the contest on SSB, RTTY and CW on all bands. Operators will be: Mac/KM4WE, Clarence/W4CJK, Joe/W4USN, Gary/K4GZ and Bill/W4WX using /C6A outside the contest. QSL C6AJT contacts to W4CJK and others to CBA or via bureau.
Also, Jon, EA2KL, and Lluis, EA3ELM, members of the LYNX DX Group, will be active from Abaco on SSB/CW all bands (including 12 and 17 meters), from November 2-9th. The callsign that they will use is C6AHN. QSL via EA3ELM.

FK8, NEW CALEDONIA. Look for FK8GM during the CQWW SSB Contest. Operators will be Eric/FK8GM, Alain/FK8FI and Franck/FK8HC, and they will be a Multi/Multi entry in the contest. The QSL via WB2RAJ.

FP, MIQUELON (UPDATE). As mentioned in OPDX.323, operators KG8CO, N8CC, K8AEM and W8MC would be active from here October 23-28th. Activity will be on 160-10 meters with the various modes. They announced that they

will be active as FP/KG8CO in the CQWW Phone Contest and will operate as a M/M entry. QSL via K8AQM.

FT5W/X/Z, CROZET, KERGUELEN AND AMSTERDAM ISLAND. There are conflicting reports on this on! One report states Rene, FT5X/FR5HR, heard from Kerguelen Island, will be active for about one more week before he goes to Amsterdam Island (FT/Z). Another report states, Rene, who was heard on maritime mobile headed back to Reunion Island. He will be there a week or so before going to Crozet. A comment was made, "As he is on a French Navy ship, he said plans can change at any time. So keep your ears out for him active from any of FT5 terrritories in October". Check 21217 kHz around 1345z. QSL via F5RRH.

KG4, GUANTANAMO BAY. KG4QD will be active as a Multi-Single during the CQWW DX SSB Contest October 25-26th. Jan, K4QD (ex WA4VQD), will lead a team consisting of Al/K3VN (ex WA3YVN), Bill/N2WD (ex WD4GDZ), Rusty/KG4AU and other amateurs at GITMO for this contest effort. The team, members of the Central Florida DX Assoc. (CFDXA), will arrive Thursday, October 23rd, and depart Wednesday, October 29th. During non contest periods, look for Jan/KG4QD, Al/KG4VN, and Bill/KG4WB operating primarily on the WARC bands. The team also plans to try some six meter activity. The contest logs and photos will be available on the WEB shortly after the contest. A log search test site containing KG4QD logs from October, 1996, and February, 1997, is available at "http://www.ham.net/cfdxa/gitmo". QSL via home call for KG4QD, KG4VN and KG4WB.

P4, ARUBA. Jose, CT1BOH, will be active as P40E one week before the CQWW SSB and CW Contest. Activities and operations were not provided. QSL to W3HNK for both CT1BOH and P40E.

QSL INFO AND NEWS.....
Nino, IK8ENH, has announced that he is the new QSL Manager (Europe only) for Jose, CO3CL.

Mac, WA4FFW, reports that all QSL cards for the N4BQW/KH4 (Midway), KH6 (Tern), and KH7K (Kure) trips have been answered. This includes all SWL, Bureau, and cards received directly. There were a few not in the logs, and those cards were returned to verify dates and times. Mac appreciates the help he received from WJ4T and the patience from the DX community. Mac will continue to process requests for any of the above contacts on a daily basis.

Jean, F6AJA, reports he has the F2JD/HP1XBI logs up to September 15th. All direct requests are on the way. Gerard will probably stay in Panama up to December.

QSL 6W1AE via F6AJA direct or via the bureau BUT not via F5THR.

Andy, RW3AH, is very active all over the bands from Rwanda as 9X0A (ex 9X/RW3AH), and he is planning to stay there until February, 1998. He has changed his QSO route. Andy was asking for QSLs to be sent to his home address. Unfortunately, mail still gets lost in Russia, and he decided to change his QSL policy. Jeff, DL5WM, was appointed as 9X0A

QSL Manager. All QSLs for 9X/RW3AH still should be sent to RW3AH's home address: Box 899, Moscow, 127018, Russia (they are being handled by Toivo, RA3AR). He made 7900 QSOs as 9X/RW3AH.

A new QSL Manager has been appointed for 5V7A (upcoming 1997 CQWW CW Contest). QSL via GM4FDM. His e-mail address has changed, and they will accept E-mail QSL requests for replies via bureau. Please note that the E-mail address to which these should be addressed has changed to: wylie@sol.co.uk Note: QSLs for 5V7A (CQWW CW Contest 1996) continue to be handled by GM4AGL.

SPECIAL EVENT. Look for special event station HB4FG, October 18-19th, from the Swiss Army Amateur Group. They will be active from Vallemaggia/TI for the Jamboree on the air with the Scouting Group of Vallemaggia and Daro. Activity will be on 80/40/20 meters. A special QSL will be received via bureau.

SV9, CRETE. Walt, SV9/G3NYY and Tim, SV9/G4VXE will be very active on CW from Crete (IOTA EU-015) from October 14-21st. They hope to operate on all bands 160-10 meters, and there may also be some 6 meter activity. QSL for SV9/G3NYY via G3NYY and for SV9/G4VXE via G3SWH (direct or via bureau for both).

T7, SAN MARINO. During the next CQWW SSB Contest, look for T70A (San Marino Club) to be aired as a Multi/Multi or Multi/Single operation. The opertors will be: DF6QC, DL2MEH, DL4OCL, DL8OBC, I4ZQS, IK4TVP, IV3NVN, IV3TAN, IV3TMV, T77BL, T77C, 777LL and T77WI. QSL via: P.O.BOX 77, San Marino A1, 47031 Rep. San Marino.

TF, ICELAND. NODXA member Phil, KE8RO, and Sean, KC8CSD, will be heading to Iceland on October 16th. They will arrive in Keflavik on the 17th. They plan to operate HF, both SSB and CW, on as many bands as possible. Phil's license has been issued and his call is KE8RO/TF. They will be in Iceland from the 17th through the 24th of this month. Direct QSLs can go to KC8CSD, or via the bureau to Phil's homecall.

TO5, MARTINIQUE. Ralph, K2PF, reports that Steve, KU9C, and he are heading here for the CQWW SSB Contest this month. They are not sure what their callsigns will be, but expect a TO5* or TO5** callsign. They will be on all bands. Activity will take place before and after the contest, and they will likely include WARC bands, RS-12 and perhaps RTTY. QSLs via K2PF.

V2, ANTIGUA. Team Antigua is once again pleased to announce that it will be activating V26B in the upcoming CQWW SSB Contest in late October. They will be entering the contest as a Multi-Operator/Multi-transmitter catagory from Antigua (Grid Square FK-97 -- IOTA NA-100). In addition, the Team would also like to announce that both the 5 band and 6 band "Certificates of Appreciation" will be available once again for the 1997 operation. Briefly, to qualify for these special certificates, all you have to do is work V26B during the CQWW SSB Contest period on either 5 bands or 6 bands to receive the special "Certificate of Appreciation".

Members of Team Antigua will also make special attempts to be active on the WARC Bands, RTTY, and 160 meters. Here are the members of Team Antigua and their QSL routes:

V26AK - Tony, QSL via WB2P or N2TK V26RS - Tom, QSL via N2SR
V26B - Sam, QSL via WT3Q V26TS - Tyler, QSL via K3MM
V26E - Darrell, QSL via AB2E V26U - Bill, QSL via W2UDT
V26R - Mike, QSL via KA2AEV
V26RN - Bob, QSL via N5NJ

Team Antigua would also like to welcome to its family the following new members: WX0B/Jay, W3FV/Barry and N3OC/Brian. Also, please check out the V26B WWW site for complete details with photos and descriptions of their station. Its URL is: http://WWW.frc-contest.org/v26b.html
Please also note that in Team Antigua are members of The Frankford Radio Club who is celebrating its 70th Anniversary and is sponsoring a very special award. Additional information for this special certificate and a full list of members of the Frankford Radio Club may be found at: http://www.frc-contest.org/70th.html

VI0, MACQUARIE ISLAND. Alan, VK4AAR, reports that the special event callsign "VI0ANARE" will be used from Macquarie Island from October 25-31st, and then it will not be used anymore. The custodians of this callsign (celebrating the 50th anniversary of the Australian National Antarctic Research Expeditions (ANARE)) insist that QSLs go ONLY to VK4AAR direct with return postage and self addressed envelope:
Alan Roocroft, c/o Post Office, Dalveen. QLD 4374. Australia.
From November 1st, the boys on Macquarie will revert back to their own callsign and QSL managers until their return to Australia soon.

VK9, LORD HOWE ISLAND (Update). Dan, K8RF, and Nick, VK2ICV, will be active as VK9LX. Due to the cancellation of the 3C0 DXpedition, they have an opportunity to borrow the Battle Creek Special antenna to operate on 80/160 meters. Unfortunately, they are faced with both time and financial constraints in their effort to get the Battle Creek Special antenna to Lord Howe. As the Lord Howe DXpedition is without any commercial sponsors, their budget is already stretched to the limit. For this reason they appeal to the DX community for help. If interested in helping, donations can be sent to: Lord Howe Island Dxpedition VK9LX, c/o Nick Hacko, P.O Box 730, Parramatta NSW 2124, Australia.

Hi Stan,
I can see your argument. I'm a runner myself, but there is a difference between walking and code. Using the same analogy, if you got sick would you rather have an ambulance come get you, or gave a copuple of paramedics run to you for help.

On another note, I do believe that code has a lot to do with rec.radio.amateur.dx, in fact without CW, you can't work any real dx below 50, with the current licensing regulations. And I belive that it is very relevent on this news group. What I don't think is necessary are the rude posts by some people. I'm simply discussing CW in an intelligent manne, and not arguing about it. If you don't like the word CW in the heading, than simply omit the thread.

Best Regards,
Art.

From: terrybu@netman.ens.tek.com
Message-ID: <61tjga$9b@netman.ens.tek.com>
Source record: 31627

Well, that's the way it happens guys and gals. No sooner do I say
I haven't worked it an then I do. This weekend 5X4F was in qso with
K3SW and one or two others and I 'politely' broke with my call asking
to work the 5X. Low and behold I got to. One more down.

5X4F 21.240+- Sunday 10/12 around 1900Z, QSL Mng K3SW

Also worked a 9Q5 just up the band a few minutes later just up the band
around 21.270.

15 meters has been getting some interesting stuff on it and 10 meters
is sounding pretty good too. Should I say it...I need the TT8.

I know how much you all hate to read postings here that have to do with DX!
:-)

Does anyone have a good address for UA9LM? I worked EZ7TOP a couple weeks ago, maybe my third station in Turkmenistan, which I have been totally unsuccessful at geting confirmed. So once again I will try to confirm it via UA9LM, as the op announced. I will try the buro, but thought a direct card may have a chance too if I can find the address.

DX IS!

>

1.Sciatica refers to pain in the passage and distribution region of
the
sciatica nerve.
2.It's main manifestation is radiating pain in the lower back and
legs. It
usually radiates from the lumbar region on just one

side from the lumbar region or buttock to the posterior side of
the
thigh, popliteal fossa, lateral side of the leg and lateral
side of the dorsum of the foot.
3.Most sciatica is due to prolapse of a lumbar intervertebral disc.

More information at: http://www.acupuncture.com/Clinical/Sciatica.htm

Good Luck,

Doug

While the MUF continues to climb this fall(northern hemi) and a lot of attention
is being placed on 15/12/10 meters this season. Will the low bands fade only in interest or will the openings still be as good ? The past 2 fall/winter low band
seasons by my book were nothing short of super. ZS8IR 10DB over s9 on 80 meters short path our evenings !! S21XX operation working west coast on top band just to name a few. Can this season measure up with rising MUF's ?

>Ron, AA7CQ
>

Good question! I just put up my 80 meter dipole again in hopes of this season being as good as last years'.

I have never heard an S2 on 80 meters here in the Black Hole of the Midwest ... but then again last year I got 3V8BB on 80 and the year earlier, 1A0KM.

Still trying to come up with a decent 160 meter antenna that will fit in my yard!

73, Zack W9SZ

2491. Dx4Win Mailing List Reflector

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-15 00:00:00 UTC
From: "Short, B.K." <shortckt@primenet.com>
Message-ID: <34458A40.13A@primenet.com>
Source record: 31643

Dx4Win Mailing List Reflector

(Other mailing lists at: http://www.qth.net and much
further information at: http://www.qsl.net/k7on)

Dx4Win is a mailing list (reflector) devoted to the
discussion of Dx4Win, the DX logging and packet program.

* Anything Dx4Win Related

TO: majordomo@qth.net
SUBJECT:
BODY: subscribe dx4win

To be removed from the mailing list:

TO: majordomo@qth.net
SUBJECT:
BODY: unsubscribe dx4win

To post information/questions to the list:

TO: dx4win@qth.net

This mailing list is sponsored by Al Waller (K3TKJ).

Please address any questions to: pvander@erols.com

QTH.Net Digests and Archives (for subscribers)
k7on@qth.net

What about Digests and Archives?

A. Digests

All lists at QTH.Net have digests available.

You can subscribe to a digest and periodically receive the compiled
messages rather than individual messages.

All list digests are configured for a size limit of 40,000 bytes.
However, most of the files are around 16k to 30k. This is because
majordomo will NOT send a digest larger than the limit. If a new
message pushes beyond the limit, it sends the accumulated, putting
the new message in the NEXT digest.

If you are switching from non-digest to digest, you must unsubscribe
dx4win and subscribe dx4win-digest.

It is an entirely seperate subscription, but both digest and non-digest
subscribers are permitted to post to the non-digest list.

TO: majordomo@qth.net
SUBJECT:
BODY: subscribe dx4win-digest
unsubscribe dx4win

B. Archives

All messages sent via reflector are archived and are available for
access through majordomo.

You can send a command to majordomo@qth.net and in the body type:

index dx4win-digest

and get a list of files that are available by request.

Here is an example:

>>>> index dx4win-digest
total 116
-rw-rw---- 1 majordom 45 14169 Sep 2 18:09 v01.n042
-rw-rw---- 1 majordom 45 18100 Sep 3 11:27 v01.n043
-rw-rw---- 1 majordom 45 15322 Sep 4 14:11 v01.n044
-rw-rw---- 1 majordom 45 13490 Sep 6 11:15 v01.n045
-rw-rw---- 1 majordom 45 16382 Sep 9 18:39 v01.n046
-rw-rw---- 1 majordom 45 14823 Sep 11 08:40 v01.n047
-rw-rw---- 1 majordom 45 16872 Sep 12 01:04 v01.n048

To retrieve one of these files, send an email to majordomo@qth.net.

In the body of the message, type:

get dx4win-digest v01.n048

The file will be emailed to you, automagically!

C. Archives on WWW

You may view the archives online.

Point your web browser to: http://www.qth.net/dx4win-digest.archive

If you have a space to lay down a 31 foot circle, you can get on 160
meters.
If you have an ARRL Antenna Book, look up DDRR antennas, however,
instead of using solid pipe, I use a riggings similar to a cage dipole
to make the structure. I also don't use the capacitor shown, I just
move the gap closer or farther apart.

In my very short time as an HF DXer, I have yet to hear *any* DX on
80 M, and precious little on 40 (a single S.Amer. station, as I recall).
I've gotten lots of DX on 20, and have seen recent 15M/10M openings.
Am I just looking in the wrong place/time for 80 and 40? A couple
possible explanations:

- my ant is a 135-ft dipole, center is up ~25 ft (any boost
in height would push the Ugly Quotient into 'unacceptable',
acc to XYL). Maybe too low for the lower bands?

- I've never stayed up to listen later than 1 AM local (0500Z).
Missing out?

- Maybe I'm not aware of the hot spots on the dial, and just hear
all the rag-chewers?

- The above posters make it sound like winter is when I'll see the
action. True?

Granted 3 months is rather short for gaining experience, but I've begin
to wonder. Anyone?

I heard one can do this by clipping the device to the antenna
and i think the negitive (-) side of the battery.
i want to make it recieve differnt Freq. s and maybey transmit on them
too. i know about the FCC and licenseing stuff so i will keep the power
down :)
i'm new in radio stuff so please use simple terms and maybey
scematics (i can read those :>)
thank you in advance.

> action. True?

Your dipole is a little bit too low at 25 feet BUT

The secret of 75m DX is to listen at sunrise and sunset
when you are in the grayzone. Use something like Geoclock
to see when this happens.

I can hear on my low dipole (25ft too) dozens of VKs ZLs and
sometimes JAs almost every morning at sunrise, and same thing at
sunset although it is sometimes more difficult when they are long
path. VKs and ZLs are already there around 3799.5 every morning
and afternoon.

From West Coast it is more difficult to catch Europeans but
VK, ZL and JAs should be very easy to catch even with a low
dipole. A vertical is sometimes better. Last year I put up a 25ft
center loaded vertical and worked more than 30 countries in one month
with 100 watts.

>I try reason, I get someone using gutter language. Sorry for you Ken.....

>Alan Stanley

We have places to try reason, Alan. And we have people who love to
be reasoned with. We read this particular newsgroup because we want
to see what is going on related to DX, not scanner laws, code arguments,
etc. If your assumption that "Seems that if it concerns ham radio, it might be
appropriate to post in any rec.radio group" was correct, there would be only one
rec.radio newsgroup. The reason that there is more than one is that each is
intented for specific topics, this one being DX - not scanner laws.

Try .MISC or .POLICY if you want someone to reason with.

73, Jim KH2D

ZCZC AE44
QST de W1AW
DX Bulletin 44 ARLD044
From ARRL Headquarters
Newington CT October 16, 1997
To all radio amateurs

SB DX ARL ARLD044
ARLD044 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, Frank, DL7UFR, Peter, W1RM, Mike, W0YR, The 599Rpt, G4BUE, QRZ DX and Contest Corral from QST. Thanks to all.

MONACO, 3A. Mike, W0YR, and Tom, N9NC, will be QRV from October 23 to 27 as 3A7G/homecalls using CW and RTTY. They do not expect to be active in the CQ WW SSB Contest. QSL both calls via OM2SA.

VIETNAM, 3W. Look for Yuki, JI6KVR, to activate a new IOTA until October 20. 3W6VT will be QRV from Con Dao Island, which is part of the Con Son Island Group. QSL via JJ6LXX.

OMAN, A4. Mary, G0BQV, will be QRV as A4/G0BQV using CW until October 24. Look for her at 25 kHz up from the band edges. QSL to home call.

ST. PIERRE AND MIQUELON, FP. KG8CO, N8CC, K8AEM and W8MC will be QRV from Miquelon as FP/KG8CO from October 23 to 28. Activity will be on 160 to 10 meters. They also expect to be active in the upcoming CQ WW SSB Contest. QSL via K8AQM.

HONDURAS, HR. Sigi, DL7DF, with other German amateurs will be QRV as DL7DF/HR3 on all bands, including the newer bands and 6 meters. Activity is expected as well in the upcoming CQ WW SSB Contest. QSL via DL7DF.

PALMYRA ISLAND, KH5. Chuck, N4BQW, will be QRV as KH5/N4BQW on 160 meters from October 17 to 25. QSL via WA4FFW.

ARUBA, P4. John, W2GD, will be QRV from October 22 to 27 as P40W. Activity is expected as well in the CQ WW SSB Contest. QSL via N2MM.

CRETE, SV9. G3NYY and G4VXE are QRV as SV9/G3NYY and SV9/G4VXE until October 21. Look for their CW activity on 160 to 10 meters. QSL SV9/G3NYY to home call and SV9/G4VXE via G3SWH.

TURKEY, TA. TA3J and TA3YJ will be QRV as YM3SV from October 25 to 31 in celebration of the reconciliation agreement signed between Greece and Turkey in 1930. Look for them on 80 to 10 meters, using only SSB. QSL via TA3YJ.

CHAD, TT. TT8JWM will be QRV on 20 and 17 meters using RTTY and other digital modes. QSL via WA4KKY.

SOUTH ORKNEY ISLANDS. Jorge has been QRV from club station LU1ZA on 20 meters at 0100z. His length of stay is unknown. QSL via operator's instructions.

THIS WEEKEND ON THE RADIO. The ARRL International EME Competition, The QRP ARCI Fall CW QSO Party, RSGB 21/28 MHz CW Contest and the Illinois QSO Party will keep you busy this weekend. Please see October QST, page 107 for details.

Date: 1997-10-16 00:00:00 UTC
From: Madjid BOUKRI <mboukri@cam.org>
Message-ID: <34466130.AC7D9954@cam.org>
Source record: 31661

Thanks to people who answered my posting, I was able
to re establish contact with Sadek 7X2LS.

DONT SEND QSLs with green stamp or IRC via Bureau or
CALL BOOK Address !!!!!

He told me that QSLs addressed to him in ALGERIA have
little chance to arrive. Some envelopes arrived but
were ripped open by ??? to see if there was any money inside.

Use the address below instead (it is also in QRZ on the WEB)
Sadek is asking for 1 green stamp or 2 IRCs to cover return
postage for direct QSLs.

And dont put ALGERIA in there, the address is in FRANCE!!!!

SADEK LASKRI

Dear reader,

De Radiowereld again has updated her website!
As you can see there's a lot to find there about radio / tv / media,
and all dutch radiostations.
New on this site is the "last media news".
Also new is that the amount of links is doubled!
In a simple way a CD can be won, by placing a button
on your own web site. We would appreciate it if you placed
a button of our site on your web site.
Therefore we would like to invite you to take a look
at our web site. Please inform us how you think
about our site!
Yours sincerely
De radiowereld.
http://www.radiowereld.nl

Geachte lezer:
De Radiowereld heeft haar site wederom opnieuw vernieuwd.
Zoals u al misschien weet kunt u op de Radiowereld alles vinden op het
gebied van radio / tv / media, nieuw is het laatste media nieuws.
Nieuw is het aantal links dat nu is verdubbelt.
Tevens kunt u kans maken op een GRATIS CD op een simpele manier.
Bij deze nodigen we u uit om eens een kijkje te nemen, veel plezier.
Het adres, http://www.radiowereld.nl

Met vriendelijke groet :-) martin---De Radio Wereld----
E-MAIL : webmaster@radiowereld.nl

De RADIOWERELD
Hier vind u alles over het medium radio
Nu geheel in nieuwe stijl, snel, en nog meer...
Tevens maak je nu kans op een GRATIS CD
P.S. staat Uw link er nog niet bij, MAIL ons.

Source record: 31570

Dear fellow amateurs,

Greetings from BD1QL. My name is Rick Niu, and I am a first-year MBA student at Columbia Business School in the City of New York. I used to serve as the president and chief operator of BY1QH, the Tsinghua University Amateur Radio Club (TUARC) station, in Beijing, China. While quite a few modes (SSB, CW, digital and satellite) fascinated me, I found the interpersonal aspect of amateur radio the most exciting. I graduated from Tsinghua in the summer of 1995, and worked as consultant and later marketing director for the consulting arm of CITIC, China International Trust and Investment Corporation, until I came to Columbia in September, 1997. Despite of an extremely rigorous curriculum in the first semester, I look forward to talking, and perhaps meeting in person, with many of you, and hopefully being able to get on the air shortly. My email address is xn6@columbia.edu.

73s,

Rick

Try your sunrise/sunset. A few nites ago around 11:00 GMT I
worked a bunch of east coast U.S. stations on 40 meters. On
40, listen below 7.100 for SSB stations who are trying to work
the U.S. split - our phone band ends at 7.100, so if you are listening
on your phone band, you'll never hear us...

73, Jim KH2D

. ======================
*** The Daily DX ***
======================
Volume 1 Number 147
October 17, 1997
Edited by Bernie McClenny, W3UR

Headlines

The Japanese group that was headed to Con Dao Islands started up yesterday around 08:00Z from the Island of Con Son. They were unable to take satellite equipment however they were able to take RTTY equipment. They were originally going to use 3W6VT. Look for the following calls on the following bands.

Bands Suggested freq. Call
160 1822 or 1823 3W5MNB
80 40 3795 7080 3W5KDN
20 15 14260 & 21260 3W5KVR
30 17 12 3W5FS

See QSL information listed below.

Koji, ZS6CAX/JM1CAX, tells The Daily DX that he will operate from Swaziland from 23 to 27 October. During the CQ World Wide SSB DX contest he will use 3DA5A and out side of the contest he will use 3DA0NX. He will be paying special attention to 160, 80 and 30 meters. QSL 3DA5A via JH7FQK (direct or bureau). QSL 3DA0NX via ZS6CAX (direct or bureau) or JM1CAX (bureau only). He will leave on Monday morning 27 October.

Chris, A45XR (ex A71CW), has been very active recently signing A45XR/SJ. The SJ stands for Silver Jubilee. He has been very active on 40 meters the last week or so. Check the low end between 22:00 and 01:00Z. He says he hopes to be on 160 meters in about 10 days. QSL information for A45XR and A71CW is as follows: Krzysztof (Chris) Dabrowski, P.O. BOX 2038, CPO 111, OMAN.

Tom, VK0TS, Graham, VK0GW, will help celebrate the 50th anniversary of ANARE by using the special call VK0ANARE on Macquarie Island from 25 to 31 October. They plan to have two stations on at the same time and they will participate in the CQ World Wide SSB DX Contest. QSL cards for VK0ANARE go to Simon Trotter, VK1AUS/VK1OZ, P.O. Box 2063, Kambah Village, ACT 2902, AUSTRALIA.

The DX News Sheet reports that Hubert, DK1ZN, and his XYL Nanda, DL9GCP, have moved to Sri Lanka and will be active as 4S7ZNG and 4S7YLR.

QSN

3B8/CX4CR - MAURITIUS - This station has been showing up the last two days on SSB on 40 and 12 meters. QSL via CX3AN.

4U1ITU - ITU Geneva - As predicted activity is starting to happen from this club station. Yesterday they were on 15 and 17 meters CW working JA's. Look for this station to be very active in the next few weeks as operators from all over the world will be at WARC 1997 and will spend time here.

5A1A - LIBYA - This is the second day this station was found on 21350. Yesterday he was there after 17:00Z.

ET3BN - ETHIOPIA - Check 24900 between 12:00 and 13:00Z.

FH/DJ2BW - MAYOTTE - Hermann said the 160 meter antenna fell down and he needs to repair it. North Americans may want to check around 1830 or 1831 tomorrow (Saturday) around 02:00Z. QSL via DJ2BW. Activity yesterday was a follows:
GMT Band
2-4 40
13-17 17
22-00 80

VK0TS - MACQUARIE ISLAND - Tom was found between 10:00 and 11:00Z on 7080. QSL via VK1AUS.

IOTA

The following IOTA stations were active yesterday.

IOTA	Call	Freq	GMT	IOTA	Call	Freq	GMT
AS-130	3W5KVR	14260	1304	NA-045	XF3/EA3BT	14260	2116

>Madjid, VE2GMI - Home Page: http://www.CAM.ORG/~mboukri
>NEC4WIN Windows Antenna Simulation Software

You are VERY correct about sunrise/sunset times and the grayline path. However, it also helps if your location happens to correspond with a location at the other end of the path that puts the far end of the path in a decent operator's time for that area! It just so happens that the W5 area in central Texas is a very poor corresponding path for much activity in VU, HS0, 9M6, VU4 and so on at our sunrise during much of the year. By the time it begins to get dark over there, the sun is up for two or three hours here!

Now that isn't true at ALL times of the year. A couple of weeks a year the terminator passes through us and, say HS0, right at the exact peak of the path. During those weeks, even a fairly poor setup with 100 watts or so can work from one end to the other on 40 and 80. This propagation mode is responsible for many of my low band nice ones, such as 8Q on 80 from here, UA0Y, JT1, 9M2, etc, both on 40 and 80, as well as VK0H and many others.....

The reall secret to mastering low band work, as you well said, is to get a program that gives you a look at the terminator line on a computer screen, a clock that does that, or at least a set of some type of computer or other tables that show off where darkness and the terminator line is at the other end of the path as you go through your end of it! I know you know all this, but we are trying to help a new guy learn it here...

Once you figure out how it all works, and begin to correllate all this with life and the probability of someone being both there and darkness being there at the other end of the path in a near termninator situation.....

40 and 80 meters "mysteriously" come alive with signals,
as you say......

The other thing you didn't mention..... for the most part, on CW, you can forget about working much of any of this except down in the very bottom 10Khz of either 40 or 80. Oh sure, some of the DX will go up above 7025 and MAYBE above 3525, but you'd better have an Extra Class to ever get to anyhing much of this as a USA ham.......

AS well, if you are listening on PHONE - SSB, the foreign stations are on completely different areas of the band than the USA crew may legally work. We didn't say to him here that 7045 or so or whatever it is on 80 is the place to listen for them! Heck! I don't even work phone, so I really don't even know the window by heart for 75 SSB DX!!!!

From: John@datasafe.demon.co.uk
Message-ID: <344921d9.3879412@news.demon.co.uk>
Source record: 31581

I have just purchased a Heil headset with the HC4 insert. The cables are terminated: One with a 5mm stereo plug and the other with a mono 3.5mm plug.

The paperwork included gives no details of which is which (PTT, MIC, AUDIO etc).

Can you help? I need to make up leads for Yaesu and Kenwood rigs.

Regards

John

2535. ## < HAM RADIO IN ALBANIA ?? >

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-19 00:00:00 UTC
From: dragans@eunet.yu
Message-ID: <62d33ksum1@SOLAIR2.EUnet.yu>
Source record: 31587

Thanks for reading this message.

Want to ask if anyone knows about any Ham Radio activities from
Albania or any other details about getting the valid Albanian license.

I'll go to Tirana two months from now and wanted to make a ham radio
set-up. Will stay there 2-3-4 years, so it may be very interesting to
have an active ham radio station from there.

2537. Heil Microphone again! Will it work okay with IC775DSP?

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-19 00:00:00 UTC
From: John@datasafe.demon.co.uk
Message-ID: <344d3d30.33277197@news.demon.co.uk>
Source record: 31589

I have just acquired an IC775DSP and am wondering whether the Heil HC4 will work okay with this rig?

Any info appreciated.

Regards

John

SB DX @ WW $OPDX.327
Ohio/Penn DX Bulletin No. 327

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 327
BID: $OPDX.327
October 20, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K2KW, N4GN, W5ZPA, KG6AR, W8KKF, W0YR, AP2TJ, CX5BW, CX7BY, DL6DH, G3SXW, G4BUE & DX News Sheet, LZ1BB, IT9JPK, JI3ERV, OH2BH, OM2SA, RA3AUU, XE1AE, ZL2AL and ZP5AZL for the following DX information.

3A, MONACO (Update, please refer to OPDX.326). Mike, W0YR, reports that he and Tom, N9NC, will NOT (repeat NOT) be using the prefix 3A7G for their planned operation from Monaco, October 23-27th. This is due to a mistake by a person who proved to be an inept translator of French, and told Mike that they COULD use the special prefix. 3A7G is only authorized for use by permanent Monaco stations. Mike and Tom will use the more normal callsigns, 3A/W0YR and 3A/N9NC. QSL info reportedly is via OM2SA, bureau or direct. The correct address is:
George Sipos, 93013 Trhova-Hradska 550, Republic of Slovakia, Europe.

6Y, JAMAICA. "You never heard Jamaica so loud, MON!", states Kenny, K2KW, team leader of a multinational team ready to operate 6Y4A as a Multi/Multi effort in the 1997 CQ WW CW Contest. The 6Y4A contest team consists of the following: AG9A, JE3MAS, JI3ERV, K2KW, KE7X, N6BT, N6TV, W4SO and W9QA. The team will return to the site used in 1997 ARRL DX CW 6Y4A operation which is located on the north shore of Jamaica. Two adjacent villas will house the team with all the operations done from the main villa. There is a clear shot over the water to Europe, Africa, USA, Japan, and Oceania. The antennas are designed and provided by Force 12 (Thanks Tom!). The 6Y4A team has done extensive empirical testing this summer to determine the correct antennas for this location. The results of the testing were quite intriguing, and hopefully the results will be published in the near future. The team will use quasi-fixed arrays of multi-element parasitic verticals on 80-10m, with most low band antennas using the new ZR vertical by Force 12. All the arrays will be fed with coax subsidized by Nemal Electronics. Six full stations running 500-1500w are being

brought down with the team (there is no existing station at this QTH!), and, hopefully, DX packet spotting will be available via the InterNet using DX Telnet software. The team will operate outside the contest from November 21st through December 2nd, signing homecall/6Y5. QSL 6Y4A via WA4WTG. For QSOs outside the contest, QSL via operators home CBA.

AP, PAKISTAN (Pirates using AP prefix on CW). Tariq, AP2TJ, reports that as of late a lot of pirates have been using the AP prefix to operate CW on the ham bands. One example is AP2ZP who was heard last week on 21007 kHz. The only bona fide CW operators in Pakistan today are:

AP2HA (Hasnat - active mostly on weekends)
AP2MY (Yunus - presently QRT)
AP2SD (Shahid - presently QRT)
AP2NK (Nasir - occasionally active)
AP2TJ (Tariq - occasionally active)

Tariq suggests, "When working an AP station on CW, operators are requested to ask for the station's name and QSL info. If given a foreign name and a 'QSL Manager' from the same country as the name, you can be 100% sure the station is a pirate as foreigners are not given tickets."

CP, BOLIVIA. Olli, OH0XX, will be active as CP6AA and plans to be a Single-Op/All Band entry in the CQWW CW Contest. QSL voa OH0XX.

CW1, FLORES ISLAND (URUGUAY). Operators Estela/CX3ACS, Daniel/CX2DP, Daniel/CX1AK, Diver/CX6IM Diver, Diego/CX5BBR Diego and Pablo/CX7ACH will be active from this Uruguayan island (IOTA SA-030) between October 24-30th. They will use the special callsign CW1D, and the group is planning to be active in the CQWW DX SSB Contest. QSL via CX1AK: Daniel Muinos, P.O.Box 5, 11.000 - Montevideo, Uruguay.

CW5, ISLA DE LOBOS (URUGUAY). Pedro, CX5BW, reports to OPDX that from now until October 26th, look for this Uruguayan island (IOTA SA-039) to be aired using the callsign CW5R. Last summer this island was damaged by a spread of petroleum, and as it is a natural refuge of wild sea life, thousands of sea wolves and birds were dead. The group going there will be an eyewitness to the recuperation of the island, and will celebrate it by doing a DXpedition and by participating in the CQWW Contest. They will operate all HF, VHF, UHF bands, on SSB and CW modes. They will run high power, and beams on all bands except on 80 and 160 meters were they will use slopers hanging from the lighthouse 200 feet high. QSL via P.O.Box 2, ZC 11000, Montevideo, Uruguay, S.A.

EA8, CANARY ISLANDS (The following press release was provide by Tim, N4GN): " Martti J. Laine, OH2BH, has been absent from the single op contesting arena during his tour of duty in the Far East for the past 4-years. During that period, he also reached the age of 50--an accomplishment which was celebrated with a team effort in the 1996 CQWW CW Contest as C21BH.
But before he retires from the single op game, Martti has once again set his sights on the Canary Islands, and will employ some interesting

new technology in the upcoming CQWW SSB Contest. The newly re-born EA8BH station will be based on PC-controlled Kachina 505DSP transceivers and a customized power splitting, selected receiving arrangement that can effectively cover four beam directions simultaneously if desired. The Kachina concept is described on the following webpage:
http://www.kachina-az.com
The overall station design will be described in a special dual-frame QSL card which will be issued to each and every EA8BH CQWW QSO. Martti and the entire EA8 gang, as well as the people at Kachina Communications Inc. (via N6YY), will be delighted to hear your comments about the sound and penetration of the EA8BH station during the CQWW SSB Contest. EA8BH will be on all bands and welcomes your QSOs and observations.

II9, ITALY. Gianni, IT9PKO, will be active for the CQ WW DX SSB Contest as II9ZZ. He will be on all bands. QSL to IT9PKO, direct or via the bureau.

J3, GRENADA. From October 23-28th, a group will be here active in and outside the CQWW SSB Contest. J3A will be on the air as a Multi-Multi entry in the contest. Members of the group (along with their own J3 callsigns) are: W8KKF/J37K, KC5DJI/J38YL, N0AT/J38AT, KC5AK/J38DD, NH7C/J38NA, N7UE/J38EA, W6SR/J38SR, K6RO/J38RO, N6LL/J38LL and WA8LOW/J38L. QSL manager for J3A is WA8LOW. QSL all others to home call unless otherwise announced. The group is planning a major effort with six complete stations including 4 high power amplifiers and will have antenna improvements. They will operate from the National Emergency Relief Organization emergency operating center. This year and over the past two years, the J3A groups (SSB) and J39A groups (CW) have provided towers, coax, special non amateur equipment, an amplifier and tuner for the NERO EOC. The SSB group expects to have operations outside of the contest starting October 23rd (Thursday) and on Monday and part of Tuesday after the contest. CW and RTTY should be available before and after contest. They state that 10, 15 and 20 meters will have a second antenna available, so several modes may be on at the same time. A beam for 12/17 meters and one for 6 meters are available. The J3EOC beacon on 6 meters is at the contest site.

LZ0, SOUTH SHETLAND ISLANDS. Dan, LZ2UU, will be the radioman for a scientific team that will visit the Bulgarian Antarctic base "St. Kliment Ohridski" on Livingston Island in the South Shetland group. The team will leave November 24th and is planning to be on the island around December 7th. They will be there for the summer season. Dan will be using the callsign LZ0A which is issued for the base on Livingston Island. Although Dan will be very busy with the scientific team, he will make every effort to be active on the amateurs bands. He plans this year's operation to include RTTY and Packet Radio.

NH2, GUAM. Operators Aki/JI3ERV/NH2C, Kaz/JG3RPL/N1BJ, Seo/JR3RVO/WX8M, Toshi/JR7OMD/WI3O, Kazu/JK3GAD/AL7NC and Kou/JH7QXJ will be active in the upcoming 1997 CQ World Wide DX Contest (phone) next weekend. The operators are the members of Guam Contest Club, and plan to air NH2C

as a Multi-Single entry. They report their sunrise/sunset is 2020/0757z. They also mention to look for them between 7075-7100 kHz on 40 meters. QSL via JI3ERV. Any questions or comments are welcomed via E-mail: guam-contest-club@seo.amagasaki.hyogo.jp

QSL INFO AND NEWS.....
Several have asked for DL5WM's (QSL Manager for 9X0A) address: Gottfried Gerth, Obere Dorfstr 13 a, D-09661, Gruenlichtenberg, Germany.

Henning, DL6DH, reports to OPDX that in the last few weeks he has received QSL cards for YT1AD, mainly from stateside stations. Henning states he is NOT the QSL Manager of YT1AD. QSLs should be sent directly to YT1AD's callbook address. Henning has forwarded the QSL requests that were sent to him, but now reports he can no longer send the envelopes to YT1AD without any fees.

The correct QSL route for the upcoming FO8DX operation during the CQWW Contest is via Chris Williams, KG6AR, 1117 So. Del Mar Ave., San Gabriel, CA. 91776-3034

QSL route for XE1RAT/XE3 can be sent to: Radio Club Mexicano, A.C., P.O.Box # 19-500/510, Mexico, D.F., Mexico 03910

SPECIAL EVENT. Look for VY7V to be active October 20th through November 2nd. The Ucluelet ARC will activate this special event station to celebrate the 50th anniversary of Unit #293 Army, Navy and Air Force Veterans. QSL via VE7DUG.

V3, BELIZE. Stan/W5JYK (V31YK), John/K5KR (V31KR) and Mike/W5ZPA (V31MP) will be active from Ambergirs Caye (IOTA NA-73) from November 7-10th. They will operate the usual Dx windows on CW, SSB, and RTTY on 80-10 meters. They will try to be active on 160, but that depends on antenna space. QSLs go to each operator's home call with SASE requested.

VK0, MACQUARIE ISLAND (Update and Change). Alan, VK4AAR, reports that since the last notice he was asked to send to the DX bulletins, it has been decided by those concerned that the callsign "VI0ANARE" will not be used on Macquarie Island to celebrate ANARE's 50th anniversary after all. They will be using a similar callsign, and making their own arrangements for QSLing. Please be advised that Alan is the QSL Manager for VI0ANARE (ONLY) and NOT the call they will be using during that period October 25-31st. Meanwhile, Tom, VK0TS, will be using the callsign "VK0ANARE" during October 25-31st. That's right, he will be using VK0 and not VI0 as a callsign for the whole period, including during the CQWW SSB Contest in which Tom will be competing. The QSL route is the same for VK0TS: Simon Trotter, VK1AUS, PO Box 2063, Kambah Village, ACT 2902, Australia.

VP9, BERMUDA. Look for Jeff, AJ2U, to operate as a Single-Op/All Band entry in the CQWW SSB as VP9ID. There will be some CW activity on the WARC bands outside the contest. Jeff will sign AJ2U/VP9 outside the contest. QSL via K1EFI.

ZM7A/ZL7AA, CHATHAM ISLAND. Just a quick reminder that Chatham Island will be activated next week from October 22-27th. A multi-team from New Zealand will be active on all bands with four stations. During the CQWW SSB Contest, the callsign to be used will be ZM7A. The callsign ZL7AA will be used for the few days before and after the contest. The team will consist of ZL2AL, ZL2HU, ZL2TT, ZL2ST, ZL2RR, ZL2LF and ZL2GI (YL op). Some of the operators were part of the team that activated ZL8RI last year. CW will be not be used during the contest time. Yagis will be used and WARC bands will be activated. Remember, there is no commercial sponsorship for this DXpedition, so costs is being paid by the members of the team. QSL ZL7AA and ZM7A via ZL2AL: Lee Jennings, PO Box 54, HASTINGS 4201, NEW ZEALAND or via ZL2AL CBA or bureau.

ZF, CAYMAN ISLAND. The "DX News Sheet" reports that Don, WB8WCU, will be active in the CQ SSB Contest as ZF2VR. QSL via home call.

ZP0, PARAGUAY. Tom, ZP5AZL, reports to OPDX that his contest station will be active in the CQWW SSB Contest as ZP0R. The ZP0R contest team will be active as a Multi/Single entry and the team consists of: Tom/ZP5AZL, Laca/ZP5CGL, Hugo/ZP5XHM, Luis/ZP5WBM, ZP5VAY and Jorge/ CX6VM. Activity will be on all bands from 160-10 meters. USA stations are to look for them on 160 meters starting around 0500z. QSL via ZP5AZL.

It certainly will work. Don't know if you have the headset, the mic, or just
the cartridge but if you have the headset the AD1-I will help you out. If you
have the HM-10 then the CC1-I is what you need.

Maybe because few people believe there is any form of hope in trying to mold what the ARRL will do.

Martti was allowed to present a 30+ year old letter to approve 4J1 when it no longer met criteria and the wonderful "demonstration" in P5. I often wonder if a specific demo is a real operation but Martti controls the DXCC Desk more that members.

The only thing I wanted to see was an acceptance of electronic QSL credits. The ARRL could easily be provided copies of DX station logs. Fortunately N4MM likes the idea also and said it will just be announced when they have the computer facilities to do it.

> I really don't even know the window by heart for 75 SSB DX!!!!

Yep Yep! ABSOLUTELY RIGHT! I forgot to say that BOTH stations had more
or
less to be in that gray zone "pipe line". And for our original poster
info,
the difference is DXtraordinary. You don't hear them Q5, the sun is
rising
or going down and sundenly they pop out of the noise with S9 signals. So
you must stay and listen for a while before using the cutters on your

antenna.

Another major point that I forgot to mention is WINTER! WINTER is low band
season for long haul DX (VKs compared to Europe for East coast)

1. QRN is many Dbs higher in summer (Low Banders worst enemy are S9+ crashes)
2. Angles (of propagation and reflection) are lower in automn/winter

On 40m VKs are often around 7080 to 7090 in SSB.

The 75 DX Window "worldwide" is 3790 to 3800.

VKs are not allowed above 3700 but they have a small DX window
from 3994 to 3800. Seems they have two restrictions limiting
that even further:

1. They must be 1 Khz above the lower limit
2. All emissions must be in the 5Khz bandwith of the window.

So in practice in LSB VKs are squeezed between 3798 and 3800 Khz.

There are a lot of other "tricks" like listening antenna etc... Anybody
interested in Low Band DXing should get a copy of ON4UN "Low Band DXing"
It is the bible on the subject (40m, 80m and 160)

What's IDXC? The Internet DX Club is "free" to all Amateur
Radio Operators and Shortwave Listeners that had 100 or
more users from different countries visit there web page.

There are upgrades available for 200 and Honor Roll with 250
or more countries to had visited your web page. The awards
are displayed to the right and I hope you will display them on
your page to help us letting the world know about the IDXC
Award.

A monthly list of members and the number of countries
submited will be published for others to track your
progress.

2558. CQWWDX Rules

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-23 00:00:00 UTC
From: John Hunley <jhunley@printrak.com>
Message-ID: <344F7C03.41C6@printrak.com>
Source record: 31609

OK, this may sound like a stupid question, but I/ve scoured the rules
for CQWWDX (as published at http://home.sn.no/~janalme/rules/cqdx.txt),
and I can't find anything that says whether you can work stations once
per band or once, period. Which is it? And more curiously, with all
the people getting technical over little nuances of the rules, why
isn't this clearly stated somewhere?

> In my very short time as an HF DXer, I have yet to hear *any* DX on
> 80 M, and precious little on 40

In addition to the many fine comments in response to your post, I'll add my own experience.

When I was a newbie ham between 1981-83, the sunspot cycle at the time was pretty close to its peak. My favorite bands were 10 and 15, where DX was always available to some part of the world, day and night. 10m was amazing in the summertime - quiet as can be with VK's and ZL's galore!

History aside, I got back into the hobby in a big way last winter, at the precisely worst possible time in the cycle. Forget about 10 - 15 was dead, and 17 only active for a few hours each day. 20 is fine, but it's a busy band. Being that I operate only eves/nites and sometimes early morning, my options were limited. 30m could offer interesting DX, but in my entire prior experience as a ham I had not worked any significant DX on 40 or 80. 80 I passed off as an old-timer's ragchew band, and 40 was just a sea of QRM-bearing SWBC stations.

Well, necessity is the mother of invention! I put up a 40m skyloop: "Might as well try to work 40." I also upgraded to Extra, and twiddled down to the bottom of the band. There is more consistent DX on 40 CW than any other band, at this nascent period in the new sunspot cycle, and during all hours of the late afternoon through early the next morning. During the midday, of course, the band doesn't produce much DX.

During the past year I have worked about 100 countries in roughly 30 kHz of bandwidth down on 40m CW, including VK0IR. In fact, 40 was really the only band that gave me a chance to work Heard - I barely copied them anywhere else and without a beam on the high bands, I was lost in the pileups. 40m is the first of the "great equalizer" bands, where few have the resources or space for yagis and quads. It's wire and ingenuity that will get you the best signal, not big bucks towers and humongous rotatable arrays.

I still can't wait for 10 to open up like it was when I was a kid, but for now give me 40 at dawn. I worked my first VU last winter - the first one I *ever* heard in 15 years of hamming. Hong Kong, Papua New Guinea, all the furthest DX from New Jersey is on 40! (you might need that Extra, tho...)

To: "All web page owners"

To whom it may concern,

DISCOVER The Most Powerful & PROVEN Strategies that
Really Work To Place You At The Top of the Search Engines!

If you have a web page, or site, that can't be found at the top of the search engines then this will be the most important information you will ever read. You are about to Discover the most Powerful Strategies used only by the very best on the Web... Strategies so Powerful that once used will place your Web Page or site at the TOP 10 - 20 search engine listings.

These TOP SECRET strategies will provide you with a cutting edge advantage over your competition and give you the long awaited results you have been looking for. Just Imagine, opening a Floodgate of People into your Home Page because you have the right information. It doesn't matter if you have one page or 1000 pages you can achieve a top rating with this powerful information and soon squash your competitors!

Here is what you'll receive!

This in-depth report covers:

The best kept secret to getting you a top 10 - 20 listing!
The 10 top keywords searched for! How to get people to go to your site first even if they see your competition! The most powerful words used to create the best Web Pages! A Web tool used to market successfully in the Newsgroups!

Also, you'll get over 250 Money Making Reports written by pros. with Complete Reprint & Resell Rights!!!

That's right!!!... You'll have a complete Reprint & Resell Rights of over 250 money making reports so you too can earn BIG Money ! I'll even show you how to market these reports using our secret Search Engine information! Think about it. Not only am I going to reveal the best information you will probably ever lay your eyes on... I'm going to let you market it as well!

This in-depth report, is normally US$59.95... However, if you order right now... I'll include ABSOLUTELY FREE... OVER 1000 Links to Search Engines and Directories and over 220 International ones where you can advertise your web site and let you have it all for JUST US$29.95! This INVALUABLE information alone is worth the asking price, and YES!... you'll have complete reprint and resell rights

to over 250 Money Making Reports!!! (a suggested value of at least $15.00 each.)

If you only sell 1 report a day @ $15 would you be disappointed? Do you think 5, 10 or 20 a day is possible?...YOU BET IT IS! I won't even discuss 100 a day or more @ $15 each!

Don't delay...this Extraordinary and Valuable Information can be yours today for ONLY $29.95 (US FUNDS). Why Wait...Order Right Now!

Oh dear!

Yet more pointless awards...

Where's the challenge in this one? A marketing campaign? Spamming? Didn't someone once say the internet is replacing all that is interesting about amateur radio? This is very sad.

I think that this message should have been posted on 1st April...

2569. St Helena HAM-Rallye, Oct 26th

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-25 00:00:00 UTC
From: Lennart Deimert <ltd@sthelena.se>
Message-ID: <3452251E.229B@sthelena.se>
Source record: 31523

The St Helena HAM-Rallye

We are just hours ahead of the broadcast of the year. There will be
a HAM rallye Rtarting from 12 and last until 19 this Sunday.
Operators will use the callsign ZD7RSD and will issue a
special QSLcard via the host Derek Richards (ZD7CTO).

If you don't have a chance to hear the broadcast - here are the items
you
will miss on Sunday (of course you are able to purchase recordings from
this 4 hour long broadcast):

Opening speech by The Governor MR Smallman
Information from the Tourist Office, Postal Service, Information
Service,
Citizenship Commission and Cable&Wireless.
Also visitors to the islands will be speaking to their homelands, this
includes a German Television Team the French Consul and visitors from
Solomon Islands, as weell as Lord Iveagh from ireland and an Irish bloke
speaking Gaelic.

There will be a Quiz (first prize the newest video on St Helena).

About literature - an interview will be made with Trevor Hearl (by the
way
I spoke to him this Friday evening and he said there will be 4 new books
out next year dealing with St Helena) "on the air".

Also Mr Andrew Bell will be interviewed about Curnow Shipping.

Don't forget - if aren't able to listen to the broadcast you can send an
"email" direct to Dereb during broadcast (ie. between 1900-2300 UTC);
derek@sthelena.se

More information about Radio St Helena and The Island St Helena can be
found
at htt://www.sthelena.se/

Good luck to everyone from
John Ekwall, Jan Tuner and Lennart Deimert

2570. Noviomagum certificate

Newsgroup: rec.radio.amateur.dx

I have an FT1000D in excellent condition. All CW filters except 250hz. Includes BP1 and tuning mod. Functions and looks like new. Includes original, new, manual, Yaesu map and sticker, and warranty card (never filled out or sent in!) SN: 0I080xxx. Price: $2,750.00 firm plus shipping.

Also have an Amp Supply, LK-800A amplifier. 160-10m. 3-3cx800A's!!! This amplifier is capable of incredible results! Both internal 1500w and external (remote, Peter Dahl Hypersil transformer) contest supplies. Less than 100 hours on tubes. Excellent, like new condition. Price: $2,500.00 firm plus shipping.

Terms: All equipment is sold as and can be inspected at my location. I have no antennas so testing will be limited but can be arranged.

PLEASE... NO TRADE OFFERS.

China Ham News 10/25/97
China on EME!

BY1QH, Beijing, confirmed three 2-meter QSOs on EME on Saturday, October 18, and Sunday October 19, 1997. The Tsinghua University Amateur Radio Club station ran 200 watts into a 4x9-element Yagi antenna.

In the first EME experiment, David, BZ1BM, and Lars, SM0KAK, had hoped to work VE7BQH and W5UN from BY1QH, but failed. They did work into Europe and QSOed with three SM stations. David and Lars also heard some DL, 9K and JA amateurs on EME, and are planning their second experiment shortly.

Please direct your interest in working with China on EME to David (bzibm@wg.chnmail.com), the student president of BY1QH.

2579. Drake R8 for sale

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-25 00:00:00 UTC
From: Mark Pitts <mpitts@sttl.uswest.net>
Message-ID: <3452CBF5.DF86347F@sttl.uswest.net>
Source record: 31533

I have a Drake R8 in excellent condition that I want to sell. It, and the modifications which have followed, have consistently received 5 stars in Passport to World Band Radio, and the White Pages report by Larry Magne is very compliamentary. I haven't seen any others advertised on the internet recently to know whether this price is high or low, but I'd let it go for $500.--and include shipping in the price. Want to get yourself a really great present for Christmas? This would sure do it. Reply to this E-mail address. Mark

2580. I sell Big Amplifier & Antennas

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-25 00:00:00 UTC

Message-ID: <62tcv0$28l$1@talia.mad.ibernet.es>
Source record: 31535

I would appreciate any info on this mobile HF antenna.
Is it possible to use it without the antenna tunner on 20?
What kind of mount does it include? Is it possible to use it on a
simple magnetic mount?
Any other comments on its general performance will be welcome

SB DX @ WW $OPDX.328
Ohio/Penn DX Bulletin No. 328

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 328
BID: $OPDX.328
October 27, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB2E, WB2RAJ/WB2YQH & The 59(9) DXReport, N2VW, K4MA, KF4OOX, N5FG, KH7RS, W7YAQ, AG8L, K8DD, DL8ZAJ, DU9RG, EY8MM, F6AJA, G3XTT, G4BUE & DX News Sheet, JA1HGY, JE1CKA, LZ1BB, OH2BVE, OH2TA and DL4YT/K4YT for the following DX information.

3B8, MAURITIUS. Jacques, F6HMJ, will be active as 3B8/F6HMJ from November 26th to December 12th. He will be active on all bands.

3D2, ROTUMA ISLAND. The rumor mill reports Ron, ZL1AMO, will be going here November 8th for one week. He will probably sign 3D2RW/R. QSL via home call.

4I, PHILIPPINES. Robin, DU9RG, reports to OPDX that he will be signing with special prefix 4I9RG for the month of November. This special prefix is to celebrate the 65th anniversary of the Philippine Amateur Radio Association (PARA).

5R, MADAGASCAR. Klaus, DJ9DX, and Theo, DJ1RL, will be active from here between November 5-14th. Their callsigns will be issued upon their arrival. Activity will be 160-10 meters with DJ1RL handling the CW and DJ9DX doing the SSB part. QSL via direct or via the bureau. After Madagascar, they will go to Mayotte (see down below).

5X, UGANDA. Mats, SM7PKK, currently signing 5X1Z, states he has just put up a 160m Inverted-L. Listen for him on 1833 kHz. He will be trying the antenna out mainly towards EU in the evening hours around 2100-2200z.

9M0, LAYANG-LAYANG (Update). OPDX has received the latest update from the CDXC (Chiltern DX Club) on the DXpedition to the Spratly Islands which will take place February 12-24th. OPDX InterNet Subscriber will receive the complete press release (long) as an additional bulletin. In short, a multinational group of DXpeditioners, primarily members of the UK's CDXC (Chiltern DX Club), the UK DX Foundation, will operate from Layang Layang Island. The operation is timed to take place soon after the

island re-opens to visitors following the typhoon season in order to maximize the opportunities for good LF propagation. The team is expected to include G3NUG, G3OZF, G3SED, G3WGV, G3XTT, G4JVG, G0OPB, K5VT, VK2BEX, 9M2OM(G3NOM) and 9M6SU. It is planned to keep four stations on the air round the clock to maximize band openings. All HF bands will be activated on SSB, CW and RTTY, and the group will also have equipment for 6 meters. The callsign will be 9M0C.

C6, BAHAMAS. Operators K8DD, AC8W and N8KR plan to be active from here November 25th through December 2nd. Their stay will include an entry as a Mult/Singlr in the 1997 CQWW CW Contest as K8DD/C6A. QSL to home callsigns.

FH, MAYOTTE. After their operation from Madagascar (see above), Klaus, DJ9DX, and Theo, DJ1RL, will be active from here between November 15-28th. They will sign FH/homecall. Activity will be the same as their 5R operation. QSL via direct or via the bureau.

FP, ST. PIERRE & MIQUELON. "The 59(9) DXReport" states Ron, FP5EK, will QRT from here before the end of the year and move to Gandor, Newfoundland (VO1). QSL via K1RH.

KH0, SAIPAN ISLAND. A group of JA operators will be active from here October 31st to November 3rd. Planned activity will be 160-6 meters. Look for the following (operator/QSL info): KH2/JA4DND via JA4DND, KH2/JA1HGY via JA1HGY, W1BRK/KH0 via JA1BRK, WH2Q/WH0 via JI1DLZ, KH0/JA1HYF via JA1HYF, KH0/JR1MLU via JR1MLU.

KP2, U.S. VIRGIN ISLANDS. Jim, K4MA, will be on St.Croix from November 11-17th. His plans of band operations were not mentioned, but he will use the callsign KP2/K4MA. QSL via K4MA. Jim will also participate during the ARRL SSB Sweepstakes as WP2Z. QSL via KU9C.

NEW ELECTED OFFICERS. The following DXers have been elected for the Willamette Valley DX Club for 1998: President - Vince/K7REG; Vice-President - John/W7WZ; Secretary - Bill/AA7KF; Treasurer - Mike/K7NT; Director - Russ/W7LXR and Director - Craig/N7OR.

NO RTTY (A need for support). As mentioned in OPDX.327, Dan, LZ2UU, will be the radioman for a scientific team that will visit the Bulgarian Antarctic base "St. Kliment Ohridski" on Livingston Island in the South Shetland group. Harry, LZ1BB, Editor of The QRP Digest, reports to OPDX that, "There won't be any RTTY activity without help." The Internet Business Center Ltd. supported the expedition with only $600 without any plans to take advantage of RTTY capability of LZ0A. There is a need for more sponsorship to put LZ0A on RTTY. If it does not happen, there will be NO RTTY QSOs. If RTTY fans who would like to help the LZ0A operation, please send donations (payable) to: Internet Business Center Lrd., v.k. Krasno selo, bl.207A-A-6, Sofia-1618, Bulgaria.

POSSIBLE NEW COUNTRY IN THE WORKS? On October 14th, the Nevis Island (V4) administration decided to secede from its federation with St. Kitts (V4), which was formed after the countries obtained their independence

in 1983. It is now required to have a two-thirds majority vote by the island's 5000 voters in a referendum to implement it.

POSSIBLE PREFIX CHANGE? UK amateurs on Pitcairn Island using the VR6 prefix may be switching to VP6. Reportedly, the VR6 prefix now belongs to People Republic of China since the handover of Hong Kong.

QSL INFO AND NEWS.....
FLoyd, N5FG, reports to OPDX that Igor, US1IDX, has won the Bermuda Contest and has been very active as US1IDX/VP9. QSL to Floyd's new address: Floyd Gerald, 17 Green Hollow Road, Wiggins, MS. 39577

Rick, KH7RS (formerly KH6JEB), QSL Manager for K7CXJ who was active from American Samoa as KH8/K7CXJ, reports he still has not received the QSL Cards as of yet. K7CXJ has decided that he wants a nice picture postcard type of QSL card, and the cards have not been received from the printer. The QSLs will go out when Rick receives the blanks. Please be patient and do not resend.

Bill Beyer's home call, N2WB, was listed wrong in the Guantanamo Bay (KG4) announcement. QSL KG4WB via N2WB.

Jean, F6AJA, reports he is NOT the QSL manager for FK8GM nor 6W1AE. He reports reading it somewhere, but did not state where.

QSL for the KH0A operation during the CQWW DX Phone Contest should go to JF1MIA's home address: Takashi Sugawara, 3-4721-13-403 Sobudai, Zama-city 228, Japan. DO NOT use the KH0A address on the FCC database.

SPECIAL EVENT. If you were lucky to work OF0TA from Aland Island during the CQWW SSB Contest, please note the special prefix OF0 was used to celebrate the 80th anniversary of the independance of Finland. The station was operated by Pekka, OH2TA. QSL via OH2TA: Pekka Holstila, Linnaistentie 7, 01640 Vantaa, Finland.

TARL WEB HOME PAGE. Nodir, EY8MM (currently in VK3-land until Novemeber), request DXers to check out the Tajik Amateur Radio League Home page at: http://www.geocities.com/CapeCanaveral/Hangar/5873

TG, GUATEMALA. A group of Finnish DXers will be active from here between January 18th and February 5th (1998). They will arrive in Guatemala City on January 17th. The purpose is to be on the air from the eastern part of Guatemala to gain better propagation to Europe, which is main target. Other regions will be worked without exceptions. The same scale of operation is expected as they had from XF3/OH3JF and others in 1996, with emphasis on low bands (160-30 meters). More information will be published later.

UK & EY, UZBEKISTAN AND TAJIKISTAN. Karl, DL4YT/K4YT, will be making his last trip to UK and EY before returning to Washington for a 2 year assignment. He will arrive in Tashkent late on October 29th, and plans to operate from the station of UK9AA on the night of the 30th. Karl will travel to Dushanbe on the 31st and is hopeful to be able to operate as EY8/K4YT from EY8CQ's big station. He plans to return to Tashkent on

or about November 4th or 5th and be active again as UK4YT before flying back to Frankfurt on the 6th. Karl mentions that he will carry UK9AA, UK8AXA and UK0A QSLs which he has received to take back with him. PLEASE NOTE, from now on QSLs, should only go direct to UK9AA, UK8AXA and UK0A. All of Karl's operations should continue to go via his brother, W2TK, Bob Renz, 366 Rutherford Av, Lyndhurst, NJ 07071.

V2, ANTIGUA. John/K3TEJ, Ed/WA3WSJ and Darrell/AB2E will activate V26KW for the CQWW CW Contest November 29-30th. Their planned activity will be from November 25th through December 2nd, on all bands including WARC badns from 160-10 meters. They will activate the V26B Superstation site of Roy Carty, V21N, so they should be loud on all bands. QSL info is K3TEJ for V26KW, WA3WSJ for V26ED, and AB2E for V26E.

V31, BELIZE OPERATION CANCELLED. Reported in OPDX.327, the group from W5 land that was going to activate Ambergris Caye, Belize, beginning November 7th, has now been cancelled. It has been reported that the daughter of K5KR was killed in automobile accident October 20th. OPDX would like to send out our deepest sympathy to the family.

VP5, TURKS & CAICOS ISLANDS. The group which activated VP5T in the CQWW DX SSB Contest will continue to be active until October 28th. Look for N2VW, W2OF and WA2VYA to be active on CW and the WARC bands signing with their homecall/VP5. QSL to homecalls for N2VW and WA2VYA. W2OF via K2SB. QSL for VP5T go to N2VW via direct w/postage, via ARRL bureau, or by E-mail request to <n2vw@skyhigh.com> for bureau reply.

WP2, U.S. VIRGIN ISLANDS. Dave, AG8L, will be mounting a serious Single Op effort for the ARRL CW Sweepstakes Contest, November 1-3rd. He will be using the famous Windwood contest station and using the WP2Z callsign. He will be active before and after the contest using the call KP2/AG8L. Most of the activity will be after the contest. The QSL route for KP2/AG8L is via KM6ON (now NN6C). Both direct and bureau cards are accepted. The QSL route for WP2Z is via KU9C. This is the new standard route for all operations, and both direct and bureau cards will be answered. Please allow time for logs to get to KU9C from the various WP2Z ops.

VU2, INDIA. Jim, VK9NS/VU2JBS, will be visiting Yannick, F6FYD, who is in India at the moment. He will arrive on November 3rd and be there for a few weeks. They will be active under Jim's callsign as VU2JBS. They are looking to obtain a licence for the Andaman or Laccadives Islands. ADDED NOTE: During this same period, they will try to be active from Bangladesh as S21ZA (VK9NS) and S21?? (F6FYD).

ZD8, ASCENSION ISLAND. Paul, KF4OOX, reported to OPDX he will be transfering to Ascension Island on October 29th (or there abouts). He hopes to be active within a few days, if not the same day he arrives. His callsign will be ZD8V which he received last month while he was down there for a 5 week stay. He plans on being active after work between 1800 and 2300z and on the weekends. He will be active on 20-10 meters. Also, he plans to operate on 6 meters once he receives his 6m antenna. QSL via his home call sign KF4OOX or Paul L. Hutley, CSR 6310 Ascension,

P.O. Box 4915, Patrick AFB, Fl 32925. He also mentions that you can QSL to his parents' house and they will forward it to him: Paul L. Hutley, 298 Logan Ave, Sharon, Pa 16146. Paul also mentions there is another stateside ham on the island. He is Dave, AC4IV, and his callsign is ZD8T. He is on the island for a long term assignment. He tries to be active at night and on the weekends.

John, I imagine that you have received a dozen answers to this question, and since the contest is over, oh well. Yes, you can work the same station once on every band. The reason why it is not clearly stated, I guess is the same reason the drivers handbook doesn't say 'Drive on the right side of the road'. Somebody probably assumed we all knew that already. Don't see you in my log, hope you worked on of the other guys here in Guam during the contest.

73, Jim KH2D

2592. Mike for TS-940S, Help Pse

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-28 00:00:00 UTC
From: Murray Green <mgreen@erols.com>
Message-ID: <3455A958.19B1@erols.com>
Source record: 31546

Need your opinions on obtaining the best microphone for use with a
TS-940S. I specifically want a mike that has a high frequency output
quality to work DX and "cut thru" the pileups but is not objectionable
to the ear for regular QSOs. Want to keep away from that tinney quality.
Email please mgreen@erols.com

2593. Speaker for TS-940S

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-28 00:00:00 UTC
From: Murray Green <mgreen@erols.com>
Message-ID: <3455ABBD.65B4@erols.com>
Source record: 31547

Forgot to include this in my other message. Sri.

Is their an alternative speaker for the TS-940S that I could use instead of the 940 speaker without sacrificing audio reception quality? I understand the 940 matching speaker is pricey. Thanks. Email mgreen@erols.com

2594. China on EME

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-28 00:00:00 UTC
From: K0HB@JUNO.COM
Message-ID: <878060884.7514@dejanews.com>

China on EME!

BY1QH, Beijing, confirmed three 2-meter QSOs on EME on Saturday, October 18, and Sunday October 19, 1997. The Tsinghua University Amateur Radio Club station ran 200 watts into a 4x9-element Yagi antenna.

In the first EME experiment, David, BZ1BM, and Lars, SM0KAK, had hoped to work VE7BQH and W5UN from BY1QH, but failed. They did work into Europe and QSOed with three SM stations. David and Lars also heard some DL, 9K and JA amateurs on EME, and are planning their second experiment shortly.

Please direct your interest in working with China on EME to David (bzibm@wg.chnmail.com), the student president of BY1QH.

CHINA HAM NEWS 10/28/97
BY1QH Special

Contributed by Lars Melin, SM0KAK
Member, Tsinghua University Amateur Radio Club, Beijing, China

Edited by Rick Niu, BD1QL
MBA '99, Columbia Business School, New York, NY
xn6@columbia.edu

* VHF DX

BY1QH is presently looking for stations who want to try 144 MHz DX, and are located less than 2,000 km away from Beijing in such DXCCs as BY, BV, VS, HL, JT, UA, and, in particular, VK6 (less than 400km from Dampier). The Dampier area is the only location to which it would be possible to make QSOs on 144 MHz using Trans-Equatorial Propagation. Stations interested in working with BY1QH on 144 MHz need to have at least one Yagi (preferably horizontally or circularly polarized), the capability to work on SSB or CW, a good take-off (low horizon) in the direction of Beijing, and a minimum output power of 50 watts.

* EME Report

In the first leg of the ARRL EME Contest, BY1QH worked SM5FRH, SM5BSZ and SM2CEW. The QSO with SM5FRH was the first EME QSO ever from China! BY1QH also heard and identified 11 more stations during the contest. Last weekend, BY1QH worked KB8RQ (first BY to North America on EME!) and W5UN. Also heard was VE7BQH.

BY1QH will participate in the second leg of the ARRL EME Contest on November 15-16. Antenna improvement is becoming urgent as it is not yet wind-proof now. In addition, the club is requesting China Radio Sports Association (CRSA) to clear the much QRMed 144.000 MHz caused by local paging system.

* Contact BY1QH

Tsinghua University Amateur Radio Club is seeking any possible assistance from the international amateur radio community, such as on EME. Please feel free to write to: David Zhang, BZ1BM (bzibm@wg.chnmail.com) or Lars Melin, SM0KAK (lars.melin@era.ericsson.se).

CHINA HAM NEWS is available for unlimited, appropriate distribution.

2599. New! Novice Mac Ham Radio Test Simulator - Free

2600. OX3FV - his correct address

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-29 00:00:00 UTC
From: slay@netcom.com
Message-ID: <slayEItItw.FzE@netcom.com>
Source record: 31554

Here is a message received from OX3FV concerning his
current QSL route. 73, Sandy W7BX

Hi Sandy
I am very glad you ask about QSL info. I think many stations send QSL to my
old adress wich is about 3000 Km north of here.
I dont think I will recieve those cards!!!.
My correct address is:

Kim Andersen
OX3FV
Box 3
zip 3930 Groennedal
GREENLAND

You are more than welcome to pass this adress around as you please. It
would be good for me to let people know my new address. Then again, many
times during pile-up's I give this adress, and even then they send cards to
another adress I had here from a previous stay!!!!!. So I guess you can see
my problem??.
If you have ANY good ideas about how I can spread my correct address, you
are more than welcome to send me a mail again.
This morning blue sky and minus 4 c.
Rig here is abt 600w and 40m vertical delta loop antenna.
All the best 73 from Greenland

73 de Kim, OX3FV

The site http://www.iw7chv.org has been modified. For who already knows
about it will find really interesting news, explained with a functional
graphics to quickly understand what are the services offered. I say
someone for who go to see it the first time:

- HamRadio Search Engine: with over 10000 entries is the most complete
HamRadio Search Engine. You can search/add/modify your URL. It's also
possible to put a banner the first page of the gate.

- Internet <-> Packet Link: You can send mail between Packet Radio
Network and Internet. The service is in testing way..test it.

- Internet Radio gateway: you can browse the gate reading the Packet
bulletins around the HamRadio World.

- TOP 10 HamRadio Site: TOP 10 permit you to vote your favorite Ham
Radio URL and suggest your one.

An more ... HamRadio news, POWWOW community, meteo page, etc. ...

2605. New Concept! Cyberscheds Your Next DX and Satellite Contact!

Newsgroup: rec.radio.amateur.dx
Date: 1997-10-30 00:00:00 UTC
From: wb6siv@cyberg8t.com
Message-ID: <wb6siv-2910972307550001@host64.clr.cyberg8t.com>
Source record: 31559

This is a new use of the WWW that can benefit ham radio operators throughout the world.

You can now schedule contacts with hams all over the world simply and easily by using the WWW and e-mail.I have set aside a section of my web site http://www.sarrio.com for hams to post their request for over-the-air schedules. Included in each posting is a place to list the posters specific ham radio contact needs (countries, zones,IOTA, grid squares ect...). The postings will also include an e-mail link that will allow hams that read the posts, to easily request an over-the-air schedule.

Cyberscheds are a simple way to have the internet work to the benefit of hams all over the world.

All posting will stay on-line for 6 months, or until the posting is asked to be deleted. Below is an example of one cyberpost visit the cyberpost page and view them all. Below is an example of one of the postings:

Station: BV/N0IAT

Name: Joe Fitter
QTH: Taipei, TAIWAN Republic of China
Bands: 40/20/17/15/10
Mode: CW (occasional SSB, but not much)
Comments: Looking for South America, Central America, and Carribean QSO's. I QRV from a
neighbors shack (local law), so operating times are limited to station availability. QSL via my CBA --
I DO NOT accept IRC's or Greenbacks, just please send me your QSL card and a route for returning
the favor.
Post Date: Sept. 6, 1996

How sterile!

IMHO, Cyberscheds are a simple way to have the internet take the
skill, mystery, romance, and "element of chance" out of DXing.

Your mileage may vary.

What if you had been waiting for that qsl for 7- SEVEN years??? And
it was your only qso with that country on 28 mhz?
And you probably would wait 5 more years for such a qso??
Do you still think it is stupid to make a phone-call??

From: Dave Booth <booth@pactitle.com>
Message-ID: <345A0512.446B@pactitle.com>
Source record: 31469

Hello all you 6M AM'ers.

I'll be out on 50.400 AM all this weekend from :

Sat 08:00-22-00(pst)
Sun 08:00-20:00(pst)

Have not heard much other than locals in the last few months, due I
think from the lack of DX here on the West coast.

There have been scattered (small) openings lately.
Lets hope for the BIG opening to come this weekend! I'm ready!

I'll be running a Gonset "G-50" (D-104) and a Heath "twoer" and a
Cushcraft ARX-6.

If you have not yet seen my 50.400 AM web page please check it out.
http://www.geocities.com/Hollywood/5860/50am.html

Catch ya on 50.400!

Ever work someone who sends you a QSL card for the contact that actually happened on 40m plus they sent you a QSL card for the 15m contact that NEVER happened? I hate when that happens.

SB DX @ WW $OPDX.329
Ohio/Penn DX Bulletin No. 329

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 329
BID: $OPDX.329
November 3, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, KH2D, KF2TI, WB2RAJ/WB2YQH & The 59(9) DXReport, N5XG, K8RF, K8XP, AP2TJ, BD1QL, DJ5AV & DX News Letter, DL8OBC, G4BUE & DX News Sheet, ON6TT/5X1T, OX3FV, OZ8AE, and VK4AAR for the following DX information.

5A, LIBYA. Felix, DL8OBC, reports that the status of the Rhein Ruhr DX Association's upcoming operation from Libya is going to take place as planned. Thanks to the support of the Libyan ASSAKER Club. The team will leave Germany on November 21st, and expects to be on the air from Libya a few days later. Their callsign will most probably be 5A7A, although this has not yet been officially confirmed. Outside of the CQ World Wide DX Contest, they will use two stations on all HF bands (including WARC and top band) in CW, SSB, and RTTY. They will join the contest as an Multi/Single entry to give the 5A and Zone 34 multipliers. A mailing list has been set up. While they are on the air, you will receive information about their progress and will also be able to send them information and comments. To subscribe, send a message to "majordomo@qth.net" with only the words "subscribe libya" in the message. ALso, there will be an online log search available. Check out their WEB page at: http://www.afthd.tu-darmstadt.de/5a1a/

9Q, EASTERN DEMOCRATIC REPUBLIC OF CONGO (ex-Zaire). Peter, ON6TT/5X1T, and Mats, SM7PKK/5X1Z, will be in Kisangani, from November 3-7th. They will have some ham equipment with them and expect to be active in their evenings hours. Peters states their antennas are very low performance, but USA and EU should have no problem working them. Peter will be taking his SSTV equipment with him and will do some SSTV. Peter has asked, "Where are all the SSTV DXers?" He has indicated that he has worked about 50 stations from 5X and most of them did not really know where 5X was, and clearly were just as interested in a picture exchange. Peter states, "Where is the bulk of you SSTV DX chasers? Sometimes I call CQ SSTV for 30 minutes (both voice and video) but no reply. So I asked myself, should

I bother? Motivate me!" Lastly, Peter might be in Kinshasa the week after the 9Q operation, and he is trying for the Vatican the week after that.

BZ, CHINA (China on EME!). It has been reported that the station BY1QH in Beijing has confirmed three 2-meter QSOs on EME on Saturday, October 18th, and on Sunday, October 19th. The Tsinghua University Amateur Radio Club station ran 200 watts into a 4x9-element Yagi antenna. In the first EME experiment, David, BZ1BM, and Lars, SM0KAK, had hoped to work VE7BQH and W5UN from BY1QH, but failed. They did work into Europe and made QSOs with three SM stations. David and Lars also heard some DL, 9K and JA amateurs on EME, and are planning their second experiment shortly. If interested in working China on EME, please send your request via E-mail to David (the student president of BY1QH) at: bzibm@wg.chnmail.com

C6A, BERRY ISLANDS (BAHAMAS). Don, N5XG, will activate NA-054 as N5XG/C6A on November 22nd. His operation will be on 15/20/40 meters CW/SSB on the normal IOTA frequencies. He suggests to check 7015 kHz at 0300z. Also, check 14260 kHz at 1300 and 1900z and 14040 kHz at 1600 and 2200z. QSL via N5XG (ex K5BDX).

FO, FRENCH POLYNESIA. "The 59(9) DXReport" states Albert, FO5JR, will take his Christmas holiday on Rimatara Island (OC-050) and will be active on 40-10 meters including WARC bands, CW only.

KH2 QSL BUREAU. Jim, KH2D, KH2 QSL Bureau Manager, reports that the KH2 QSL Bureau in Guam is becoming a repository for a very large number of unclaimed QSL cards. A large majority of the cards received there are for 2x1 calls. The MAJORITY of extra class call signs issued for Guam are NOT issued to hams in Guam - they are issued to hams who were at one time in Guam and no longer are there, hams who came to Guam and operated for brief periods, and hams who have never been in Guam but obtained Guam callsigns via the vanity call program. Judging from the cards received at the Guam bureau, a number of hams worldwide would like to receive a card from a Guam station, but sending them via the bureau is not, in most cases, the way to accomplish obtaining a Guam QSL card. OPDX InterNet Subscribers will receive an additional bulletin containing Jim's press release (which is very long) and a list that will assist people in getting cards from Guam.

KH5K, KINGMAN REEF (Cancelled). Chuck, N4BQW, had to cancel his KH5/N4BQW operation because the Captain of the ship he was on stated they had run out of time and needed to get back to Christmas Island to catch the weekly plane out.

OX, GREENLAND. Kim, OX3FV, has been very active on 160 meters and the WARC bands on CW. Check 17 meters around 1830z, 20 meters around 1230 and 2215z, 30 meters around 1200z, 80 meters between 0415 and 0500z and 160 meters between 0345 and 0430z. Kim reports to OPDX that the correct QSL info is via bureau or direct to: Kim Andersen, Box 3, zip 3930 Groennedal, Greenland.
Meanwhile, Joergen, OZ8AE, reports to OPDX that he will be active as OX/OZ8AE from Groennedal in the southwestern part of Greenland from

November 3rd to December 1st. In the CQWW CW Contest, he will be operating as a Multi/Single with Kim, OX3FV, as OX3FV. Most of his operation will be on CW. QSL for OX/OZ8AE go to OZ8AE direct or via bureau. The contest QSOs for OX3FV go to OX3FV.

PAKISTAN PIRATE CONTINUES. Tariq, AP2TJ, reports, "It has been confirmed by Bob/AP2JZB that he has never worked CW and has no intentions of the same either. Stations working 'AP2JZB' on CW are advised not to bother logging or QSLing, you will only be wasting your time and money as the QSL address/manager will also in all likelihood be a fake to get your IRCs or green stamps."

QSL INFO AND NEWS.....
CHANGE OF ADDRESS. Ray, G3NOM/9M2OM, states on November 2nd he will be leaving Malaysia and returning to the UK. He is expecting another overseas assignment, but until further notice, please forward any mail to: Ray Gerrard, c/o 37 Godward Road, New Mills, High Peak, SK12 2BU, England UK

It is very important to note that VI0ANARE and VK0ANARE have two totally separate QSL routes. These two separate operations with similar callsigns were celebrating the 50th anniversary of the A.N.A.R.E..
The VI0 callsign was used from July 1st through October 25th. QSLs for VI0ANARE go via VK4AAR (direct):
A. Roocroft,
Post Office,
Dalveen QLD 4374
Australia

The VK0 callsign which was used on Macquarie Island was active between October 26-31st. QSLs for VK0ANARE go via VK1AUS (the same for VK0TS):
Simon Trotter
POB 2063
Kambah Village ACT 2902
Australia

SPECIAL EVENT SPECIAL. The club radio station, 4U1ITU, located at the ITU Headquarters in Geneva, will operate as 4U1WRC until November 21st. The special callsign is in celebration of the 1997 World Radio Conference (WRC-97). This station will still count for ITU HQ for DXCC. For more information check out their WEB page at: http://www.itu.int/radioclub QSL via bureau or direct.

SV, GREECE. The "DX News Sheet" reports that Charles, ex-S92SS, and his XYL Leslie, ex-S92YL, will be active for the next four years as SV0LM and SV0LN from northern Greece near Thessos Island.

TZ, MALI. If you missed Baldur, DJ6SI, as TZ6SI (QRT on October 29th), you can still work Larry, TZ6VV, who will be active for about the next 6 weeks (maybe longer) before he goes to the U.S. Larry has been heard on 21226 and 21447 kHz between 1600 and 1830z. Also, check 28424 kHz around 1515z. QSL via AA0GL.

VK9L, LORD HOWE ISALND (Update). Dan, K8RF, provided OPDX with the following VK9LX Lord Howe Island DXpedition (November 23rd to December 1st) update. Everything is reportedly on schedule for Nick, VK2ICV/VK9LX, and Dan's, K8RF, operation slated for the last week of November. They will be operating as a Multi/Single in the CQ WW CW Contest and will run two stations before the contest as much as possible. Their equipment consists of: TS-930, TS-850, MLA2500, Laptops. They will make special efforts to be on 160, 80 and 40 meters before the contest. They have a good Antenna Tuner to help get them on the WARC bands. Nick has already pre-shipped all of their antennas to Lord Howe Island. This package includes the "Battlecreek Special" on loan from W8UVZ and friends, a Triband Beam (TNX VK4FW), MLA2500 Amp, 20 Meterlong Vertical, 2" Masting for beam, Coax, Antenna Tuner, etc. They have been provided with a Laptop computer and software courtesy of DEBCO electronics. Dan would also like to thank VE7BS; NM7M and XYL; W2UE/7 and others for their financial contributions. ANY help no matter how modest is appreciated, they heed help NOW before they leave, if possible. For details, contact Dan at: k8rf@fuse.net.

ZD9, TRISTAN DA CUNHA. Ian, ZD9IL, is active most days. He has been spotted on 12 meters on 24955 kHz starting around 1345z. He has also been heard on 10 meters this past week on 28490 kHz around 1445 kHz. Information from the "DX News Letter" mentions he uses a dipole and his QSL Manager is Edwin, ZS5BBO. Edwin hopes that they can find a sponsor for a new beam for Ian. Please be patient for QSL, Edwin gets the paper logs by ship three to four times a year. QSL via ZS5BBO: Edwin Musto, Box 211032, Bluff, 4036, South Africa.

ZK1XXP NORTH COOK OPERATION SUMMARY. The Dateline DX Association completed its DXpedition to Penrhyn Atoll, North Cook on September 27th. The total on-air time was 5 1/2 days with 2 stations produced 15,299 QSO's. OPDX InterNet Subscribers will receive an additional bulletin containing the statistics (provide by Tom, K8XP) of the operation.

-=-
IMPORTANT NOTICE! Users of the online BARF-80 BBS (Home of the OPDX Bulletin) take note, the area code has changed as of August 16th. The new 440 area code will replace the 216 area code. Currently both area codes can be used, but the 216 area code will be permanently replaced in April, 1998. BARF-80 BBS online at 440-237-8208 28.8k-1200 Baud 8/N/1

ITU have assigned prefix VR to China. For Ham stations, we use VR2
as prefix.

>mgreen@erols.com

Ditto on the info on Jim Smith and A51JS. Last effort to P5 was
turned down as they said amateur radio is not allowed . Wish they
would make this formal so P5 can be deleted or open up the country.

Headlines

The Stingray City Contest Group will once again be active as ZF1A in this years CQ World Wide CW DX Contest. The group will operate from the QTH of Andrew, ZF1EJ, on Grand Cayman Island. The will attempt to break the Multi-single record for the Caribbean. The group will consist of Dan, K1TO/ZF2??, Bob, K4UVT/ZF2RF, Joe W5ASP/ZF2NE, Mike K9MK/ZF2MK, and Carl K9LA/ZF2LA. QSL cards for ZF1A go to K9LA. QSL requests for QSOs outside of the contest go to home callsign. The ZF1A homepage can be found at http://members.aol.com/k4uvt/ZF1A.htm for more details.

Alex, PA3DZN, is currently operating from Alfredo's (9U5CW) station in Burundi. He has fixed the Battlecreek Special which is being used on 40, 80 and 160 meters. He reports having worked many JA's on 80 meters at their sunrise. Just before his sunrise he heard several US stations however they were very weak. Alex said "I did hear G3SED on 160, but I guess he was listening direction USA." He will be in the Country until mid-January and is waiting for his own callsign. He applied for 9U2L. Alex reports that 9U5DX is still in the country but only active occasionally as is 9U5W. During contests look for 9U5T. This will be a multi-operation by the 9U boys.

Cedric, HB9HFN, will be on a business trip in Tel-Aviv, Israel from 8 to 13 November and will take an IC-706, a tuner and wires. Look for him to be signing 4X/HB9HFN during the evenings his time. QSL via HB9HFN to the HB9 bureau or direct to Cedric Baechler, Mettetlet 26, 1763 Granges-Paccot, Switzerland.

QSN

5V7BC - TOGO - Was found on 21245 yesterday around 16:10Z.
QSL via F5KPG.

8Q7AJ - MALDIVES - Bruce likes 40 meter CW daily between
00:00 and 02:00Z for East Coast US and between
12:30 and 14:00Z for West Coast US. QSL this
current operation via KD6WW, not K9AJ.

9M6BG - EAST MALAYSIA - Brett, VR97BR, is now on the air
and will be until 16 November. Phil, VS6CT, should
also be with him. Brett was very active yesterday
on 20, 17, 15, 12 and 10 meters CW. QSL via VS6BG.

9U5CW - BURUNDI - Alex was on 40 meters CW between 19:00
and 21:00Z and again at 22:30Z. He was active also
on 3505 from 20:45Z to 22:15Z working JA's and
Europeans. He or Alfredo plan to be active on the
low bands (40, 80 & 160) from 20:00 to 04:00Z
daily. Try 7005, 3505 and 1825.

EL2JR - LIBERIA - Joe has been active on 30 meters CW
between 00:00 and 02:00Z. Check high in the band
between 10115 and 10123. QSL via KB3U.

S21YE - BANGLADESH - Was working the West Coast of the US
on 14208 at 01:20Z yesterday.

YK1AO - SYRIA - Omar showed up yesterday on the longpath
working West Coast US stations on 7006 around
14:25Z.

IOTA

The following IOTA stations were active yesterday.

IOTA	Call	Freq	GMT	IOTA	Call	Freq	GMT

Yang, BD7JA, and crew have reorganized and are now ready to head for
Gui-Shan Island this weekend. They hope to start around 10:00Z on 7
October using their homecalls /7 on 10, 15, 20 and 40 meters.
Operators include Wu, BD7IA, Lu, BD7IX, Yang, BD7JA, Jian, BD7JG,
Zhou, BD7JK, Li BD7YA, Chen, BG7ML and Liang, BG7NQ. They will take
a TS-690S, IC706MKII, A4S and a 40-2CD. Suggested frequencies are
listed below plus check the IOTA frequencies.

CW: 7030, 14040, 21040
SSB: 7055, 14260, 21260, 28460

They plan to wrap up this operation around 04:30Z on 9 November.
QSLs go to P.O. Box 1713, Guangzhou, PEOPLES REPUBLIC OF CHINA 510600

The following operations have provided acceptable validation material
for the IOTA Award.

Hello
When i talk on USB , LSB , AM i can hear myself in the speaker.
but FM is all-right.

Hope someone know how i can remove this "Talk Back" function
on my President Lincoln

e-mail: jrs@pct.no

From the supplemental manual on this unit-

Purchase a roll of duct (duck) tape.

Stand at the left rear of your "big rig".

Using the duct tape, securely attach the "President Lincoln" to the
frontmost tire, facing forward.

Drive said "big rig" forward 10 feet.

Problem solved!

I am just listening at 14.313 MHz, and i am wondering how many idiots there
are on the
HAM bands.
And to many seem's coming from the US.
Why are the so many of them over there ?????????
Hope you all get well WERY soon.

ZCZC AE47
QST de W1AW
DX Bulletin 47 ARLD047
From ARRL Headquarters
Newington CT November 6, 1997
To all radio amateurs

SB DX ARL ARLD047
ARLD047 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The 425 DX News, The DX News Sheet, Frank, AH0W and Contest Corral from QST. Thanks to all.

TRISTAN DA CUNHA, ZD9. Ian, ZD9IL, is active most days. He has been spotted on 12 and 10 meters. QSL via ZS5BBO, Edwin Musto, Box 211032, Bluff 4036, South Africa.

CHAD, TT. Jim, TT8JWM, and John, TT8JFC, are now QRV on RTTY. Jim will go QRT on November 8, but will be QRV again December 10 . QSL TT8JWM via N4RXL.

GREENLAND, OX. Kim, OX3FV, has been very active on 160 meters and the newer bands on CW. QSL via the bureau or direct to Kim Andersen, Box 3, DK 3930 Groennedal, Greenland. Joergen, OZ8AE, will be active as OX/OZ8AE until December 1. QSLs for OX/OZ8AE go to OZ8AE direct or via bureau.

UNITED NATIONS, 4U. Club station 4U1ITU, ITU Headquarters in Geneva, will operate as 4U1WRC until November 21 in celebration of the 1997 World Radio Conference (WRC-97). This station will count for ITU HQ for DXCC.

TROMELIN, FR/T. Henri, FR5ZQ/J, has been spotted on 20 and 10 meters.

MALI, TZ. Larry, TZ6VV, will be active for about the next 6 weeks. QSL via AA0GL.

ZAMBIA, 9J. Ely, IN3VZE, will be active as 9J2CE until November 10. QSL via home call.

UNITED ARAB EMIRATES, A6. David, K3LP, will be joined by Rich, KE3Q in Dubai from November 22 to December 2. QSL for this operation

only to K3LP (ex AA6DC).

OMAN, A4. David and Rich plan to be active here from December 2 through 5.

GUINEA BISSAU, J5. Dave, J52IM has been found on 15 meters. QSL via KB9XN.

JORDAN, JY. George, JY9QJ has been heard on 24909 kHz around 1520z. QSL via DL5MBY.

GUAM, KH2. Bill, NH6D, has moved to Guam and will be active on all bands as NH2/NH6D. QSL NH2/NH6D via N6FF.

THIS WEEKEND ON THE RADIO. The Worked All Europe Contest, RTTY, the Japan International DX Contest, phone, and the OK/OM DX Contest round out this weekend's activities. Please see November QST, page 94 for details.

Yeah, I have the electrician I just hired downstairs wiring in the new 80 amp 220 line ;)

The way I figure it, I'll only need to drive it with about 6 watts from my FT-900 for legal limit... and if the lights in the neighborhood start dimming..... hey, dont look here!

Several years ago someone PAID for an ad in the Yellow Sheet which said that I was selling one of those 10kw Collins amplifiers. I got a call from Italy, a call from someone representing an Italian, and a call from Japan.

I had never even heard of the amplifier until I started getting these international phone calls!

Draw your own conclusions.

I'm posting this for my friends at Alpha...
please respond directly to them:

SAVE! ** ALPHA "SUNSPOT" SALE! ** SAVE!

Long after sunset Saturday night, I switched on
the xcvr & ALPHA. Before you could say "propagation",
two 9n1's, an AP2, and a string of Siberians were
in the log. Signal reports ran to S9+20 just like
old times. Sunspots are back!

Dave AA0RS/G3SZA, Brad K0HM, and I all love DXing,
so ALPHA/POWER is throwing a SUNSPOT SALE to celebrate
long nights with 20 wide open to everywhere all night!

CALL NOW and buy a brand new ALPHA 87A for $5,995, an
'89 for $3,795, or a '91B for $2,695. Standard warranty
and 30 day money-back guarantee, of course. Quantities
are limited, so call Dave, Brad, Barbara, or Scott and
mention that you saw this promotion to save on your new
ALPHA. Sale ends 12/19/97 in any case.

Dick Ehrhorn, W0ID

Visit Alpha's web site at:

2667. " Idiot's" on the HAM bands

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-06 00:00:00 UTC
From: Paul Ramb<antispam> <rambo@trollnet.no>
Message-ID: <01bceaea$73e89340$035ceac2@min-datamaskin>
Source record: 31515

Hi !

I have got some wery angry e-amil's from a Norwegian amateur about my mail concerning all the mess going on on the amateur bands in the US, after listening on 14.313 MHz yesterday .(He was calling me a idiot , but I do not take that to hard. hi hi !)
It was NOT my meaning to call ALL the US HAM's "idiot's" !.
(I could not find a "better" word)
If anyone feel it that way, please accept my apologize ! . My intention was to start a discussion about what we can do to stop this madness, and if there was only I that was upset about this.
I do know that most of the HAM's are serious people, but there is ALWAYS someone that have to make problems for others.
Before I become a HAM, I used to operate a lot on the CB band, and that was a mess.
So when I become a HAM, I did belive it would be more disipline on the bands, but I have to say I am disappointed !

73's, and please let us all try to be "gentlemen" on the bands.

A Norwegian "HAM" seems to have this meaning, but I, and I guess,
all Norwegian Radio Amateurs with me, find that US Ham's;
and by the way; ALL Ham's; are very professional!
Pse let this guys meaning stand for what it is; nothing but a lot
of bs....
I've been on the air the last 20 years, and have nothing - nil -
bad information about any operators; whatever country.
OK - of course there will always be someone trying to
"pass the line"; making a lot of bs,
but I do believe these sick guys are spread around the globe...

Friendly wishes to all the vy nice Ham's out there,

==========

Hi John in Roseville -- Rod here in San Diego
There is a guide called " The Considerate Operator's Freq Guide" --
which is not an FCC ruling -- but a recommended use of the spectrum --
some what unofficial I guess.
For 75/80 Meters
3.590 -- RTTY DX
3.580-3.620 -- RTTY
3.620-3.635 -- Packet
3.790-3.800 -- DX Window
3.845 -- SSTV
3.885 -- AM Calling Frequency

For the full table see URL:
http://cit1.unl.edu/larc/freqguide.html

Some other goodies at URL:
http://pw2.netcom.com/~ac6v/pagev.html
Includes:
HAM OPERATING FREQUENCIES

Part 97 Subpart D - Technical Standards -- Authorized frequency bands,
Frequency sharing requirements, Authorized emission types, Emission
standards, RTTY and data emission codes, SS emission types.

Amateur Radio Band Plans -- Includes DX Windows, DX & QRP Calling Freqs,
Digital Freqs -- From The University of Texas Amateur Radio Club

The Considerate Operator's Freq Guide - Whos Operating Where?

Amateur Radio Frequency Allocations. -- From The ARRL

Frequency Operation Recommendations -- ARRL's DC To Daylight Op Guide

Amateur Frequencies Outside the USA -- From The ARRL

ITU Band Plans

ITU Regions (3) World map

Calling and Simplex Frequencies -- Selective CQing

QRP Calling Frequencies -- Avoid The Big Guns
--

John,
Why do you need an atu?
You'll just be heating up the components in the atu, you will not be putting any more power actually into the antenna.
And anyway, the G5RV antenna is highly overated.
What do you want from your radio that you can't get from a good vertical or a compact 3 or 4 ele yagi?

Phil Unit 148 / G4ZOW

In the RSGB 1997 bandplans 3.775 to 3.800 is indicated as reserved for intercontinental working. This being a voluntary recommendation.

Hello John,
I am not familiar with a 2830, so I have to assume that it's just
another all-mode, all band transceiver. And I will assume that it is
tube - not solid state - not that it will matter from my perspective.

Sorry that you are already in receipt of such a negative response from
Phil.

In my opinion the G5RV is a good antenna, even though it can be
difficult to match on 40 and 80 and downright recalcitrant on 30M.
However, I have always managed to tune one to a perfect match with a
roller inductor tuner. If you buy a tapped inductor tuner, I think
you're throwing your money away.

I've tried all kinds of verticals and there isn't but one that can
come close to a dipole or any other reasonable length wire antenna,
and that's my 80M vertical with 8 tuned counterpoise wires and top hat
loading with loading coil.

Bob

You didn't do the math, did you? There are quite a few appliances in a house that draw about 10 KW. At 220 volts, it is less than 50 amps.

Well Bill,
That calculation may may be close for your electric range, but I have
yet
to see an amplifier that is 100% efficient.

Just remember, it's HUMOR.....

WHO'S WHO IN HAM RADIO

ADVANCED:
Leaps tall buildings in a single bound;
Is more powerful than a locomotive;
Is faster than a speeding bullet;
Walks on water, and gives policy to GOD.

GENERAL:
Leaps short buildings in a single bound;
Is more powerful than a switch engine;
Is just as fast as a speeding bullet;
Walks on water if the sea is calm;
Talks with GOD.

CONDITIONAL:
Leaps short buildings with a running jump
AND favorable winds...
Is almost as powerful as a switch engine;
Is faster than a speeding BB;
Walks on water in an indoor swimming pool;
Talks with GOD if special request is
approved.

TECHNICIAN (Old):
Barely clears a Quonset hut;
Looses tug-of-war with a locomotive;
Can fire a speeding bullet;
Swims well;
Is occasionally addressed by GOD.

TECH-PLUS:
Runs into buildings;
Recognizes locomotive two out of three
times;
Is not issued ammunition;
Can stay afloat with a life preserver;
Talks to walls.

NOVICE:
Makes high marks on the wall when
trying to leap small buildings;
Is run over by locomotive;

Can sometimes handle a gun without inflicting self-injury;
Talks to animals.

TECH:
Falls over doorsteps when entering buildings;
Says, "Look at the choo-choo";
Wets himself with a water pistol;
Plays in mud puddles;
Mumbles to himself.

AMATEUR EXTRA:
Lifts buildings and walks under them;
Kicks locomotives off the track;
Catches speeding bullets in their teeth AND EATS THEM;
Freezes water with a single glance;
THEY ARE GOD!

Author Unknown; But rumor has it, that he has been demoted to 11 meters
and is now a CBer, he can occasionally be heard Eastbound and Down!

In addition...

NO CODE EXTRA:
Flaunts honorary degree in "Tall Building Jumping";
Exhibits powerful ulterior "Loco Motives";
Attempts to avoid speeding bullets;
Is able to "Pass Water", usually without difficulty
Denys the existence of GOD; Cohort of CBers

Temporary Operating Suffixes

General - /AG
Advanced - /AA
Extra - /AE
No Code Extra - /AH

SB DX @ WW $OPDX.330
Ohio/Penn DX Bulletin No. 330

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 330
BID: $OPDX.330
November 10, 1997
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1 (New Area Code!)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, WB2RAJ/WB2YQH & The 59(9) DXReport, K3ZO, N4GN, N6RT, K8YSE, K9LA, K9VV, AH0W/OH2LVG, F6AJA, G3NOM, G3SXW, G4BUE & DX News Sheet, HB9HFN, HS0/G4UAV and ON4VT for the following DX information.

IMPORTANT NOTICE FROM EDITOR! It is a shame I have to go through this again, but BARF-80 BBS (Basic Amateur Radio Frequency) is NO (repeat NO) way connected or associated with the B.A.R.F. (Better Amateur Radio Federation). The same notice was issued several years back, but due to the numerous messages appearing on the UseNet groups dealing with B.A.R.F. and involving hatred towards individuals, this message is important to circulate before confusion between BARF-80 BBS and B.A.R.F. gets out of hand. PLEASE PASS THE WORD! There is NO ASSOCIATION OR CONNECTION.

4X, ISRAEL. Look for Cedric, HB9HZN, to be signing 4X/HB9HFN now until November 13th from Tel-Aviv. He is there on a business trip but plans to be active as much as possible during the evening. He will be taking an IC-706 w/Tuner and wires. QSL to his home call (bureau preferred) or direct to Cedric Baechler, Mettetlet 26, 1763 Granges-Paccot, Switzerland.

5T, MAURITANIA. Members of the International Amateur Radio Volunteers (IARV) led by Yoshi, JA1UT, and Toshi, JA8RUZ, are currently in Nouakchott to implement an aid project. This project will help in the setup of hospital/ambulance radio communications, assistance to UNICEF, and assistance to the Government with the famous Paris-Dakar Motor Rally. The main activity will take place between November 6-13th. They hope and expect to have the 5T5U licence reissued to them, but the operation may be supervised, so "pile-up" type operations may not be possible. Their operating times are subject to spare time. They will give an emphasis to CW on all bands including the WARC bands, excluding 1.8 MHz (check +30 kHz from the band edge, except for LF bands). They plan to operate on RTTY (on 14, 21, and possibly 7 MHz, frequency not yet decided). On SSB,

check 14185, 21285, 28585 and check PacketCluster spots for 7/3.8 MHz.
QSL to JA1UT.

5V, TOGO (Update). Roger, G3SXW, provided OPDX with the following update and reminder: "All arrangements are in place for the 5V7A expedition to Togo, to operate in the Multi-Multi category of CQ World-Wide CW Contest. Before the contest (November 26th to 28th) we will operate on contest bands, checking antennas. After, (December 1st to 4th) we will also operate WARC bands. Arrangements have now also been made to operate some RTTY. These operations (several simultaneous stations) will be with personal callsigns: 5V7A/G3SXW, 5V7ZM/G3ZEM, 5V7FA/G4FAM, 5V7RF/GM3YTS, 5V7VT/K5VT, 5V7PN/K7PN 5V7MF/KC7V, 5V7BG/N7BG, 5V7MB/N7MB and 5V7BV/W6RGG."
For more details check out the following WEB site:
http://www.getnet.com/~k7wx/5v7a.html

9A, CROATIA. Croatian club radio station 9A1CRD will be celebrating its 20th anniversary until December 31st, with special callsign 9A20D. All activity will be on 80-10 meters frequencies with operations on CW and SSB. QSL via 9A1CRD.

9Q ON SSTV! On Tuesday, November 4th, Peter/ON6TT made the first SSTV QSO ever from 9Q (Democratic Republic Congo) using the call 9Q2T. The first pictures from 9Q2T are already on WWW. Check ON4VT's WEB site at:
http://www.ping.be/on4vt/

A6, UNITED ARAB EMIRATES (Update). David, K3LP (ex AA6DC), will now be joined by Rich, KE3Q, for his November 22nd to December 2nd operation as A61AJ. Activity will be mostly CW and on the lower bands (watch their local sunset at 1327z). David (and probably Rich) will also be an entry in the CQWW CW Contest. QSL this operation only to K3LP.
Meanwhile, disaster hits A6 operators by a cyclone that hit Dubai at the end of October. "The DX News Sheet" reports A61AD lost his KT34XA, A61AN lost his 20m yagi, A61AO's yagi is now vertically polarised and partially damaged, but A61AQ's antennas survived.

EL, LIBERIA. "The 59(9) DXReport" states that Joe, K3KN, who has been active as EL/K3KN is now sporting his new EL2JR callsign. OPDX has found him to be active on some of the WARC bands. This past weekend he was heard on 30 meters between 0000 and 0530z and on 17 meters (around 18074 kHz) between 1930 and 2330z. QSL via KB3U.

FO, RIMATAR ISLAND (Postponed). Albert's (FO5JR) planned activity from this Polynesian island (IOTA OC-50) in December has been postponed due to the projected weather forecast. The forecast states a very bad and hard summer season and Albert wishes to stay at home. He will now try to be there next July.

HS0, THAILAND. Tony, HS0/G4UAV, announces that the Radio Amateur Society of Thailand is planning an all-out multi effort in the 1997 CQWW CW from its club station HS0AC at the Asian Institute of Technology near Bangkok Airport. SM3DYU and LA7JO are organizing the effort which will also include VK3DXI, E21CJN and EY8MM. However, they would like to have five

or six more operators to really make a full go of it. PERMISSION FOR THE OPERATION TO UTILIZE 80 AND 160 METERS HAS ALREADY BEEN OBTAINED. If you are interested, please contact Tony (quickly) at his E-mail address: tonyw@mozart.inet.co.th
Fred, K3ZO, added something to this annoucement which readers may find interesting: "Granted, this announcement is being made on very short notice. But consider the fact that Thailand, never an expensive tourist destination to start with, is now a real bargain with the dollar worth 60% more in the local currency than it was a few months ago. The Institute has a comfortable and inexpensive hotel right on the campus within easy walking distance of HS0AC. Persons flying in on that Thursday or Friday, from the U.S. at least, can often get special discounts because of it being the Thanksgiving holiday whereby most people have already arrived at their destinations. No visa need be obtained in advance in order to enter Thailand; you will be given a 30-day permit to stay in Thailand on arrival at the airport."

J2, DJIBOUTI. Jean, F6AJA, reports Dominique, J28DB (home callsign unknown), will be active for the next 3 years. QSL via F4AAQ.

J8. ST. VINCENT. "The 59(9) DXReport" states that Volkmar, DF2SS, will be active from here December 20th through January 20, 1998. No callsign was mentioned, but the "DX News Sheet" reports that their activity will included operations on 160 meters and RTTY.

JD, MINAMI TORISHIMA. Look for Take, JG8NQJ, to be active as JG8NQJ/JD1 from Marcus Island, starting November 25th, and lasting until February 20, 1998. He will be working at the meteorological station on the island. QSL via JA8CJY.

NH2, GUAM. Bill, NH6D, who lived in Honolulu and operated off and on from Midway last year, has permanently moved to Guam. He will be using the callsign NH2/NH6D. Over time, he will be more and more active on the low bands. QSL to his manager N6FF.

P4, ARUBA. Bob, K4UEE, will be active once again as P40R during the CQWW CW Contest as a Single/OP entry. QSL via NK4U.

QSL INFO AND NEWS.....
Tim, N4GN, reports that the OH0/N4GN and OJ0/N4GN DXpedition logs are now searchable at the following URL: http://www.iglou.com/n4gn/oj0/
He states, "Much of the original logs were on paper, so there are likely a few data entry errors. Please notify me of any discrepancies. Details regarding the QSL status are also available at this same URL, and will be updated as necessary. The bottom line now is that I expect to answer direct requests by the end of December. Please do not send second (or third!) requests before then. Tnx for your patience! 73, Tim Totten, n4gn@iglou.com....."

Doug, N6RT, wants to remind everyone that the FO8DX QSLs for 1997 CQWW SSB Contest go via KG6AR: Chris Williams, 1117 So. Del Mar Ave., San Gabriel, CA 91776-3034. He also mentions that their FO0 2x2

callsigns listed in the bulletins before the contest were never issued. Please remove them from any QSL info lists you see. All current visitor licenses are 2x3 FO0 callsigns with the suffix being the first three letters of your last name (or the closest unissued callsign). The following are the actual callsigns issued and their QSL routes:

FO5VO via N6VO, Ron Weaver, 13691 Solitaire, Irvine, CA 92720
FO0BRD via N6RT (ex-NF6H), Doug Brandon, 712 Stardust Drive,
Placentia, CA 92870-4507
FO0KEO via KA7CQQ, John Kennon, P O Box 31553, Laughlin, NV 89029
FO0MIT via W6RW (ex-N6NU), Mike Mitchell, 5271 Turquoise Ave,
Alta Loma, CA 91701
FO0PLA via W8AEF, Paul Playford, 35639 N 3rd St, Phoenix, AZ
85027-7405
FO0SPE via KG6AR (see above address - op. W6KK)

"Please be patient as it will take a month or so to develop film and get QSLs printed..... 73 de Doug, N6RT"

TI, COSTA RICA. Fred, K9VV, reports to OPDX that through the courtesy of TI5KD, the contest call of TI5N will be used as a Multi/Single in the CQWW CW Contest. The operators will be K6CT, K9VV, TI2CCC and TI2OY. QSL via TI5KD.

XF3, ROQUETA ISLAND (Mexico). A group of Mexican operators will activate NA-183 located in the Guerrero State Group from 2100z November 21st, to 2100z November 23rd. Operators will sign: XF3/XE3HLR, XF3/XE3AD, XF3/XE3LYC, XF3/XE3LBT, XF3/XE1K and XF3/XE3LMV. Activity will be on 160-6 meter and RS-12/13. QSL via XE3LMV.

XU, KAMPUCHEA (CAMBODIA) (Sad Note). OPDX is sad to report that Mike, W0YZS, who many have worked as XU6WV, became a Silent Key (SK) on October 27th in Kampuchea. Mike was also noted for his activities as VR2WV, VS6WV, SV0FE, SV0FE/SV5 and SV0FE/SV9. OPDX sends our deepest sympathy to the family.

ZF, CAYMAN ISLANDS. Look for ZF1A as a Multi/Single entry in the CQWW CW Contest. The following operators will activate ZF1A and will be active outside the contest: Dan K1TO/ZF2??, Bob K4UVT/ZF2RF, Joe W5ASP/ZF2NE, Mike K9MK/ZF2MK, and Carl K9LA/ZF2LA. QSLs for ZF1A QSOs go to K9LA. QSLs for QSOs outside the contest period go to the respective home call. For more details visit their WEB site at: http://members.aol.com/k4uvt/ZF1A.htm.

You don't *have* to assume that. John did cross-post his question to
a CB group and gave no call sign. Maybe that's a bit of a tip.

I'd wager that you gave the right answer but to the wrong question,
Bob, but that it was actually Phil who got it dead right this time.

2712. November Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-10 00:00:00 UTC
From: ids@nol.net
Message-ID: <3466650b.30562422@news.nol.net>
Source record: 31268

PROPAGATION - by AD5Q HOUSTON, TEXAS -- NOVEMBER 1997

This fall has given some neglected HF bands a wake up call. The seasonal peak in high band activity has coincided with a sharp increase in solar activity to produce a 15 Meter season beyond anyone's expectations. The band was well populated with DXers trying out paths that have been closed for some time. From W5, most of Europe was coming through nicely with occasional openings to parts of Russia. The east coast undoubtedly got a better path to Russia with less Japan. The CQWW fone contest was marred by geomagnetic storminess, but many reported respectable QSO totals on 15.

The waters on 10 Meters were also tested, and openings to both Europe and Asia were found. With flux levels at times higher than 120, these openings were sometimes pretty good (though brief).

Winter approaches, however, and the polar night is advancing over the high latitudes. The fall DX season is therefore past its peak, and we should not expect this new solar activity to keep the bands open the way they have been this fall. We are in the early stages of the new cycle. The recent sharp rise in flux levels from near bottom levels was almost unprecedented and likely anomalous, and continued improvement at these rates should not be expected (even though possible). I expect deterior-ating conditions now through January on 10 and 15, with hope for a nice comeback in spring '98. Next fall season, the big news will be 10 Meters.

A moderate increase in flux levels is very significant for 20 Meter nightpath propagation. Evening DX openings will be better than last year, and morning daypath openings to Europe will be longer. This winter the band will still close at night, but it is summer in the southern hemisphere where the nightpaths will be wide open. Expect dramatic improvement in long path propagation across the Antarctic. From W5, find southern Asia, the Middle East, N.E. Africa, Russia and Europe in the morning; and Indonesia, S.E. Asia, and Japan around our sunset. Short path openings can also occur at these times.

It is too early to expect an end to the great lowband conditions of recent years. Many have put up effective antennas and will continue to use them, providing lots of activity through the winter months. Evening conditions on 40 will likely improve over last year due to higher nighttime MUF's.

> were in the dx part of the band. The band was very quiet that day.

> Is their a dx part? What is it?

Here in Israel (which is like most of the world outside of the Americas)
we have 3500-3800 as our 80 meter band. Class B operators (generals)
can use up to 150 watts, Extra's (class A) get 1500.

Since US hams are restricted to CW on most of our 80 band the top end
(low end for US hams) is designated as reserved for DX. This is by
gentelman's agreement not by law.

Since you will have no 80 meter propogation during daylight beyond ground
wave, I see no reason to worry about it during the day. At other times,
please be considerate of us and move up.

Thanks and 73,

Geoff.

Hello Ted!
Me thinks thou hast missed the boat by about 12+ years!
I used to live in Vineland, and when Cable-TV was coming in hot and
furious, I decided to ride around the area, check for TV towers by a
house that had the familiar Cable line going into it, and 'offer' to
dismantle their obsolete tower for them for no charge! I believe I
acquired over 30 towers like that! Which I then sold to people up here
in No. Jersey. Around the Middlesex/Union Counties areas.
Yepper.....I made big bucks those 2 years!
Try doing what I did. There may be some left.
Regards,
Brian

: Well Bill,
: That calculation may may be close for your electric range, but I have
: yet to see an amplifier that is 100% efficient.

Yeah, but... In neighborhoods where houses were built with electric heat,
and gas came through later, like mine, many houses have excess electric service
capacity. Mine has a 400 amp service, and no longer uses the 2*60A @ 240V
that fed the 20kW electric furnace; nor does it use the power that fed the
electric hot water heater. But...I'll bet most 10kW output amplifiers have
3-phase power input, and that would be a serious problem in residential
areas.

(Me?? I'd much rather use simple, low power equipment and get
satisfaction from operating skill and effective but simple antennas.)

Please address any questions to: k7on@qth.net

QTH.Net Digests and Archives (for subscribers)
k7on@qth.net

What about Digests and Archives?

A. Digests

All lists at QTH.Net have digests available.

You can subscribe to a digest and periodically receive the compiled
messages rather than individual messages.

All list digests are configured for a size limit of 40,000 bytes.
However, most of the files are around 16k to 30k. This is because
majordomo will NOT send a digest larger than the limit. If a new
message pushes beyond the limit, it sends the accumulated, putting
the new message in the NEXT digest.

If you are switching from non-digest to digest, you must unsubscribe
dx and subscribe dx-digest.

It is an entirely seperate subscription, but both digest and non-digest
subscribers are permitted to post to the non-digest list.

TO: majordomo@qth.net
SUBJECT:
BODY: subscribe dx-digest
unsubscribe dx

B. Archives

All messages sent via reflector are archived and are available for
access through majordomo.

You can send a command to majordomo@qth.net and in the body type:

index dx-digest

and get a list of files that are available by request.

Here is an example:

```
>>>> index dx-digest
total 116
-rw-rw---- 1 majordom 45 14169 Sep 2 18:09 v01.n042
-rw-rw---- 1 majordom 45 18100 Sep 3 11:27 v01.n043
-rw-rw---- 1 majordom 45 15322 Sep 4 14:11 v01.n044
-rw-rw---- 1 majordom 45 13490 Sep 6 11:15 v01.n045
-rw-rw---- 1 majordom 45 16382 Sep 9 18:39 v01.n046
-rw-rw---- 1 majordom 45 14823 Sep 11 08:40 v01.n047
-rw-rw---- 1 majordom 45 16872 Sep 12 01:04 v01.n048
```

To retrieve one of these files, send an email to majordomo@qth.net.

In the body of the message, type:

get dx-digest v01.n048

The file will be emailed to you, automagically!

C. Archives on WWW

You may view the archives online.

Point your web browser to: http://www.qth.net/dx-digest.archive

Greetings to all!
It is now 1605 UTC here in New Jersey, USA. Tuned into 14313/USB on my Icom IC-R71A and guess what? Heard a couple idiots calling each other 'liars', as a "California Kilowatt" station tried to pile on top of them with his own choice selection of obsenities!
Still have the freq. tuned in, and haven't heard a call/sign yet. They are from America, that I can be sure of because of the propagation factor here today. Don't know if they are Hams or Pirates. (Can't be Hams!)
I'm not an amateur radio operator myself, but was in charge of the MARS station at Ft. Dix, NJ for 17 months. High speed CW Op. (35WPM S/R), and I am quite familiar with proper radio discipline! Also operated a KWM-2A

for 2 1/2 tours in VietNam.
Can't really say that the foreign operators are exactly 100% 'legit'
with their QSO's (language, et al), I only know Vietnamese.
Thinking about going for my General Class in about 2 months or less. Got
the code down, going to buy some 'help' books and software from the ARRL
for the written part.
Has anyone ever thought about TRIANGULATION? I know the FCC has
basically given up on CB'ers, and are slowly but surely 'auctioning' off
the Ham freqs, but what about the existing Ham Bands? Will there be
anything left for me and my 3 daughters left? And, would I really expose
them to what I've been hearing out there?!
Sorry if I rambled on! I tend to be a keyboard-ragchewer at times.
Take care.....God Bless.....HAPPY THANKSGIVING!!!
Your turkey is below! 73

Well Rob,

Lets do a little scenario. Take the 13kW continuous offering for example. Now say it only runs at 50% efficiency. We are now up to 26Kw. Throw in another 4kW to cover other losses and we have a grand total of 30kW.

At my house, with a 200 amp main, each leg runs 121V-122V no load. With every thing in the house that uses electricity turned on and and a few extra 500W floodlamps plugged into spare plugs, 1000W metal halide flood, air compressor and a 2hp deep well jet. Oh, I ran the hair dryer also. The voltage drops to a minimum of 116V while drawing 137A. My electric company was kind enough to use 2/0 copper for the connection to their secondary. That gives me 232V phase to phase. 30,000W/232V = 129.3A This still leaves 70.7A to run the rest of the house on. An amount sufficient to run the rest of the house under normal conditions.

Electricity wise, I don't see any problem. Actually, it may turn out to be the least of all problems. Of course you may put a kink in the theory of divirsity that the electric company uses in figuring distribution transformer kVA, but that is their problem. They'll just have to use a

larger distribution transformer if you contest a lot.

You have to shout when you're only running 5 watts and everyone else is
(illegally) running a kW ! :-)

With the proposed 50 watt at 20 foot power limit almost Stoped
the City dwellers edge to run full legal power to compete with
the big towers and antennas. We must not forget RFI to the neighbors,
even though their equipment usually is at fault.

Things like Big amps running illegal power durring contesting is
ruining this hobby for the rest of us. Continuing RFI to neighbors
with bad design equipment with no protection is the fault of the
FCC with their hands tied. For DXing and contesting in a highly
dense population like where I am is out of the question, cause of
leagal RFI, need to get along with neighbors, not to fight em.
I have been in bouts 3 times with the FCC with RFI and biolgical
effects of RF radiation. Got out of it with no restrictions. My lot
is 35 by 120 feet. 8 foot to the neighbors house. Got 185 countries
on 75/80 meters confirmed. I payed the price with pissed off neighbors.
Telephone RFI was the worst, but of no concern to the FCC.

No longer worth the bitching with the neighbors.

>3-phase power input, and that would be a serious problem in residential
>areas.

In Europe, three-phase is readly available. Power is distributed locally
by a three-phase 415V Y-system, and individual houses get a 230V AC feed
from one of the phase conductors and neutral. Neighboring houses are
connected to different phases to roughly balance the neutral current.
Large buildings and light industrial users get all four conductors.
In countries such as Sweden which have a history of large electric
heating demand, even individual houses have three-phase supplies.

Why waste time to determine if the average house will run an amp this
large? It is NOT legal to run in the US for any ham. Unless you crank
it way down ... 1500 w output = legal max.

CHINA HAM NEWS 11/11/97: EME Schedule

Contributed by Lars Melin, SM0KAK
Member, Tsinghua University Amateur Radio Club, Beijing, China

Edited by Rick Niu, BD1QL
MBA '99, Columbia Business School, New York, NY
xn6@columbia.edu

BY1QH will be QRV on 144MHz EME at 1300-2300z, Saturday, November 15, 1997.

1400-1600z CQ
1600-1700z Listen around
1700-1900z CQ
1900-2000z Listen around
2000-2100z CQ
2100-2200z Listen around
2200-2300z CQ

BY1QH will always call CQ on 144.120MHz, using two-minute timing, with BY1QH transmitting in the first period. BY1QH plans to stay on 144.120MHz the full even hour, and stay there longer if someone is heard at the end of the hour.

During the contest, BY1QH will be QRV on a borrowed mobile phone: (86-10) 9085-4674.

So far BY1QH has worked SM5FRH, SM5BSZ, SM2CEW, KB8RQ, and W5UN.
If you want to see some pictures taken at BY1QH just before the first leg of the ARRL EME contest, take a look at the homepage of PA3DSS:
http://www.horizon.nl/~tdekkers/by1qh/index.html.

CHINA HAM NEWS is available for unlimited, appropriate distribution.

2740. ? QSLing

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-11 00:00:00 UTC
From: "Ronald L. Watkins KG8XM" <ss454@wwnet.com>
Message-ID: <34693153.4EE3@wwnet.com>
Source record: 31296

Hello to the group,
I have a few DX QSLing questions. I have been sending most of my QSL's direct using 6x9 brown end flap S.A.E.'s for the return trip, when and if I get a return I find in most cases that my address is cut out of my envelope and pasted to a 4.5x6.5 envelope. My questions are:

1. Is my envelope (6x9) to expensive for the DX station to return?
2. Where can one find 4.5x6.5 envelopes?
3. If I use 4.5x6.5 envelopes will they work for all countries.

As you have seen not all QSL's are the same size. If I send a standard 3 5/8x6 1/2 for the return the larger cards come back folded or the envelope modified to fit. I don't feel I am getting a good return for the cards sent. I use IRC's and send the required number according to a table in our local DX PacketCluster. Any help would be appreciated this is getting expensive.

TNX Ron KG8XM...

I think guys with 40 watts and a dipole who sit on the 20 meter DX nets
all day and nite looking for a 'new one' are ruining the hobby, but's that's
only my opinion.

>Jim WA9YSD

Sounds like you need a different amplifier, Jim. My neighbors are 10 feet
on either side of me, and I have been running 1.5 KW for 6 years with no
complaints. For the seven years previous, I ran 1.5 KW from an 8th floor
condo with 150 units in the same building. No problems there either. Only
complaint I ever had was from another ham who had his antenna about 200'
from mine on the other end of the building, and he wasn't complaining about
his TV......

>But only if you hold an Advanced ticked !!

that's true.

if you have a basic only... you can still use:

- 250W D.C. Input

- 560W SSB Output

- 170W Other Mode Output

560W is quite a lot !!

2743. November Propagation Forecast

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-12 00:00:00 UTC
From: ids@nol.net
Message-ID: <34694ec3.13814282@news.nol.net>
Source record: 31299

PROPAGATION - by AD5Q HOUSTON, TEXAS -- NOVEMBER 1997

This fall has given some neglected HF bands a wake up call. The seasonal peak in high band activity has coincided with a sharp increase in solar activity to produce a 15 Meter season beyond anyone's expectations. The band was well populated with DXers trying out paths that have been closed for some time. From W5, most of Europe was coming through nicely with occasional openings to parts of Russia. The east coast undoubtedly got a better path to Russia with less Japan. The CQWW fone contest was marred by geomagnetic storminess, but many reported respectable QSO totals on 15.

The waters on 10 Meters were also tested, and openings to both Europe and Asia were found. With flux levels at times higher than 120, these openings were sometimes pretty good (though brief).

Winter approaches, however, and the polar night is advancing over the high latitudes. The fall DX season is therefore past its peak, and we should not expect this new solar activity to keep the bands open the way they have been this fall. We are in the early stages of the new cycle. The recent sharp rise in flux levels from near bottom levels was almost unprecedented and likely anomalous, and continued improvement at these rates should not be expected (even though possible). I expect deterior-ating conditions now through January on 10 and 15, with hope for a nice comeback in spring '98. Next fall season, the big news will be 10 Meters.

A moderate increase in flux levels is very significant for 20 Meter nightpath propagation. Evening DX openings will be better than last year, and morning daypath openings to Europe will be longer. This winter the band will still close at night, but it is summer in the southern hemisphere where the nightpaths will be wide open. Expect dramatic improvement in long path propagation across the Antarctic. From W5, find southern Asia, the Middle East, N.E. Africa, Russia and Europe in the morning; and Indonesia, S.E. Asia, and Japan around our sunset. Short path openings can also occur at these times.

It is too early to expect an end to the great lowband conditions of recent years. Many have put up effective antennas and will continue to use them, providing lots of activity through the winter months. Evening conditions on 40 will likely improve over last year due to higher nighttime MUF's.

It's about 1.5dB more than the 400w that UK amateurs are allowed.
But then we used to be allowed only about 100w on cw (150w input).

It's too big. European standards are for a much smaller envelope. It's
probably too heavy as well.

> 2. Where can one find 4.5x6.5 envelopes?

Billo plum sells a pair of envelopes that fit one inside the other. The
Mailer is 4 3/4 x 6 1/2 and the return is 4 1/2 x 6 1/4 and works
wonderfully. I have used them now for several years without any problem

William Plum DX Supplies (he also sells foreign postage!!!
12 Glenn Rd
Flemington, NJ 08822

ph (908) 788-1020
fax (908) 782-2612

prices are reasonable as well. The Mailers are $9/100 and the returns
are $8/100

> 3. If I use 4.5x6.5 envelopes will they work for all countries.

YES!!!!

> is getting expensive.

I have stopped using IRC. They usually never get the desired results.
I've heard that alot of DX'ers can't be troubled with redeeming them. I
use either the old fashioned green stamp or have used Bill for foreign
postage. I also hit up any friend traveling abroad to get me a few
dollars worth of stamps. Usually France, or Britian, Germany, etc.

There are a lot of QSL managers in those countries. I average better
than 90% on SASE with foreign postage affixed

Good luck

Because 80 meters "ends" at 3.800Mc in much of the world, the
segment from 3.790-3.800 is an unofficial meeting place for US
stations to work DX on that band.

2755. Essay Question

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-12 00:00:00 UTC
From: "Edward, III Dickinson" <eddick@worldnet.att.net>
Message-ID: <64cgon$od4@bgtnsc03.worldnet.att.net>
Source record: 31311

The following table is contained in an article in October 1997 QST, 'Official Journal of The American Radio Relay League'. The article, "What's New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on pages 51 and 52.

Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations

Band (Wavelength)	Transmitter Power (W)
160m	500
75m	500
80m	500
40m	500
30m	425
20m	225
17m	125
15m	100
12m	75
10m	50
6 - 1.23m	50
70cm	70
33cm	150
23cm	200
13cm and up	250

ESSAY QUESTION

Compare the frequencies aligned with lower power thresholds with those which may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.

As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.

So in Canada we can use +33.52 dBw, but in the US we're limited to
+31.76 dBw, for a total difference of 1.76 dB. Doesn't seem like very
much.

Source record: 31423

Dear fellow DXers,
I would like to inform you about the upcoming DXpedition by DF6PW and
DJ4VW to Reunion Island.

The operators will arrive on the island November 19th. DF6PW will stay
until November 28th and DJ4VW until December 5th.

It is planned to operate CW / SSB and perhaps RTTY on
40m, 30m, 20m, 17m, 15m, 12m and 10m.

It is also planned to operate in CQ WW DX CW contest.

They will probaly visit FR5DX and work also 80m and 160m but that depends
on interest and condx.

The DXpedition homepage can be found at:
http://www.uni-bonn.de/~ule102/reunion.html

I also set up an an interacitve log search that can be accessed via the
WWW. A link to this and to the latest news on the operation are also on
the page mentioned above.

For any request concerning special modes/bands you can drop me an email
and I will try to inform the operators down there.....

Best 73 de Markus DL5OBZ / K2XS

Hi all:

Just a quick note to let you know we've moved! We maintain a
redirector, so the old URL will still work, but you can find us on
QSL.net now. A link is at the bottom of this post. Stop and give us a
look and we'll be adding more goodies in the coming weeks.

You can also find the Central Michigan Amateur Radio Club at QSL.net.
This Site will also be adding more goodies, so check in
http://www.qsl.net/cmarc

Thanks and 7-3,
Erv KB8TNQ

Thanks to everyone--I thought he might be at the Ukrainian Antarctic Base
as I worked EM1KA down there last year on 40 CW.

Most logging programs accept "KC4" as a "country" prefix for Antarctica,
although CE9, KC4, 8J1, AT0, DP0, T8Y, LU, OR4, R1AN, VK0, VP8, ZL5, ZS1,
and ZX0 are listed on the ARRL World Map.

From: "Edward, III Dickinson" <eddick@worldnet.att.net>
Subject: Essay Question

The following table is contained in an article in October 1997 QST, 'Official Journal of The American Radio Relay League'. The article, "What's New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on pages 51 and 52.
Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations
Band (Wavelength) Transmitter Power (W)
160m 500
75m 500
80m 500
40m 500
30m 425
20m 225
17m 125
15m 100
12m 75
10m 50
6 - 1.23m 50
70cm 70
33cm 150
23cm 200
13cm and up 250
ESSAY QUESTION
Compare the frequencies aligned with lower power thresholds with those which may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.
As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.

Thanks to everyone--I thought he might be at the Ukrainian Antarctic Base
as I worked EM1KA down there last year on 40 CW.

Most logging programs accept "KC4" as a "country" prefix for Antarctica,
although CE9, KC4, 8J1, AT0, DP0, T8Y, LU, OR4, R1AN, VK0, VP8, ZL5, ZS1,
and ZX0 are listed on the ARRL World Map.

Subject: Essay Question

The following table is contained in an article in October 1997 QST,
'Official Journal of The American Radio Relay League'. The article, "What's
New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on
pages 51 and 52.
Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations
Band (Wavelength) Transmitter Power (W)
160m 500

75m 500
80m 500
40m 500
30m 425
20m 225
17m 125
15m 100
12m 75
10m 50
6 - 1.23m 50
70cm 70
33cm 150
23cm 200
13cm and up 250
ESSAY QUESTION
Compare the frequencies aligned with lower power thresholds with those which may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.
As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.
'Only the Paranoid Survive'

Subject: New Web Site Locations

Hi all:

Just a quick note to let you know we've moved! We maintain a
redirector, so the old URL will still work, but you can find us on
QSL.net now. A link is at the bottom of this post. Stop and give us a
look and we'll be adding more goodies in the coming weeks.

You can also find the Central Michigan Amateur Radio Club at QSL.net.
This Site will also be adding more goodies, so check in
http://www.qsl.net/cmarc

Thanks and 7-3,
Erv KB8TNQ

Back in July 1992, I worked a dxpedition, 4K5Z1. They were part of The Snake "Zmeinyj" dxpedition.

I have a QSL card from them, any idea which part of the world they were operating from?

I also worked T53UN (Somalia) on 24 May 1992. He was on a DX net, but I wasn't able to get the QSL info for him. I believe he was a Canadian working there. Does anyone know the qsl route for this one, haven't found anything in the usual sources, webb sites etc.

Source record: 31439
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.swap

Reprinted from from The ARRL Letter Vol 16 No 45

* Bogus bulbs? Merit Arnold, W6NQ, of RF Parts in San Marcos, California, asks in an Internet posting if anyone has encountered counterfeit high-power transmitting tubes (eg, 3-500Z, 3-500ZG, 4-400 series) at flea markets or through overseas suppliers. He says that since Eimac left the glass tube business, he's learned of instances where Eimac and Amperex logos and cleverly copied markings or labels have been applied to tubes manufactured in China which are then packaged in yellow Eimac-style or Amperex boxes. Arnold says that recent-issue Eimac 3-500Z/ZG tubes will have the Eimac logo imprinted on the grid shroud. Also, he says, Eimac will usually have the serial number engraved with vibrating pencil on the shroud. On the other hand, the counterfeit overseas tubes will have the date code and serial number stamped along the edge or on top of shroud (first two digits indicating year of manufacture). Counterfeit 4-400 series "Amperex" tubes use a "slip-on" anode terminal with a set screw. Genuine Amperex tubes have the terminal fused through the glass. W6NQ would like to hear from anyone who has run into these bogus tubes. E-mail him at rfp@rfparts.com.--thanks to Marv Gonsior, W6FR

Subject: EM1HO???

I also worked EM1HO and just received the QSL card.
It is from the Ukrainian Antarctic base (on Galindez Island).
The operator is Tony, I2PJA, so QSL to his home QTH.

Anyone know if this one counts for a DXCC country? Which one?
Thanks

- Craig, AA0ZZ

Thanks to everyone--I thought he might be at the Ukrainian Antarctic Base
as I worked EM1KA down there last year on 40 CW.

Most logging programs accept "KC4" as a "country" prefix for Antarctica,
although CE9, KC4, 8J1, AT0, DP0, T8Y, LU, OR4, R1AN, VK0, VP8, ZL5, ZS1,
and ZX0 are listed on the ARRL World Map.

Subject: Essay Question

The following table is contained in an article in October 1997 QST,
'Official Journal of The American Radio Relay League'. The article, "What's
New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on
pages 51 and 52.
Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations
Band (Wavelength) Transmitter Power (W)
160m 500
75m 500
80m 500
40m 500
30m 425
20m 225
17m 125
15m 100
12m 75
10m 50
6 - 1.23m 50
70cm 70
33cm 150
23cm 200
13cm and up 250
ESSAY QUESTION
Compare the frequencies aligned with lower power thresholds with those which

may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.
As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.

Subject: New Web Site Locations

Hi all:

Just a quick note to let you know we've moved! We maintain a redirector, so the old URL will still work, but you can find us on QSL.net now. A link is at the bottom of this post. Stop and give us a look and we'll be adding more goodies in the coming weeks.

You can also find the Central Michigan Amateur Radio Club at QSL.net. This Site will also be adding more goodies, so check in http://www.qsl.net/cmarc

Thanks and 7-3,
Erv KB8TNQ

SB DX ARL ARLD048
ARLD048 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, QRZ DX, G4BUE, DXNL and Contest Corral from QST. Thanks to all.

CROATIA, 9A. The Croatian Radio Club station is celebrating its 20th anniversary until December 31, using the special callsign 9A20D. Activity takes place on 80 to 10 meters using CW and SSB. QSL via 9A1CRD.

UNITED ARAB EMIRATES, A6. David, K3LP, and Rich, KE3Q, will be QRV in Dubai beginning November 22 from the QTH of A61AJ. They will also participate in the CQ WW CW Contest. QSL via W3UR.

IRAN, EP. Ali has been QRV as EP2MKO on 10 meters around 0745z. QSL via UA6HCW.

MAYOTTE, FH. DJ1RL and DK8FB will be QRV as FH/homecalls until November 28. QSL to home calls.

SOUTH KOREA, HL. DS5USH and DS5RNM has been QRV on 80 meters around 1200z. QSL via operator's instructions.

DJIBOUTI, J2. Dominique, J28DB, will be QRV for three years. QSL via F4AAQ.

SOUTH SHETLAND ISLANDS. Danny has been QRV as LZ0L on 40 and 20 meters. QSL via LZ1KCP.

GREENLAND, OX. Kim, OX3FV, is active using CW on 160 meters and the newer bands. Meanwhile, Joergen, OZ8AE, is QRV as OX/OZ8AE until December 1. Look for OX3FV and OZ8AE to be QRV as OX3FV in the CQ WW CW Contest. QSL both calls via their respective bureaus.

BANGLADESH, S2. S21YG has been QRV on 15 meters around 0900z and 40 meters around 2000z. QSL via operator's instructions.

BOSNIA, T9. Cedric, F1PSR, is QRV as T98PSR from Sarajevo until the beginning of March, 1998. Look for SSB activity on 160 to 2 meters. Some satellite and packet activity is expected. QSL via F5WN.

CAMEROON, TJ. Phillipe is QRV as TJ1HP. QSL via F6FNU.

ANTARCTICA. VU2JBK is QRV from the Indian Maitri Station in Queen Maud Land. QSL via VU2DVC.

ALBANIA, ZA. ZA1MH was QRV on 15 meters around 1400z. QSL via Z32KV.

THIS WEEKEND ON THE RADIO. The ARRL International EME Competition, ARRL November Phone Sweepstakes, North American Collegiate ARC Phone Championship and the IARU Region One 160 Meter Contest should fill up your operating weekend. Please see November QST, page 94 for details.

Subject: EM1HO???

I also worked EM1HO and just received the QSL card.
It is from the Ukrainian Antarctic base (on Galindez Island).
The operator is Tony, I2PJA, so QSL to his home QTH.

Anyone know if this one counts for a DXCC country? Which one?
Thanks

- Craig, AA0ZZ

Subject: EM1HO???

Thanks to everyone--I thought he might be at the Ukrainian Antarctic Base
as I worked EM1KA down there last year on 40 CW.

Most logging programs accept "KC4" as a "country" prefix for Antarctica,
although CE9, KC4, 8J1, AT0, DP0, T8Y, LU, OR4, R1AN, VK0, VP8, ZL5, ZS1,
and ZX0 are listed on the ARRL World Map.

Subject: Essay Question

The following table is contained in an article in October 1997 QST, 'Official Journal of The American Radio Relay League'. The article, "What's New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on pages 51 and 52.
Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations
Band (Wavelength) Transmitter Power (W)
160m 500
75m 500
80m 500
40m 500
30m 425
20m 225
17m 125
15m 100
12m 75
10m 50
6 - 1.23m 50
70cm 70
33cm 150
23cm 200
13cm and up 250
ESSAY QUESTION
Compare the frequencies aligned with lower power thresholds with those which may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.
As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.

SB DX ARL ARLD048
ARLD048 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, QRZ DX, G4BUE, DXNL and Contest Corral from QST. Thanks to all.

CROATIA, 9A. The Croatian Radio Club station is celebrating its 20th anniversary until December 31, using the special callsign 9A20D. Activity takes place on 80 to 10 meters using CW and SSB. QSL via 9A1CRD.

UNITED ARAB EMIRATES, A6. David, K3LP, and Rich, KE3Q, will be QRV in Dubai beginning November 22 from the QTH of A61AJ. They will also participate in the CQ WW CW Contest. QSL via W3UR.

IRAN, EP. Ali has been QRV as EP2MKO on 10 meters around 0745z. QSL via UA6HCW.

MAYOTTE, FH. DJ1RL and DK8FB will be QRV as FH/homecalls until November 28. QSL to home calls.

SOUTH KOREA, HL. DS5USH and DS5RNM has been QRV on 80 meters around 1200z. QSL via operator's instructions.

DJIBOUTI, J2. Dominique, J28DB, will be QRV for three years. QSL via F4AAQ.

SOUTH SHETLAND ISLANDS. Danny has been QRV as LZ0L on 40 and 20 meters. QSL via LZ1KCP.

GREENLAND, OX. Kim, OX3FV, is active using CW on 160 meters and the newer bands. Meanwhile, Joergen, OZ8AE, is QRV as OX/OZ8AE until December 1. Look for OX3FV and OZ8AE to be QRV as OX3FV in the CQ WW CW Contest. QSL both calls via their respective bureaus.

BANGLADESH, S2. S21YG has been QRV on 15 meters around 0900z and 40 meters around 2000z. QSL via operator's instructions.

BOSNIA, T9. Cedric, F1PSR, is QRV as T98PSR from Sarajevo until the beginning of March, 1998. Look for SSB activity on 160 to 2 meters. Some satellite and packet activity is expected. QSL via F5WN.

CAMEROON, TJ. Phillipe is QRV as TJ1HP. QSL via F6FNU.

ANTARCTICA. VU2JBK is QRV from the Indian Maitri Station in Queen Maud Land. QSL via VU2DVC.

ALBANIA, ZA. ZA1MH was QRV on 15 meters around 1400z. QSL via Z32KV.

THIS WEEKEND ON THE RADIO. The ARRL International EME Competition, ARRL November Phone Sweepstakes, North American Collegiate ARC Phone

Championship and the IARU Region One 160 Meter Contest should fill
up your operating weekend. Please see November QST, page 94 for
details.

He should contact Continental Electronics up in Richardson, Texas. They
specialize in just such projects. They even offer megawatt HF auto
tuned rigs that use cavity tuning in which the final tank circuit is made
up of a tuned cavity where-in one wall of the whole room slides in and
out like a piston to tune the thing. Among their more interesting patents
are the software algorithms emplaced in hardware that control the setting
servos that drive these moving wall piston tuner hydraulic rams. The

ability to predict exactly when to start applying opposite force to the moving walll so as to avoid it "hunting" about the frequency during the five or so seconds that it takes to move the whole amp to frequency, are very well thought out.

Less ringing of the wall during a tuning run that way..

He should go there with a pocketbook sized very-large; he'll need it :)

hello there,
Yes yes, it's the wrong newsgroup, but please hear me out before you start to write someting.
I'm an animation student and I am writing a paper on "adults and animation". At the moment I am trying to do some research and that's why I need your answer on these small questions.
Please e-mail me the answer because this message was posted to really a lot of newsgroups. You will find my e-mail adress at the bottom of the page.
Thank you very much for answering, and please don't even think about sending me something else than the answers, I won't take the time to read it anyway.
Brecht Cuppens

1 Which factors do you find most important in an animated movie, series, short,.....(choose three and rate, 1 being the most important, 3 the least)

1humor
2story
3visual style
4music
5Technique (3-d, cells, computer...)
6atmosphere (dark, heavy, comic, weird,....)
7dialogue
8quality of animation
9"adult content"(violence, sex, drugs,...)
10suspence
11realism
12subjects
13other (fill in)

2Which is your favourite animated movie, series, short,.....(only one please) and why?(choose from the above list)

3some personal info: age, sex , education, country

My answer would look like this:
1visual style
2storie
3humor
The Nightmare before christmas: visual style, quality of animation
20/m/university equal education(not finished yet)/Belgium

This shouldn't take too long and I kept it as short as I could,
so if you feel like it, you know what to do
thanks
Rene.Cuppens@ping.be

```
FCC Enacts Internet Morse Code Requirement
--- ------ -------- ----- ---- -----------

The FCC, under pressure to clean up the Internet, especially after the
Communications Decency Act provisions regarding Internet content
regulation were stricken as violating the U.S. Constitution, has
decided instead to require a Morse code requirement for Internet
users. Citing the success of the Amateur Radio Service and the general
belief that its requirement for operators to pass a Morse code
proficiency exam and other technical requirements, has kept the A.R.S.
"clean", the FCC will enact a 5 word-per-minute requirement for all
Internet users. They are leaving open the issue of whether there
should be a "codeless" class of Internet user and are soliciting
comments on this proposal.

Persons wishing to develop a web site having only links to other web
sites having links to other web sites, and so forth, must pass a 13
word-per-minute test and demonstrate proficiency in HTML, the Internet
authoring language.

Persons wishing to develop web sites that have actual content, as
compared to just links to other web sites, must pass a 20
word-per-minute Morse proficiency test, demonstrate proficiency in
HTML and the Java programming language, and show that they have
mastery of at least one human language, such as English.

The FCC, which lacks budgetary authority to implement the testing
program, has stated that it intends to create Volunteer Examiner
programs for Internet applicants.

Actually, that's interesting. I did get the info from someone here on the group, but I just received the Buckmaster newest CD and they list the DL3 as "data not released due to privacy laws. Interesting huh?

>I second that. All those in favor?

Let's just modify it a tad. How about we change it from codeless
to clueless? As a result, you should turn in your newsreader
immediately.

>Hey - if morse code is so bad,

Few have said it's "so bad". It just isn't the be all end all of
communications as it was 50-70 years ago.

>so tough to learn,

So is the theory, but I don't hear anyone complaining about it
because the rationale for it as a requirement is spelled out
in Part 97.

> so out dated

Well that it is.

> and so completely useless,

Again, few if anyone has said that. It's simply no more important
than any other aspect or mode in amateur radio.

> as many no coders continuously whine,

The only whining I see is from clueless folks that can't even understand
the issue isn't about Morse Code, but the requirement for
demonstrating its knowledge at higher and higher speeds to
access portions of the amateur spectrum. You might rent a
clue and check the call signs of most of those posting in favor
of change. You'll find that they have passed as many or more
Morse Code tests than your license class indicates you have.

>why do I see
>the majority of qsl cards for CW qsos? I presort cards for the W1 QSL
>bureau. Better than 75% are for CW contacts. Somebody better get a
>clue here.

Because DX chasers haven't discovered the latter half of the
20th century? No, just kidding. As an apparent wall paper chaser
yourself, you well know that it is an amusing activity to some and
many feel it is more sporting to do it the hard way. What any of
that has to do with licensing requirements is hard to imagine.
The clue you really need to rent though, is that no one cares
whether you find manual OOK Morse Code amusing and no one
is trying to prevent you from continuing to use it. The need for
Morse Code as a licensing requirement has long since disappeared.

>For those of you who will take exception to the "CW requirement" for the
>internet...Lighten up or get a life!

Why not have it as a requirement? After all, if you are going
to make arbitrary unrelated requirements for some activity, it's
about as valid as making Morse Code knowledge a requirement
to access amateur frequencies below 30 MHz.

>73 to all, even no-coders de W1AAE

73 to all, even the clueless,
Todd
N9MWB

PS This post has had its follow up line set to rec.radio.amateur.policy
as
I'm sure the other newsgroups have had their fill of this nonsense.
Please take the discussion over there.

YES RIGHT YOU ARE G-Ray!!

Aye SWL the ham bands and it be real Circus of Indius complete with
critchety old 2-faced farts, cheap assed bastards who try to jew down on a
25 cent price item at a hamfest and many sexual perverts than
in the redlite district of town. Greatest collection of geek mental
patients in any place. I went to a few ham fests with CB friends from the
Raleigh-Durham NC area, never seen bigger collection of nut cases wearing
clothes looking like they have not been washed in ten Years. My faves were
the ham goofballs wearing old army and cammo type clothing with 4 or more
walkietalkies on their beer gut streech'd belts. They look and act like
they were ready to go to a McDonalds or a Lubys after the hamfest with an
assault weapon or back to work at Post Office the next day. Scary!
Be afraid as most hams seem to not be wrapped too tite in the head.

Anyway here are some frequencies where you can hear ham radio ops in their
natural enviornmental, using dirty language on a DAILY 24 HOUR
shift work. These nuts really must not need sleep, I hear them comedy all
time on my old R-1000 Kenwood which sits next to my Uniden 2510 and
Sommerkamp CB radio - Leon N.C. "Hoppy Leo"

6am all day long, till sundown --> 14.300 to 14.313 USB
After sundown or starting 8pm to midnite --> 3.894.5 & 3.901 & 3.950 LSB
Midnite to 6am --> 3.853 or sometimes 3.950 continued LSB

24 Hours a day -- 7 days a week all manner of nutcase and mentaly
derranged ham op's on the above freq's and also check 3.850 LSB
late nite when 3.853 is quiet not too often.

There are WEB PAGES put up by hams with more info on crazy
places on ham radio bands. Here are a few to go see sometime:

LOL. I liked that one too. :-)

But when will QSLs become electronic? A one-time key, Password protected and encrypted QSL verification! Then the QSL could be sent by any means required or available such as internet, packet, CW, or phone. A QSL bureau web site could handle the entire transaction, and the recipients could instantly verify and print if they like, or just leave it in memory at the bureau.

We would then exchange "QSL information" by simply sending a unique password serial number during the QSO.

Maybe someone's already cooked this scheme before. But it's worth heating up again.

Amor Powers

hallo this is germany and also Australia (from 25.nov I stay in australia
and look on the 15m Band for many station my callsign in Australia I become
when I'm in Australia)

20m band = 14200 - 14210 khz
15m band = 21190 - 21200 khz
12m " " = 24940 - 24950 ""
10m " " = 28500 - 28510 khz
6m " " = 50110 -50120 khz

Hope to can work any stations !

My call in germany is DG6mfq and in Australia I hope to become a VK3 ???
Lizenz!

Whoa! One of the best gags in years!!!!
Lesseee,the Amateur Radio Service is "clean,and a success??" GARBAGE!
This is not an idle claim,let's fire up our radios and listen.What do we have here? Ummmmmm,Twenty meters during the weekend.....Gee,sounds a whole lot like what I hear on cb 19.....Lets spin the dial down to Eighty meters.Listen to some of these guys say F*ck this,S*it that...Hey! thats not allowed!!! I don't understand,they are using their callsigns! Why does this happen? Why does this continue?Because the "clean and success" line is is bogus.

I second that. All those in favor?

Hey - if morse code is so bad, so tough to learn, so out dated and so completely useless, as many no coders continuously whine, why do I see the majority of qsl cards for CW qsos? I presort cards for the W1 QSL bureau. Better than 75% are for CW contacts. Somebody better get a clue here.

For those of you who will take exception to the "CW requirement" for the internet...Lighten up or get a life!

73 to all, even no-coders de W1AAE

"Ronald D. Lucier" <optics3d@ix.netcom.com> wrote:
>Hey - if morse code is so bad,

It's not bad, it just has no compelling reason to
continue to be a license requirement.

>so tough to learn,

The degree of difficulty is not the issue at all.

>so out dated

It is certainly out dated as it's use has now down to only
a recreational aspect (QSOs, DX, contests, etc.) within the
ham ranks only. Even in the ham ranks it serves no
purpose at all in emergency preparedness and or any
actual safety or distress operations.

and so
>completely useless,

It isn't useless (procode red herring again) it has its
proponents and users, but none of the uses suffice any
longer to mandate the separate pass/fail test element that
code contines to have. Yes, there's a treaty requirement
today, but that is met completely by a 5wpm test for
now and there's no additional treaty elements that
require 13 or 20wpm testing.

>as many no coders continuously whine,

Again, many (most?) of us that are championing
the end of code testing are NOT nocoders, but rather
coded hams who have already passed various levels of
code testing.

>why do I see
>the majority of qsl cards for CW qsos? I presort cards for the W1 QSL
>bureau. Better than 75% are for CW contacts. Somebody better get a
>clue here.

What's the point? QSL cards are just the exchange of record for
a contact. It isn't the USE of CW that we oppose, it is the
mandated test requirement that is wrong for the license
testing today. If, as you note, most QSL exchanging is for
CW contacts then I see no reason to think

that continued use of CW will end IF code testing
ends. Indeed, if DX continues to be the interest area
it always has been, then there will continue to be new
devotees to CW for that reason alone. Having said that,
I'll repeat again that DXing is not a reason that justifies
mandated CW testing today.

Back in July 1992, I worked a dxpedition, 4K5Z1. They were part of The Snake "Zmeinyj" dxpedition.

I have a QSL card from them, any idea which part of the world they were operating from?

I also worked T53UN (Somalia) on 24 May 1992. He was on a DX net, but I wasn't able to get the QSL info for him. I believe he was a Canadian working there. Does anyone know the qsl route for this one, haven't found anything in the usual sources, webb sites etc.

Thanks to everyone--I thought he might be at the Ukrainian Antarctic Base
as I worked EM1KA down there last year on 40 CW.

Most logging programs accept "KC4" as a "country" prefix for Antarctica,
although CE9, KC4, 8J1, AT0, DP0, T8Y, LU, OR4, R1AN, VK0, VP8, ZL5, ZS1,
and ZX0 are listed on the ARRL World Map.

Subject: Essay Question

The following table is contained in an article in October 1997 QST,
'Official Journal of The American Radio Relay League'. The article, "What's
New About the FCC's New RF-Exposure Regulations?", by Ed Hare, W1RFI, is on
pages 51 and 52.
Table 1
Power Thresholds for Routine Evaluation of Amateur Radio Stations
Band (Wavelength) Transmitter Power (W)
160m 500
75m 500
80m 500
40m 500
30m 425
20m 225

17m 125
15m 100
12m 75
10m 50
6 - 1.23m 50
70cm 70
33cm 150
23cm 200
13cm and up 250
ESSAY QUESTION
Compare the frequencies aligned with lower power thresholds with those which may be useful to Low Earth Orbit satellites. Include in your discussion the implications of non-structured communications verses a potential preponderance 'organizationally prepared' information. Discuss the ramifications of this with the potential dampening of freedom of communication throughout the world. Additionally, discuss the idea of vertically integrated information processing entities dominating the RF Spectrum. References to other recent restrictions on the airways, may be included.
As you see fit, please post this 'essay question' where it may be viewed by Radio Amateurs and interested others.

Subject: New Web Site Locations

Hi all:

Just a quick note to let you know we've moved! We maintain a redirector, so the old URL will still work, but you can find us on QSL.net now. A link is at the bottom of this post. Stop and give us a look and we'll be adding more goodies in the coming weeks.

You can also find the Central Michigan Amateur Radio Club at QSL.net.
This Site will also be adding more goodies, so check in
http://www.qsl.net/cmarc

Thanks and 7-3,
Erv KB8TNQ

SB DX ARL ARLD048
ARLD048 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, The Daily DX, QRZ DX, G4BUE, DXNL and Contest Corral from QST. Thanks to all.

CROATIA, 9A. The Croatian Radio Club station is celebrating its 20th anniversary until December 31, using the special callsign 9A20D. Activity takes place on 80 to 10 meters using CW and SSB.

QSL via 9A1CRD.

UNITED ARAB EMIRATES, A6. David, K3LP, and Rich, KE3Q, will be QRV in Dubai beginning November 22 from the QTH of A61AJ. They will also participate in the CQ WW CW Contest. QSL via W3UR.

IRAN, EP. Ali has been QRV as EP2MKO on 10 meters around 0745z. QSL via UA6HCW.

MAYOTTE, FH. DJ1RL and DK8FB will be QRV as FH/homecalls until November 28. QSL to home calls.

SOUTH KOREA, HL. DS5USH and DS5RNM has been QRV on 80 meters around 1200z. QSL via operator's instructions.

DJIBOUTI, J2. Dominique, J28DB, will be QRV for three years. QSL via F4AAQ.

SOUTH SHETLAND ISLANDS. Danny has been QRV as LZ0L on 40 and 20 meters. QSL via LZ1KCP.

GREENLAND, OX. Kim, OX3FV, is active using CW on 160 meters and the newer bands. Meanwhile, Joergen, OZ8AE, is QRV as OX/OZ8AE until December 1. Look for OX3FV and OZ8AE to be QRV as OX3FV in the CQ WW CW Contest. QSL both calls via their respective bureaus.

BANGLADESH, S2. S21YG has been QRV on 15 meters around 0900z and 40 meters around 2000z. QSL via operator's instructions.

BOSNIA, T9. Cedric, F1PSR, is QRV as T98PSR from Sarajevo until the beginning of March, 1998. Look for SSB activity on 160 to 2 meters. Some satellite and packet activity is expected. QSL via F5WN.

CAMEROON, TJ. Phillipe is QRV as TJ1HP. QSL via F6FNU.

ANTARCTICA. VU2JBK is QRV from the Indian Maitri Station in Queen Maud Land. QSL via VU2DVC.

ALBANIA, ZA. ZA1MH was QRV on 15 meters around 1400z. QSL via Z32KV.

THIS WEEKEND ON THE RADIO. The ARRL International EME Competition, ARRL November Phone Sweepstakes, North American Collegiate ARC Phone Championship and the IARU Region One 160 Meter Contest should fill up your operating weekend. Please see November QST, page 94 for details.

He should contact Continental Electronics up in Richardson, Texas. They
specialize in just such projects. They even offer megawatt HF auto
tuned rigs that use cavity tuning in which the final tank circuit is made
up of a tuned cavity where-in one wall of the whole room slides in and
out like a piston to tune the thing. Among their more interesting patents
are the software algorithms emplaced in hardware that control the setting
servos that drive these moving wall piston tuner hydraulic rams. The
ability to predict exactly when to start applying opposite force to the
moving walll so as to avoid it "hunting" about the frequency during the
five or so seconds that it takes to move the whole amp to frequency,
are very well thought out.

Less ringing of the wall during a tuning run that way..

He should go there with a pocketbook sized very-large; he'll need it :)

I think you will find that most DLs have this comment beside their
calls on Buckmaster.

Buckmaster is not the recognized, authorized definitive International
Callbook.

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I have a Sommer XP507 antenna for sale. It is in perfect shape, about 4 years old that I am needing to get rid of. It is assembled and laying on some saw horses in my back yard and can be checked with a meter for operation if you like. It works 10-12-15-15-20-30-40 meter bands, 15 foot boom, 7 elements, and about 75 pounds.
I WILL not ship this antenna so if you are interested and live close enough, email me. I am asking $275.00 or best offer.

ARLD049 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10 meters, including the newer bands until early January 1998. QSL via 3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW to be QRV as 5B4/homecalls from November 25 to early December. They will also participate in the CQ WW CW Contest as either P3A or H2A. QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from Pulau Pangkor, IOTA AS-072, from November 24 to December 2. Activity will be on 80 to 10 meters, with an emphasis on CW. He will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to activate T49C from November 25 to December 1 on the RS and FO satellites and possibly on AO-10. Activity is expected on 6 and 2 meters and 70 cm. Activity on 160 to 10 meters is planned as well. They may participate in the CQ WW CW Contest using this call. QSL via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer bands using CW and SSB. He has also been active on RTTY. QSL to home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November 25 to December 15 as JL1KFR/JD1. He is here to work on the weather station, so operating time will be limited. Activity will be on 80 to 10 meters, using mainly CW around 0900 to 1100z. QSL to home call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to December 3 using CW and SSB on 40 to 10 meters. He will also participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length of stay is unknown. QSL to home calls.

NAMIBIA, V5. Frank, DL7UFS, is QRV as V5/DL7UFS from Swakopmund using mostly CW on 20, 15 and 10 meters. His length of stay is unknown. QSL to home call.

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

There is already a "code requirement" for the internet.
Every user has to learn how to type. This weeds out those with no
hand-eye coordination or touch-insensitive persons...
The skill of touch-typing is very similar to the Morse skill.

In fact, my maximum CW speed and typing speed at one time were almost
exactly the same (topping out at about 45WPM). I had a "mental block" at
that speed for some reason. Through practice I increased my typing speed
to about 60WPM. Internet chat groups on the low end of the #channels
(where all the DXers work) was the fix.

Subject: Sommer XP507

I have a Sommer XP507 antenna for sale. It is in perfect shape, about 4
years old that I am needing to get rid of. It is assembled and laying on
some saw horses in my back yard and can be checked with a meter for
operation if you like. It works 10-12-15-15-20-30-40 meter bands, 15
foot boom, 7 elements, and about 75 pounds.
I WILL not ship this antenna so if you are interested and live close
enough, email me. I am asking $275.00 or best offer.

Wanted: Saber III, Systems Saber or HT-1000 (16/32 Channel w/Scan Option).
Radio must be in 470-512 Mhz range.

Currently in possession of an 8 Channel HT-1000 470-520 Mhz and would like
to trade towards (radio and payment or some other terms) one of the above
radios or if possible convert my 8 channel to a 16 Channel. Any info would
be greatly appreciated.

Thanx. Please contact via E-mail.

DO YOU WANT TO MAKE BUCKS FAST???--AND NO ONE LOSES . . .
Of course you do, we all do !!! Here's how to do so with little effort, and, yes IT'S LEGAL.

Some people make things happen
Some watch things happen
While others wonder what has happened

This is the easiest way that you can make a buck. Think how excited you'll be to open up your mailbox day after day! Will it be $50 in dollar bills? or $5,000? Start making your plans, because it can happen to you.

DON'T PASS UP THIS ONCE IN A LIFETIME OPPORTUNITY!!! (I'm glad I didn't)

Like you're doing now, I was checking out newsgroups and came across an article similar to this that said you could make thousands of dollars within weeks, with only an initial investment of $6.00! So I thought, "Yeah, right, this must be a scam!", but, like most of us, I was curious; I kept reading.

Anyway, it said that if you send $1.00 to each of the 6 names and addresses stated in the article, you could make thousands in a very short period of time. You then place your own name and address at the bottom of the list at #6, and post the article to at least 200 newsgroups.(There are about 22,000.)

No catch, that was it. After thinking much about it, I came to the conclusion that this could not be a scam (but, if it was, only scamed out of $6 , I could afford it.)

Even though the investment was a measly $6, I had three questions that needed to be answered before I could get involved in this sort of thing. Just like you, I was skeptical, or thought it might take too much work or something.

1. Is this really legal? . . . I called a lawyer first. This lawyer friend was a little unbelieving that I would actually make any money but he said it WAS LEGAL if I wanted to try it. I told him it sounded a lot like a chain letter but the details of the system (SEE BELOW) actually made it a legitimate legal business.

2. Would the Post Office be ok with this . . . I called them: 1-800-725-2161 and they confirmed THIS IS ABSOLUTELY LEGAL! (See Title 18,h sections 1302 NS 1341 of Postal Lottery Laws). This clarifies the program of collecting names and addresses for a mailing list.

3. Is this moral? Well, everyone who sends me a buck has a good chance of getting A LOT of money . . . a much better chance than buying a lottery ticket!!! In the end it looks to me like no one loses, we help each other move ahead.

So, having these questions answered, I invested EXACTLY $7.92 ... six $1.00 bills and six 32 cent postage stamps . . . and boy am I glad I did !!!

Within 7 days, I started getting money in the mail! I was shocked! I still figured it would end soon, and didn't give it another thought. But the money just continued coming in. In my first week, I made about $20.00 to $30.00 dollars. By the end of the second week I had a mad total of $1,000.00 !!!!! In the third week I had over $10,000.00 and it was still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it's still coming in . . . It's certainly worth $6.00 and 6 stamps !!!

So now I'm reposting this so I can make even more money! (and helping you to make a lot of money.) The *ONLY* thing stopping *ANYONE* from increasing their own bank account is pure laziness ! It took me all of 5 MINUTES to print this out, follow the directions, and begin posting to newsgroups. It took me a mere 45 minutes to post to over 200 newsgroups. And for this GRAND TOTAL investment of $7.92 (US) and under ONE HOUR of my time, I have reaped an incredible amount of money --like nothing I've ever even heard of anywhere before ! Enough said, time to start !

Let me tell you HOW this works, and most importantly, WHY it works. Also, make sure you print a copy of this article now, so you can get the information off of it when you need it. The process is very simple and consists of THREE easy steps:
STEP 1--Send the 6 people on the list a single dollar each.
STEP 2--Put your name and address on the list in position 6.
STEP 3--Post this amended letter to 200 (or more!) Newsgroups.

==========
HOW IT WORKS
==========

STEP 1:

Get 6 separate pieces of paper and write the following on each piece of paper:

PLEASE ADD ME TO YOUR MAILING LIST.
$1 US DOLLAR PROCESSING FEE IS INCLUDED.

(This is the key as this is what makes it legal since you are paying for and later offfering a service.)

Now get 6 $1.00 bills and place ONE bill inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope to prevent theft/robbery. Then, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes, each with a piece of paper stating the above phrase and a U.S. $1.00 bill. Now send to:

#1
JA Gualtieri
45-350 Columbia St. W.
Waterloo, ON, Canada N2L 6G3

#2
Andrew Wiggin

PO BOX 424
East Setauket, NY 11733

#3
Ashle
347 Jamboree
Manchester, MO 63021

#4
The Mom
4464 Castelar Street, #320
San Diego, CA 92107

#5
Chris Watson
1138 Indian Road
Virginia Beach, VA 23451

#6
Virgil
3538 West 12th Street
Trainer, PA 19061-5301

STEP 2: Now delete name #1, move the other names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR name as number 6 on the list. (If you want to remain anonymous, put a nickname, but the address MUST be correct, or you won't receive your dollars in the mail.)

STEP 3: Now post your amended article to at least 200 newsgroups. Remember, 200 postings is just a guideline. The more you post, the more money you make! As you might know, it's not that difficult to post to news groups. So, you don't know HOW to post in the news groups? Well, do exactly the following:

HOW TO POST TO NEWSGROUPS FAST WITH YOUR WEB BROWSER:

Highlight and COPY(Ctrl-C) the text of this posted message and PASTE(Ctrl-V) it into a plain text editor (like Wordpad or WordPerfect) and save it. After you have made the necessary changes that are stated above, simply select a newsgroup then COPY(Ctrl-C) and PASTE(Ctrl-V) the text into the message composition window of the newsgroup, and post it!

GENERAL NOTES ON POSTING: A nice page where you'll find all the newsgroups if you want help is http://www.liszt.com/ (When you go to the home page, click on the link 'Newsgroup Directory'). But I don't think you'll have any problem posting because it's very easy once you've found the newsgroups. All these web browsers are similar. It doesn't matter which one you have (But it makes it very easy if you have Netscape Navigator 3.0 or later. You may download it from the Internet if you don't have it.) You just have to remember the basic steps, stated below.

BASIC STEPS FOR POSTING:
1. Find a newsgroup and you click on it.
2. You click on 'POST AN/NEW ARTICLE' or 'TO NEWS' or anything else similar to

these.
3. You type your flashy headline in the subject box.
4. Now, either you attach the file containing your amended letter, or you PASTE the letter.(You have to COPY it from the text editor, of course, from before.)
5. Finally, you click on 'SEND' or 'POST' or 'OK', whatever is there.

REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200

That's it! You will begin receiving money from around the world within day's! You may eventually want to rent a P.O. Box due to the large amount of mail you receive. If you wish to stay anonymous, you can invent a name to use, as long as the postman will deliver it.

JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.

==========
Now the WHY part:
==========
Out of 200 postings, say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at #5 and only 5 persons respond to each of the original 5, that is another $25.00 for me, now those 25 each make 200 MINIMUM posts with my name at #4 and only 5 replies each, I will bring in an additional $125.00! Now, those 125 persons turn around and post the MINIMUM 200 with my name at #3 and only receive 5 replies each, I will make an additional $626.00! OK, now here is the fun part, each of those 625 persons post a MINIMUM 200 letters with my name at #2 and they each only receive 5 replies, that just made me $3,125.00!!! Those 3,125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 newsgroups react I will receive $15,625.00! With a original investment of only $6.00! AMAZING! And as I said 5 responses is actually VERY LOW! Average is probable 20 to 30!

So lets put those figures at just 15 responses you get. Here is what you will make:

at #6 $15.00

at #5 $225.00

at #4 $3,375.00

at #3 $50,625.00

at #2 $759,375.00

at #1 $11,390,625.00

When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to names on the list, putting your name at number 6 again. And start posting again. The thing to remember is, do you realize that thousands of people all over the world are joining the internet and reading these articles everyday, JUST LIKE YOU are now!! So can

you afford $6.00 and see if it really works?? I think so...

People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual internet. Remember, play FAIRLY and HONESTLY and this will work. We all just have to be honest and help each other get ahead.

REMEMBER-HONESTY IS THE BEST POLICY. WHAT ARE 6 DOLLARS TO YOU? YOU DON'T NEED TO CHEAT THIS IDEA TO MAKE MONEY!!! IF YOU NEEDTHE $6, I'M SURE ANY OF THE PEOPLE ON THE LIST AHEAD OF YOU WOULD SEND YOU $6 IN DOLLAR BILLS TO GET GOING--YOU HAVE NOTHING TO LOSE !!

** We will monitor the program and if we find you have cheated by not sending your money to your five recipients, we will just dump you out of the system. Come on folks, let's work together and make this work for everyone.

GOOD LUCK to all and please play fairly and reap the huge rewards from this, which is tons of extra CASH.

Please remember to declare your extra income. Thanks once again...

The first steps to Electronic QSL handling are already in use at our
Club-station and club members, the first ever launched?
If it is possible to FIND your call/QSO, by looking it up in our
electronic log-database, you can have the qso confirmed by DOWNLOADING
a electronic-qsl in postscript format.

Our national QSL-bureau (SM) and QSL-managers, award managers worldwide
have
showed great interest in the qsl-server, it is now tried out 3
continents.

Who need encryptation/password as long as the log-files are published
open
and can be accessed/confirmed by anyone with i.net access?

More info, check out 'QSLs Online by SK0UX' at:
http://ham.te.hik.se/clubs/sk0ux/index.htm

I have a Sommer XP507 antenna for sale. It is in perfect shape, about 4
years old that I am needing to get rid of. It is assembled and laying on
some saw horses in my back yard and can be checked with a meter for
operation if you like. It works 10-12-15-15-20-30-40 meter bands, 15
foot boom, 7 elements, and about 75 pounds.
I WILL not ship this antenna so if you are interested and live close
enough, email me. I am asking $275.00 or best offer.

From: kf2ti@planet.net (Steve (KF2TI - Landing, NJ))
Subject: THIS JUST IN

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.

The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

That is a irrational statement here. I dare say that 75% of all QSO's
on the amatuer band are CW. All you have proven as that in the W1 QSL
bureau most hams that send QSL cards use CW. That is all, nothing
more or nothing less.
Just because he sees more QSL cards are for CW contacts, he make the
assumption that more contacts are via CW. That's like asking the
general public if they like carrots. If only the ones who reply are
the ones who hate carrots. You make an assuption that most people
don't like carrots. Something like a straw poll. Not worth a tinkers
D$%$^#.
>
>For those of you who will take exception to the "CW requirement" for the
>internet...Lighten up or get a life!

I ask what is the relavence of proficiency in one form of
communications a mandate to priviledges that are not even related to
this mode of communicatoins?
Does it mean that someone who doesn't like one aspect of amatuer radio
should not have priviledges in another area?
Do you subscribe to the theory that I had to do it so everyone else
after me must also?
I wonder if someone jumped off a bridge, would you?

>

Oh no one of those! Likes to keep his ball and not let anyone else
share unless they meet up to their expectations.

A smaller amatuer radio market will mean ever higher costs for new
equipment. Smaller numbers also mean less political muscle when it
comes to attacks on the bands that are already in use. To those
amatuer operators that subscribe to the 1920's, the times are a
changing. I would not be suprised if more of the UHF and higher bands
come under attack from commercial interests. These people have power
and if the population of the amatuer service remains the same or
dwindles the hobby will also. It is estimated the frequencies
assigned to the amatuer band exclusively would bring to the federal
government about 30 to 60 BILLION dollars based on the last PCS
auction inthe 900 MHZ range. That's alot bucks there for politicians
to spend. Numbers in any radio service acan help to fight the money
grabbing poloticians and commercial interests that stand to make more
than the frequencies are wortth.

That's my penny's worth

Hi James, there is a logical explaination. CW is so inefficient as
a communications mode, that everyone has to resort to snail mail
to finish their QSOs. :-)

Steve;

That is just exactly what the FCC did when they opened up CB in the early 70s. The temporary was good for 90 days until you could write and get a real number. Mine became KAAV7422 (strange since I submitted mine 2 months before my dad submitted his and he got KYV1661) I was so late in the game that I got a 4 letter one.

Typical FCC perversion of good frequency space.

Next they will allow you to use a computer that 'reads' code to take the code test. (Everyone already uses computer keyers.)

Oops, my reality filter broke.

On Thu, 20 Nov 1997 15:34:29 -0500, kf2ti@planet.net (Steve (KF2TI - Landing, NJ)) wrote:

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all amateur radio vendors, and many national electronic chain outlets, in an effort to shore-up the sagging radio sales picture, were given the authority to issue amateur radio call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the call sign block of "WT" along with the district #, for all vendors to issue. These "try before you study" licenses will be issued for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the hobby is worth the effort of all the study time, is authorized to operate for a period of one month along with the purchase of a radio. The new operator will be authorized at the General class level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a class, or take their exam from a local VEC or from the vendor, which is also now authorized to give radio exams. If the operator decides the hobby isn't worth the aggravation they find on the HF bands, he/she can return the radio for a full refund.

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by
Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The
Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10
meters, including the newer bands until early January 1998. QSL via
3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW
to be QRV as 5B4/homecalls from November 25 to early December. They
will also participate in the CQ WW CW Contest as either P3A or H2A.
QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from
Pulau Pangkor, IOTA AS-072, from November 24 to December 2.
Activity will be on 80 to 10 meters, with an emphasis on CW. He
will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as
A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to
activate T49C from November 25 to December 1 on the RS and FO
satellites and possibly on AO-10. Activity is expected on 6 and 2
meters and 70 cm. Activity on 160 to 10 meters is planned as well.
They may participate in the CQ WW CW Contest using this call. QSL
via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer
bands using CW and SSB. He has also been active on RTTY. QSL to
home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November 25 to December 15 as JL1KFR/JD1. He is here to work on the weather station, so operating time will be limited. Activity will be on 80 to 10 meters, using mainly CW around 0900 to 1100z. QSL to home call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to December 3 using CW and SSB on 40 to 10 meters. He will also participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length of stay is unknown. QSL to home calls.

NAMIBIA, V5. Frank, DL7UFS, is QRV as V5/DL7UFS from Swakopmund using mostly CW on 20, 15 and 10 meters. His length of stay is unknown. QSL to home call.

2872. QSL info for VK9XL 03/96

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-24 00:00:00 UTC
From: n9fh@qsl.net
Message-ID: <65ah1shmk1@uwm.edu>
Source record: 31228

Anybody have a route for VK9XL for 03/07/96? I worked them
(at least I thought I did ;-) on 40 CW and they were signing
/LH for Lord Howe. So far I've found W7NI for 4/96 and UA0ZDA
for 2/96 through the usual sources. I've sent two cards to W7NI
with no response. Any ideas?

Thanks & 73,

Fred, N9FH

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were
ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

Regards,
Sandy W7BX

2877. What's 10M like under less than ideal conditions ?

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-24 00:00:00 UTC
From: Bob <cqbdiaz@pacbell.net>
Message-ID: <3479EA79.62166FB9@pacbell.net>
Source record: 31233

I've been hearing a lot of exciting talk on the local 2M repeater about how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are entering
a very exciting part of the solar cycle for HF communications; so the next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is "dead",
what exactly is it like. Clearly, local contacts are possible, but how far is
"local"? Can one still talk to someone on 10M, say 300 miles away under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was just
trying to get some sort of general understanding of what the band might be
like at less than ideal conditions.

73,

Bob KF6JHG

2878. SSB Handheld 10m (12/15/17/20m next?)

Newsgroup: rec.radio.amateur.dx
Date: 1997-11-24 00:00:00 UTC
From: "Amor Powers, Radio" <power@radio.net>
Message-ID: <3479FCA4.3CC5@radio.net>
Source record: 31234
Cross-posted to:
rec.radio.amateur.misc,rec.radio.amateur.homebrew,rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment

The Cherokee AH-100 SSB handheld makes a great little 10 meter sideband rig. The price just dropped to US$214. It comes with a mobile adapter (MA100) that replaces the battery pack. The MA100 has a single coiled cord that ends in an SO-239 and cig lighter plug. This turns it into an all-in-the-mic mobile rig.

7Watts PEP. AM/SSB. It's fun working "handheld DX" with it when the band is open, using a WTA-1 Maxon telescopic whip.

Has anyone done the simple 12 meter mod yet?

When will ICOM, Kenwood, Yaesu, or Alinco, etc, jump in, using their already-tooled cases and battery packs, to bring out a 20, 17, 15, 12, or 10 meter handheld?
They could just start with a 10m and/or 15m SSB/(FM)/CW unit; with the rising DX conditions and the increase in activity.
Next: How about an HF all band handheld? Companion antenna could provide filtering.

Ten can be very unpredictable, recently have had contacts to East Coast operating about 50 watts mobile. During last cycle talked to Europe on 5 watts. When it does open up, it's great. You can still have fun now.

Bob (cqbdiaz@pacbell.net) wrote:
: "local"? Can one still talk to someone on 10M, say 300 miles away
: under: less than ideal band conditions?

Ten may sound dead but still support openings of a few hundred
miles; you may not hear anybody on it but a CQ may still bring
a surprising QSO you wouldn't have expected. Still, ground wave
on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on
low power--no problem! Good sigs and low noise, with DX just
swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,
OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

When the flux is high, you can work around the world on 10M with very
little power. When the flux is low, you are lucky if you can get out of
your backyard!

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit, 150-200 miles isn't out of the question even when ten is dead. Ten may be the best overall DX band we have during solar cycle peaks, but don't write it off at other times. Spradic E (Es) propagation can provide nice single-hop contacts out to about 1200 miles and occasional double-hop to twice that distance (sometimes more). Es peaks EVERY YEAR roughly May through August (plus or minus) and for a few weeks right around Christmas/New Year. But, like the name says, it's sporadic; the band can be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

>under
>less than ideal band conditions?

When the sunspot cycle is in the wrong phase, 10 meters is very quiet. Many band openings occur without anyone being aware of it because all think it is dead. South America is available many days when the band is 'dead' but there is nobody there to talk to. That would be what is called Transequadoreal skip and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there. Regardless of all the tales about working 10 with 5 watts and a wet noodle for an antenna, the fact is that a good power level and a good antenna will open the band up quite a bit. Od course, there has to be someone else with a like rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for ground wave and a little close for F layer and most Sporadic E conditions. The best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

Subject: THIS JUST IN

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.

It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by
Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The
Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10
meters, including the newer bands until early January 1998. QSL via
3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW
to be QRV as 5B4/homecalls from November 25 to early December. They
will also participate in the CQ WW CW Contest as either P3A or H2A.
QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from
Pulau Pangkor, IOTA AS-072, from November 24 to December 2.
Activity will be on 80 to 10 meters, with an emphasis on CW. He
will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as
A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to
activate T49C from November 25 to December 1 on the RS and FO
satellites and possibly on AO-10. Activity is expected on 6 and 2
meters and 70 cm. Activity on 160 to 10 meters is planned as well.
They may participate in the CQ WW CW Contest using this call. QSL
via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer
bands using CW and SSB. He has also been active on RTTY. QSL to
home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November
25 to December 15 as JL1KFR/JD1. He is here to work on the weather
station, so operating time will be limited. Activity will be on 80
to 10 meters, using mainly CW around 0900 to 1100z. QSL to home
call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to
December 3 using CW and SSB on 40 to 10 meters. He will also
participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length of stay is unknown. QSL to home calls.

NAMIBIA, V5. Frank, DL7UFS, is QRV as V5/DL7UFS from Swakopmund using mostly CW on 20, 15 and 10 meters. His length of stay is unknown. QSL to home call.

Date: Wed, 26 Nov 1997 06:23:27 GMT
From: mccarthy@NOSPAMkearney.net (Shane McCarthy)
Subject: AM external antenna in crowded area

First, no, I can't move.
Ok, with that out of the way, I live in a mobile home park and
need suggestions for an external AM antenna. I've built a loop, which
works great...except of course, the metal siding of my house offsets
it. And it's cold outside. So no, I'm not going to sit in the yard
:) This isn't so much for DXing as a hobby as it is just being able
to listen to a few 50kW stations within a few hundred miles for
evening enjoyment. While this may not be the most appropriate group
to post to, certainly noboy would know better then the folks here.
Trying first to use the loop, I can put it outside, connect a
wire to one of the leads to the tuning capacitor and have relative
sucess. My problem here of course is that I need to go outside to
tune it, then come inside and tune the radio again...repeating the
process for each station a number of times. Also, I'm worried that it
would interest neighbor kids too much, so it must come in each night
before I go to bed.
My next attempt was a suggestion by a friend of a single wire of
about 70 feet. I ran it out the window and lengthways with the house,
suspended about 8 feet off the ground. As of now, it's close to the
house and I'm sure that again the house is presenting problems - it is
very directional (working only for stations on the open side) While
this provided me a good amount of success, I'm hoping for suggestions
that would be even better.
I have a decent sized yard and one open side - to the street.
There are no above ground power lines in the area. As for having
external wires, if I put them up so they are straight and a 'clean'
look, my neighbors won't complain. However, I would prefer to put
anything on the side opposite the house - which is less open, but also
less visable to otheres.

To simplify things, I drew up a quick layout of my house and it's
relationship to surrounding buildings. Not wanting to post anything
binary to this group, I have placed the image in my web account. Just
point directly to:
http://members.tripod.com/~placidpup/myplace.gif
If you would, please take a look and then describe what you would
do if you were in my situation. Feel free to edit the image with your
ideas and mail the edited version back to me. PLEASE do not post an
edited version back to this group.
Any and all suggestions are welcome, ones applied specificly to
the layout of my home are even more prefferable.
Thanks,
Shane McCarthy
mccarthy@kearney.net

PS. While looking at the image, if you have suggestions for a SW
external antenna please feel free to include those too. I bought a
DX-390 awhile back, but a friend is still fixing it, so I'm still
listening to AM. Thanks again.

From: slay@netcom.com (Sandy Lynch)
Subject: QSL info for VK9XL 03/96

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were

ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

Date: Mon, 24 Nov 1997 12:58:34 -0800
From: Bob <cqbdiaz@pacbell.net>
Subject: What's 10M like under less than ideal conditions ?

I've been hearing a lot of exciting talk on the local 2M repeater about
how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are
entering
a very exciting part of the solar cycle for HF communications; so the
next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is
"dead",
what exactly is it like. Clearly, local contacts are possible, but how
far is
"local"? Can one still talk to someone on 10M, say 300 miles away
under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was
just
trying to get some sort of general understanding of what the band might
be
like at less than ideal conditions.

73,

Bob KF6JHG

Subject: QSL - HW TO GET!

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I think it was VE3BW, and it was definitely a Canadian, but...

Hold your cards. There's a postal strike in progress up there, and
the USPS is returning mail to Canada. (the sticker says if you take
it to a post office, they'll refund your postage. Personally, I wish
they'd just hold it at the P.O. until the strike is over..)

: less than ideal band conditions?

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit, 150-200 miles isn't out of the question even when ten is dead. Ten may be the best overall DX band we have during solar cycle peaks, but don't write it off at other times. Spradic E (Es) propagation can provide nice single-hop contacts out to about 1200 miles and occasional double-hop to twice that distance (sometimes more). Es peaks EVERY YEAR roughly May through August (plus or minus) and for a few weeks right around Christmas/New Year. But, like the name says, it's sporadic; the band can be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

73,

Mark -- WA9ETW

50 mHz WAS/WAC

When the flux is high, you can work around the world on 10M with very
little power. When the flux is low, you are lucky if you can get out of
your backyard!

When the sunspot cycle is in the wrong phase, 10 meters is very quiet.
Many
band openings occur without anyone being aware of it because all think it is
dead. South America is available many days when the band is 'dead' but there
is nobody there to talk to. That would be what is called Transequadoreal skip
and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there.
Regardless of all the tales about working 10 with 5 watts and a wet noodle for
an antenna, the fact is that a good power level and a good antenna will open
the band up quite a bit. Od course, there has to be someone else with a like

rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for
ground wave and a little close for F layer and most Sporadic E conditions. The
best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

: under: less than ideal band conditions?

Ten may sound dead but still support openings of a few hundred
miles; you may not hear anybody on it but a CQ may still bring
a surprising QSO you wouldn't have expected. Still, ground wave
on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on
low power--no problem! Good sigs and low noise, with DX just
swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,
OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

I have a Sommer XP507 antenna for sale. It is in perfect shape, about 4
years old that I am needing to get rid of. It is assembled and laying on
some saw horses in my back yard and can be checked with a meter for
operation if you like. It works 10-12-15-15-20-30-40 meter bands, 15
foot boom, 7 elements, and about 75 pounds.
I WILL not ship this antenna so if you are interested and live close
enough, email me. I am asking $275.00 or best offer.

We also need a separate, dedicated newsgroup specially for articles
flaming people for posting to inappropriate newsgroups!

BTW, I believe at least three of the four topics you have listed
already co-exist in a single newsgroup .... it's called alt.tasteless

:-)

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,

which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10 meters, including the newer bands until early January 1998. QSL via 3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW to be QRV as 5B4/homecalls from November 25 to early December. They will also participate in the CQ WW CW Contest as either P3A or H2A. QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from Pulau Pangkor, IOTA AS-072, from November 24 to December 2. Activity will be on 80 to 10 meters, with an emphasis on CW. He will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to activate T49C from November 25 to December 1 on the RS and FO satellites and possibly on AO-10. Activity is expected on 6 and 2 meters and 70 cm. Activity on 160 to 10 meters is planned as well. They may participate in the CQ WW CW Contest using this call. QSL via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer bands using CW and SSB. He has also been active on RTTY. QSL to home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November 25 to December 15 as JL1KFR/JD1. He is here to work on the weather station, so operating time will be limited. Activity will be on 80 to 10 meters, using mainly CW around 0900 to 1100z. QSL to home call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to December 3 using CW and SSB on 40 to 10 meters. He will also participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length

of stay is unknown. QSL to home calls.

NAMIBIA, V5. Frank, DL7UFS, is QRV as V5/DL7UFS from Swakopmund using mostly CW on 20, 15 and 10 meters. His length of stay is unknown. QSL to home call.

Date: Wed, 26 Nov 1997 06:23:27 GMT
From: mccarthy@NOSPAMkearney.net (Shane McCarthy)
Subject: AM external antenna in crowded area

First, no, I can't move.
Ok, with that out of the way, I live in a mobile home park and
need suggestions for an external AM antenna. I've built a loop, which
works great...except of course, the metal siding of my house offsets
it. And it's cold outside. So no, I'm not going to sit in the yard
:) This isn't so much for DXing as a hobby as it is just being able
to listen to a few 50kW stations within a few hundred miles for
evening enjoyment. While this may not be the most appropriate group
to post to, certainly noboy would know better then the folks here.
Trying first to use the loop, I can put it outside, connect a
wire to one of the leads to the tuning capacitor and have relative
sucess. My problem here of course is that I need to go outside to
tune it, then come inside and tune the radio again...repeating the
process for each station a number of times. Also, I'm worried that it
would interest neighbor kids too much, so it must come in each night
before I go to bed.
My next attempt was a suggestion by a friend of a single wire of
about 70 feet. I ran it out the window and lengthways with the house,
suspended about 8 feet off the ground. As of now, it's close to the
house and I'm sure that again the house is presenting problems - it is
very directional (working only for stations on the open side) While
this provided me a good amount of success, I'm hoping for suggestions
that would be even better.
I have a decent sized yard and one open side - to the street.
There are no above ground power lines in the area. As for having
external wires, if I put them up so they are straight and a 'clean'
look, my neighbors won't complain. However, I would prefer to put
anything on the side opposite the house - which is less open, but also
less visable to otheres.
To simplify things, I drew up a quick layout of my house and it's
relationship to surrounding buildings. Not wanting to post anything
binary to this group, I have placed the image in my web account. Just
point directly to:
http://members.tripod.com/~placidpup/myplace.gif
If you would, please take a look and then describe what you would
do if you were in my situation. Feel free to edit the image with your

ideas and mail the edited version back to me. PLEASE do not post an
edited version back to this group.
Any and all suggestions are welcome, ones applied specificly to
the layout of my home are even more prefferable.
Thanks,
Shane McCarthy
mccarthy@kearney.net

PS. While looking at the image, if you have suggestions for a SW
external antenna please feel free to include those too. I bought a
DX-390 awhile back, but a friend is still fixing it, so I'm still
listening to AM. Thanks again.

From: slay@netcom.com (Sandy Lynch)
Subject: QSL info for VK9XL 03/96

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were
ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

From: Bob <cqbdiaz@pacbell.net>
Subject: What's 10M like under less than ideal conditions ?

I've been hearing a lot of exciting talk on the local 2M repeater about how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are entering
a very exciting part of the solar cycle for HF communications; so the next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is "dead",
what exactly is it like. Clearly, local contacts are possible, but how far is
"local"? Can one still talk to someone on 10M, say 300 miles away under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was just
trying to get some sort of general understanding of what the band might be
like at less than ideal conditions.

73,

Bob KF6JHG

Subject: QSL - HW TO GET!

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I think it was VE3BW, and it was definitely a Canadian, but...

Hold your cards. There's a postal strike in progress up there, and
the USPS is returning mail to Canada. (the sticker says if you take
it to a post office, they'll refund your postage. Personally, I wish
they'd just hold it at the P.O. until the strike is over..)

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit,
150-200 miles isn't out of the question even when ten is dead. Ten may be
the best overall DX band we have during solar cycle peaks, but don't
write it off at other times. Spradic E (Es) propagation can provide nice
single-hop contacts out to about 1200 miles and occasional double-hop to
twice that distance (sometimes more). Es peaks EVERY YEAR roughly May
through August (plus or minus) and for a few weeks right around
Christmas/New Year. But, like the name says, it's sporadic; the band can
be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX
excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

When the flux is high, you can work around the world on 10M with very little power. When the flux is low, you are lucky if you can get out of your backyard!

>less than ideal band conditions?

When the sunspot cycle is in the wrong phase, 10 meters is very quiet. Many band openings occur without anyone being aware of it because all think it is dead. South America is available many days when the band is 'dead' but there is nobody there to talk to. That would be what is called Transequadoreal skip and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there. Regardless of all the tales about working 10 with 5 watts and a wet noodle for an antenna, the fact is that a good power level and a good antenna will open the band up quite a bit. Od course, there has to be someone else with a like rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for ground wave and a little close for F layer and most Sporadic E conditions. The best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

Bob (cqbdiaz@pacbell.net) wrote:
: "local"? Can one still talk to someone on 10M, say 300 miles away
: under: less than ideal band conditions?

Ten may sound dead but still support openings of a few hundred miles; you may not hear anybody on it but a CQ may still bring a surprising QSO you wouldn't have expected. Still, ground wave on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on low power--no problem! Good sigs and low noise, with DX just

swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,
OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

First, no, I can't move.
Ok, with that out of the way, I live in a mobile home park and need suggestions for an external AM antenna. I've built a loop, which works great...except of course, the metal siding of my house offsets it. And it's cold outside. So no, I'm not going to sit in the yard :) This isn't so much for DXing as a hobby as it is just being able to listen to a few 50kW stations within a few hundred miles for evening enjoyment. While this may not be the most appropriate group to post to, certainly noboy would know better then the folks here.
Trying first to use the loop, I can put it outside, connect a wire to one of the leads to the tuning capacitor and have relative sucess. My problem here of course is that I need to go outside to tune it, then come inside and tune the radio again...repeating the process for each station a number of times. Also, I'm worried that it would interest neighbor kids too much, so it must come in each night before I go to bed.
My next attempt was a suggestion by a friend of a single wire of about 70 feet. I ran it out the window and lengthways with the house, suspended about 8 feet off the ground. As of now, it's close to the house and I'm sure that again the house is presenting problems - it is very directional (working only for stations on the open side) While this provided me a good amount of success, I'm hoping for suggestions that would be even better.
I have a decent sized yard and one open side - to the street. There are no above ground power lines in the area. As for having external wires, if I put them up so they are straight and a 'clean' look, my neighbors won't complain. However, I would prefer to put anything on the side opposite the house - which is less open, but also less visable to otheres.
To simplify things, I drew up a quick layout of my house and it's relationship to surrounding buildings. Not wanting to post anything binary to this group, I have placed the image in my web account. Just point directly to:
http://members.tripod.com/~placidpup/myplace.gif
If you would, please take a look and then describe what you would do if you were in my situation. Feel free to edit the image with your ideas and mail the edited version back to me. PLEASE do not post an edited version back to this group.
Any and all suggestions are welcome, ones applied specificly to the layout of my home are even more prefferable.
Thanks,
Shane McCarthy
mccarthy@kearney.net

PS. While looking at the image, if you have suggestions for a SW external antenna please feel free to include those too. I bought a DX-390 awhile back, but a friend is still fixing it, so I'm still listening to AM. Thanks again.

From: slay@netcom.com (Sandy Lynch)
Subject: QSL info for VK9XL 03/96

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were
ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

From: Bob <cqbdiaz@pacbell.net>
Subject: What's 10M like under less than ideal conditions ?

I've been hearing a lot of exciting talk on the local 2M repeater about
how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are

entering
a very exciting part of the solar cycle for HF communications; so the
next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is
"dead",
what exactly is it like. Clearly, local contacts are possible, but how
far is
"local"? Can one still talk to someone on 10M, say 300 miles away
under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was
just
trying to get some sort of general understanding of what the band might
be
like at less than ideal conditions.

73,

Bob KF6JHG

Subject: QSL - HW TO GET!

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I think it was VE3BW, and it was definitely a Canadian, but...

Hold your cards. There's a postal strike in progress up there, and
the USPS is returning mail to Canada. (the sticker says if you take
it to a post office, they'll refund your postage. Personally, I wish
they'd just hold it at the P.O. until the strike is over..)

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit,
150-200 miles isn't out of the question even when ten is dead. Ten may be
the best overall DX band we have during solar cycle peaks, but don't
write it off at other times. Spradic E (Es) propagation can provide nice
single-hop contacts out to about 1200 miles and occasional double-hop to
twice that distance (sometimes more). Es peaks EVERY YEAR roughly May
through August (plus or minus) and for a few weeks right around
Christmas/New Year. But, like the name says, it's sporadic; the band can
be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX
excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

When the flux is high, you can work around the world on 10M with very
little power. When the flux is low, you are lucky if you can get out of
your backyard!

>less than ideal band conditions?

When the sunspot cycle is in the wrong phase, 10 meters is very quiet.
Many
band openings occur without anyone being aware of it because all think it is
dead. South America is available many days when the band is 'dead' but there
is nobody there to talk to. That would be what is called Transequadoreal skip
and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there.
Regardless of all the tales about working 10 with 5 watts and a wet noodle for
an antenna, the fact is that a good power level and a good antenna will open
the band up quite a bit. Od course, there has to be someone else with a like
rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for
ground wave and a little close for F layer and most Sporadic E conditions. The
best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

Bob (cqbdiaz@pacbell.net) wrote:
: "local"? Can one still talk to someone on 10M, say 300 miles away
: under: less than ideal band conditions?

Ten may sound dead but still support openings of a few hundred
miles; you may not hear anybody on it but a CQ may still bring
a surprising QSO you wouldn't have expected. Still, ground wave
on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on
low power--no problem! Good sigs and low noise, with DX just
swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,

OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

I have a Sommer XP507 antenna for sale. It is in perfect shape, about 4
years old that I am needing to get rid of. It is assembled and laying on
some saw horses in my back yard and can be checked with a meter for
operation if you like. It works 10-12-15-15-20-30-40 meter bands, 15
foot boom, 7 elements, and about 75 pounds.
I WILL not ship this antenna so if you are interested and live close
enough, email me. I am asking $275.00 or best offer.

I THINK Walt was being facetious, Nils. I certainly hope so.
Otherwise we'd need just ONE newsgroup, not one for hams, but
one for everything. Necrophiliacs and Disney fans and Boy Scouts
and pornographic pictures, all in one big happy group, and Walt
telling people to learn to use the "Ignore thread" option. :-(

We also need a separate, dedicated newsgroup specially for articles
flaming people for posting to inappropriate newsgroups!

BTW, I believe at least three of the four topics you have listed
already co-exist in a single newsgroup .... it's called alt.tasteless

:-)

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.
It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class

level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10 meters, including the newer bands until early January 1998. QSL via 3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW to be QRV as 5B4/homecalls from November 25 to early December. They will also participate in the CQ WW CW Contest as either P3A or H2A. QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from Pulau Pangkor, IOTA AS-072, from November 24 to December 2. Activity will be on 80 to 10 meters, with an emphasis on CW. He will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to activate T49C from November 25 to December 1 on the RS and FO satellites and possibly on AO-10. Activity is expected on 6 and 2 meters and 70 cm. Activity on 160 to 10 meters is planned as well. They may participate in the CQ WW CW Contest using this call. QSL via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer bands using CW and SSB. He has also been active on RTTY. QSL to home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November 25 to December 15 as JL1KFR/JD1. He is here to work on the weather station, so operating time will be limited. Activity will be on 80 to 10 meters, using mainly CW around 0900 to 1100z. QSL to home call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to December 3 using CW and SSB on 40 to 10 meters. He will also participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on

all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length of stay is unknown. QSL to home calls.

NAMIBIA, V5. Frank, DL7UFS, is QRV as V5/DL7UFS from Swakopmund using mostly CW on 20, 15 and 10 meters. His length of stay is unknown. QSL to home call.

Date: Wed, 26 Nov 1997 06:23:27 GMT
From: mccarthy@NOSPAMkearney.net (Shane McCarthy)
Subject: AM external antenna in crowded area

First, no, I can't move.
Ok, with that out of the way, I live in a mobile home park and
need suggestions for an external AM antenna. I've built a loop, which
works great...except of course, the metal siding of my house offsets
it. And it's cold outside. So no, I'm not going to sit in the yard
:) This isn't so much for DXing as a hobby as it is just being able
to listen to a few 50kW stations within a few hundred miles for
evening enjoyment. While this may not be the most appropriate group
to post to, certainly noboy would know better then the folks here.
Trying first to use the loop, I can put it outside, connect a
wire to one of the leads to the tuning capacitor and have relative
sucess. My problem here of course is that I need to go outside to
tune it, then come inside and tune the radio again...repeating the
process for each station a number of times. Also, I'm worried that it
would interest neighbor kids too much, so it must come in each night
before I go to bed.
My next attempt was a suggestion by a friend of a single wire of
about 70 feet. I ran it out the window and lengthways with the house,
suspended about 8 feet off the ground. As of now, it's close to the
house and I'm sure that again the house is presenting problems - it is
very directional (working only for stations on the open side) While
this provided me a good amount of success, I'm hoping for suggestions
that would be even better.
I have a decent sized yard and one open side - to the street.
There are no above ground power lines in the area. As for having
external wires, if I put them up so they are straight and a 'clean'
look, my neighbors won't complain. However, I would prefer to put
anything on the side opposite the house - which is less open, but also
less visable to otheres.
To simplify things, I drew up a quick layout of my house and it's
relationship to surrounding buildings. Not wanting to post anything
binary to this group, I have placed the image in my web account. Just
point directly to:

http://members.tripod.com/~placidpup/myplace.gif
If you would, please take a look and then describe what you would
do if you were in my situation. Feel free to edit the image with your
ideas and mail the edited version back to me. PLEASE do not post an
edited version back to this group.
Any and all suggestions are welcome, ones applied specificly to
the layout of my home are even more prefferable.
Thanks,
Shane McCarthy
mccarthy@kearney.net

PS. While looking at the image, if you have suggestions for a SW
external antenna please feel free to include those too. I bought a
DX-390 awhile back, but a friend is still fixing it, so I'm still
listening to AM. Thanks again.

From: slay@netcom.com (Sandy Lynch)
Subject: QSL info for VK9XL 03/96

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were
ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

Regards,
Sandy W7BX

From: Bob <cqbdiaz@pacbell.net>
Subject: What's 10M like under less than ideal conditions ?

I've been hearing a lot of exciting talk on the local 2M repeater about how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are entering
a very exciting part of the solar cycle for HF communications; so the next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is "dead",
what exactly is it like. Clearly, local contacts are possible, but how far is
"local"? Can one still talk to someone on 10M, say 300 miles away under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was just
trying to get some sort of general understanding of what the band might be
like at less than ideal conditions.

Subject: QSL - HW TO GET!

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I think it was VE3BW, and it was definitely a Canadian, but...

Hold your cards. There's a postal strike in progress up there, and
the USPS is returning mail to Canada. (the sticker says if you take
it to a post office, they'll refund your postage. Personally, I wish
they'd just hold it at the P.O. until the strike is over..)

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit,
150-200 miles isn't out of the question even when ten is dead. Ten may be
the best overall DX band we have during solar cycle peaks, but don't
write it off at other times. Spradic E (Es) propagation can provide nice
single-hop contacts out to about 1200 miles and occasional double-hop to
twice that distance (sometimes more). Es peaks EVERY YEAR roughly May
through August (plus or minus) and for a few weeks right around
Christmas/New Year. But, like the name says, it's sporadic; the band can
be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX
excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

When the flux is high, you can work around the world on 10M with very
little power. When the flux is low, you are lucky if you can get out of
your backyard!

When the sunspot cycle is in the wrong phase, 10 meters is very quiet.
Many
band openings occur without anyone being aware of it because all think it is
dead. South America is available many days when the band is 'dead' but there
is nobody there to talk to. That would be what is called Transequadoreal skip
and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there.
Regardless of all the tales about working 10 with 5 watts and a wet noodle for
an antenna, the fact is that a good power level and a good antenna will open
the band up quite a bit. Od course, there has to be someone else with a like
rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for
ground wave and a little close for F layer and most Sporadic E conditions. The
best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

Ten may sound dead but still support openings of a few hundred
miles; you may not hear anybody on it but a CQ may still bring
a surprising QSO you wouldn't have expected. Still, ground wave
on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on
low power--no problem! Good sigs and low noise, with DX just
swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,
OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

From: mccarthy@NOSPAMkearney.net (Shane McCarthy)
Subject: AM external antenna in crowded area

First, no, I can't move.
Ok, with that out of the way, I live in a mobile home park and
need suggestions for an external AM antenna. I've built a loop, which
works great...except of course, the metal siding of my house offsets
it. And it's cold outside. So no, I'm not going to sit in the yard
:) This isn't so much for DXing as a hobby as it is just being able
to listen to a few 50kW stations within a few hundred miles for
evening enjoyment. While this may not be the most appropriate group
to post to, certainly noboy would know better then the folks here.
Trying first to use the loop, I can put it outside, connect a
wire to one of the leads to the tuning capacitor and have relative
sucess. My problem here of course is that I need to go outside to
tune it, then come inside and tune the radio again...repeating the
process for each station a number of times. Also, I'm worried that it
would interest neighbor kids too much, so it must come in each night
before I go to bed.
My next attempt was a suggestion by a friend of a single wire of
about 70 feet. I ran it out the window and lengthways with the house,
suspended about 8 feet off the ground. As of now, it's close to the
house and I'm sure that again the house is presenting problems - it is
very directional (working only for stations on the open side) While
this provided me a good amount of success, I'm hoping for suggestions
that would be even better.
I have a decent sized yard and one open side - to the street.
There are no above ground power lines in the area. As for having
external wires, if I put them up so they are straight and a 'clean'
look, my neighbors won't complain. However, I would prefer to put
anything on the side opposite the house - which is less open, but also
less visable to otheres.
To simplify things, I drew up a quick layout of my house and it's
relationship to surrounding buildings. Not wanting to post anything
binary to this group, I have placed the image in my web account. Just
point directly to:
http://members.tripod.com/~placidpup/myplace.gif
If you would, please take a look and then describe what you would
do if you were in my situation. Feel free to edit the image with your

ideas and mail the edited version back to me. PLEASE do not post an
edited version back to this group.
Any and all suggestions are welcome, ones applied specificly to
the layout of my home are even more prefferable.
Thanks,
Shane McCarthy
mccarthy@kearney.net

PS. While looking at the image, if you have suggestions for a SW
external antenna please feel free to include those too. I bought a
DX-390 awhile back, but a friend is still fixing it, so I'm still
listening to AM. Thanks again.

From: slay@netcom.com (Sandy Lynch)
Subject: QSL info for VK9XL 03/96

Sorry to say ... don't think you'll have much luck getting a QSL
for a few reasons:

1) Although UA0ZDA apparently used Stan/W7NI's address for the
purpose of obtaining an FCC issued callsign, Stan told fellow
members of the local DX Club here that he was NOT handling
QSL manager duties and had NOT been asked to do so. I heard
this directly from Stan ...

2) VK9XL operated from a number of interesting VK and VK9 locations
although it is now thought, by some, that he was actually
maritime mobile at the time. This was suggested because he
was supposedly operating from...Cocos Keeling, I think.... yet
another DXpedition was on the island at the same time and
VK9XL (apparently) refused to meet them ... the thought is that
he was probably maritime mobile at that time as well.

I don't know if the allegation that VK9XL was maritime mobile or
not was ever proven ... I also do not know if his operations were
ever qualified by the DXCC desk at ARRL or not. You can always ask
them directly and I'm sure they'll advise.

Regards,
Sandy W7BX

Well, are you sure it wasn't VK9LX? Or maybe I'm wrong here. Anyway,
the QSL info I copied indicated QSL via VK2ICV. Hope that helps.

From: Bob <cqbdiaz@pacbell.net>
Subject: What's 10M like under less than ideal conditions ?

I've been hearing a lot of exciting talk on the local 2M repeater about how
the 10M band is starting to open up. (In one case, a HAM said he could
speak to someone in South America using just 8 watts.)

All of this is very exciting to a new HAM, like me, and I'm working on
learning the code so that I can get onto HF. It seems that we are entering
a very exciting part of the solar cycle for HF communications; so the next
few years HF should be really "radio active". <smile>

Still, I can't help but wonder, when HAMs say that the 10M band is "dead",
what exactly is it like. Clearly, local contacts are possible, but how far is
"local"? Can one still talk to someone on 10M, say 300 miles away under
less than ideal band conditions?

I know that this type of question depends on lots of factors, but I was just
trying to get some sort of general understanding of what the band might be
like at less than ideal conditions.

73,

Bob KF6JHG

Subject: QSL - HW TO GET!

another fine point of QSL'ing
after a major contest-say like ARRL DX or CQ WW:

1. Remember the DX maybe returning from the contest
operation and may not have QSL'ing on his mind for awhile.
2. When the contest operator returns home - that is when
he actually orders his DX QSL - hence if you mail your SASE the
day after the contest, it will sit in a box until the QSL's
arrive from the printer.
3. The contesting DX maybe married with Children. Your QSL's are
sitting in a box in the house remember!
4. Once the QSL's show up from the printer the cards are typically
answered from the top of the box (LAST IN FIRST OUT -> THINK ABOUT IT!)

73 & Happy QSL'ing.....

I think it was VE3BW, and it was definitely a Canadian, but...

Hold your cards. There's a postal strike in progress up there, and
the USPS is returning mail to Canada. (the sticker says if you take
it to a post office, they'll refund your postage. Personally, I wish
they'd just hold it at the P.O. until the strike is over..)

Bob:

With moderate power (100 w) and gain antennas at both ends of the circuit,
150-200 miles isn't out of the question even when ten is dead. Ten may be
the best overall DX band we have during solar cycle peaks, but don't
write it off at other times. Spradic E (Es) propagation can provide nice
single-hop contacts out to about 1200 miles and occasional double-hop to
twice that distance (sometimes more). Es peaks EVERY YEAR roughly May
through August (plus or minus) and for a few weeks right around
Christmas/New Year. But, like the name says, it's sporadic; the band can
be open for minutes or hours, and you gotta be there to catch it.

By the way, you'll find the same propagation modes and most of the DX
excitement on 6 meters, too. It's just a little bit tougher.

All part of the fun and challenge. Go for it!!

When the flux is high, you can work around the world on 10M with very
little power. When the flux is low, you are lucky if you can get out of
your backyard!

>less than ideal band conditions?

When the sunspot cycle is in the wrong phase, 10 meters is very quiet.
Many
band openings occur without anyone being aware of it because all think it is
dead. South America is available many days when the band is 'dead' but there
is nobody there to talk to. That would be what is called Transequadoreal skip
and gets even stronger when 10 opens up.
The curse of 10 meters is the low powered rigs most of us use there.
Regardless of all the tales about working 10 with 5 watts and a wet noodle for
an antenna, the fact is that a good power level and a good antenna will open
the band up quite a bit. Od course, there has to be someone else with a like
rig on the other end.
300 miles is a bad distance for 10 meters, it's a little out of range for
ground wave and a little close for F layer and most Sporadic E conditions. The
best bet for 300 miles is backscatter when the F layer is active.
Just wait and see what happens when 10 opens. It's my favorite band.

Bob (cqbdiaz@pacbell.net) wrote:
: "local"? Can one still talk to someone on 10M, say 300 miles away
: under: less than ideal band conditions?

Ten may sound dead but still support openings of a few hundred
miles; you may not hear anybody on it but a CQ may still bring
a surprising QSO you wouldn't have expected. Still, ground wave
on 10 is pretty small, and when it's really dead, it's DEAD.

But, Bob, when it's open, it's pure magic. Around the world on
low power--no problem! Good sigs and low noise, with DX just
swimming up to the boat.

It's not bad even now, btw. I've got a 10-m rig in the car;
worked two new countries on it semi-recently on the way home
from work. And the beacon on 28200? I'll tune to that on
the drive, to see what's open. I hear the SA beacons (LU,
OA, YV) coming in pretty well in North Carolina just about
every afternoon.

Good luck! Have fun! 73!

Where can I get a list of Telnet sites that are used to check for DX
like Packet?

NEW TEMPORARY LICENSE CLASS PROPOSED
In an unprecedented event, on Tuesday this past week, all
amateur radio vendors, and many national electronic chain
outlets, in an effort to shore-up the sagging radio sales
picture, were given the authority to issue amateur radio
call signs to new radio purchasers.
The ruling from the FCC in docket APR-001 allows for the
call sign block of "WT" along with the district #, for all vendors
to issue. These "try before you study" licenses will be issued
for a thirty day on-air trial period at the general class level.

It works like this: a potential ham who doesn't know if the
hobby is worth the effort of all the study time, is authorized to
operate for a period of one month along with the purchase of a
radio. The new operator will be authorized at the General class
level with a "WT" call sign i.e. WT2XYZ.
At the end of the trial period, the new ham can enroll in a
class, or take their exam from a local VEC or from the vendor,
which is also now authorized to give radio exams. If the
operator decides the hobby isn't worth the aggravation they find
on the HF bands, he/she can return the radio for a full refund.

From: <Tac63@worldnet.att.net>
Subject: Wanted: Saber III, Systems Saber or HT-1000 (16/32 Channel w/Scan
Option). 470-512 Mhz range.

Wanted: Saber III, Systems Saber or HT-1000 (16/32 Channel w/Scan Option).
Radio must be in 470-512 Mhz range.

Currently in possession of an 8 Channel HT-1000 470-520 Mhz and would like
to trade towards (radio and payment or some other terms) one of the above
radios or if possible convert my 8 channel to a 16 Channel. Any info would
be greatly appreciated.

Thanx. Please contact via E-mail.

SB DX ARL ARLD049
ARLD049 DX news

This week's bulletin was made possible with information provided by Tedd, KB8NW, the OPDX Bulletin, QRZ DX, The 599Rpt, G4BUE and The Daily DX. Thanks to all.

ROTUMA ISLAND, 3D2. Look for 3D2AG/p to be active on 80 to 10 meters, including the newer bands until early January 1998. QSL via 3D2AG.

CYPRUS, 5B. Look for UA9YAB, RA9JX, RA9JR, UA9MA, UN7FZ and UN7FW to be QRV as 5B4/homecalls from November 25 to early December. They will also participate in the CQ WW CW Contest as either P3A or H2A. QSL contest call via W3HNK. QSL all others to homecalls.

WESTERN MALAYSIA, 9M2. Don, G3OZF, will be QRV as 9M2/G3OZF from Pulau Pangkor, IOTA AS-072, from November 24 to December 2. Activity will be on 80 to 10 meters, with an emphasis on CW. He will also be active in the CQ WW CW Contest. QSL to home call.

QATAR, A7. Dave, KA5TQF, Tom, WT2O, and Ali, A71CX will be QRV as A72O from IOTA AS-088 from November 23 to 25. QSL via KA5TQF.

CUBA, CO. A group of amateurs from Sweden, Denmark and Cuba plan to activate T49C from November 25 to December 1 on the RS and FO satellites and possibly on AO-10. Activity is expected on 6 and 2 meters and 70 cm. Activity on 160 to 10 meters is planned as well. They may participate in the CQ WW CW Contest using this call. QSL via CO2OJ.

MOLDOVA, ER. Slawa, ER1LW, is QRV on the weekends on the newer bands using CW and SSB. He has also been active on RTTY. QSL to home call.

MINAMI TORISHIMA. JD1. Ryoichi, JL1KFR, will be QRV from November 25 to December 15 as JL1KFR/JD1. He is here to work on the weather station, so operating time will be limited. Activity will be on 80 to 10 meters, using mainly CW around 0900 to 1100z. QSL to home call.

CRETE, SV9. Karl, DJ5IL, will be QRV as J49IL from November 25 to December 3 using CW and SSB on 40 to 10 meters. He will also participate in the CQ WW CW Contest. QSL to home call.

GABON, TR. Jean, TR8XX is QRV on 160 meters around 0515z. QSL to home call.

ANTIGUA, V2. WA3WSJ and K3TEJ will be QRV as V26ED and V26KW, respectively, from November 25 to December 2. Activity will be on all HF bands, using CW and SSB. They will participate in the CQ WW CW Contest as V26KW. Amir, 4X6TT, is QRV now as V29TT. His length of stay is unknown. QSL to home calls.
